(IF APPLICATION HAS BEEN FILED, CASE NUMBER
MUST BE INDICATED REGARDLESS OF DATE OF INJURY)

SUBPOENA DUCES TECUM

(When records are mailed, identify them by using the
above Case No. or attaching copy of the subpoena.)

NO PERSONAL APPEARANCE NECESSARY

Please refer to the In Bold summary description
found below to identify the documents requested by
this Subpoena

*The People of the State of California Sends Greetings to: **Custodian Of Records***

POMONA VALLEY HOSPITAL MEDICAL CENTER - MEDICAL

WE COMMAND YOU to appear before A NOTARY PUBLIC

At ONTELLUS, 27450 Ynez Road, Suite 300, Temecula, CA 92591-4680

On the 09th day of February, 2023, at 9 o'clock A. M. to testify in the above-entitled matter and to bring with you and
produce the following described documents:

**ANY AND ALL MEDICAL/TREATMENT RECORDS PERTAINING TO THE CARE, TREATMENT AND EXAMINATION OF CLAIMANT/APPLICANT REGARDLESS
OF TIME PERIOD WHEN SERVICES WERE RENDERED.**

(Do not produce X-rays unless specifically mentioned above.)

For failure to attend as required, you may be deemed guilty of a contempt and liable to pay to the parties aggrieved all losses and amages
sustained thereby and forfeit one hundred dollars in addition thereto.

This subpoena is issued at the request of the person making the declaration on the reverse hereof, or on the copy which is served herewith.

Date 01/25/2023

CC: NATALIA FOLEY ESQ

**WORKERS' COMPENSATION APPEALS BOARD
OF THE STATE OF CALIFORNIA**

Workers Compensation Judge

**Records copied and submitted to the designated
court by ONTELLUS will be deemed as full
compliance with this Subpoena.**

FOR INJURIES OCCURRING ON OR AFTER JANUARY 1,
1990 AND BEFORE, JANUARY 1, 1994:

If no Application for Adjudication of Claim has been filed, a declaration
under penalty of perjury that the Employee's Claim for Workers'
Compensation Benefits (Form DWC-1) has been filed pursuant to Labor
Code Section 5401 must be executed properly.

SEE REVERSE SIDE

[SUBPOENA INVALID WITHOUT DECLARATION]

Order Ref #: 1957152

You may fully comply with this subpoena by mailing the records described (or authenticated copies, Evid Code 1561) to the person and place stated
above within ten (10) days of the date of service of this subpoena.

This subpoena does not apply to any member of the Highway Patrol, Sheriff's Office or City Police Department unless accompanied by notice from
this Board that deposit of witness fee has been made in accordance with Government Code 68097.2 et seq.

DECLARATION FOR SUBPOENA DUCES TECUM

Case No.: ADJ15547702

STATE OF CALIFORNIA, County of RIVERSIDE

The undersigned states:

That he / she is (one of) the representative(s) for the defendant in the action captioned on the reverse hereof.

That POMONA VALLEY HOSPITAL MEDICAL CENTER - MEDICAL has in his / her possession or under his / her control the documents described on the reverse hereof. That said documents are material to the issues involved in the case for the following reason: To determine present and/or past physical condition; nature, extent and duration of sickness; injury, disability and/or necessity of further treatment.

Declaration for Injuries on or After January 1, 1990 and before January 1, 1994

That an Employee's Claim for Workers' Compensation Benefits (DWC Form 1) has been filed in accordance with Labor Code Section 5401 by the alleged injured worker whose records are sought, or if the worker is deceased, by the dependant(s) of the decedent, and that a true copy of the form filed is attached hereto. (Check Box if applicable and part of declaration below, See instructions on front of subpoena.)

I declare under penalty of perjury that the forgoing is true and correct.

Executed on 01/25/2023, at Temecula, California

NOTICE TO CONSUMER OR EMPLOYEE AND OBJECTION (Code Civ. Proc., §§ 1985.3, 1985.6)	

NOTICE TO CONSUMER OR EMPLOYEE

TO (name): ADEL HANNA VIA HIS/HER ATTORNEY OF RECORD

1. PLEASE TAKE NOTICE THAT **REQUESTING PARTY (name): DIANA MUNOZ, STATE FUND - RIVERSIDE - STATE CONTRACTS** SEEKS YOUR RECORDS FOR EXAMINATION by the parties to this action on (*specify date*):02/09/2023
 The records are described in the subpoena directed to (*specify name and address of person or entity from whom records are sought*): **POMONA VALLEY HOSPITAL MEDICAL CENTER - MEDICAL 1798 N GAREY AVE ATTN: MEDICAL RECORDS POMONA, CA 91767**
 A copy of the subpoena is attached.
2. IF YOU OBJECT to the production of these records, YOU MUST DO ONE OF THE FOLLOWING BEFORE THE DATE SPECIFIED. IN ITEM a. OR b. BELOW:
 - a. If you are a party to the above-entitled action, you must file a motion pursuant to Code of Civil Procedure section 1987.1 to quash or modify the subpoena and give notice of that motion to the **witness** and the **deposition officer** named in the subpoena at least five days before the date set for production of the records.
 - b. If you are not a party to this action, you must serve on the **requesting party** and on the **witness**, before the date set for production of the records, a written objection that states the specific grounds on which production of such records should be prohibited. You may use the form below to object and state the grounds for your objection. You must complete the Proof of Service on the reverse side indicating whether you personally served or mailed the objection. The objection should **not** be filed with the court. **WARNING: IF YOUR OBJECTION IS NOT RECEIVED BEFORE THE DATE SPECIFIED IN ITEM 1, YOUR RECORDS MAY BE PRODUCED AND MAY BE AVAILABLE TO ALL PARTIES.**
3. YOU OR YOUR ATTORNEY MAY CONTACT THE UNDERSIGNED to determine whether an agreement can be reached in writing to cancel or limit the scope of the subpoena. If no such agreement is reached, and if you are not otherwise represented by an attorney in this action, YOU SHOULD CONSULT AN ATTORNEY TO ADVISE YOU OF YOUR RIGHTS OF PRIVACY.

Ongoing - Any problem that you are currently receiving treatment for.

- Family history of polyps in the colon
- Hypertension

Education Materials

Gastrointestinal Bleeding

Gastrointestinal bleeding is bleeding somewhere along the path food travels through the body (*digestive tract*). This path is anywhere between the mouth and the opening of the butt (*anus*). You may have blood in your poop (*stools*) or have black poop. If you throw up (*vomit*), there may be blood in it.

This condition can be mild, serious, or even life-threatening. If you have a lot of bleeding, you may need to stay in the hospital.

Follow these instructions at home:

- Take over-the-counter and prescription medicines only as told by your doctor.

Medical Service: Telemetry Attending: Chang MD,Ronald C

Discharge/Transfer Documentation

- Eat foods that have a lot of fiber in them. These foods include whole grains, fruits, and vegetables. You can also try eating 1–3 prunes each day.
- Drink enough fluid to keep your pee (*urine*) clear or pale yellow.
- Keep all follow-up visits as told by your doctor. This is important.

Contact a doctor if:

- Your symptoms do not get better.

Get help right away if:

- Your bleeding gets worse.
- You feel dizzy or you pass out (*faint*).
- You feel weak.
- You have very bad cramps in your back or belly (*abdomen*).
- You pass large clumps of blood (*clots*) in your poop.
- Your symptoms are getting worse.

This information is not intended to replace advice given to you by your health care provider. Make sure you discuss any questions you have with your health care provider.

History of Present Illness

Patient is a 70-year-old male PMH hiatal hernia, fundoplication surgery, cholecystectomy over 30 years prior, 2016 admission for lower GI bleed post colonoscopy, that presents for concern of GI bleed

Patient states that his last episode of this occurred 3 years prior, since then he has not seen a GI specialist or had repeat colonoscopy. Patient this morning had 2 episodes of bright red blood per rectum, however decided to go into work. Patient today while at work with continued episode, to the point where he was dizzy and surrounded by his coworkers, 911 called and brought to the ER for further evaluations. Patient reportedly total had about 6-7 episodes, last about 1 hour prior to my evaluation, patient hemodynamically stable but lightheaded upon arising, no fevers chills. At this point in time plan for admission

Notably, patient states that he also does not see a primary care doctor. He states that his coworkers to care for him, but also says that he has not formally seen him in clinic setting

ROS: 10 point review of systems done and is negative except for HPI

Past medical history: hiatal hernia, fundoplication surgery, cholecystectomy over 30 years prior, 2016 admission for lower GI bleed post colonoscopy but no obvious bleeding told at that time had hemorrhoids, ?migraine (self initiated atenolol for treatment)
Past Surgical history: fundoplication surgery, cholecystectomy over 30 years prior, 2016 admission for lower GI bleed post colonoscopy

Discharge/Transfer Documentation

Family history: denies family history of GI bleed

Social history:

Marital status: married
Employment: psychiatrist, prior cardiothoracic surgeon egypt
Tobacco, Drug and alcohol use: prior smoker, no drinks or drugs

Hospital Course

Patient while hospitalized Hb remains in normal limits. Post colonoscopy, no overt bleed but noted lipomatous appearing ileocecal valve post biopsy and polyp removed. Increasing diet, at this point stable for dc

PLAN

-dc home
-f/u PMD and GI 1-2 weeks
-meds: stop BP and ASA meds for now in setting of GI bleed

ASSESSMENT

Rectal bleed
History of 2016 bleed from left colon
Hypertension
Migraine
suspect orthostatic hypotension

Significant Findings

CT Abdomen and Pelvis w/ Contrast

12/13/19 15:36:00

Impression:

1. Sigmoid colonic mural thickening and diverticula, without pericolonic abscess formation or pneumoperitoneum. Neoplasm should be considered as well.
2. Previous cholecystectomy.
3. No other acute nor specific abnormality is demonstrated in the abdomen or pelvis.

CT radiation dose reduction techniques used include automatic exposure control, and adjustment of kVp and/or mA according to patient size.

DICOM images are available to non-affiliated providers, secure, media free, reciprocally searchable, upon patient authorization, using RadConnect.

CTDIvol: 4.6 mGy. DLP: 247 mGy-cm.

Patient Name: HANNA, ADEL **EMS Agency Name:** AMR - Rancho Cucamonga
Narrative: ARRIVE ON SCENE AT CIM JAIL TO FIND 73 Y/O MALE SITTING IN CHAIR IN CARE OF MEDICAL STAFF AND APPEARING TO BE IN NO OBVIOUS DISTRESS. PATIENT COMPLAINS OF RECTAL BLEEDING SINCE 0600 THIS MORNING WITH MILD DIZZINESS BEGINNING APPROXIMATELY 0830. PATIENT STATE HE HAS HAD FOUR EPISODES OF RECTAL BLEEDING SINCE 0600 AND ESTIMATES APPROXIMATELY 2 CUPS WORTH OF BLOOD LOSS. PATIENT DENIES ABDOMINAL PAIN AND STATES NAUSEA WITHOUT VOMITING SINCE 0830. CARDIAC MONITOR APPLIED AND VITALS OBTAINED. PATIENT STATE HE HAS PREVIOUS RECTAL BLEEDING DUE TO RUPTURED COLON POLYPS IN THE PAST WHICH CAUSED MORE SEVERE BLEEDING AND DIZZINESS THAN TODAY'S EPISODES. PATIENT REQUESTS TRANSPORT TO POMONA VALLEY HOSPITAL.

PATIENT PLACED ONTO GURNEY AND SECURED IN FIVE POINT HARNESS. CARDIAC MONITORING CONTINUED AND PATIENT LOADED INTO AMBULANCE. PATIENT CONTINUES TO DENY ABDOMINAL PAIN AND STATES THAT NAUSEA AND DIZZINESS ARE MILD. 18G SALINE LOCK ESTABLISHED IN LEFT AC. BLOOD GLUCOSE ANALYSIS PERFORMED READING 115MG/DL. PATIENT GIVEN 4MG VIA IV WITH PATIENT STATING IMPROVEMENT IN NAUSEA. PATIENT TRANSPORTED TO POMONA VALLEY HOSPITAL WITH VITALS MONITORED. SAN ANTONIO REGIONAL BASE HOSPITAL CONTACTED AND DIRECTED PATIENT TO REQUESTED DESTINATION WITHOUT FURTHER ORDERS. VITALS MONITORED DURING TRANSPORT WITHOUT CHANGE NOTED.

UPON ARRIVAL AT PVMC ER PATIENT OFF LOADED AND MAINTAINED ON CARDIAC MONITOR. PATIENT DIRECTED TO AWAIT BED PLACEMENT BY PVMC ER STAFF. VITALS MONITORED WHILE ON BED DELAY WITH NO CHANGE NOTED. PATIENT EVALUATED BY PVMC ER PHYSICIAN WHILE ON GURNEY AND WAS DIRECTED TO INTERNAL WAITING ROOM. PATIENT PLACED IN WHEELCHAIR AND TAKEN TO INTERNAL WAITING ROOM. PATIENT ADVISED TO ALERT STAFF IF THERE IS ANY CHANGE IN CONDITION. RN VINCE SIGNED FOR TRANSFER OF CARE.

Note
Upon assessment of this patient his blood diagnostic studies are stable with a hemoglobin of my concern is patient has had past abdominal surgeries and states he has had 7 episodes of approximately 1 cup of bright red blood. When this happened 2 years ago he ended up having a syncopal episode here in the ER and he had a ruptured diverticula that they diagnosed on a colonoscopy and had to be rushed to surgery. He also has a history of a Niesen fundoplication and states that he needs to be admitted for colonoscopy. Patient be moved to the main department for further examination by my colleagues.

blood. Patient denies chest pain, abdominal pain, syncope or other acute medical complaints at this time. [1]

Review of Systems

All other systems reviewed and are negative except as noted in the history of present illness.

Physical Exam

Vitals & Measurements

HR: 59 **RR:** 16 **BP:** 142/81 **SpO2:** 95%

Pulse oximetry notes an oxygen saturation of 95%. Interpretation: normal.

INITIAL VITAL SIGNS: Reviewed by me.

Constitution: Well-appearing, no acute distress

HEENT: Normocephalic atraumatic
Conjunctiva not injected. No discharge

Respiratory: Effort normal. No stridor or retractions.
Equal breath sounds, no rales, rhonchi, or wheezing.

Cardiovascular: [regular rate] and regular rhythm

Gastrointestinal: Non-distended; soft,
no tenderness.

Rectal exam: trace bright red blood

Musculoskeletal: No extremity deformity
No Lower extremity edema

Integumentary: Warm, no rash.

Neurological: Patient alert and oriented
Moving all four extremities spontaneously

Medical Decision Making

Patient is 70-year-old male who presents for bright red rectal bleeding. He had 4 episodes prior to arrival. Notes mild weakness and dizziness. He had 5 further episodes in the emergency department. He has a history of a colonoscopy with significant bleeding of his diverticula. Will admit to the unassigned hospitalist service for GI consult for possible colonoscopy while inpatient. Hemoglobin trend in the emergency Hartman's stable x2.

History and Physical Reports

History of Present Illness

Patient is a 70-year-old male PMH hiatal hernia, fundoplication surgery, cholecystectomy over 30 years prior, 2016 admission for lower GI bleed post colonoscopy, that presents for concern of GI bleed

Patient states that his last episode of this occurred 3 years prior, since then he has not seen a GI specialist or had repeat colonoscopy. Patient this morning had 2 episodes of bright red blood per rectum, however decided to go into work. Patient today while at work with continued episode, to the point where he was dizzy and surrounded by his coworkers, 911 called and brought to the ER for further evaluations. Patient reportedly total had about 6-7 episodes, last about 1 hour prior to my evaluation, patient hemodynamically stable but lightheaded upon arising, no fevers chills. At this point in time plan for admission

Notably, patient states that he also does not see a primary care doctor. He states that his coworkers to care for him, but also says that he has not formally seen him in clinic setting

ROS: 10 point review of systems done and is negative except for HPI

Past medical history: hiatal hernia, fundoplication surgery, cholecystectomy over 30 years prior, 2016 admission for lower GI bleed post colonoscopy but no obvious bleeding told at that time had hemorrhoids, ?migraine (self initiated atenolol for treatment)
Past Surgical history: fundoplication surgery, cholecystectomy over 30 years prior, 2016 admission for lower GI bleed post colonoscopy

Family history: denies family history of GI bleed

Social history:
Marital status: married
Employment: psychiatrist, prior cardiothoracic surgeon egypt
Tobacco, Drug and alcohol use: prior smoker, no drinks or drugs

Review of Systems

10 point review of systems otherwise negative other than the above

Assessment/Plan

Diagnoses

Rectal bleed
 History of 2016 bleed from left colon
 Hypertension
 Migraine
 suspect orthostatic hypotension

Plan

-Inpatient telemetry
 -GI consult
 -serial Hb
 -Clear liquid diet, Suprep
 -Hold blood pressure medications
 -Bolus 1 L
 -blood consented

DVT PPX: scd
 GI PPX: not indicated
 IVF: 1/2 saline 75 cc/hr
 Diet: CLD then NPO MN

Code Status: Full

Disposition: Likely back home, here for rectal bleeding

Consultation Note

DATE OF CONSULTATION: 12/14/2019

GASTROENTEROLOGY CONSULTATION

REASON FOR CONSULTATION: Melena and diverticulosis.

HISTORY OF PRESENT ILLNESS: This is a 73-year-old man who is a board certified thoracic surgeon and board eligible in psychiatry, and apparently he currently practices psychiatry. He did have prior history of lower gastrointestinal bleeding, for which he was admitted to Pomona Valley Hospital Medical Center back in 2016. According to the patient, there was severe bleeding requiring blood transfusion at that time. He did undergo colonoscopy with Dr. Merla at that time, which showed diverticulosis and some submucosal bulges in the

Pomona Valley Hospital Medical Center

Medical Service: Telemetry Attending: Chang MD,Ronald C

Consultation Notes

sigmoid colon with a tattoo in the area, but no definitive mass lesion or polyp seen. There was an adequate preparation. He has not undergone colonoscopy since that time. He also had an upper endoscopy done about 6 or more years ago with Dr. Umesh Shah, which was reportedly negative.

He does take aspirin 81 mg daily, but no other antiplatelet agents or blood thinners. He has no chronic symptoms at all. He was in his usual state of health when he went to the hospital yesterday morning for work, and then developed gross hematochezia. There was no abdominal pain at all. He had multiple more episodes of gross hematochezia yesterday and overnight, which then became more maroon in color. However, there is no black tarry stool. No chronic diarrhea or constipation. No fevers or weight loss. No abdominal pain. No nausea or vomiting.

He has been afebrile and hemodynamically stable here in the hospital.

His hemoglobin was 15 yesterday and is 13.8 today. White blood cell count and platelet count are normal. From yesterday, liver tests are normal. Creatinine is normal.

He did undergo CT of the abdomen and pelvis with intravenous contrast yesterday, which showed normal liver and spleen. There are surgical clips in the gallbladder fossa. There is no pancreatic abnormality. The large and small bowel appeared normal except for some sigmoid colonic mural thickening with no abscess or perforation.

PAST MEDICAL HISTORY:

1. As above.
2. History of gastroesophageal reflux disease, which has not recurred since the patient underwent fundoplication surgery 25 years ago. He is not taking any medication for reflux.
3. Hypertension.

PAST SURGICAL HISTORY:

1. Status post cholecystectomy.
2. Status post fundoplication surgery complicated by esophageal perforation requiring over 60 days in the hospital.
3. Colonic diverticulosis.

MEDICATIONS: Please see reconciliation.

ALLERGIES: REGLAN.

SOCIAL HISTORY: No drinking, smoking, or street drugs.

FAMILY HISTORY: Negative for gastrointestinal or liver diseases, colon polyps, or colon cancer.

REVIEW OF SYSTEMS: As above.

PHYSICAL EXAMINATION:

GENERAL: This is a nontoxic and pleasant man lying in the bed in no acute distress.

HEENT: Conjunctivae and sclerae are normal. Pupils and irises are normal. External exam of the ears and nose normal. Throat shows no gross lesions.

Pomona Valley Hospital Medical Center

1798 N Garey Ave
Pomona, CA 91767-2918

Patient: **Hanna, Adel**
MRN: 000854595 Admit Date: 12/13/2019
FIN: 532106457 Disch Date: 12/15/2019
DOB/Age/Gender: 3/29/1946 76 years Male Admitting: Chang MD,Ronald C
Medical Service: Telemetry Attending: Chang MD,Ronald C

Consultation Notes

NECK: Supple, with no thyromegaly.
CARDIOVASCULAR: Regular rate and rhythm.
LUNGS: Anteriorly clear to auscultation.
ABDOMEN: Nondistended and soft. There is no mass, organomegaly, or rebound.
EXTREMITIES: No cyanosis, clubbing, or edema.
NEUROLOGIC: He is alert and oriented with appropriate mood and affect.

LABORATORY VALUES: As mentioned above.

ASSESSMENT: This is a 73-year-old man with prior history of severe lower gastrointestinal bleeding in 2016, with colonoscopy that only showed diverticulosis and some sort of submucosal bulging area in the sigmoid colon. He now presents with recurrent bleeding, although he is hemodynamically stable with normal hemoglobin. Most likely diagnosis would be recurrent diverticular bleeding.

RECOMMENDATIONS: Proceed with colonoscopy now. The patient needs to get more fiber in the diet. Further management will be determined based on results of colonoscopy. Continue to monitor. Follow up blood counts.

Thank you very much for asking me to see this patient in consultation.

DOB/Age/Gender:	3/29/1946 76 years Male	Attending:	Chang MD,Ronald C
Medical Service:	Telemetry		

Progress Notes

A review of the medical record found a need for documentation clarification. *In responding to this query, please exercise your independent professional judgment. The fact that a question is asked does not imply that any particular answer is desired or expected.*

73 y.o male admitted for rectal bleed, gross hematochezia.

Clinical Indicators: Documentation: rectal bleed-s/p colonoscopy with snare polypectomy and biopsy. Colonoscopy findings: pan diverticulosis, lipomatous appearance to the ileocecal valve.

Pathology report from colonoscopy from transverse colon polyp biopsy: tubular adenoma.

Risk Factors: Hiatal hernia, fundoplication surgery, cholecystectomy, lower GI bleed post colonoscopy 2016, HTN, migraine

Treatments: GI consult, Colonoscopy/polypectomy/biopsy, telemetry level of care, monitor CBC daily

Based on your medical judgment of the clinical indicators outlined above, please clarify cause-effect/relationship the patient's documented conditions: rectal bleed, tubular adenoma:

- Rectal bleed related to/due to tubular adenoma
- Rectal bleed not related to/due to tubular adenoma
- Other, please specify
- Unable to clinically determine

Thank you in advance for your clarification.
For question, please call CDI at 909-630-7376

- Admit as Outpatient
Location: GI Lab
Level of Care: Med Surg Telemetry
- Maintain current Inpatient Status - Transfer to GI Lab

Pre-procedure diagnosis: Mellitus Date of procedure: _____

Nursing Instructions:

- Verify consent for:
 - EGD (Esophagogastroduodenoscopy) and possible biopsy, possible dilatation, possible cautery, possible sclerotherapy, possible banding, possible polypectomy
 - EGD (Esophagogastroduodenoscopy) with capsule placement
 - PEG (Percutaneous endoscopic gastrostomy) and EGD (Esophagogastroduodenoscopy) with possible biopsy
 - PEJ (Percutaneous endoscopic Jejunostomy) and EGD (Esophagogastroduodenoscopy) with possible biopsy
 - ERCP (Endoscopic Retrograde CholangioPancreatography) and possible biopsy, Possible sphincterotomy, possible stone removal, possible stent placement
 - EGD (Esophagogastroduodenoscopy) and foreign body removal with possible biopsy and dilatation
 - Colonoscopy and possible biopsy, possible polypectomy, possible cautery and possible banding
 - Capsule Endoscopy
 - Flexible Sigmoidoscopy, possible biopsy, possible cautery and possible banding
 - Endoscopic Ultrasound (EUS), possible biopsy, possible fine needle aspiration
 - _____
- Blood glucose (point of care) on admission for patients with a history of diabetes and call physician if blood glucose Less than 70 mG/dL or Greater than 250 mG/dL.
- Urine pregnancy test per standardized procedure
- Post procedure - discharge per standardized procedure

Diet

- NPO after midnight except meds NPO after midnight-no meds Clear liquid diet

Radiology

- XR ERCP

IV Fluids

- Dextrose 5%/Sodium Chloride 0.45% 1000 mL IV at 15 mL/hour Dextrose 5% 1000 mL IV at 15 mL/hour
- Sodium Chloride 0.9% 1000 mL IV at 15 mL/hour _____

Medications

- Midazolam (Versed) 10 mG IVP; have available at start of procedure
- Fentanyl 200 mGg IVP; have available at start of procedure
- Lidocaine, Viscous, 2% Oral Solution, 30 mL PO, have available at start of procedure
- Simethicone (Mylcon) Liquid 40 mG/0.6 mL via endoscope PRN irrigation; have available at start of procedure
- Glucagon _____ mG IV; have available at start of procedure
- Benadryl _____ mG IVP; have available at start of procedure.
- _____; have available at start of procedure

Operative Report

DATE OF SURGERY: 12/14/2019

SURGEON: Kenneth W Lee MD

PROCEDURE: Colonoscopy with snare polypectomy and biopsy.

PREOPERATIVE DIAGNOSES: Melena and diverticulosis.

Benefits and risks including infection, bleeding, perforation, death and risks of missed lesions including cancer were discussed with the patient. Alternatives including barium enema were offered and all questions were answered. Consent was signed by the patient and placed in the chart.

MEDICATIONS: Fentanyl and Versed intravenously.

FINDINGS: The moderate sedation start time was at 9:54 a.m., the procedure start time was at 10:04 a.m., the procedure finish time was 10:22 a.m. Rectal examination was normal. After the rectal exam, the Olympus pediatric colonoscope was gently inserted into the rectum and advanced carefully to the cecum. The cecum was identified by the appendiceal orifice and ileocecal valve. Preparation was good. Underwater colonoscopy technique was performed using no air insufflation at all. An attempt was made to pass the colonoscope through the lips of the ileocecal valve to evaluate the terminal ileum, but this was not possible. The colonoscope was then slowly withdrawn through the colon and the mucosa was carefully examined in a circumferential manner, taking care to look behind folds. There was a 12-minute withdrawal time and retroflexion showed a skin tag. There was pan diverticulosis extending from the ascending colon down to the sigmoid colon. There was a tattoo in the sigmoid colon with no polyp in the area. There was a 6 mm sessile transverse colon polyp removed with cold snare polypectomy and retrieved and sent for pathologic examination with no bleeding in bottle #2. There was a lipomatous appearance to the ileocecal valve with no mass in the area, status post biopsies with extrusion of fat consistent with lipoma. The biopsies from the ileocecal valve were placed in bottle #1. The colon was then decompressed and the procedure was terminated.

POSTOPERATIVE DIAGNOSES:

1. A 12-minute withdrawal time.
2. No blood or bleeding lesions seen in the colon.
3. Pan diverticulosis.
4. A 6 mm transverse colon polyp removed as described with no bleeding.
4. Lipomatous appearance to the ileocecal valve, status post biopsies.

RECOMMENDATIONS: Biopsies will be discussed in the office next week after hospital discharge. Diet can be advanced. He can be discharged home later today if he remains stable. He needs to get more fiber in the diet. The most likely diagnosis would be diverticular bleeding.

MRN: 000854595 FIN: 532106457

The following sheet(s) are the Patient Education Leaflets for Hanna, Adel

Gastroenterology

Gastrointestinal Bleeding

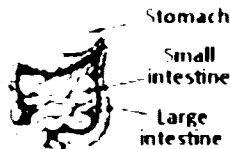

Gastrointestinal bleeding is bleeding somewhere along the path food travels through the body (*digestive tract*). This path is anywhere between the mouth and the opening of the butt (*anus*). You may have blood in your poop (*stools*) or have black poop. If you throw up (*vomit*), there may be blood in it.

Mouth

Esophagus

Colon

Rectum

This condition can be mild, serious, or even life-threatening. If you have a lot of bleeding, you may need to stay in the hospital.

Follow these instructions at home:

- Take over-the-counter and prescription medicines only as told by your doctor.
- Eat foods that have a lot of fiber in them. These foods include whole grains, fruits, and vegetables. You can also try eating 1–3 prunes each day.
- Drink enough fluid to keep your pee (*urine*) clear or pale yellow.
- Keep all follow-up visits as told by your doctor. This is important.

Medical Service:	Telemetry			Attending:	Chang MD,Ronald C

Patient Education Notes

Contact a doctor if:

- Your symptoms do not get better.

Get help right away if:

- Your bleeding gets worse.
- You feel dizzy or you pass out (*faint*).
- You feel weak.
- You have very bad cramps in your back or belly (*abdomen*).
- You pass large clumps of blood (*clots*) in your poop.
- Your symptoms are getting worse.

This information is not intended to replace advice given to you by your health care provider. Make sure you discuss any questions you have with your health care provider.

Consent Documentation

*** Clinical Documentation Content on Following Page ***

* Auth (Verified) *

**AUTHORIZATION FOR AND CONSENT TO SURGERY OR SPECIAL
DIAGNOSTIC OR THERAPEUTIC PROCEDURES**

- 1 The hospital maintains personnel or facilities to assist your physicians and surgeons in their performance of various surgical operations and other special diagnostic and therapeutic procedures. These operations and procedures may all involve risks of unsuccessful results, complications, injury, or even death, from both known and unforeseen causes, and no warranty or guarantee is made as to result or cure. You have the right to be informed of such risks as well as the nature of the operation or procedure, the expected benefits or effects of such operation or procedure; and the available alternative methods of treatment and their risks and benefits. You also have the right to be informed whether your physician has any independent medical research or economic interests related to the performance of the proposed operation or procedure. Except in cases of emergency, operations or procedures are not performed until you have had the opportunity to receive this information and have given your consent. You have the right to consent or to refuse any proposed operation or procedure at any time prior to its performance.
- 2 Upon your authorization and consent, the operation or procedure listed above, together with any different or further procedures which in the opinion of the supervising physician or surgeon may be indicated due to any emergency, will be performed on you. The operations or procedures will be performed by the supervising physician or surgeon named above (or in the event that your physician is unable to perform or complete the procedure, a qualified substitute supervising physician or surgeon), together with associates and assistants, including anesthesiologists, pathologists and radiologists from the medical staff of Pomona Valley Hospital Medical Center to whom the supervising physician or surgeon may assign designated responsibilities. The persons in attendance for the purpose of performing specialized medical services such as anesthesia, radiology or pathology are not agents, servants or employees of the hospital or your supervising physician or surgeon. They are independent contractors and therefore are your agents, servants or employees.
- 3 **Blood – Elective Procedures** If your physician determines that there is a reasonable possibility that you may need a blood transfusion as a result of the surgery or procedure to which you are consenting, your physician will inform you of this and will provide you with a brochure regarding blood transfusions. This brochure contains information concerning the benefits and risks of the various options for blood transfusions, including predonation by yourself or others. You also have the right to have adequate time before your procedure to arrange for predonation, but you can waive this right if you do not wish to wait. You should understand that transfusions of blood or blood products involve certain risks, including the transmission of disease such as hepatitis or Human Immunodeficiency Virus (HIV) and that you have a right to consent or refuse consent to any transfusion. You should discuss any questions that you may have about transfusions with your physician. If this consent pertains to the possible administration of a blood transfusion for an elective, scheduled procedure, your signature on this form indicates that: (1) You have received a copy of the brochure, *A Patient's Guide to Blood Transfusions*, (2) You have received information concerning the risks and benefits of blood transfusion and of any alternative therapies, (3) You have had the opportunity to discuss this matter with your physician, including predonation if it is an option, and (4) Subject to any special instructions listed below, you consent to such blood transfusions as your physician may order in connection with the operation or procedure described in this consent form.
- 4 By your signature on this form you authorize the pathologist to use his or her discretion in the disposition or use of any member, organ, or other tissue removed from your person during the operation or procedure set forth above.
- 5 At the discretion of a participating physician, representatives, such as vendors, are authorized to be present as technical resources related to the products being used. These persons are not authorized to provide direct care.
- 6 To make sure that you fully understand the operation or procedure, your physician will fully explain the operation or procedure to you before you decide whether or not to give consent. If you have any questions, you are encouraged and expected to ask them.
- 7 Your signature on this form indicates that: (1) you have read and understood the information provided in this form, (2) the operation or procedure set forth above has been adequately explained to you by your supervising physician or surgeon and by your anesthesiologist; (3) you have had a chance to ask questions, (4) you have received all of the information you desire concerning the operation or procedure, and (5) you authorize and consent to the performance of the operation or procedure.

C PHYSICIAN DOCUMENTATION OF INFORMED CONSENT PROCESS FOR SURGERY AND BLOOD TRANSFUSION

YES NA

- Risks, Benefits and Alternatives of the Procedure** I have talked to the patient, or the patients authorized representative, in simple layman terms about the nature of the procedure I have discussed with him / her the benefit(s), risk(s) and possible complications. Finally, I have presented to him / her the alternative treatment(s) I have answered his/her questions regarding the procedure. He/She has chosen the procedures noted on this consent and gives his/her informed consent.
- Emergency Treatment Exception** Pursuant to business and Professions Code section 2397(c) (2) and (3), Probate Code Section 3210(b) and Welfare and Institutions Code Sections 369(d) and 739(d), I am providing treatment to a patient who is not currently competent to give consent. I have determined that the treatment listed above is immediately necessary to alleviate severe pain or to diagnose and treat conditions that could lead to serious disability or death if not immediately diagnosed and treated. I will limit the scope of the treatment to the emergent medical condition that exists without the patient's informed consent.
- Emergent Blood Transfusion** I have discussed the risk(s), benefit(s) and alternatives to the use of blood and blood products with the patient. I have answered his / her questions regarding the use of blood and blood products. He / she has chosen the noted procedure and gives his / her consent to the transfusion.
- Possible Elective Blood Transfusion for Treatment or Scheduled Surgical Procedure** (PAUL GANN BLOOD SAFETY ACT) In accordance with the Paul Gann Blood Safety Act (Health and Safety Code Section 1645), I have provided my patient with a copy of the California Department of Health Services information pamphlet *A Patient's Guide to Blood Transfusions*, concerning the advantages, disadvantages, risks and benefits of autologous blood and of directed and non-directed homologous blood from volunteers. I have also allowed adequate time prior to surgery for my patient or other person to predonate blood for transfusion purposes except where there is a life-threatening emergency, there are medical contraindications, or the patient has waived this right.
- Suspension of No CPR order, during procedural sedation or surgery** I have talked with the patient, or the patients authorized representative regarding the temporary suspension of their "No CPR" order. The patient or representative consents to associated temporary measures related to resuscitative efforts and agrees that this does not conflict with their No CPR order. The No CPR order will be reinstated after recovery from sedation and/or anesthesia.

Special Instructions _____

(Describe here any specific instructions for patient's blood transfusion, e.g., predonation, directed donation, etc. if applicable)

AUTHORIZATION FOR AND CONSENT TO SURGERY OR SPECIAL DIAGNOSTIC OR THERAPEUTIC PROCEDURES

- 1 The hospital maintains personnel or facilities to assist your physicians and surgeons in their performance of various surgical operations and other special diagnostic and therapeutic procedures. These operations and procedures may all involve risks of unsuccessful results, complications, injury, or even death, from both known and unforeseen causes, and no warranty or guarantee is made as to result or cure. You have the right to be informed of such risks as well as the nature of the operation or procedure, the expected benefits or effects of such operation or procedure, and the available alternative methods of treatment and their risks and benefits. You also have the right to be informed whether your physician has any independent medical research or economic interests related to the performance of the proposed operation or procedure. Except in cases of emergency, operations or procedures are not performed until you have had the opportunity to receive this information and have given your consent. You have the right to consent or to refuse any proposed operation or procedure at any time prior to its performance.
- 2 Upon your authorization and consent, the operation or procedure listed above, together with any different or further procedures which in the opinion of the supervising physician or surgeon may be indicated due to any emergency, will be performed on you. The operations or procedures will be performed by the supervising physician or surgeon named above (or in the event that your physician is unable to perform or complete the procedure, a qualified substitute supervising physician or surgeon), together with associates and assistants, including anesthesiologists, pathologists and radiologists from the medical staff of Pomona Valley Hospital Medical Center to whom the supervising physician or surgeon may assign designated responsibilities. The persons in attendance for the purpose of performing specialized medical services such as anesthesia, radiology or pathology are not agents, servants or employees of the hospital or your supervising physician or surgeon. They are independent contractors and therefore are your agents, servants or employees.
- 3 **Blood – Elective Procedures** If your physician determines that there is a reasonable possibility that you may need a blood transfusion as a result of the surgery or procedure to which you are consenting, your physician will inform you of this and will provide you with a brochure regarding blood transfusions. This brochure contains information concerning the benefits and risks of the various options for blood transfusions, including predonation by yourself or others. You also have the right to have adequate time before your procedure to arrange for predonation, but you can waive this right if you do not wish to wait. You should understand that transfusions of blood or blood products involve certain risks, including the transmission of disease such as hepatitis or Human Immunodeficiency Virus (HIV) and that you have a right to consent or refuse consent to any transfusion. You should discuss any questions that you may have about transfusions with your physician. If this consent pertains to the possible administration of a blood transfusion for an elective, scheduled procedure, your signature on this form indicates that (1) You have received a copy of the brochure, *A Patient's Guide to Blood Transfusions*, (2) You have received information concerning the risks and benefits of blood transfusion and of any alternative therapies, (3) You have had the opportunity to discuss this matter with your physician, including predonation if it is an option, and (4) Subject to any special instructions listed below, you consent to such blood transfusions as your physician may order in connection with the operation or procedure described in this consent form.
- 4 By your signature on this form you authorize the pathologist to use his or her discretion in the disposition or use of any member, organ, or other tissue removed from your person during the operation or procedure set forth above.
- 5 At the discretion of a participating physician, representatives, such as vendors, are authorized to be present as technical resources related to the products being used. These persons are not authorized to provide direct care.
- 6 To make sure that you fully understand the operation or procedure, your physician will fully explain the operation or procedure to you before you decide whether or not to give consent. If you have any questions, you are encouraged and expected to ask them.
- 7 Your signature on this form indicates that (1) you have read and understood the information provided in this form, (2) the operation or procedure set forth above has been adequately explained to you by your supervising physician or surgeon and by your anesthesiologist, (3) you have had a chance to ask questions, (4) you have received all of the information you desire concerning the operation or procedure, and (5) you authorize and consent to the performance of the operation or procedure.

ECD# 532106457 Hanna, Adel EMR 12/13/2019 Condition of Admission Scanned 12/13/2019

CONDITIONS OF ADMISSION TO POMONA VALLEY HOSPITAL MEDICAL CENTER

1. Consent to Medical and Surgical Procedures: I consent to the procedures that may be performed during this hospitalization or while I am an outpatient. These may include, but are not limited to, emergency treatment or services, laboratory procedures, X-ray examinations, medical or surgical treatment or procedures, anesthesia, telehealth services, or hospital services provided to me under the general and special instructions of my physician or surgeon. I understand that the practice of medicine and surgery is not an exact science and that diagnosis and treatment may involve risks of injury or even death. I acknowledge that no guarantees have been made to me regarding the result of examination or treatment in this hospital.

2. Nursing Care: This hospital provides only general nursing care and care ordered by the physician(s). If I want a private duty nurse, I agree to make such arrangements. The hospital is not responsible for failure to provide a private duty nurse and is hereby released from any and all liability arising from the fact that the hospital does not provide this additional care.

3. Maternity Patients: If I deliver an infant(s) while a patient of this hospital, I agree that these same Conditions of Admission apply to the infant(s).

4. Teaching Program: I understand that this hospital is a teaching institution and that unless I notify the hospital to the contrary in writing, I may participate in the medical education program of the institution and may receive treatment by residents and/or fellows with the approval of my attending physician and those clinical students acting under appropriate supervision as required by such medical education and clinical training programs.

5. Personal Belongings: As a patient, I am encouraged to leave personal items at home. The hospital maintains a fireproof safe for the safekeeping of money and valuables. The hospital is not liable for the loss or damage to any money, jewelry, eyeglasses, dentures, hearing aids, cellphones, laptops, other personal electronic devices, documents or other articles that are not placed in the safe. Hospital liability for loss of any personal property deposited with the hospital for safekeeping is limited by law to five hundred dollars (\$500.00) unless I receive a written receipt for a greater amount from the hospital.

6. Consent to Photograph: I consent to the taking of pictures of my medical or surgical condition or treatment for purposes directly related to my treatment. I consent to the taking of photographs of my newborn child or children for the sole purpose of possible purchase by me.

7. Advance Directives: My signature below acknowledges receipt of information about creating an advance directive, and my understanding of that information. An advance directive is a document that allows me to direct how health care decisions will be made for me if I lack capacity to make those decisions for myself at a later date. If I already have an advance directive, my signature below acknowledges understanding that it is my responsibility to provide a copy to the hospital.

8. California Immunization Registry: I understand that the hospital may share my immunization or tuberculosis (TB) screening test records with the California Immunization Registry (CAIR), a statewide, secure and confidential database of patient immunization information. I understand that the CAIR is used by health care professionals, agencies, and schools to keep track of all shots and TB tests I take, and can provide proof about immunizations needed to start child care, school, or a new job. If I do not want my immunization or TB records to be shared with other registry users, I understand I must fax or email the "Decline or Start Sharing/Immunization Information Request Form," available on the CAIR website at <http://cairweb.org/cair-forms>, to the CAIR Help Desk at 1-888-436-8320 or CAIRHelpDesk@cdph.ca.gov.

9. Health Information Exchange (HIE): I understand that the hospital makes information about my care available to me and other care providers online through Pomona Valley Hospital Medical Center's (PVHMC) patient portal MYHEALTH, and that the hospital participates in other information exchange services for various purposes related to my treatment, including my medication history. My signature on this form acknowledges receipt of a brochure explaining HIEs and my rights in regard to information exchange.

10. Assignment of All Rights and Benefits: I irrevocably assign and transfer to the hospital all rights, benefits and any other interests in connection with any insurance plan, health benefit plan, or other source of payment for my care. This assignment shall include assigning and authorizing direct payment to the hospital of all insurance and health plan benefits payable for this hospitalization or for these outpatient services. I agree that the insurer or plan's payment to the hospital pursuant to this authorization shall discharge the insurance company's obligations to the extent of such payment. I understand that I am financially responsible for charges not paid according to this assignment, to the extent permitted by state and federal law. I agree to cooperate with, and take all steps reasonably requested by, this hospital to perfect, confirm, or validate this assignment.

11. Legal Relationship Between Hospital and Physician(s): All physicians and surgeons providing services to me, including the radiologist, pathologist, emergency physician, anesthesiologist, physician assistants, nurse practitioners and others, are not employees or agents of the hospital. They have been granted the privilege of using the hospital for the care and treatment of their patients, but they are not employees or agents of the hospital. They are independent practitioners.

I understand that I am under the care and supervision of my attending physicians. The hospital and its nursing staff are responsible for carrying out my physician's instructions. My physician or surgeon is responsible for obtaining my informed consent, when required, to medical and surgical treatment, special diagnostic or therapeutic procedures, or hospital services provided to me under my physician's general and special instructions.

Patient Initials: HA

12. Separate Bills: I understand I will receive separate bills from the health care providers who render care to me during my hospital stay, including bills from the hospital, my physician, and other professionals involved in my care such as but not limited to anesthesia, pathology, and radiology. The hospital is not able to collect for these charges and payment must be sent to the address listed on their billing statement. If I have questions, I understand I am able to contact the patient service representative at the telephone number shown on my billing statement.

13. Financial Agreement and Payment/Collection Communications: I agree to promptly pay all hospital bills in accordance with the charges listed in the hospital's charge description master and, if applicable, the hospital's charity care and discount payment policies, and state and federal law. I understand that I may review the hospital's charge description master before (or after) I receive services from the hospital. I understand that all physicians and surgeons, including the radiologist, pathologist, emergency physician, anesthesiologist, physician assistants, nurse practitioners and others, will bill separately for their services. Should any account be referred to an attorney or collection agency for collection, I will pay actual attorneys' fees and collection expenses. All delinquent accounts shall bear interest at the legal rate, unless prohibited by law.

My signature below grants permission and consent to the hospital, hospital assignees, affiliates and third party collection agents: (1) to contact me by telephone at any telephone number associated with me, including wireless numbers; (2) to leave answer machine or voicemail messages for me, and include in any such messages information required by law (including debt collection laws) and/or regarding amounts owed by me; (3) to send me text messages or emails using any email addresses I provide; (4) to use pre-recorded or artificial voice messages and/or automatic dialing device (an "autodialer") in connection with any communications made to me or related to me account. I understand I can refer to hospital's Notice of Privacy Practices (Right to Request Confidential Communications) concerning my rights in regard to this communication authorization.

14. Financial Assistance Information: Hospital provides financial assistance to eligible patients who are uninsured or under insured. I understand that if I am in need of: (1) Insurance Coverage: Financial assistance may be available to me, if I am eligible, through various government programs such as the California Health Benefit Exchange (Covered CA), Medicare, Medi-Cal, California Children's Services Program or Charity Care. These programs may assist me with paying hospital, doctor and other medical bills. I understand I may contact Eligibility Services for more information, to obtain an application or obtain application assistance in English at 909-469-9441 or Spanish at 909-469-9442; (2) Financial Assistance: I may qualify for a discount if my income is less than 400% of the Federal Poverty Limit. Financial Assistance Policy and Financial Assistance Application (English/Spanish) can be obtained in any of the following ways: (a) Hospital website - www.pvhmc.org, (b) Hospital's Eligibility Services Department located on the 1st Floor in the Main Hospital, or (c) via U.S Mail-by calling the hospital's Eligibility Services department at 909-469-9441 (English) or 909-469-9442 (Spanish).

15. Medicare: I understand that if I am a Medicare beneficiary, that the following items are not covered under the Medicare program: 1) take home medications; 2) a private room (unless medically necessary); 3) discharges from the hospital that occur after 1:00 p.m. if not medically necessary (the hospital will not impose a late charge unless I have been given advance notice of at least 12 hours of my impending discharge); 4) certain medical procedures (the hospital will notify me before providing me with any hospital services that are not Medicare covered services, and will obtain my written consent before rendering me such care). I understand that Federal regulations require hospital to inform me of the above. My signature below acknowledges that I have been informed and that I am aware that I will be responsible for charges of this nature should they occur during my hospital stay.

16. Medical Supplies Provided to Medicare Patients: If you are a patient eligible for Medicare Part A benefits, you acknowledge that title to all tangible medical related products and devices provided to you or consumed while providing services to you in the hospital ('Medical Supplies') vests in you when the first of the following occurs; when the Medical Supplies are provided to you or consumed while the hospital is providing services to you; when the hospital begins to process the Medical Supplies; or when the hospital receives payment from Medicare.

17. Release of Information, Notice of Privacy Practices and Patient Rights/Responsibilities: I understand that the hospital provides a Notice of Privacy Practices that explains in detail how a patient's health information may be used and the rights I have to access or control the information. In addition, the hospital provides information on my rights and responsibilities as a patient at the hospital. My signature below acknowledges receipt of the Notice of Privacy Practices and Information on Rights/Responsibilities.

I certify that I have read the foregoing, have been offered a copy thereof. I am, the patient, the patient's legal representative, or am otherwise authorized by the patient to sign the above and accept its terms on his/her behalf.

I also certify that the patient's demographics, personal and financial information, have been reviewed and updated accordingly to ensure that PVHMC has current and accurate information.

Computed Tomography

Document Type: CT Abdomen and Pelvis w/ Contrast
Result Status: Auth (Verified)

CT Abdomen and Pelvis w/ Contrast

PROCEDURE:

Computed tomography of the abdomen

Computed tomography of the pelvis

Clinical history: 73-year-old man with abdominal pain, diverticular disease.

Technique: Using the Toshiba Aquilion 320 multichannel spiral CT scanner, a digital scout radiograph was acquired. Multiple high resolution transverse volume computed tomographic images of the abdomen and of the pelvis were acquired during the intravenous administration of contrast material. Iopromide 300 mg I/mL 80 mL i.v. was administered via an upper extremity venous cannula, without untoward reaction.

Findings:

The lung bases and pleural spaces demonstrate no nodules, consolidation or pleural effusions. The liver and spleen are normal in position size and shape. Surgical clips are demonstrated in the gallbladder fossa. The pancreas is not enlarged. The kidneys demonstrate no masses or hydronephrosis. No free intraabdominal fluid or lymphadenopathy is demonstrated. The mid abdominal large and small bowel appear normal. The visualized bones of the lumbar spine are unremarkable for the patient's age.

The ureters demonstrate no masses or hydronephrosis. No free intraabdominal fluid or lymphadenopathy is demonstrated. A few distal colonic diverticula are demonstrated, associated with mural thickening, but without pericolic mass or free fluid. Neoplastic disease should be considered as well, however.. The prostate gland is enlarged, and there is a mild to moderate infravesical prostatic impression. Otherwise, the bladder and rectum are unremarkable. Anterolisthesis of L4 upon L5 is demonstrated.

Impression:

1. Sigmoid colonic mural thickening and diverticula, without pericolic abscess formation or pneumoperitoneum. Neoplasm should be considered as well.
2. Previous cholecystectomy.
3. No other acute nor specific abnormality is demonstrated in the abdomen or pelvis.

Computed Tomography

CT radiation dose reduction techniques used include automatic exposure control, and adjustment of kVp and/or mA according to patient size.

DICOM images are available to non-affiliated providers, secure, media free, reciprocally searchable, upon patient authorization, using RadConnect.

CTDIvol: 4.6 mGy. DLP: 247 mGy-cm.

delay draw pt in ct

Interpretive Data

i1: eGFR AA, eGFR Non-AA
>=60 No kidney damage, OR STAGE 1 CKD
(Kidney damage with normal or increased kidney function,
OR STAGE2 CKD(Kidney damage with mild decreased kidney function);
30-59 STAGE 3 CKD(Moderate decreased kidney function);
15-29 STAGE 4 CKD(Severe decreased kidney function);
<15 STAGE 5 CKD(End-Stage kidney failure). Stable Creatinine presumed.
Ignore eGFR in dialysis patients.
Interpret with caution in patients with acute renal failure.

i2: Troponin-I
Reference Range:
TnI : 0.00 - 0.039 ng/mL: Negative based on 10% CV at 99th percentile.
TnI : = or > 0.04 ng/mL is considered Positive for Myocardial Infarction.
TnI : = or > 0.30 ng/mL Critical Value.
