**08/17/2022 - Telephone Appointment Visit in FAMILY MEDICINE KP CARE NOW (continued)**

---

Instructions from CHRISTOPHER KATSURA MD, M.D.

Please go to the emergency department if you have worsening of your current symptoms, vomiting blood or green stuff, severe headache/neck pain, chest pain, fever > 101, loss of consciousness, paralysis, confusion or change in your mental status, trouble breathing, bloody diarrhea, worsening weakness or trouble walking, or any other worrisome symptoms as this could represent a life threatening emergency that should be promptly evaluated.

Thank you for choosing to use Kaiser Permanente KP NOW After Hours phone services. Remember virtual telephone visits are brief and does not constitute a complete medical evaluation of your current condition. It is important for you to follow up with your primary care doctor. If you need to make an appointment you can call 1-800-954-8000 Monday — Friday 7am to 7pm.

If you are taking ANTIBIOTICS

- Please be aware of antibiotic resistance and the importance of appropriate antibiotic use. PLEASE take them exactly as instructed. Do not skip, share or stop early without checking with your healthcare professional. Not taking antibiotics in the way it was prescribed can lead to treatment failure and development of resistance. This means the antibiotic doesn't work on these bacteria anymore. Contact your healthcare team if you develop side effects of the antibiotic per the pharmacy education.

## General Information

### **SKIP THE TRIP. Have our pharmacy come to you!**

**New and refill prescriptions mailed to your home.**

#### **WHEN USING THE MAIL ORDER OPTION FOR OBTAINING PRESCRIPTIONS:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

#### **4 WAYS TO RECEIVE PRESCRIPTIONS BY MAIL:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to kp.org/Rxrefill**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.

**08/17/2022 - Telephone Appointment Visit in FAMILY MEDICINE KP CARE NOW (continued)**

- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to KP.ORG/REGISTERNOW to get started.**

**For questions, call member services at**

[800-464-4000](tel:800-464-4000) or TTY [711](tel:711)  
[800-788-0616](tel:800-788-0616) (Spanish)  
[800-757-7585](tel:800-757-7585) (Chinese dialects)

**Hours**

Open 7 days a week  
 24 hours a day  
 Closed holidays

**Medicare members**

[800-443-0815](tel:800-443-0815) or TTY [711](tel:711)

**Hours**

Open 7 days a week  
 from 8 a.m. to 8 p.m.

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Patient Pepper Smith attended a nutrition consultation w/ a Registered Dietitian. Pt has hx of GERD, and IBS, will experience abdominal bloating, cramping, gas, has noticed immediate reaction w/ apple juice, and is currently avoiding them. Pt states she had also eliminated pork, beef and gradually introduced to identify any triggers for abdominal discomfort; recently had small portion of steak at a restaurant and did not experience any discomfort. Per pt, she is also trying to lose wt, avoiding high blood sugar, and high blood pressure.

Per diet recall pt states, she does not have a consistent meal schedule, may skip meals, or go long hrs w/o eating, pt may eat:

- Breakfast – approx. 8am – old fashioned oatmeal prepared w/ water, butter, and sugar, slice of toast w/ butter (home pride white bread or may have whole grain) and orange juice.
- Lunch - approx. 3pm-4pm – yesterday, 9/14/22, had pasta w/ shrimp, mushrooms, and alfredo sauce (states did not have any abdominal discomfort)
- Dinner – skipped yesterday
- Snack - approx. 10pm – states yesterday, 9/14/22, felt hungry by 10pm, had cereal (honey nut cheerios w/ 2% milk, did not feel abdominal discomfort, states she can tolerate milk)
- Fluids - approx. 8-10 cups water/d on days she works, states on days off will drink a lot less water, may forgot to drink water, may also drink fruit juice (orange juice)

**09/15/2022 - Allied Health/Nurse Visit in MEMBER HEALTH EDUCATION (continued)****Clinical Notes (continued)**

Ht: 5'3"  
Wt: 214.7 lbs  
BMI: 38.03  
ABW: 139.92 lbs

Estimated Nutritional Needs/Day:  
1500 kcal [(Mifflin St Jeor)x(AF, 1.3)-500 kcal]  
Pro: 80g/d (0.8g/kg)

Altered GI function ft IBS dx, AEB abdominal bloating, cramping, gas w/ subsequent avoidance of specific foods.

Topics discussed included an assessment of patient's diet history, dietary guidelines for IBS and GERD, benefits of monitoring food intake and abdominal symptoms, tips for the control of gas, carb sources and distribution, food sources of lean and plant-based protein, food sources of unsaturated fat vs saturated fat, healthy drinks, the Healthy Plate method for meal planning, food sources of fiber, food label review tips, tips for promoting a healthy weight loss, and encouragement to eat small balanced meals each day and include a variety of minimally processed, whole foods from all food groups.

Per our discussion pt was encouraged to 1) schedule meals 4 to 5 hrs apart based on daily schedule 2) use a food log/food journal to track daily food options and abdominal symptoms to identify food triggers 3) at meals use the Healthy Plate method to combine food groups 3) use the Nutrition Keynote handout provided to monitor foods that may cause abdominal bloating/gas, such as food w/ a large amount of fat/oil 4) use the nutrition facts label to choose whole grains w/ 3-5g dietary fiber per serving, gradually increasing fiber, aiming for 25-35g dietary fiber per day 5) continue w/ water, avoiding sugary drinks, and use fruit slices to add flavor to water.

Written materials provided and reviewed w/ pt included Making Healthy Food Choices, Creating a Healthy Plate booklet, Enjoying the Healthy Plate, Reading Nutrition Labels, Cooking Tips and Recipes, Nutrition Keynotes: Tips for the Control of Gas. Contact number was provided, follow-up as needed.

PELVIC ULTRASOUND - 1/2/08

Please note this study is not monitored by a radiologist and is presently submitted for interpretation.

**01/02/2008 - Diagnostic Imaging in HOV GENERAL (X-RAY) (continued)****Imaging (continued)**

Using the bladder as an acoustical window, multiple images are made of the patient's pelvis. Additionally, with the patient's consent, a female technologist performs an endovaginal exam. The uterus measures about 11 cm x 4.5 cm. There are areas of altered echo texture. The endometrium is 1.3 cm. There is some free fluid seen in the pelvis. There are small cysts in the cervix. There is a 3.4 cm cyst seen in a 4.6 cm right ovary with the left ovary at 2.9 cm.

**IMPRESSION**

1. 11 cm uterus with some areas of altered echo texture. The endometrium is 1.3 cm.
2. 3.4 cm cyst seen in a 4.6 cm right ovary.
3. Multiple cysts evident in the cervix.

Report put on RIS on 1/3/08.

## 09/04/2009 - Lab in HOV LABORATORY (continued)

## Labs (continued)

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.7	0.6 - 1.1 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89-NB	mL/min	—	956

## Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \* GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality). IDMS-calibrated. See LabNet for Details.

## 03/24/2011 - Lab in HOV LABORATORY (continued)

## Labs (continued)

## Components

Component	Value	Reference Range	Flag	Lab
25-HYDROXYVITAMIN D	8	30 - 100 ng/mL	L 	956
VITAMIN D, 25-HYDROXY, D3	8	NOT ESTABLISHED ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	NOT ESTABLISHED ng/mL	—	956

## Comment:

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY, NATL OSTEOPOROSIS FDN, K\_DOQI) THAT 25-OH VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD (NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D, 25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

Comment:

----- TO ALL PROVIDERS A REFLEX THYROID TESTING PROGRAM IS NOW IN PLACE. ALL SINGLE TSH SPECIMENS FOUND TO BE ABNORMAL WILL AUTOMATICALLY HAVE FT4 DETERMINED ON THE SAME SERUM SAMPLE. THIS WILL SIMPLIFY SCREENING FOR THYROID DYSFUNCTION BY ORDERING A SINGLE TSH MEASUREMENT. (APPROVED: REGIONAL ENDOCRINOLOGY SUBCOMMITTEE, 1995.)

**Components**

Component	Value	Reference Range	Flag	Lab
CREATININE	0.8	0.6 - 1.1 mg/dL	—	956
GLOMERULAR FILTRATION RATE	80-NB	mL/min	—	956

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \*  
 GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29  
 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CDK5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality). IDMS-calibrated. See LabNet for Details.

## VITAMIN D, 25-HYDROXY [1554006292] (Abnormal)

Resulted: 01/23/12 1708, Result status: Final result

Order status: Completed

Filed on: 09/29/22 1038

Collected by: JAT 01/18/12 1512

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
25-HYDROXYVITAMIN D	13	30 - 100 ng/mL	L ▼	956
VITAMIN D, 25-HYDROXY, D3	6	NOT ESTABLISHED ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	7	NOT ESTABLISHED ng/mL	—	956

## Comment:

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY, NATL OSTEOPOROSIS FDN, K\_DOQI) THAT 25-OH VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD (NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D, 25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## Components

Component	Value	Reference Range	Flag	Lab
PARATHYROID HORMONE INTACT	66	15 - 65 pg/mL	H ^	956

## 01/18/2012 - Lab in HOV LABORATORY (continued)

## Labs (continued)

## Comment:

INTERPRETATION OF INTACT PTH RESULTS SHOULD TAKE INTO ACCOUNT THE SERUM CALCIUM CONCENTRATIONS AND THE PHYSIOLOGICAL INTERPLAY BETWEEN THESE TWO ELEMENTS IN THE VARIOUS PTH/CALCIUM DISORDERS. THE FOLLOWING LEVELS OF INTACT PTH WERE DETERMINED BY NICHOLS DIAGNOSTICS, USING A DIFFERENT ASSAY. NORMAL RANGE (n=253): PTH OF 10-65 pg/mL WITH CALCIUM VALUES RANGING FROM 8.5-10.5 mg/dL PTH DEPENDENT HYPERCALCEMIA (n=88): PTH 53 TO 1180 pg/mL WITH CALCIUM VALUES RANGING FROM 10.5-16.3 mg/dL NON-PTH DEPENDENT HYPERCALCEMIA (n=63): PTH FROM UNDETECTABLE TO 22 pg/mL WITH CALCIUM VALUES RANGING FROM 10.5-17.6 mg/dL HYPOPARATHYROIDISM (n=8): PTH FROM UNDETECTABLE TO 21 pg/mL WITH CALCIUM VALUES RANGING FROM 6.3-8.5 mg/dL CONSISTENT WITH GOOD CLINICAL PRACTICE, IT IS RECOMMENDED THAT INTACT PTH RESULTS, EVEN WHEN USED IN CONJUNCTION WITH CALCIUM VALUES, SHOULD BE INTERPRETED WITH CAUTION AND WITH CONSIDERATION OF THE OVERALL CLINICAL MANIFESTATIONS.

BILATERAL SCREENING MAMMOGRAM: 5/3/2013

CLINICAL: Baseline mammogram, no family history of breast cancer.

No prior exams were available for comparison.

There are scattered fibroglandular elements in both breasts that could

obscure a lesion on mammography.

No significant masses, calcifications, or other findings are seen in either breast.

IMPRESSION: NEGATIVE

There is no mammographic evidence of malignancy. A routine screening

**05/03/2013 - Diagnostic Imaging in HOV GENERAL (X-RAY) (continued)****Imaging (continued)**

mammogram is recommended within 2 years.

SMITH, PEPPER  
 Gyn Exam, 6/16/2013

## EXAM INFORMATION

Patient Name: SMITH, PEPPER  
 Patient ID: 000004779300  
 DOB: 5/22/1971  
 Age: 42 yrs  
 Sex: Female  
 Ref Phys: MIRDAMADI, LINDA MARIE  
 Exam Date: 6/16/2013  
 Procedure: US TRANSABDOMINAL AND ENDOVAGINAL PELVIS ULTRASOUND  
 Exam Site: WLA  
 Accession #: 52282579

## INDICATIONS FOR SONOGRAPHY

Reason: follow up pelvic ultrasound

## UTERUS

Measurements:  
 Length x Width x Height = Volume  
 10.85 cm x 5.87 cm x 5.55 cm = 184.9 cc  
 Endometrium Thickness: 12.8 mm

## LEFT OVARY

Measurements:  
 Length x Width x Height = Volume  
 2.78 cm x 1.97 cm x 1.71 cm = 4.9 cc

## RIGHT OVARY

Measurements:  
 Length x Width x Height = Volume  
 4.82 cm x 3.87 cm x 2.92 cm = 28.52 cc

## COMMENTS

Pelvic Ultrasound:

06/16/2013 - Diagnostic Imaging in HOV GENERAL (X-RAY) (continued)

Imaging (continued)

UTERUS:

The uterus appears normal in size.

Multiple fibroids are visualized. The largest measures 2.5 x 2.2 x 2.0 cm and is located in the anterior aspect of the uterus. This fibroid appears to be submucosal . Multiple nabothian cysts are visualized in the cervix.

The endometrial stripe is not well seen.

RIGHT OVARY:

A simple cyst is visualized in the right ovary measuring 3.4 x 3.0 x 3.1 cm.

RIGHT ADNEXA:

The right adnexa is unremarkable.

LEFT OVARY:

The left ovary appears normal in size and echogenicity.

LEFT ADNEXA:

The left adnexa is unremarkable.

CUL DE SAC:

There is a small amount of free fluid in the cul-de-sac.

IMPRESSION:

Fibroid which appears submucosal. RIGHT OVARIAN CYST(S). FREE FLUID IN THE CUL-DE-SAC.

Preliminary prepared by LING WANG, SONOGRAPHER WLA RAD on 6/16/2013 12:10:28 PM.

Sonographer: LING WANG, SONOGRAPHER WLA RAD

BP 135/84 | Pulse 92 | Temp(Src) 98.4 °F (36.9 °C) | Resp 18 | Ht 1.6 m (5' 3") | Wt 103.42 kg (228 lb) | BMI 40.4 kg/m<sup>2</sup> | SpO<sub>2</sub> 99%

History Reviewed:

I have reviewed the Medical/Surgical and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever, chills, weight loss, malaise/fatigue and diaphoresis.

Skin: Negative for itching and rash.

HENT: Negative for hearing loss, ear pain, neck pain, tinnitus and ear discharge.

Eyes: Negative for blurred vision, double vision, photophobia and pain.

Cardiovascular: Positive for chest pain. Negative for palpitations, orthopnea, claudication and leg swelling.

Respiratory: Negative for cough, hemoptysis, sputum production, shortness of breath and wheezing.

Gastrointestinal: Negative for heartburn, nausea, vomiting and abdominal pain.

Genitourinary: Negative for dysuria, urgency and frequency.

Musculoskeletal: Negative for myalgias, back pain and joint pain.

Endo/Heme/Allergies: Negative for environmental allergies. Does not bruise/bleed easily.

Neurological: Negative for dizziness, tingling, tremors, sensory change, speech change, focal weakness, seizures and headaches.

Physical Exam

Constitutional: She is oriented to person, place, and time. She appears well-developed and well-nourished.

03/30/2014 - ED in EDWL (continued)

## ED Provider Note (continued)

No distress.

HENT:

Head: Normocephalic and atraumatic.

Eyes: Pupils are equal, round, and reactive to light.

Neck: Normal range of motion. Neck supple.

Cardiovascular: Normal rate, regular rhythm, normal heart sounds and intact distal pulses. Exam reveals no gallop and no friction rub.

No murmur heard.

Pulmonary/Chest: Effort normal and breath sounds normal. No respiratory distress. She has no wheezes. She has no rales. She exhibits tenderness.

**Minimal ttp**

Abdominal: Soft. Bowel sounds are normal. She exhibits no distension. There is no tenderness. There is no rebound and no guarding.

Musculoskeletal: Normal range of motion. She exhibits no edema and no tenderness.

Neurological: She is alert and oriented to person, place, and time. No cranial nerve deficit. Coordination normal.

Skin: Skin is warm and dry. No rash noted. She is not diaphoretic. No erythema.

Nursing note and vitals reviewed.

Lab: trop (-), wbc count normal, electrolytes nml

Radiology: cxr: no infiltrates, effusions or ptx.

EKG: NO ST-T CHANGES, NO Q'S, NSR

Assessment and Plan:

1) Chest Pain - r/o ACS

**03/30/2014 - ED in EDWL (continued)****ED Provider Note (continued)**

- labs, monitor, ekg,
- asa, nitro,
- check troponin, cxr serial
- trop now and again at 4am.
- if both negative will d/c home with ETT on Monday

CREATININE	0.70	<=1.10 mg/dL	—	305
GLOMERULAR FILTRATION RATE	>89	mL/min	—	305
Comment: Estimated GFR (eGFR) is normalized to a standard body surface area (1.73m <sup>2</sup> ), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System. -GFR Ranges- GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).				
RACE	Non Black	—	—	305

BP 130/74 | Pulse 83 | Temp(Src) 98.9 °F (37.2 °C) | Resp 18 | SpO2 100%

History Reviewed:

I have reviewed the Medical/Surgical, Family and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever, chills and diaphoresis.

HENT: Negative.

Cardiovascular: Positive for chest pain. Negative for palpitations, orthopnea, leg swelling and PND.

Respiratory: Negative for cough and shortness of breath.

Gastrointestinal: Negative for nausea, vomiting, abdominal pain and diarrhea.

Genitourinary: Negative.

Musculoskeletal: Negative for myalgias, back pain and neck pain.

Neurological: Negative for dizziness, tingling, speech change and focal weakness.

Psychiatric/Behavioral: Negative.

09/24/2015 - ED in EDLA (continued)

## ED Provider Note (continued)

Physical Exam

Constitutional: She is oriented to person, place, and time. She appears well-developed and well-nourished. No distress.

**Obese**

## HENT:

Head: Normocephalic and atraumatic.

Eyes: Conjunctivae and EOM are normal. Pupils are equal, round, and reactive to light. No scleral icterus.

Neck: Normal range of motion. Neck supple. No JVD present. No thyromegaly present.

Cardiovascular: Normal rate, regular rhythm and intact distal pulses. Exam reveals no gallop and no friction rub.

No murmur heard.

Pulmonary/Chest: Effort normal and breath sounds normal. No stridor. No respiratory distress. She has no wheezes. She has no rales. She exhibits no tenderness.

Abdominal: She exhibits no distension and no pulsatile midline mass. There is no hepatosplenomegaly. There is no tenderness. There is no rigidity, no rebound and no guarding.

Musculoskeletal: She exhibits no edema.

Neurological: She is alert and oriented to person, place, and time. No cranial nerve deficit or sensory deficit.

Skin: Skin is warm and dry. She is not diaphoretic. No cyanosis.

Psychiatric: She has a normal mood and affect. Her behavior is normal.

Vitals reviewed.

## Procedure Orders

1. XR CHEST 1 VIEW [1554006595] ordered by Schmitz, Charles Fidel (M.D.), M.D. at 09/24/15 1925

CLINICAL HISTORY: Reason: chest pain  
Portable

COMPARISON: 3/30/2014

## FINDINGS/

## IMPRESSION:

There is relatively shallow inspiratory volume and evaluation of lung bases is limited by patient's large body habitus. There is no definite evidence of pneumonia. No pleural effusion or pneumothorax are seen. Heart size appears within normal limits for an AP portable projection.

Diagnostic imaging	65048866	9/25/2015 9:03 AM	Radner, Gary William (M.D.), M.D.

Signed by Radner, Gary William (M.D.), MEDICAL DOCTOR on 09/25/15 at 0903

CLINICAL HISTORY: Reason: chest pain

**09/24/2015 - ED in EDLA (continued)****Imaging (continued)**

Portable

COMPARISON: 3/30/2014

FINDINGS/  
IMPRESSION:

There is relatively shallow inspiratory volume and evaluation of lung bases is limited by patient's large body habitus. There is no definite evidence of pneumonia. No pleural effusion or pneumothorax are seen. Heart size appears within normal limits for an AP portable projection.

Status: Addendum	Editor: Fan, Michael Shekfai (M.D.), M.D. (Physician)	

History:

Pepper Smith is a 44 year old female

Patient presents with:

COUGH: Cough with mucus x 2 days, had "violent cough that feels like a knot around stomach area."

Unable to sleep at night due to cough.

SORE THROAT: Sore throat x 3 days.

HEADACHE: Headache x 2 days.

4 DAYS OF SORE THROAT, PRODUCTIVE COUGH->GREENISH PHLEGM,  
NASAL CONGESTION.  
TOOK OTC MEDS

Review of Systems

Gastrointestinal: Negative for vomiting, abdominal pain and diarrhea.

Physical Exam

Constitutional: She is oriented to person, place, and time. No distress.

HENT:

Mouth/Throat: Oropharynx is clear and moist.

Neck: Neck supple.

Cardiovascular: Normal rate, regular rhythm and normal heart sounds.

Pulmonary/Chest: Effort normal and breath sounds normal. No respiratory distress.

Neurological: She is alert and oriented to person, place, and time. She has normal reflexes. No cranial nerve deficit. Gait normal. Coordination normal.

Skin: Skin is warm and dry.

Nursing note and vitals reviewed.

ASSESSMENT:

COUGH (primary encounter diagnosis)

Note:

Plan: AZITHROMYCIN 500 MG ORAL TAB

CHERATUSSIN AC 10-100 MG/5 ML ORAL LIQD

SUDAFED PRN

PLAN: IF SYMPTOMS PERSIST OR BECOME WORSE, CONTACT YOUR DOCTOR OR RETURN TO CLINIC.  
IF SYMPTOMS SEVERE, GO TO EMERGENCY DEPARTMENT.

Orders Placed This Encounter

- Azithromycin (ZITHROMAX) 500 mg Oral Tab
- Codeine-guaiFENesin (CHERATUSSIN AC) 10-100 mg/5 mL Oral Liqd

Creation Time: 4/6/2016 1:06 PM

The history is provided by the patient.

**History:**  
1:06 PM  
4/6/2016  
Pepper Smith is a 44 year old female who presents with HEADACHE. Around 10:30am, she developed a headache on back of head. Felt sharp and was strong. She felt shaky and dizzy. No nausea. Doesn't normally get headaches. Sat down and had some celery and water. Was picked up by husband at work, now she feels like symptoms are mostly gone. She also mentions that she has a heavy period right now and wondering if this has contributed to headache.

**Patient Active Problem List:**

SEVERE OBESITY, BMI 40-44.9, ADULT  
VITAMIN D DEFICIENCY

No outpatient prescriptions have been marked as taking for the 4/6/16 encounter (Hospital Encounter).

No Known Drug Aller\*

**Social History**

Marital Status: Unknown      Spouse Name:

Initial vital signs: BP 132/83 mmHg | Pulse 98 | Temp(Src) 98.1 °F (36.7 °C) | Resp 17 | SpO2 98%

History Reviewed:

I have reviewed the Medical/Surgical, Family and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative. Negative for fever and chills.

Skin: Negative. Negative for itching and rash.

Eyes: Negative.

Cardiovascular: Negative.

Respiratory: Negative.

Gastrointestinal: Negative.

Genitourinary: Negative.

Musculoskeletal: Negative.

Endo/Heme/Allergies: Negative.

Neurological: Positive for dizziness and headaches. Negative for tingling, tremors, sensory change, speech change, focal weakness, seizures and loss of consciousness.

Psychiatric/Behavioral: Negative.

Physical Exam

Constitutional: She is oriented to person, place, and time. Vital signs are normal. She appears well-developed and well-nourished. She is cooperative. Non-toxic appearance. She does not have a sickly appearance. She does not appear ill. No distress.

04/06/2016 - ED in EDLA (continued)

## ED Provider Note (continued)

HENT:

Head: Normocephalic and atraumatic.

Eyes: Conjunctivae and EOM are normal. Pupils are equal, round, and reactive to light.

Neck: Normal range of motion. Neck supple.

Cardiovascular: Normal rate, regular rhythm, normal heart sounds and intact distal pulses. Exam reveals no gallop and no friction rub.

No murmur heard.

Pulmonary/Chest: Effort normal and breath sounds normal. She has no wheezes. She has no rales.

Abdominal: Soft. There is no tenderness. There is no rebound and no guarding.

Musculoskeletal: Normal range of motion. She exhibits no edema or tenderness.

Neurological: She is alert and oriented to person, place, and time. No cranial nerve deficit. She exhibits normal muscle tone. Coordination normal.

Skin: Skin is warm and dry. No rash noted.

Psychiatric: She has a normal mood and affect. Her behavior is normal. Judgment and thought content normal.

Nursing note and vitals reviewed.

## Radiographs (preliminary reading):

## CThead:

## FINDINGS:

Ventricles are normal in size without evidence of displacement or compression. Cerebral sulci are normal.

No abnormal areas of parenchymal edema or hemorrhage are seen within the cerebral hemispheres, basal ganglia, brainstem, or cerebellum.

There is no evidence of subdural hematoma or blood in the subarachnoid space.

Calvarium and bony structures of the skull base are normal.

Paranasal sinuses, as visualized, are normally pneumatized.

Middle ear cavities and mastoid air cells are normally pneumatized.

## IMPRESSION:

Normal study

Impression-  
(R51) HEADACHE (primary encounter diagnosis)  
(D64.9) ANEMIA

Latest Vital signs: BP 124/71 mmHg | Pulse 89 | Temp(Src) 98.1 °F (36.7 °C) | Resp 17 | SpO2 98%

Assessment/Plan-  
3:00pm Patient feeling much improved.  
She admits she is supposed to be taking iron but hasn't. Will resume.  
No neuro deficits.  
Will d/c home with husband.  
F/u with Stahl, Jerusha Emily (M.D.).  
Given strict headache precautions.

I have discussed with the patient and family the rationale behind the recommendations and work-up today as well as the disposition recommendations. Patient is responsible for following through with treatment/labs/tests and follow-up as recommended and appropriate. Failure to do so as directed may delay diagnosis and treatment. The examination and treatment that they have received in the Emergency Department is not intended to be a substitute for an effort to provide complete medical care. The imaging, if any, have been interpreted on a preliminary basis pending final reading by the radiologist. The patient and family were instructed to return immediately to the ED if any changes or worsening of condition should occur.

Patient expressed understanding, appreciation, and agreement.

If the patient was given any sedating medication, narcotic, or benzodiazepine, they (and family if present) were advised no driving or operating machinery for the next 12 hours and symptom free.

## Procedure Orders

1. CT HEAD NO CONTRAST [1554006671] ordered by Sanders, Lisa Martine (M.D.), M.D. at 04/06/16 1306

CLINICAL HISTORY: Reason: Severe headache back of head

COMPARISON: No previous cross-sectional imaging studies the brain are available for comparison

TECHNIQUE: Study performed per routine noncontrast head CT protocol.

## CT Dose:

As required by California law, the CTDIvol and DLP radiation doses associated with this CT study are listed below. This represents the estimated dose to a standard lucite phantom resulting from the technique used for this study, but is not the dose to this specific patient.

Type / CTDIvol / DLP / Phantom

Axial / 52.58 / 853.74 / H

Total Exam DLP: 853.74

CTDIvol = mGy DLP = mGy-cm

Phantom: B=Body32, H=Head16

## FINDINGS:

Ventricles are normal in size without evidence of displacement or compression. Cerebral sulci are normal.

No abnormal areas of parenchymal edema or hemorrhage are seen within the cerebral hemispheres, basal ganglia, brainstem, or cerebellum.

There is no evidence of subdural hematoma or blood in the subarachnoid space.

Calvarium and bony structures of the skull base are normal.

04/06/2016 - ED in EDLA (continued)

## Clinical Notes (continued)

Paranasal sinuses, as visualized, are normally pneumatized.

Middle ear cavities and mastoid air cells are normally pneumatized.

C0000220160970 43050	—	BLOOD	RN,Collect 04/06/16 1321

## CREATININE [1554006663]

Resulted: 04/06/16 1349, Result status: Final result

Ordering provider: Sanders, Lisa Martine (M.D.), M.D. 04/06/16 1306 Order status: Completed  
 Filed on: 09/29/22 1038 Collected by: RN,Collect 04/06/16 1321  
 Resulting lab: KFH, LAMC HOSPITAL LABORATORY  
 Narrative:  
 RMS ACCN: 582108541

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.61	<=1.10 mg/dL	—	002
GLOMERULAR FILTRATION RATE	>89	mL/min/BSA	—	002

## Comment:

Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System.

## -GFR Ranges-

GFR >89 Normal (or CKD1\*)  
 60-89 Mildly reduced (CKD2\*)  
 30-59 Moderately reduced (CKD3 if >3mos)  
 15-29 Severely reduced (CKD4 if >3mos)  
 GFR <15 Kidney failure (CKD5 if >3mos)  
 \* GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).

RACE	Black	—	—	002

Type	ID	Date and Time	Dictating Provider
Diagnostic imaging	68132104	4/6/2016 2:35 PM	Helmer, Edward (M.D.), M.D.
Signed by Helmer, Edward (M.D.), MEDICAL DOCTOR on 04/06/16 at 1436			

CLINICAL HISTORY: Reason: Severe headache back of head

COMPARISON: No previous cross-sectional imaging studies the brain are available for comparison

TECHNIQUE: Study performed per routine noncontrast head CT protocol.

## CT Dose:

As required by California law, the CTDIvol and DLP radiation doses associated with this CT study are listed below. This represents the estimated dose to a standard lucite phantom resulting from the technique used for this study, but is not the dose to this specific patient.

Type / CTDIvol / DLP / Phantom

Axial / 52.58 / 853.74 / H

Total Exam DLP: 853.74

CTDIvol = mGy DLP = mGy-cm

Phantom: B=Body32, H=Head16

## FINDINGS:

Ventricles are normal in size without evidence of displacement or compression. Cerebral sulci are normal.

No abnormal areas of parenchymal edema or hemorrhage are seen within

**04/06/2016 - ED in EDLA (continued)****Imaging (continued)**

the cerebral hemispheres, basal ganglia, brainstem, or cerebellum.

There is no evidence of subdural hematoma or blood in the subarachnoid space.

Calvarium and bony structures of the skull base are normal.

Paranasal sinuses, as visualized, are normally pneumatized.

Middle ear cavities and mastoid air cells are normally pneumatized.

**IMPRESSION:**

Normal study

## CREATININE [1554006720]

Resulted: 10/03/16 1637, Result status: Final result

Order status: Completed

Filed on: 09/29/22 1038

Collected by: Kiel,Diane 10/03/16 0912

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 593792285

Acknowledged by: Williams Cotton, Carol Joy (M.D.), M.D. on 10/14/16 1851

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.62	<=1.10 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89	mL/min/BSA	—	956

Comment:

Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System.

## 10/03/2016 - Lab in HOV LABORATORY (continued)

## Labs (continued)

-GFR Ranges-  
 GFR >89 Normal (or CKD1\*)  
 60-89 Mildly reduced (CKD2\*)  
 30-59 Moderately reduced (CKD3 if >3mos)  
 15-29 Severely reduced (CKD4 if >3mos)  
 GFR <15 Kidney failure (CKD5 if >3mos)  
 \* GFR >60 is not diagnostic of CKD1 or 2  
 unless another marker of kidney damage is  
 present (e.g. microalbumin or urine protein  
 >300 mg/day on 2 occasions, or renal  
 biopsy or imaging abnormality).

CLINICAL INDICATION: Reason: fibroid uterus planning possible surgery or uae. Ordered by Dr. Williams Cotton CREAT 0.62  
10/03/2016 GFR >89 10/03/2016

COMPARISON: None.

CONTRAST: 10 milliliter of GADAVIST was given on 10/4/2016 10:26:00 AM by route: INTRAVENOUS

TECHNIQUE: Study performed per protocol.

**FINDINGS:**

4.5 cm submucosal fibroid is noted. 1.6 cm submucosal fibroid is seen. 1.4 cm intramural fibroid is noted. Contrast enhancement is noted in the fibroids.

Bilateral ovarian cysts are noted. The largest one is measuring 2.7 cm in the right ovary. No other pelvic mass is seen.

- MAMMOGRAM, SCREENING BILATERAL

BILATERAL DIGITAL SCREENING MAMMOGRAM: 10/4/2016

CLINICAL: 40-49 no personal or family history of breast cancer.

Comparison is made to exam dated: 5/21/2015 West Los Angeles Medical Center.

There are scattered fibroglandular elements in both breasts that could

obscure a lesion on mammography.

No significant masses, calcifications, or other findings are seen in either breast.

There has been no significant interval change.

**IMPRESSION: NEGATIVE**

There is no mammographic evidence of malignancy. A routine screening mammogram is recommended within 2 years.

Kaiser Permanente regional guidelines recommend annual screening mammography for high risk patients and screening mammography within 2 years for normal low risk patients. Determination of risk assessment by

radiology is limited and ultimately should be determined by the patient's primary care provider in collaboration with the patient.

Mammograms do not detect all breast cancer. Up to 15 percent of breast

cancer can't be detected by mammography. Patients with palpable abnormalities may require further investigation.

**Disposition and Responsibility**

A letter with these results will be sent to the patient by the Mammography Department.

## VITAMIN D, 25-HYDROXY [1554006735] (Abnormal)

Resulted: 10/11/16 1753, Result status: Final result

Order status: Completed

Filed on: 09/29/22 1038

Collected by: Kendrick,Ashley R 10/06/16 1000

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 594050664

Acknowledged by: Stahl, Jerusha Emily (M.D.), M.D. on 10/12/16 0744

## Components

Component	Value	Reference Range	Flag	Lab
VITAMIN D, 25-HYDROXY, D3	15	ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	6	ng/mL	—	956
25-HYDROXYVITAMIN D	21	30 - 100 ng/mL	L v	956

Comment:

There is general consensus (Endocrine Society, Natl Osteoporosis FDN, K\_DOQI) that 25-OH Vitamin D measurements > 30 ng/mL are desirable. However, most Americans are deficient by this standard (NHanes III).

Levels <10 ng/mL are consistent with a diagnosis of Rickets/Osteomalacia.

Infants normally produce Vitamin D metabolites that falsely elevate 25-OH Vitamin D measurements. Please order D,25-Hydroxy, Neonatal [82306D] for these patients.

This test was developed and its performance characteristics determined by the

**10/06/2016 - Lab in HOV LABORATORY (continued)****Labs (continued)**

SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## 10/06/2016 - Lab in HOV LABORATORY (continued)

## Labs (continued)

RMS ACCN: 594050663

Acknowledged by: Stahl, Jerusha Emily (M.D.), M.D. on 10/06/16 1917

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.63	<=1.10 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89	mL/min/BSA	—	956

## Comment:

Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System.

## -GFR Ranges-

GFR >89 Normal (or CKD1\*)  
 60-89 Mildly reduced (CKD2\*)  
 30-59 Moderately reduced (CKD3 if >3mos)  
 15-29 Severely reduced (CKD4 if >3mos)  
 GFR <15 Kidney failure (CKD5 if >3mos)  
 \* GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).

RACE	Black	—	—	956

Component	Value	Reference Range	Flag	Lab
HGBA1C%	5.9	4.8 - 5.6 %	H ^	956

Comment:

A repeatable Hb A1c > or = 6.5% is diagnostic of diabetes. A single Hb A1c > or = 6.5% can also be confirmed by a fasting plasma glucose measurement > 125 mg/dL, a random plasma glucose > or = 200 mg/dL, or a 2 hour oral glucose tolerance test result > or = 200 mg/dL. Patients with Hb A1c of 5.7-6.4% are at increased risk for future diabetes.

**DISCHARGE NOTE FOR SAMEDAY GYN SURGERY**

=====

For Pepper Smith (46 year old female) MRN: 000004779300  
 DATE OF ADMISSION: 8/17/2017  
 DATE OF DISCHARGE: 8/17/2017

PRINCIPAL DIAGNOSIS:  
 Pre-Op Diagnosis Codes:  
 \* UTERINE FIBROIDS [D25.9]

PROCEDURES:  
 Procedure(s) (LRB):  
 ABDOMINAL HYSTERECTOMY LAPAROSCOPIC (N/A)  
 SALPINGECTOMY LAPAROSCOPIC (Left)  
 CYSTOSCOPY (N/A)  
 INTRA ABDOMINAL LYSIS OF ADHESIONS LAPAROSCOPIC (N/A)

COMPLICATIONS:  
 There are no significant changes from the dictated OR report

HOSPITAL COURSE:  
 Pepper Smith was admitted on 8/17/2017 for same day GYN surgery. Procedures listed above. No complications. EBL

**08/17/2017 - Admission (Discharged) in PACU (continued)**

**Discharge Summary Note (continued)**

75 ml. See OP note for details. She was discharged home same day in stable condition per PACU protocol.

**Current Discharge Medication List**

STOP taking these medications

medroxyPROGESTERone (DEPO-PROVERA) 150 mg/mL IM Susp

CONTINUE these medications which have NOT CHANGED

HYDROcodone-Acetaminophen (NORCO) 5-325 mg Oral Tab

Take 1 to 2 tablets by mouth every 4 to 6 hours as needed for PAIN. DO NOT EXCEED 12 TABLETS IN 24 HOURS

Ibuprofen (MOTRIN) 800 mg Oral Tab

Take 1 tablet by mouth every 8 hours as needed for pain

Simethicone (MYLICON) 80 mg Oral Chew Tab

1 tab by mouth every 6 hours as needed for gas pain

Docusate Sodium (COLACE) 100 mg Oral Cap

1 tab by mouth twice a day as needed for constipation

**INTERVAL HISTORY & PHYSICAL**

I have reviewed the Hospital Admission History & Physical. Electronic signature placed on this note will serve as a countersignature of the Hospital Admission History & Physical.

**The patient has been examined:** Changes to the patient's condition or the content of the Admission History & Physical: none.

**08/17/2017 - Admission (Discharged) in PACU (continued)****H&P Notes (continued)**

I have also reviewed the informed consent with the patient. The procedure, indications, risks, benefits, alternatives, and expected outcomes, including potential complications were discussed. All of the patient's questions were answered.

**PHYSICIAN'S STATEMENT CONCERNING TRANSFUSION INFORMATION**  
(Paul Gann Blood Safety Act. Health and Safety Code #1645)

I have informed the patient by means of a standardized written summary prepared by the California Department of Health Services concerning the positive and negative aspects of receiving autologous blood and directed and nondirected homologous blood from volunteers. Except if the patient has waived it, or there are medical contraindications or a life threatening emergency, I have allowed adequate time prior to the procedure for pre-donation to occur.

INDICATIONS: 46 year old G8P4044 with history of fibroid uterus and menorrhagia status post attempted in office resection of a 4 cm submucous fibroid. Part of the fibroid was removed, but not the entire fibroid. Patient was offered repeat attempt in office or in OR to resect fibroid or hysterectomy for definitive intervention. Here for Pre-op evaluation for Total Laparoscopic Hysterectomy .

**FINDINGS:**

Exam under anesthesia:

- 12 wk uterus
- Cervix midline, normal in consistency
- Adnexa unremarkable

Speculum exam:

- Cervix normal in appearance
- Vagina normal in appearance

Laparoscopy:

- fibroid uterus
- Normal ovaries bilaterally
- Partial L tube; absent R tube
- Moderate adhesions between omentum and abdominal wall
- Moderate adhesions between anterior uterine fundus and abdominal wall/bladder
- Adhesions of bowel to posterior uterus and right ovary

**Operative Form: Hysterectomy Cases Only**

Pre-operative Diagnosis: Fibroids

History and Duration of Abnormal Bleeding: 30 days or more

History and Duration of Pelvic Pain: None

Uterine Size Estimate: Preoperative Clinical Estimate: 12 wks

History of Blood (or products) Transfusion within 24 hours of surgery: No

PreTreatment Within One Year of Surgery: Oral Contraceptives, Mirena

Initial Hysterectomy Approach: Laparoscopic Approach

Laparoscopic Approach: Total

Vaginal Cuff Sutured: Laparoscopically

**08/17/2017 - Admission (Discharged) in PACU (continued)****Clinical Notes (continued)**

Right Lower or Mid quadrant Port Size: 5mm  
Left Lower or Mid Quadrant Port Size: 5mm  
Adhesion prevention intervention: No  
Vaginal Cavity Checked: Vaginal Cavity Checked

**PROCEDURE:**

After pre-operative briefing, including confirmation of ID, site, consent, and team discussion of patient and procedure, the patient was brought to the operating room where adequate general endotracheal anesthesia was obtained. She was placed in the low lithotomy position and her arms were padded and tucked at her side. She was examined under anesthesia and prepped and draped in the usual sterile fashion. A Foley catheter was inserted. A speculum was placed and the anterior lip of the cervix was grasped with a tenaculum. The cervix was then dilated far enough to accept the V-Care manipulator.

The umbilicus was injected with of 0.5% marcaine with 1:200k units of epinephrine. A 5mm incision was made intraumbilically, and a 5mm port was placed without difficulty. Placement confirmed with scope. Abdomen was insufflated with CO2 to 15 mmHg. Abdominal contents examined and no trauma or bleeding noted. Additional 5mm ports were placed in the lower abdominal quadrants bilaterally under direct visualization without difficulty after injecting local.

The Ligasure was used throughout the operation, except where otherwise noted. The adhesions noted in findings above were first lysed. Scissors were used to remove the bowel from the right ovary and posterior uterus as well as the bladder to the uterine fundus. Then the right utero-ovarian ligament was sealed 2-3 times before being divided. Next the right fallopian tube and round ligament were sealed and divided. The intervening broad ligament tissues were sealed and divided, separating the cornua from the upper adnexal structures. Then anterior leaf of the broad ligament was opened and a bladder flap was developed. All vascular pedicles were sealed three times before they were divided. The bladder was dissected down off the isthmus of the uterus. The uterine vessels were skeletonized, and they were triply sealed. The above steps were repeated on the left. After ensuring sufficient bladder flap development and pedicle lateralization, a colpotomy was performed circumferentially using the monopolar spatula.

08/17/2017 - Admission (Discharged) in PACU (continued)

Clinical Notes (continued)

The specimen was delivered through the vaginal w/ manual morcellation.

Left salpingectomy was then performed. We started by identifying the fallopian tube, and then carefully excising it with the Ligasure device along the mesosalpinx. The tube was removed intact through the vagina. The cuff was then sutured laparoscopically using 2-0 V-Loc suture. The pelvis was thoroughly irrigated. Excellent hemostasis noted.

Cysto performed - bladder grossly normal in appearance. Efflux of urine seen from ureteral orifices bilaterally.

The CO2 gas was released from the abdomen. The cannulae were removed. Antibiotic ointment was applied to the umbilical incision with 2x2 and tegaderm. The lateral incisions were closed with subcuticular stitches using 4-0 Polysorb and steri strips.

The anesthetic was reversed and the patient was taken to recovery in good condition.

The operation lasted 95 min  
Uterine weight 296 gms

Sponge, needle and instrument counts were reported to be correct

Drs. Lansdowne and Su were scrubbed for duration of procedure.

## FINAL PATHOLOGIC DIAGNOSIS

UTERUS WITH TUBES, HYSTERECTOMY, LEFT FALLOPIAN TUBE:

- CERVICAL TISSUE SHOWING CHRONIC CERVICITIS AND SQUAMOUS METAPLASIA.
- BENIGN ENDOMETRIUM SHOWING ATTENUATED AND DECIDUALIZED STROMA, CONSISTENT WITH EXOGENOUS PROGESTIN EFFECT.
- BENIGN LEIOMYOMAS.
- HISTOLOGICALLY UNREMARKABLE FALLOPIAN TUBE.
- NO EVIDENCE OF MALIGNANCY IDENTIFIED.

Report Electronically Signed by  
TEODULO GUEVARRA MENESES M.D.  
Date Signed Out: 08/21/17

Interpretation Performed at: Kaiser Foundation Hospital Laboratory/West Los Angeles

## MICROSCOPIC DESCRIPTION

A microscopic examination was performed.

## CLINICAL HISTORY

CLINICAL HISTORY (REQUIRED): UTERINE FIBROIDS

## GROSS DESCRIPTION

The specimen is received in formalin labeled with the patient's name and labeled "UTERUS, CERVIX AND LEFT TUBE". The specimen consists of a uterus and detached cervix. The specimen weighs 282 grams. The uterus measures 7 x 6 x 5.2 cm. The serosal surface of the uterus is tan, smooth and glistening. The cervix measures 3 cm in length and 2.5 cm in diameter. The cervical os measures approximately 2.8 cm. The endocervical canal measures approximately 2.3 cm. The endometrial canal measures approximately 2 cm. The myometrium measures approximately 2.5 cm in greatest thickness. A tubular fragment of tan tissue is identified measuring 2.2 cm in length and averaging 0.5 cm in diameter. Multiple fibroids are noted, ranging from 1.7-5.5 cm. Cut section reveals whorled surface. PE/6.

## CASSETTE SUMMARY:

- 1-2 representative sections of cervix
- 3- endometrium
- 4-5 fibroids
- 6- fallopian tube

js/8/18/2017

If immunohistochemistry and/or in situ hybridization tests were used in this case, these tests were developed and their performance characteristics determined by SCPMG Regional Reference Laboratories, Anatomic Pathology - Sherman Way. It has not been cleared or approved by the US Food and Drug Administration. FDA does not require this test to go through premarket FDA review. This test is used for clinical purposes. It should not be regarded as investigational or for research.

This laboratory is certified under the Clinical Laboratory Improvement Amendments (CLIA) as qualified to perform high complexity clinical laboratory testing.

**Care Plan****Resolved****Problem: Infection, Risk/Actual (Adult)**

Dates: Start: 08/17/17 Resolved: 08/18/17  
 Disciplines: Pt Care Team

**Goal: Identify Related Risk Factors and Signs and Symptoms (Resolved)**

Dates: Start: 08/17/17 Met: 08/18/17  
 Description: Related risk factors and signs and symptoms are identified upon initiation of Human Response Clinical Practice Guideline (CPG)  
 Disciplines: Pt Care Team

**Outcomes**

Date/Time	User	Outcome
08/18/17 1124	Han, Youngsuk (R.N.), R.N.	Outcome achieved

**Goal: Infection Prevention/Resolution (Resolved)**

Dates: Start: 08/17/17 Met: 08/18/17  
 Description: Patient will demonstrate the desired outcomes by discharge/transition of care.  
 Disciplines: Pt Care Team

**Outcomes**

Date/Time	User	Outcome
08/18/17 1124	Han, Youngsuk (R.N.), R.N.	Outcome achieved

**Intervention: Prevent or Manage Infection (Completed)**

Frequency: Per CPG  
 Dates: Start: 08/17/17 End: 08/18/17  
 Description: Implement transmission-based precautions as indicated  
 Obtain cultures prior to initiating antimicrobials when possible  
 Promptly administer ordered antimicrobial agents  
 Provide Fever reduction/comfort measures:  
 Identify/manage signs of early Sepsis/SIRS (within three hours of recognition for best outcomes)  
 Signs include:  
 temperature >38°C or <36°C  
 heart rate changes/ decreased BP  
 tachypnea  
 change in mental status  
 decreased urine output  
 Anticipate need for additional respiratory/ hemodynamic support

**Intervention: Prevent Infection/Maximize Resistance (Completed)**

**08/17/2017 - Admission (Discharged) in PACU (continued)****Care Plan (continued)**

Frequency: Per CPG  
 Dates: Start: 08/17/17 End: 08/18/17  
 Description: Screen and restrict visitors with observed/reported infections  
 Monitor skin/mucous membrane integrity  
 Promote personal hygiene (oral, skin, perineal)  
 Utilize aseptic technique with insertion site/wound/dressing care  
 Replace wet, soiled, dislodged dressings  
 Remove invasive devices/catheters as soon as possible  
 Optimize rest/sleep  
 Optimize fluids/nutrition/glycemic control  
 Promote pulmonary hygiene

**Problem: Perioperative Period (Adult)**

Dates: Start: 08/17/17 Resolved: 08/18/17  
 Description: Prevent and manage potential problems including: 1. bleeding 2. gastrointestinal complications 3. hypothermia 4. infection 5. pain 6. perioperative injury 7. respiratory compromise 8. situational response 9. urinary retention 10. venous thromboembolism 11. wound complications  
 Disciplines: Pt Care Team

**Goal: Signs and Symptoms of Listed Potential Problems Will be Absent or Manageable (Perioperative Period) (Resolved)**

Dates: Start: 08/17/17 Met: 08/18/17  
 Description: Signs and symptoms of listed potential problems will be absent or manageable by discharge/transition of care (reference Perioperative Period (Adult) CPG).  
 Disciplines: Pt Care Team

**Outcomes**

Date/Time	User	Outcome
08/18/17 1124	Han, Youngsuk (R.N.), R.N.	Outcome achieved

**Intervention: Promote Airway Secretion Clearance (Completed)**

Frequency: Per CPG  
 Dates: Start: 08/17/17 End: 08/18/17  
 Description: Position to maximize ventilation  
 Encourage incentive spirometer use/coughing/deep breathing  
 Monitor/manage fluid balance  
 Encourage early activity/mobility per patient tolerance  
 Monitor medication effects (e.g., inhaled, analgesics, anxiolytics)  
 Anticipate need for additional respiratory support

**Intervention: Promote Effective Bowel Elimination (Completed)**

Frequency: Per CPG  
 Dates: Start: 08/17/17 End: 08/18/17  
 Description: Encourage hydration/advance oral intake as tolerated  
 Monitor abdominal girth/bowel sounds/flatus pattern  
 Assess for signs/symptoms of urinary retention  
 Advocate early removal of indwelling catheter  
 Encourage frequent voiding  
 Monitor urine color/characteristics  
 Monitor/record urine and stool output

**Intervention: Monitor and Manage Pain (Completed)**

Frequency: Per CPG  
 Dates: Start: 08/17/17 End: 08/18/17  
 Description: Use a consistent pain scale for regular/frequent assessment  
 Mutually determine/review pain management plan regularly  
 Consider the presence of pre-existing persistent pain  
 Recognize need to maintain chronic regimen with additional dosing to manage acute pain  
 Eliminate/minimize actual and potential painful stimuli  
 Use a multimodal approach (e.g., more than one type/route of medication)  
 Titrate medications to patient response  
 Anticipate need to manage drug-induced side effects

**08/17/2017 - Admission (Discharged) in PACU (continued)****Care Plan (continued)****Intervention: Prevent or Manage Infection (Completed)**

Frequency:	Per CPG
Dates:	Start: 08/17/17 End: 08/18/17
Description:	Implement transmission-based precautions as appropriate Minimize exposure/entry of organisms Anticipate discontinuation of prophylactic antibiotics 24 hours after surgery Provide fever/comfort measures Monitor for early signs of sepsis Anticipate need for fluid resuscitation/advanced support

**Intervention: Prevent Peri-procedural Injury (Completed)**

Frequency:	Per CPG
Dates:	Start: 08/17/17 End: 08/18/17
Description:	Implement universal protocol for preventing wrong site/procedure/person Protect skin/musculoskeletal system from moisture, heat, pressure, friction or shearing forces Position for comfort; Protect from nerve injury Protect from environmental hazards Monitor fluid balance intraoperatively Manage frequency and timing of surgical counts. Document any implanted devices Effectively communicate/exchange critical information

**Intervention: Prevent and Manage VTE (venous thromboembolism) Risk (Completed)**

Frequency:	Per CPG
Dates:	Start: 08/17/17 End: 08/18/17
Description:	Assess for VTE risk Encourage/assist with early ambulation Initiate/maintain compression therapy Encourage both active and passive leg exercises while in bed, if unable to ambulate

**Intervention: Monitor and Manage Bleeding (Completed)**

Frequency:	Per CPG
Dates:	Start: 08/17/17 End: 08/18/17
Description:	Monitor for signs of bleeding/identify source Assess bleeding risk related to surgical procedure Maintain normothermia Maintain dressing integrity Monitor/measure drainage output Anticipate need for fluid resuscitation/hemodynamic stabilization

**Intervention: Regulate Body Temperature (Completed)**

Frequency:	Per CPG
Dates:	Start: 08/17/17 End: 08/18/17
Description:	Monitor body temperature fluctuation Initiate/maintain cooling/warming measures Correlate desired body temperature to cardiorespiratory status, vital signs, disease process, treatment/procedure, and thermal comfort level

**Patient Education****Title: Admission Education ()****Points For This Title****Point: Dietary Modifications (Resolved)**

Description:	Dietary Modifications
--------------	-----------------------

**08/17/2017 - Admission (Discharged) in PACU (continued)****Patient Education (continued)****Patient Friendly Description:**

To live a healthy lifestyle, feel the best you possibly can, and to avoid or manage health problems, you may need to make some changes to your diet. You can work with your care team, and possibly a dietitian to learn what changes you should make for a healthier diet, taking into consideration your personal likes and dislikes, your overall health, and any medical problems you may have. It's often helpful to make small changes for a set period of time and then once accomplished and part of your routine, add other changes. Setting goals for healthier eating is also important and then setting time as you go along to re-evaluate your progress. It often helps to have a support group you can talk to about your successes, as well as those things you find difficult. Other people experiencing the same thing you are can help give you encouragement and recognition for your successes and suggestions for the changes you find more difficult. Knowing that you're not alone in trying to make healthier choices and the feelings, concerns, frustrations, etc. can help you to continue moving forward.

Diagnostic Tests/Procedures

**Patient Friendly Description:**

Often when your care team is evaluating any health problems you have they may recommend you do some diagnostic testing or procedures. They will take into consideration any risk factors you may have, the medical facts and your personal feelings. You should ask questions about any testing to learn about what they are, how they're done, what preparation you need to do, recovery time, alternative testing choices and cost if that's a worry or concern. The kp.org website has many tests described that can also be helpful as you gather information. You should talk with your care team to determine the best option for you that you feel comfortable with.

**Point: Tobacco Cessation (Resolved)****Description:**

Tobacco Cessation practical counseling provided.

Interaction with the patient addressed the following: recognizing danger situations, developing coping skills, and providing basic information about quitting.

**08/17/2017 - Admission (Discharged) in PACU (continued)****Patient Education (continued)****Patient Friendly Description:**

Tobacco cessation means to stop smoking, or chewing/sniffing tobacco. Inhaling cigarette/cigar smoke or chewing/sniffing tobacco causes blood vessels to become smaller and it takes longer for oxygen and nutrition (both very important for healing), to get to a wound (pressure sore/ulcer) or injured area. Chemicals in tobacco also change the shape and actions of cells that fight infection so they can't work as well, leading to slower healing and an increase in scarring. Carbon monoxide is a poison inhaled during smoking that enters the blood cells and lowers the oxygen level in the blood. Also, because the blood vessels are smaller the blood can't flow as quickly through them and there may be problems with blood clots forming at the wound. Let your care team know if you need help to quit smoking. You can find a lot of information and helpful tools on websites like kp.org to help you stop smoking.

Medical Equipment/Supplies

**Patient Friendly Description:**

There are times that you or a loved one may need special equipment to help in the recovery from an injury or illness, or to help adapt to changes you or they may face. Medical equipment, often called durable medical equipment (DME), includes walkers, wheelchairs, canes, special beds or chairs, lifts, raised toilet seats or special toilet chairs, crutches, and shower chairs. It also includes oxygen, ventilators (breathing machines), blood testing strips, suction pumps, traction equipment, or other types of equipment that can be reused. The equipment can be bought, rented or leased for a specific period of time. Often DME is covered by insurance but you should check with your insurance company. Talk to the care team for more information.

**Point: Rehabilitation (Resolved)****Description:**

Rehabilitation

**Patient Friendly Description:**

There are many types of rehabilitation (or rehab), including stroke, pulmonary (for breathing problems), cardiac, or driving rehab, or physical, occupational or speech therapy (also considered rehab therapies). In rehab you'll generally have a team of healthcare professionals (doctors, nurses, therapists, dieticians, etc.) who are licensed in their specific field of expertise. The goal of rehab is to help you recover from a illness, disease or injury and to return to as close to normal as possible. Depending on your needs, rehab may be done in an inpatient rehab facility, on an outpatient basis where you may go several times each week, or you may have in. If you have questions about any of these rehabilitation types there are websites including kp.org that can give you specific information.

Eager, Explanation, Verbalizes understanding by DP at 8/17/2017 1006

**Point: Medications (Resolved)**Description:  
Medications**Patient Friendly Description:**

It's important for you to know all of the medications that you or family members in your home are taking, why and when they take them and what the side effects are. Encourage family members to keep a list of all of their medications with them that includes the dose (amount), and when they take them. This way they can easily share this information with their care providers or emergency responders if they have a problem. Always be sure to take your medications as instructed and before taking over the counter medications check with your care team to make sure they won't cause a reaction with prescription medications. Talk to the care team if you have a problem with any of your medications as they may be able to switch your medications to a different form (liquid, pill, capsule, injection, etc.), different schedule (with food, without food, etc.) or different medication. Also talk to the care team for more information.

**Learning Progress Summary****Patient**

Eager, Explanation, Verbalizes understanding by DP at 8/17/2017 1006

**Point: Personal Risk Factors (Resolved)**Description:  
Personal Risk Factors**Patient Friendly Description:**

There are multiple risk factors for infection. Not getting enough or the right nutrition and not getting enough rest can lower your ability to fight infection. If you smoke or are around secondhand smoke you'll be more prone to get an infection. Being around others who are sick or if your living area isn't clean you'll be more susceptible to an infection. Not getting immunizations, like a flu shot, can also put you at greater risk when you're exposed to someone else with an illness. Eating unwashed raw foods or uncooked meat can also put you at risk for infections. If you have a wound or a break in your skin, that can also put you at greater risk for an infection. Talk to the care team for more information.

**Topic: Treatment Plan (Resolved)****Point: Treatment: Transmission Precautions (Standard, Droplet, Airborne, Contact) (Resolved)**Description:  
Treatment: Transmission Precautions (Standard, Droplet, Airborne, Contact)

**08/17/2017 - Admission (Discharged) in PACU (continued)****Patient Education (continued)****Patient Friendly Description:**

Transmission precautions are things that should be done to prevent passing on infections to others. Infections are passed by contact with someone or something that is infected, through droplets where infection is spread by respiratory secretions (these infections don't remain infectious for long distances spread by sneezing, coughing - flu, colds, pertussis), or through the air (infections that can live and travel over long distances when in the air - chickenpox, measles, TB). There are standard, everyday precautions everyone should use like good hand washing with soap and water or hand sanitizer before and after being around someone who is ill or touching things in their area, before eating, after using the restroom, after using shopping carts, or after coughing or sneezing into a tissue. Talk to the care team for detailed information on what precautions you need to take if you have or are around someone with an infection that could be contagious.

**Point: Treatment: Comfort/Fever-Reduction Measures (Resolved)****Description:**

Treatment: Comfort/Fever-Reduction Measures

**Patient Friendly Description:**

A fever is a high body temperature, generally of 100.4 or higher, and is one way your body fights being sick. A fever shows that the body is responding to minor or severe infection or other illness. It's important to look at other symptoms, other conditions you have, and how you feel in general. To treat a fever check with the care team about taking an over-the-counter medicine, like acetaminophen (Tylenol), ibuprofen (Advil, Motrin), or naproxen (Aleve) that can help with any pain and help to lower the temperature. To prevent dehydration and help to cool the body, drink plenty of cool fluids like water and other caffeine-free clear liquids until you feel better. If you have kidney, heart, or liver disease and have to limit fluids, talk with your doctor before you increase the amount of fluids you drink. Using cool (NOT COLD) bath water or cool cloths on the forehead, under the armpit or as a sponge bath may also help reduce fevers. It's important to look at other symptoms, other conditions you have, and how you feel in general and let the care team know if the temperature persists, and what other symptoms you're experiencing.

**Point: Treatment: Glycemic Control (Resolved)****Description:**

Treatment: Glycemic Control

**Patient Friendly Description:**

Glycemic Control may be a part of your treatment plan. This means that you will be asked to keep your blood sugar within a certain range at all times. One such way to do this is to use a glycemic index. The glycemic index (GI) is a ranking of how high your blood sugar may rise after eating a specific carbohydrate food. Foods are ranked with a low, medium, or high glycemic index. It is best to use the glycemic index with another method such as carbohydrate counting to manage your blood sugar control.

**Topic: ZZ Self-Management (Resolved)****Point: Prevent/Minimize Transmission: Isolation Recommendations (Resolved)**

Description:  
Prevent/Minimize Transmission: Isolation Recommendations

**Patient Friendly Description:**

If you have an infection that can spread to others or you need to be protected from getting an infection, you may need to be kept apart or isolated from others. When in isolation can you expect the care team to use extra precautions like wearing gloves, masks, and/or disposable gowns. Everyone who enters or leaves the room will need to wash their hands very well. Sometimes isolation rooms use negative air pressure (a machine pulls air into the room, filters it before sending it back outside) that helps prevent airborne diseases (such as TB) from escaping the room and infecting other people. In other cases, positive air pressure may be used, where clean, filtered air is constantly pumped into the room to keep contagious diseases out of the room. You may be allowed to have limited visitors but all visitors and care team members must wear masks, gowns, and gloves. Those who have colds, flu, or other illnesses will not be allowed to visit you. The door to your room may need to stay closed at all times. You may need to stay in your room, except for tests or procedures that can't be done in your room. Talk to the care team for more detailed information.

Prevent/Minimize Transmission: Disposal of Soiled Materials

**Patient Friendly Description:**

When in isolation, soiled laundry (sheets, towels, clothing) and trash or soiled wound bandages, etc. are generally placed in special laundry or trash bags and handled to avoid the transfer of infection. Depending on the type of isolation, disposable dishes, glasses, cups, and silverware may be used and shouldn't be shared with visitors. Talk to the care team for more information.

Description:  
Skin Integrity Promotion: Avoid Pressure, Scratching, Injury, Extreme Temperatures

**Patient Friendly Description:**

The skin is actually the largest organ of the body and the first line of defense against many infections you may come in contact with. Keeping your skin healthy and free from injury (cuts, scratches, sores, pressure, extremely cold or hot temperatures, etc.) is very important. Keep your skin clean and moisturized with non-drying soaps and lotions as needed to avoid cracking or itching but not wet (from urine, BM's, sweat, drainage, etc.); Protect it from extreme cold or heat with protective clothing, sunscreen, etc.; Protect it from pressure by remaining in the same position too long, wearing restrictive clothing or jewelry, etc.; Protect it from injury using safe practices with equipment, sharp objects or when doing activities (helmets, pads, eye wear, etc.); Talk to the care team about other things you can do to prevent infections and maintain good skin integrity.

**Point: Prevent/Minimize Transmission: Modes of Transmission (Resolved)**

Description:  
Prevent/Minimize Transmission: Modes of Transmission

**08/17/2017 - Admission (Discharged) in PACU (continued)****Patient Education (continued)****Patient Friendly Description:**

Infections are passed by contact with someone or something that is infected, through droplets where infection is spread by respiratory secretions (these infections don't remain infectious for long distances spread by sneezing, coughing), or through the air (infections that can live and travel over long distances when in the air). You can minimize your exposure to illnesses by using good hand washing with soap and water or hand sanitizer before and after being around someone who is ill or touching things in their area, before eating, after using the restroom, after using shopping carts, or after coughing or sneezing into a tissue. To prevent passing illnesses on to others also use good hand washing as listed above, use tissues or the bend of your arm (not your hand) when sneezing or coughing, dispose of used tissues into the trash, don't let others use your drinking glass (bottle or can), silverware, dishes, etc., and don't go out into public places, or if necessary consider using a mask. Talk to the care team for more information on the transmission of infections and what precautions you need to take if you have or are around someone with an infection that could be contagious.

**Point: When and How to Take A Temperature (Resolved)**

Description:  
When and How to Take A Temperature

**Patient Friendly Description:**

Body temperature is a measure of how well your body can make and get rid of heat. You can take your temperature by using a thermometer. If purchase a newer digital/electronic thermometer, please follow instructions the came with it. There are specific

types to use in different parts of the body. To take a temperature by mouth (orally), start by putting the thermometer under your tongue, a little to one side of the center. Close your lips tightly around it. Leave it there for as long as the instructions say. Remove the thermometer and read it. To take an armpit (axillary) temperature, put the thermometer under your arm. The tip should be in the center of the armpit. Press your arm against your body. Leave the thermometer there for as long

as the instructions say. Remove the thermometer and read it. An armpit temperature may be as much as 1°F lower than an oral one. When done taking a temperature always remember to clean the thermometer with cool, soapy water and rinse it off before you put it away.

**Point: Prevent/Minimize Transmission: Measures to Avoid Cross Contamination (Resolved)**

Description:  
Prevent/Minimize Transmission: Measures to Avoid Cross Contamination

Patient Friendly Description:  
When you have an infection or are trying to prevent one, you need to be aware of possible cross-contamination, which is when an infection is transferred from one thing to another. If you touch something infected (body fluids, used tissues, drinking glasses, etc.) and then touch something else, that other object becomes "cross contaminated" and can spread the infection if touched. Be aware of your environment, dispose of used tissues, laundry, bandages, etc. appropriately and wash hands frequently and follow all other precautions as indicated by the care team.

**Point: Personal Hygiene Measures (Resolved)**

Description:  
Personal Hygiene Measures

Patient Friendly Description:  
To prevent infection keep your skin clean and free of sweat, urine, and bowel movements, changing underwear, pads or bed sheets frequently when wet or soiled. If bowel or bladder control is an issue consider using disposable pads that can protect bed sheets from moisture and can be changed whenever wet or soiled much easier than the bed sheets. Be sure to clean places where the skin folds over itself. Wash skin with gentle soap and warm (not hot) water. Don't scrub the skin too hard. Be sure to dry off thoroughly. Use a barrier cream or lotion to protect the skin from moisture. Use moisturizing cream or lotion to keep the skin from drying out or cracking.
