STATE OF CALIFORNIA
DEPARTMENT OF INDUSTRIAL RELATIONS
DIVISION OF WORKERS' COMPENSATION
WORKERS' COMPENSATION APPEALS BOARD

Case No: ADJ12721676;
ADJ12721933

ANNETTE GARNER

AKA:
DOB:
SSN: XXX-XX-6071

VS.

MISSION SCHOOL TRANSPORTATION , NATIONAL INTERSTATE INSURANCE
COMPANY

(IF APPLICATION HAS BEEN FILED, CASE NUMBER MUST
BE INDICATED REGARDLESS OF DATE OF INJURY)

SUBPOENA DUCES TECUM

(When records are mailed, identify them by using the
above Case No. or attaching copy of the subpoena.)

NO PERSONAL APPEARANCE NECESSARY

Please refer to the In Bold summary description
found below to identify the documents requested by
this Subpoena

The People of the State of California Sends Greetings to: Custodian Of Records

KFH/SCPMG - ELECTRONIC

WE COMMAND YOU to appear before A NOTARY PUBLIC

At ONTELLUS, 27450 Ynez Road, Suite 300, Temecula, CA 92591-4680

On the 11th day of March, 2020, at 9 o'clock A. M. to testify in the above-entitled matter and to bring with you and
produce the following described documents:

PLEASE PROVIDE ANY AND ALL ELECTRONIC MEDICAL RECORDS.

(Do not produce X-rays unless specifically mentioned above.)

For failure to attend as required, you may be deemed guilty of a contempt and liable to pay to the parties aggrieved all losses and
damages sustained thereby and forfeit one hundred dollars in addition thereto.

This subpoena is issued at the request of the person making the declaration on the reverse hereof, or on the copy which is served herewith.

Date 02/25/2020

**WORKERS' COMPENSATION APPEALS BOARD
OF THE STATE OF CALIFORNIA**

Workers Compensation Judge

**Records copied and submitted to the designated
court by ONTELLUS will be deemed as full
compliance with this Subpoena.**

CC: WORKERS DEFENDERS ANAHEIM

FOR INJURIES OCCURRING ON OR AFTER JANUARY 1,
1990 AND BEFORE, JANUARY 1, 1994:

If no Application for Adjudication of Claim has been filed, a declaration
under penalty of perjury that the Employee's Claim for Workers'
Compensation Benefits (Form DWC-1) has been filed pursuant to Labor
Code Section 5401 must be executed properly.

SEE REVERSE SIDE

[SUBPOENA INVALID WITHOUT DECLARATION]

Order Ref #: 1653754

You may fully comply with this subpoena by mailing the records described (or authenticated copies, Evid Code 1561) to the person and place stated
above within ten (10) days of the date of service of this subpoena. This subpoena does not apply to any member of the Highway Patrol, Sheriff's
Office or City Police Department unless accompanied by notice from this Board that deposit of witness fee has been made in accordance with
Government Code 68097.2 et seq.

DWC WCAB 32 (Slide 1) (REV. 06/18)

DECLARATION FOR SUBPOENA DUCES TECUM

Case No.: ADJ12721676; ADJ12721933

STATE OF CALIFORNIA, County of RIVERSIDE

The undersigned states:

That he / she is (one of) the representative(s) for the defendant in the action captioned on the reverse hereof.

That KFH/ SCPMG - ELECTRONIC has in his / her possession or under his / her control the documents described on the reverse hereof. That said documents are material to the issues involved in the case for the following reason:

To determine present and/or past physical condition; nature, extent and duration of sickness; injury, disability and/or necessity of further treatment.

Declaration for Injuries on or After January 1, 1990 and before January 1, 1994

That an Employee's Claim for Workers' Compensation Benefits (DWC Form 1) has been filed in accordance with Labor Code Section 5401 by the alleged injured worker whose records are sought, or if the worker is deceased, by the dependant(s) of the decedent, and that a true copy of the form filed is attached hereto. (Check Box if applicable and part of declaration below, See instructions on front of subpoena.)

I declare under penalty of perjury that the forgoing is true and correct.

Executed on 02/25/2020 at Temecula, California

Signature: [Handwritten Signature] Address: ONTELLUS, 27450 Ynez Road, #300 Telephone: (951) 694-5770

ONTELLUS FOR: MICHAEL SULLIVAN & ASSOCIATES - FULLERTON
THE DEFENSE ATTORNEY: NADINE ELKHATTAT
/s/ PO BOX 85059
SAN DIEGO, CA 92186
(714) 202-3440

DECLARATION OF SERVICE

STATE OF CALIFORNIA, County of: San Bernardino

I, the undersigned, state that I served the forgoing subpoena by showing the original and delivering a true copy thereof, together with a copy of the Declaration in support thereof, to each of the following named persons, personally, at the date and place set forth opposite each name.

Name of Person Served: Soraya D. Date: February, 26 2020 Place: 10740 4TH ST 2ND FL

I declare under penalty of perjury that the forgoing is true and correct.

Executed on February, 26 2020 at RANCHO CUCAMONGA, California

Signature: [Handwritten Signature]

ANNETTE GARNER, KFH/ SCPMG - ELECTRONIC

Order Ref #: 1653754

DECLARATION OF CUSTODIAN OF MEDICAL RECORDS

Patient Name: ANNETTE L GARNER
Date of Birth: 11/15/1959 **Kaiser Permanente Medical Record Number:** 7246313
Plaintiff: ANNETTE GARNER **Defendant:** MISSION SCHOOL TRANSPORTATION, NATIONAL INTERSTATE INSURANCE COMPANY
Case or Reference Number: ADJ12721676;ADJ12721933

Says as follows (checked sections apply):

The declarant is the duly authorized Custodian of Medical Records for **Kaiser Foundation Hospital-Southern California and Southern California Permanente Medical Group**, and has the authority to certify said records.

The copy or original of the medical records attached to this declaration is a true copy of the records described in the subpoena duces tecum, court order, or other request, that are permitted to be disclosed by law, and include the following record types:

Electronic: Medical office Hospital Mental health Addiction medicine Pharmacy

Paper: Medical office Hospital Mental health Addiction medicine

These records are:

Limited to the dates, or date range of: ANY AND ALL (ELECTRONIC)

Limited to specific provider(s) or department type: _____

Paper records have been ordered to be retrieved from storage and are pending.

The following requested records that are permitted to be disclosed by law do not exist; have been destroyed; could not be located after an exhaustive search:

Electronic Records: Medical office Hospital Mental health Addiction medicine Pharmacy

Paper: Medical office Hospital Mental health Addiction medicine

Paper records may exist. The following paper records that were requested, and are permitted to be disclosed by law may exist but were not produced:

Paper: Medical office Hospital Mental health Addiction medicine

A new request is not needed to obtain these paper records. Just **send an email to address shown above within 30 days of the date of this declaration**, and provide the specific date range of the required paper records. If you wait more than 30 days after the date of this declaration to request any paper records, you must submit a new request with a \$15 payment.

The records were prepared by the personnel of the hospital, staff physicians, or persons acting under the control of either, in the ordinary course of business at or near the time of the act, condition, or event.

Pursuant to state and federal law, records which contain information pertaining to the treatment of inpatient psychiatric, chemical dependency, and HIV testing are subject to strict confidentiality and may not be disclosed in response to a routine subpoena. Such material may be obtained only upon a special court order or specific written authorization that meets federal or state guidelines.

I, Sonya Devine, declare under penalty of perjury that the foregoing is true and correct.

 Signature of Declarant

GLOMERULAR FILTRATION RATE	>89-B	mL/min	—

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. * GFR Ranges * GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality). IDMS-calibrated. See LabNet for Details.

Patient Instructions

Your Kaiser Permanente Care Instructions

Breast Cancer Screening: After Your Visit

Your Care Instructions

A breast X-ray (mammogram) and an exam by your doctor can help find breast cancer early, when it is easier to treat. If you are age 40 or older, ask your doctor when to start and how often to have a mammogram. The X-ray can spot tumors that are too small to be felt by hand. (It also can show harmless lumps, such as fluid-filled cysts).

During a breast exam, your doctor will feel your breasts for unusual lumps or any other possible signs of cancer. During a mammogram, a machine squeezes your breasts to make them flatter and easier to X-ray. The test may hurt briefly. After the test, a doctor who is an expert at reading X-rays will study your mammogram. Your doctor will tell you the results and whether you need any follow-up tests.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. Its also a good idea to know your test results and keep a list of

 SCAL HIM ROI AMB LMR

the medicines you take.

What should you do to get ready for a mammogram?

- If you are still having menstrual periods, have your mammogram done within 2 weeks after your menstrual period ends. The test will be more comfortable at this time than it would be before your period.
- On the day of the mammogram, do not use any deodorant, perfume, powders, or lotions on your breasts or armpits. They may affect the X-rays.
- Remove any jewelry. You will need to take off your clothes above the waist. You will put on a cloth or paper top. If you are concerned about an area of your breast, show the technologist so that the area can be noted.

How can you care for yourself at home?

- If you have breast pain after the mammogram, take an over-the-counter pain medicine, such as acetaminophen (Tylenol), ibuprofen (Advil, Motrin), or naproxen (Aleve). Read and follow all instructions on the label.

When should you call for help?

Watch closely for changes in your health, and be sure to contact your doctor if:

- You notice any changes in your breasts or the skin on your breasts. These may include lumps, fluid leaking suddenly from your nipples, or changes to the skin on your breast or nipple.

Where can you learn more?

Go to <http://www.kp.org>

Enter H706 in the search box to learn more about "Breast Cancer Screening: After Your Visit".

Patient Instructions

Your Kaiser Permanente Care Instructions

Body Mass Index: After Your Visit

Your Care Instructions

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered normal. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. Its also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

If you have a BMI higher than 25

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

When should you call for help?

Watch closely for changes in your health, and be sure to contact your doctor if you have any problems.

Where can you learn more?

Go to <http://www.kp.org>

Enter S176 in the search box to learn more about "Body Mass Index: After Your Visit".

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. * GFR Ranges * GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

HELICOBACTER PYLORI IGG,SER,QN	NEGATIVE	NEGATIVE	—

Comment:

A NEGATIVE RESULT INDICATES THAT THE PATIENT DOES NOT HAVE DETECTABLE LEVELS OF ANTIBODIES TO H. PYLORI. IF A SAMPLE IS DRAWN TOO EARLY IN H. PYLORI COLONIZATION, IgG ANTIBODIES MAY NOT BE PRESENT. THE CLINICAL DIAGNOSIS HAS TO BE INTERPRETED WITH THE CLINICAL SIGNS AND SYMPTOMS OF THE PATIENT. THE PERFORMANCE

VITAMIN D, 25-HYDROXY, D3 Comment: RESULT RECHECKED.	4	NOT ESTABLISHED ng/mL	—
VITAMIN D, 25-HYDROXY, D2	<4	NOT ESTABLISHED ng/mL	—

Comment:

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY,NATL OSTEOPOROSIS FDN, K_DOQI) THAT 25-OH VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD (NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D,25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

Patient Instructions

Return for Care: Return in about 2 weeks (around 5/3/2010).

Your Kaiser Permanente Care Instructions

Body Mass Index: After Your Visit

Your Care Instructions

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered normal. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. Its also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

If you have a BMI higher than 25

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve

SPECIAL HANDLING

CHEST X-RAY, PA AND LATERAL - 07/15/2010:

Comparison is made with a prior chest x-ray dated 04/12/2010.

The cardiac silhouette appears normal in size. Again noted are questionable mild increased perihilar opacities bilaterally, left slightly worse than right. These findings are grossly unchanged since the prior examination. There are no new focal consolidations. The pleural spaces are clear. Surgical clips and sutures are noted overlying the abdomen.

IMPRESSION:

Mild and subtle increased perihilar opacities bilaterally as described above. These findings are unchanged since the prior examination. While a chronic interstitial process can have a similar appearance, clinical correlation is recommended. A follow-up CT scan of the chest with IV contrast may be obtained for further clarification as clinically indicated.

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. * GFR Ranges * GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality). IDMS-calibrated. See LabNet for Details.

Comment:

----- TO ALL PROVIDERS A REFLEX THYROID TESTING PROGRAM IS NOW IN PLACE. ALL SINGLE
 TSH SPECIMENS FOUND TO BE ABNORMAL WILL AUTOMATICALLY HAVE FT4 DETERMINED ON THE SAME SERUM SAMPLE.
 THIS WILL SIMPLIFY SCREENING FOR THYROID DYSFUNCTION BY ORDERING A SINGLE TSH MEASUREMENT. (APPROVED:
 REGIONAL ENDOCRINOLOGY SUBCOMMITTEE, 1995.)

Name: GARNER, ANNETTE

ID: 0724-63-13

Comments:

Intepretation:

Spirometry is within normal limits. Lung volumes are within normal limits. There is a mild decrease in diffusing capacity. Poor test performance is indicated by volume extrapolation/FVC.

Denies recreational drugs.

History Reviewed:

Progress Notes (continued)**Green, Andrea L (M.D.) at 8/12/2010 9:55 AM (continued)**

I have reviewed the Medical/Surgical, Family and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative.

Skin: Negative.

Cardiovascular: Positive for palpitations. Negative for chest pain.

Gastrointestinal: Negative for heartburn, diarrhea and constipation.

Physical Exam

Constitutional: She is oriented and well-developed, well-nourished, and in no distress. She appears not dehydrated and not diaphoretic. Non-toxic appearance. No distress.

HENT:

Head: Normocephalic and atraumatic.

Mouth/Throat: Oropharynx is clear and moist. No oropharyngeal exudate.

Eyes: Left eye exhibits no scleral icterus.

Neck: Neck supple. No JVD present. No tracheal deviation present. No thyromegaly present.

Cardiovascular: Normal rate and regular rhythm. Exam reveals no gallop and no friction rub.

Murmur (**gr 2/6 when supine SEM**) heard.

Pulmonary/Chest: Effort normal and breath sounds normal. No stridor. No respiratory distress. She has no wheezes. She has no rales. She exhibits no tenderness.

Abdominal: Bowel sounds are normal. She exhibits no distension and no mass. Soft. There is no organomegaly. No tenderness.

Musculoskeletal: She exhibits no edema.

Lymphadenopathy:

Head (right side): Submandibular adenopathy present.

She has cervical adenopathy.

Left cervical: Posterior cervical adenopathy present.

She has no axillary adenopathy.

Neurological: She is alert and oriented.

Skin: Skin is warm and dry. No rash noted. She is not diaphoretic. No erythema. No pallor.

Psychiatric: Memory, affect and judgment normal.

Nursing note and vitals reviewed.

Cxr - perihilar increased markings noted since films in April

Ace level elevated

Assessment and Plan:

515D INTERSTITIAL LUNG DISEASE (primary encounter diagnosis)

LAB ORDER REQUEST

Call Documentation**Schneider, Lawrence (M.D.) at 8/17/2010 1:19 PM**

Status: Signed

Discussed results of blood sugar and a1c
 No evidence of diabetes
 LAWRENCE SCHNEIDER MD

Green, Andrea L (M.D.) at 8/17/2010 1:09 PM

Status: Addendum

Discussed result of ace level
 Next step would be bronchoscopy which was explained to the patient including risks and benefits
 Smell compromised
 Reinforced her concerns regarding weight loss.
 Please call and discuss bronchoscopy as well as copay. Call me regarding scheduling.

 Unable to smell Evaluate for central nervous system involvement DOES PT HAVE: IMPLANTED ELECTRONIC DEVICES, METAL IMPLANTS, BRAIN ANEURYSM CLIPS, OR CONTRAST ALLERGY?->No Are you Pregnant?->No

Transcription

Type	ID	Date and Time	Dictating Provider
Diagnostic imaging	38815739	10/7/2010 1:30 PM	Moon, Myungsun James (M.D.)
Signed by Moon, Myungsun James (M.D.), MEDICAL DOCTOR on 10/07/10 at 1412			

MR BRAIN WITH AND WITHOUT CONTRAST 10/02/2010
 TECHNIQUE: Sagittal images were obtained using T1, FLAIR, and postcontrast-enhanced T1-weighted sequences. Axial images were obtained using T1, T2, FLAIR, diffusion, and postcontrast-enhanced T1-weighted sequences. Coronal images were obtained using postcontrast-enhanced T1-weighted sequences. 20 mL of Magnevist gadolinium contrast were given intravenously.
 FINDINGS: The ventricles and sulci are normal in size and configuration. No midline shift or mass effect noted. No extraaxial collection noted. The diffusion-weighted images demonstrate no acute infarction. On the long TR sequences, there are scattered bilateral punctate foci of white matter changes. These are mostly noted in the bilateral frontal lobes. These do not demonstrate enhancement and these are nonspecific white matter changes. The postcontrast-enhanced images demonstrate no enhancing lesion in the brain. In the visualized portions of the bilateral parotid glands, multiple nodules are noted. The largest of these visualized nodules noted in the left parotid gland measures 1.5 cm in size. Mucosal thickening noted in the bilateral frontal and the maxillary and left sphenoid sinus. Also fluid and mucosal thickening noted in the bilateral ethmoid sinuses. The sella demonstrates expanded appearance and this is consistent with incompetent diaphragma sellae.
 IMPRESSION:
 1) No enhancing lesions in the brain.
 2) Scattered bilateral foci of white matter changes. This is nonspecific and exact etiology and clinical significance uncertain. Clinical correlation and followup can be obtained as clinically indicated.
 3) Nodules in the bilateral parotid glands.
 4) Sinus inflammatory disease in the bilateral frontal, bilateral ethmoids, bilateral maxillary, and left sphenoid sinuses.

Reviewed by Moreno, Elena on 8/12/2010

No Known Allergies

General Information

SKIP THE TRIP. Have our pharmacy come to you!
New and refill prescriptions mailed to your home.

When using the mail order option for obtaining prescriptions:

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

4 ways to receive prescriptions by mail:

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.

Encounter-Level Documents - 12/29/2011: (continued)

- **Go to kp.org/Rxrefill.** After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.
Not registered yet? Go to KP.ORG/REGISTERNOW to get started.**

Protect yourself from the flu. Get vaccinated.

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit kp.org/flu or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

WEIGHT MANAGEMENT

WHAT YOU SHOULD KNOW:

Weighing too much is not good for your health. Being overweight increases your risk of health conditions such as heart problems, high blood pressure, type 2 diabetes (deye-ah-BEE-teez), and certain types of cancer. Being overweight can also increase your risk for osteoarthritis (os-tee-oh-ahr-THRI-tis) (joint disease), sleep apnea (AP-nee-ah) (abnormal breathing at night) or other respiratory (RES-pir-ah-tohr-ee) (breathing) problems. Being

overweight may also cause a person to feel sad or be treated differently by others.

The best way to lose weight is to eat fewer calories and get regular exercise. Eating more calories than you need will cause you to gain weight. Try to cut down your calories by 500 calories per day. For example, cut down on one soda (about 150 calories), a small bag of regular potato chips (about 150 calories) and one chocolate bar (about 250 calories). For most people, this change will result in a slow weight loss of about one pound a week. Exercise (for example, walk, swim, or bicycle) for at least 30 minutes on most days of the week. You will be more likely to keep weight off if you make lifelong lifestyle changes.

Aim for a slow, steady weight loss. Losing even a small amount of weight can lower your risk of health problems. Ask your dietitian (deye-e-TISH-an), nutritionist (noo-TRI-shun-ist) or caregiver about a weight loss goal that is right for you.

INSTRUCTIONS:

What foods can I eat? You can eat a variety of foods and lose weight at the same time. Following a healthy diet can help you to eat fewer calories and stay healthy. You may be able stay at a healthy weight if you make this diet a part of your lifestyle. Below are a few ideas for a healthy diet:

Eat whole grain foods more often. A healthy eating plan should contain fiber. Fiber is the part of grains, fruits and vegetables that is not broken down by your body. Whole grain foods are healthy and provide extra fiber in your diet. Some examples of whole grain foods are whole wheat breads and pastas, oatmeal, brown rice and bulgur.

Eat a variety of vegetables every day. Eat dark, leafy greens such as spinach, kale, collard greens and mustard greens. Eat yellow and orange vegetables such as carrots, sweet potatoes, and winter squash. Eat these

vegetables along with other types of vegetables because they are good sources of vitamins and minerals.

Eat a variety of fruits every day. Choose fresh or canned fruit (canned in its own juice or lite syrup) instead of juice. Fruit juice has very little or no fiber.

Eat low-fat dairy foods. Drink fat-free (skim) milk or one-percent milk. Eat fat-free yogurt and low-fat cottage cheese. Try low-fat cheeses such as mozzarella or other reduced-fat cheeses.

Choose protein foods that are lower in fat. Choose beans or other legumes such as split peas or lentils. Choose fish, turkey, poultry or leaner cuts of red meat (for example, beef or pork). Before cooking meat or poultry (chicken), cut off any visible fat and remove skin.

Use less fats and oils. Try baking foods instead of frying. Add less fat (margarine, sour cream, regular salad dressing and mayonnaise) to foods. Eat less high-fat foods. Some examples of high-fat foods are potato chips, french fries, doughnuts, and cakes.

Eat fewer sweets. Limit foods and drinks that are high in sugar. Some examples of sweets are candy, cookies, regular soda and sweetened drinks.

What liquids can I drink?

Drink eight (8-ounce) cups of water every day. Follow your caregiver's advice if you must limit the amount of liquid you drink. Make sure that you have water and other low-calorie liquids available all the time.

Limit fruit juices to one to two small (four-ounce) glasses per day because they are high in calories.

Limit the amount of alcohol you drink. Alcoholic drinks have extra calories

and can make you hungrier than usual.

What are some other ways that I can eat fewer calories? Below are some other ways that you can decrease the amount calories you eat each day:

Eat smaller portions.

Use a small plate with smaller servings.

Avoid eating second helpings.

When you eat at a restaurant, ask for a to go box and place half of your meal in the box before eating. This will help you to limit the amount of food you eat at the restaurant.

You can also order one plate at a restaurant and share it with someone else.

Replace high-calorie snacks with healthier, low-calorie snacks.

Choose fresh fruit, vegetables, fat-free rice cakes or air-popped popcorn instead of potato chips, nuts or chocolate.

Choose water or calorie-free drinks instead of soda or sweetened drinks.

Eat regular meals. Skipping meals can lead to overeating later in the day. Eat a healthy snack in place of a meal if you do not have time to eat regular meals.

Do not shop for groceries when you are hungry. This can cause you to buy foods that are not healthy. Take a grocery list of healthy foods and shop after you have eaten.

How do I become more physically active?

Check with your caregiver first if you have not been exercising. You may hurt yourself if you start your exercise program with intense (heavy) exercise. Work with your caregiver to find an exercise plan that is right for you.

Exercise at least 30 minutes per day on most days of the week. Some examples of exercise include walking, riding a bicycle, dancing, and swimming.

Other ways you to be more active are:

Take the stairs instead of the elevator.

Park farther away from stores and walk.

Walk around the mall.

Be aware of situations that may give you the urge to overeat, such as eating while watching television. Find ways to avoid these situations. For example, read a book, go for a walk, or do crafts instead.

Meet with an exercise buddy who will help you stay active.

What other things should I remember as I try to lose weight?

Be aware of situations that may give you the urge to overeat, such as eating while watching television. Find ways to avoid these situations. For example, read a book, go for a walk, or do crafts instead of eating.

Meet with a weight loss support group or friends who are also trying to lose weight. Talking with others about weight loss goals will help you stay excited about your weight goals. Other people can give you good feedback on your progress.

PLEASE VISIT www.kp.org or call 1-866-549-6332 and register so that you can send messages to us and look up your medical records!

Your Kaiser Permanente Care Instructions

Strain or Sprain: After Your Visit to the Emergency Room

Your Care Instructions

You were seen in the emergency room because you stretched or tore a muscle or ligament. A strain means that you pulled or tore a muscle. A sprain means that you stretched or tore a ligament that holds bones together. The doctor may have put a brace, splint, or elastic bandage on your injured limb to keep it from moving. Or you may have been given crutches.

Rest and other home care can help the muscle or ligament heal. Be sure to talk to your doctor if you continue to have problems.

Even though you have been released from the emergency room, you still need to watch for any problems. The doctor carefully checked you. But sometimes problems can develop later. If you have new symptoms, or if your symptoms do not get better, **return to the emergency room or call your doctor right away.**

A visit to the emergency room is only one step in your treatment. Even if you feel better, you still need to do what your doctor recommends, such as going to all suggested follow-up appointments and taking medicines exactly as directed. This will help you recover and help prevent future problems.

How can you care for yourself at home?

- Rest the strained or sprained arm or leg. Do not put weight on it for a day or two. If your doctor tells you to, use crutches or a sling to rest a sore limb.
- Take pain medicines exactly as directed.
 - If the doctor gave you a prescription medicine for pain, take it as prescribed.
 - If you are not taking a prescription pain medicine, ask your doctor if you can take an over-the-counter medicine.
- Put ice or a cold pack on the sore area for 10 to 20 minutes at a time. Try to do this every 1 to 2 hours for the next 3 days (when you are awake) or until the swelling goes down. Put a thin cloth between the ice and your skin.
- Prop up the arm or leg on a pillow when you ice it or anytime you sit or lie down. Try to keep it above the level of your heart. This will help reduce swelling.
- Do not do anything that makes the pain worse.

When should you call for help?

Return to the emergency room now if:

- You have new severe pain.
- The injured area is numb, tingling, cool, pale, or changes color.
- You cannot move the injured area.

Call your doctor today if:

- You have pain and swelling that gets worse.
- You are not getting better as expected.

Where can you learn more?
