(IF APPLICATION HAS BEEN FILED, CASE NUMBER
MUST BE INDICATED REGARDLESS OF DATE OF INJURY)

SUBPOENA DUCES TECUM

(When records are mailed, identify them by using the
above Case No. or attaching copy of the subpoena.)

NO PERSONAL APPEARANCE NECESSARY

Please refer to the In Bold summary description
found below to identify the documents requested by
this Subpoena

*The People of the State of California Sends Greetings to: **Custodian Of Records***

KFH / SCPMG

WE COMMAND YOU to appear before A NOTARY PUBLIC

At ONTELLUS, 27450 Ynez Road, Suite 300, Temecula, CA 92591-4680

On the 10th day of October, 2022, at 9 o'clock A. M. to testify in the above-entitled matter and to bring with you and
produce the following described documents:

PLEASE PROVIDE ANY AND ALL ELECTRONIC AND PAPER MEDICAL RECORDS FROM DOB: 05/22/1971 TO PRESENT. *MRN: 4779300*****

(Do not produce X-rays unless specifically mentioned above.)

For failure to attend as required, you may be deemed guilty of a contempt and liable to pay to the parties aggrieved all losses and amages
sustained thereby and forfeit one hundred dollars in addition thereto.

This subpoena is issued at the request of the person making the declaration on the reverse hereof, or on the copy which is served herewith.

Date 09/24/2022

**WORKERS' COMPENSATION APPEALS BOARD
OF THE STATE OF CALIFORNIA**

Workers Compensation Judge

**Records copied and submitted to the designated
court by ONTELLUS will be deemed as full
compliance with this Subpoena.**

FOR INJURIES OCCURING ON OR AFTER JANUARY 1,
1990 AND BEFORE, JANUARY 1, 1994:

If no Application for Adjudication of Claim has been filed, a declaration
under penalty of perjury that the Employee's Claim for Workers'
Compensation Benefits (Form DWC-1) has been filed pursuant to Labor
Code Section 5401 must be executed properly.

**SEE REVERSE SIDE
[SUBPOENA INVALID WITHOUT DECLARATION]**

CC: NATALIA FOLEY ESQ
295923

Order Ref #: 1920416

You may fully comply with this subpoena by mailing the records described (or authenticated copies, Evid Code 1561) to the person and place stated
above within ten (10) days of the date of service of this subpoena.

This subpoena does not apply to any member of the Highway Patrol, Sheriff's Office or City Police Department unless accompanied by notice from
this Board that deposit of witness fee has been made in accordance with Government Code 68097.2 et seq.

DECLARATION FOR SUBPOENA DUCES TECUM

Case No.: ADJ16540224

STATE OF CALIFORNIA, County of RIVERSIDE

The undersigned states:

That he / she is (one of) the representative(s) for the defendant in the action captioned on the reverse hereof.

That KFH / SCPMG has in his / her possession or under his / her control the documents described on the reverse hereof. That said documents are material to the issues involved in the case for the following reason:

To determine present and/or past physical condition; nature, extent and duration of sickness; injury, disability and/or necessity of further treatment.

Declaration for Injuries on or After January 1, 1990 and before January 1, 1994

That an Employee's Claim for Workers' Compensation Benefits (DWC Form 1) has been filed in accordance with Labor Code Section 5401 by the alleged injured worker whose records are sought, or if the worker is deceased, by the dependant(s) of the decedent, and that a true copy of the form filed is attached hereto. (Check Box if applicable and part of declaration below, See instructions on front of subpoena.)

I declare under penalty of perjury that the forgoing is true and correct.

Executed on 09/24/2022, at Temecula, California

PEPPER SMITH, KFH / SCPMG

Order Ref #: 1920416

DECLARATION OF CUSTODIAN OF MEDICAL RECORDS

Patient Name: PEPPER SMITH REF# 1920416
Date of Birth: 05/22/1971 Kaiser Permanente Medical Record Number: 4779300
Plaintiff: PEPPER SMITH Defendant: STATE OF CALIFORNIA BETTY T YEE STATE CONTROLLER
Case or Reference Number: ADJ1640224

Says as follows (checked sections apply):

The declarant is the duly authorized Custodian of Medical Records for **Kaiser Foundation Hospital-Southern California and Southern California Permanente Medical Group**, and has the authority to certify said records.

The copy or original of the medical records attached to this declaration is a true copy of the records described in the subpoena duces tecum, court order, or other request, that are permitted to be disclosed by law, and include the following record types:

Electronic: Medical office Hospital Mental health Addiction medicine Pharmacy

Paper: Medical office Hospital Mental health Addiction medicine

These records are:

Limited to the dates, or date range of: 05/22/1971 - PRESENT

Limited to specific provider(s) or department type: _____

Paper records have been ordered to be retrieved from storage and are pending.

The following requested records that are permitted to be disclosed by law do not exist; have been destroyed;

could not be located after an exhaustive search:

Electronic Records: Medical office Hospital Mental health Addiction medicine Pharmacy

Paper: Medical office Hospital Mental health Addiction medicine

Paper records may exist. The following paper records that were requested, and are permitted to be disclosed by law may exist but were not produced:

Paper: Medical office Hospital Mental health Addiction medicine

A new request is not needed to obtain these paper records. Just **send an email to address shown above within 30 days of the date of this declaration**, and provide the specific date range of the required paper records. If you wait more than 30 days after the date of this declaration to request any paper records, you must submit a new request with a \$15 payment.

The records were prepared by the personnel of the hospital, staff physicians, or persons acting under the control of either, in the ordinary course of business at or near the time of the act, condition, or event.

Pursuant to state and federal law, records which contain information pertaining to the treatment of inpatient psychiatric, chemical dependency, and HIV testing are subject to strict confidentiality and may not be disclosed in response to a routine subpoena. Such material may be obtained only upon a special court order or specific written authorization that meets federal or state guidelines.

I, Tracy Brown, declare under penalty of perjury that the foregoing is true and correct.

Signature of Declarant

Date: 10/10/2022

Patient**Kaiser Permanente Disclosure of Patient Medical Information**

Kaiser Permanente documents patient medical record information in a Federally certified electronic medical record.

The output contained in this file is one or more of the following:

- A true and accurate copy of the requested patient medical record information for the timeframe requested as authorized by the patient or allowed by law or regulation
- If a medical certification form was requested, we may have substituted relevant medical records in lieu of form completion
- We may have also substituted a standardized electronic form, generated from our certified electronic medical record in lieu of form completion

State and federal law permit the use of electronic signatures (e-signatures) and electronic records in connection with transactions between parties.

- Medical certification forms and electronic records that are signed using electronic signatures can be audited and validated to prevent fraud
- The relevant laws provide that electronic signatures are as legally valid and as legally acceptable as wet signatures

This record output was generated on 10/10/22 and certified by Kaiser Permanente Release of Medical Information

Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.7	0.6 - 1.1 mg/dL	—	305
GLOMERULAR FILTRATION RATE	>89-NB	mL/min	—	305

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. * GFR Ranges * GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

Procedure Orders
1. US PELVIS, NON-OB REAL TIME W IMAGE DOCUMENTATION, COMPLETE [1554006193] ordered by Stahl, Jerusha Emily (M.D.) at 12/04/07 1453

12/04/2007 - Office Visit in INTERNAL MEDICINE GREEN1 (continued)**Clinical Notes (continued)**

PELVIC ULTRASOUND - 1/2/08

Please note this study is not monitored by a radiologist and is presently submitted for interpretation.

Using the bladder as an acoustical window, multiple images are made of the patient's pelvis. Additionally, with the patient's consent, a female technologist performs an endovaginal exam.

The uterus measures about 11 cm x 4.5 cm. There are areas of altered echo texture. The endometrium is 1.3 cm.

There is some free fluid seen in the pelvis. There are small cysts in the cervix.

There is a 3.4 cm cyst seen in a 4.6 cm right ovary with the left ovary at 2.9 cm.

IMPRESSION

1. 11 cm uterus with some areas of altered echo texture. The endometrium is 1.3 cm.
2. 3.4 cm cyst seen in a 4.6 cm right ovary.
3. Multiple cysts evident in the cervix.

Report put on RIS on 1/3/08.

SIGNIFICANT REPORT FAXED TO DR. JERUSHA STAHL

Electronically signed by Schneider, Merrick Tobin (M.D.) at 1/4/2008 8:07 AM

HPI

Pepper Smith is a 36 year old female with cc of PHYSICAL EXAM, ANNUAL

Patient Active Problem List:

OBESITY (BMI 30-39.9) (278.00C)

No active medications on file as of 12/04/2007

Subjective

L Ear bothering her for about 3 months - pain on outer ear, sore inside ear

No fevers/chills, no ear discharge - only hurts if touches ear, or uses q-tip, does not hurt without touching ear

Otherwis here for physical - last pap in 05, was nml - had US pelvic at that time, small cyst on R ovary - had Alittle pain at that time, now with same pain - forpast month, on andoff, not assoc with BM or eating- whole lower pelvic area is sore and pressure when she sits/stands - lasts about 5 min, then goes away

ROS**PE Text**

 Collected by: PB0 01/02/08 1547 Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.7	0.6 - 1.1 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89-NB	mL/min	—	956

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. * GFR Ranges *
 GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29
 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality). IDMS-calibrated. See LabNet for Details.

PELVIC ULTRASOUND - 1/2/08

Please note this study is not monitored by a radiologist and is presently submitted for interpretation.
Using the bladder as an acoustical window, multiple images are made of the patient's pelvis. Additionally, with the patient's consent, a female technologist performs an endovaginal exam.
The uterus measures about 11 cm x 4.5 cm. There are areas of altered echo texture. The endometrium is 1.3 cm.
There is some free fluid seen in the pelvis. There are small cysts in the cervix.
There is a 3.4 cm cyst seen in a 4.6 cm right ovary with the left ovary at 2.9 cm.

IMPRESSION

1. 11 cm uterus with some areas of altered echo texture. The endometrium is 1.3 cm.
2. 3.4 cm cyst seen in a 4.6 cm right ovary.
3. Multiple cysts evident in the cervix.

Report put on RIS on 1/3/08.

Hello Ms Smith

Your pelvic ultrasound does show a cyst in your right ovary - are you still having pain? I am going to forward the results of your ultrasound to a gynecologist to see if they think anything needs to be done about the cyst. Please let me know if you are still having the same pain.

Take care,

Jerusha Stahl, MD

Hello Pepper,

I discussed your ultrasound with a gynecologist who says that based on the size of the cyst (less than 5cm) it is not concerning, but that if you are having pain, you can consider using birth control pills which will help to regulate your period and decrease cysts from developing. If you feel the pain is bad and would like to take birth control pills, let me know and I will prescribe them. If not, you should just have a follow-up visit in GYN in 3-6 months to see how you are doing.

Take care,
Jerusha Stahl, MD

Eyes: Negative for blurred vision and double vision.
Cardiovascular: Negative for chest pain.
Respiratory: Is not experiencing shortness of breath or wheezing.
Gastrointestinal: Negative for heartburn, abdominal pain, diarrhea and constipation.
Genitourinary: Negative for dysuria, urgency and frequency.
Musculoskeletal: Positive for myalgias and back pain.

Physical Exam

BP 135/80 | Pulse 92 | Temp (Src) 97.6 °F (36.4 °C) (Tympanic) | Ht 1.6 m (5' 3") | Wt 106.595 kg (235 lb) |
LMP 08/16/2009
Gen well appearing in nad
HEENT MMM PERRL EOMI OP clear
Neck supple no lymphadenopathy - + right sided trap spasm
Lungs clear b/l
Heart RRR s1,s2 no murmur
Abd soft ntn +BS
Ext no c/c/e
Breast large pendulous breasts
Pelvic normal exam, no masses, no cmt, no discharge

Assessment and Plan:

09/04/2009 - Office Visit in INTERNAL MEDICINE GREEN1 (continued)

Clinical Notes (continued)

PHYSICAL EXAMINATION, COMPLETE OR PARTIAL

Note:

SCREENING

Note:

- Plan: HIV 1/2 ANTIBODY
- SYPHILIS SCREEN, EIA
- CHLAMYDIA/GC, SWAB AMPLIFIED PROBE TECHNIQUE
- CBC NO DIFF
- ALT, SERUM
- ELECTROLYTES, SERUM
- CREATININE, SERUM
- BUN, SERUM
- TSH
- PAP TEST
- HPV COTEST (> 29 YRS)
- LIPID PANEL
- GLUCOSE, FASTING

MUSCLE SPASM

Note:

- Plan: CYCLOBENZAPRINE 10 MG ORAL TAB

MACROMASTIA

Note: discussed upper back pain likely from large breasts and exercisng - ensure she is wearing a very supportive bra, may need to order online as has very large breasts

Orders Placed This Encounter

- HIV 1/2 ANTIBODY
- SYPHILIS SCREEN, EIA
- CHLAMYDIA/GC, SWAB AMPLIFIED PROBE TECHNIQUE
- CBC NO DIFF
- ALT, SERUM
- ELECTROLYTES, SERUM
- CREATININE, SERUM
- BUN, SERUM
- TSH
- PAP TEST
- HPV COTEST (> 29 YRS)
- LIPID PANEL
- GLUCOSE, FASTING
- CYCLOBENZAPRINE 10 MG ORAL TAB

CREATININE, SERUM [1554006216]

Resulted: 09/05/09 0435, Result status: Final result

Order status: Completed
Collected by: RDB 09/04/09 1025Filed on: 09/29/22 1038
Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.7	0.6 - 1.1 mg/dL	—	956
GLOMERULAR FILTRATION RATE	>89-NB	mL/min	—	956

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. * GFR Ranges * GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality). IDMS-calibrated. See LabNet for Details.

--	--------------------	--

Hi Pepper,
Wanted to let you know that all your labs were normal, and HIV, syphilis and chlamydia and gonorrhea were all negative. The pap is still pending and may take a few days. I wil let you know when i get the results.
Take care,
Jerusha Stahl, MD

History:

Patient presents with:
PAIN - in the neck and back

Pepper Smith is a 38 year old female with cc of PAIN

Patient Active Problem List:

OBESITY (BMI 30-39.9) (278.00C)

No active medications on file as of 10/07/2009

Subjective

Pt with pain in neck and back

Discussed at physical last month - very large breasts, had been working out more, to make sure she wears supportive bra

Muscle relaxant given at that time

Did get better, but then when goes to sleep seems to be worse

Has good mattress, doesn't think its that

Neck - down into shoulder and down into her arm

Took flexeril last night - didn't really help much

If still is ok, but then if moves the pain comes back

History Reviewed:

I have reviewed the Medical/Surgical history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever and chills.

Musculoskeletal: Positive for myalgias, neck pain and back pain.

10/07/2009 - Office Visit in INTERNAL MEDICINE GREEN1 (continued)

History:

Patient presents with:
NECK PAIN - and left shoulde in pain

Pepper Smith is a 38 year old female with cc of NECK PAIN

10/19/2009 - Office Visit in INTERNAL MEDICINE GREEN1 (continued)

Clinical Notes (continued)

Patient Active Problem List:

OBESITY (BMI 30-39.9) (278.00C)

Active Medications as of 10/19/2009:

IBUPROFEN 800 MG ORAL TAB, Sig: TAKE 1 TABLET ORALLY EVERY 6 HOURS AS NEEDED FOR PAIN

Subjective

Pt with neck and left shoulder pain - seen on 10/7 with sxs, PT referral in place and has appt in a week
Received toradol injection last time, given ibuprofen and flexeril
Reports did have some relief last week - now pain is on the left side
Went out over the weekend and did wear a less supportive bra, las large breasts and often has uper back pain

History Reviewed:

I have reviewed the Medical/Surgical history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever and chills.

Musculoskeletal: Positive for myalgias and neck pain.

Physical Exam

BP 128/97 | Pulse 83 | Temp (Src) 97.4 °F (36.3 °C) (Tympanic) | Ht 1.6 m (5' 3") | Wt 106.142 kg (234 lb)
well appearing female in no acute distress
+ spasm in left trap

Assessment and Plan:

MUSCLE SPASM (primary encounter diagnosis)

Note: PT appt next week, advised even if feeling better to keep appt

Plan: CYCLOBENZAPRINE 10 MG ORAL TAB

KETOROLAC 60 MG/2 ML IM SOLN

PHYSICAL THERAPY INITIAL EVALUATION

Referring Provider: Jerusha E. Stahl, M.D.

Referring Diagnosis: Neck strain/sprain. Right side neck and shoulder spasm in trapezius.

Time in: 3:20 pm (patient arrived late, agrees to time remaining)

Time out: 3:57 pm

TTT: 37 minutes (Eval time 23, Treatment time 14)

SUBJECTIVE

Pepper Smith is a 38 year old female who presents today with upper back that can radiate up into the neck and upper traps that started 2-3 months ago. Patient states the right side is more painful than the left. Patient states that when she aggravates it, the pain usually stays for about 2 days. Patient states the pain is worse with sleeping and in the morning, and it subsides by about 10-11 am. Patient sleeps on her stomach with her head resting on her hands. Patient states she has the pain about every other day. Patient reports she feels like she is stiffening up more because she is scared of moving and causing the pain. Pt denies signs or symptoms of numbness and tingling or upper extremity pain.

Patient rates pain at 8/10. Patient describes pain as stiff, sharp.

Aggravating factors: reaching under bed, sleeping, sitting and slouching, sitting in car going over dips in street, reaching, lifting dog (15 lb).

Easing Factors: 2 muscle relaxers, heating pad, being still, lying flat on back.

Mechanism of Injury: insidious onset.

10/26/2009 - Allied Health/Nurse Visit in PHYSICAL THERAPY (continued)**Clinical Notes (continued)**

Prior history of related problems: none, had carpal tunnel 7-8 years ago, no flare ups since having surgery for a release.

Occupation: Drive examiner at DMV.

Activities: Walking dog 2 times per week 10 minutes, playing with dog. Started going back to gym-treadmill, elliptical 4-5 months ago but has not been able to go for the past month due to back pain.

Functional Limitations: sitting in car at work- getting in and out and going over bumps ar painful, doing laundry without back pain, reaching to side without back pain, lifting dog without back pain, sleeping without pain.

No past medical history on file.

Imaging: none

OBJECTIVE

Posture: Large breasted woman with forward head, rounded shoulder posture, dowagers hump, flat thoracic spine, mild downward rotation of bilateral scapulae, right sidebend.

AROM Thoracic spine (all painfree)

Flexion: 75%

Extension: 65%

Sidebend Right:65%

Sidebend Left: 60%

Rotation Right: 70%

Rotation Left: 75%

AROM Cervical spine

C/S Flexion: 40°

Extension: 40°-pain right cervical spine

Sidebend Right:30°

Sidebend Left: 30° pain on right thoracic spine

Rotation Right: 60° -pain on right thoracic spine

Rotation Left: 60°

AROM:	Right	Left
Shoulder Flexion:	170°	170°
Shoulder Abduction:	170°	170°
HBB:	T9 -pain	T9
HBH:	T3 -mild pain	T3

MMT:	Left	Right
Deltoid:	4/5	4/5-pain
C5(biceps)	4/5	4/5
C7(Triceps)	4/5	4/5
Mid trap	4/5	4/5-pain
Lower trap	3+/5	3+/5-pain
Rhomboid	4/5	4/5-pain

Palpation: tender to palpation right upper trap, levator scap, thoracic spine paraspinals, mild tender to palpation right cervical spine paraspinals.

Special Tests: Spurling's test TBD C/S distraction not done

Joint Mobility Testing: hypomobile cervicothoracic junction, T3-5 with right unilateral PA's, T6-9 with left unilateral PA's..

10/26/2009 - Allied Health/Nurse Visit in PHYSICAL THERAPY (continued)

Clinical Notes (continued)

Treatment:

- Right T3-4 unilateral PA's grade III 3 x 30 each
- Upper trap stretch for home exercise program x 30 seconds
- Levator scap stretch for home exercise program x 30 seconds

Response to Treatment: Patient has mild increase in right upper thoracic spine pain after manual therapy. Patient states upper trap and levator scap stretch help ease her pain.

Patient Instructions: Given handouts for exercises as described for home exercise program.

ASSESSMENT

Patient presents with back pain with decreased thoracic spine joint mobility, range of motion and postural impairments. Pt would benefit from skilled PT to address above impairments. Rehab Potential = average.

PLAN

Patient to attend PT once a week for 10 weeks for treatment to include joint mobilizations, STM, therex, postural/movement re-education, and modalities PRN.

Patient agrees to plan-of-care.

Re-evaluation to be performed approximately: 1/4/10

Goals

1. Independent with home exercise program - 1 week.
2. Patient will be able to lift 15 lb without back pain in order to lift her dog - 5 weeks.
3. Patient will be able to complete a day at work with <5/10 back pain - 10 weeks.

Desiree Zavala PT, DPT

PHYSICAL THERAPY**DISCHARGE OUTPATIENT SUMMARY**

Diagnosis: Neck strain, shoulder spasm

Referring physician: Dr. Jerusha E. Stahl, MD

The patient has been seen by Physical Therapy 1 times; from 10/26/2009 to 10/26/2009 for therapy that consists of joint mobilizations, manual therapy, home exercise program, patient education therapeutic exercise.

At time of last treatment, the patient's functional status was fair+/good-.

Reason for discharge: Patient has not returned for a follow up visit within 60 days of last physical therapy session.

Goals met: Status unknown as patient has not returned for a follow-up visit.

Goals not met. Reason: Status unknown as patient has not returned for a follow-up visit.

Patient did not show and/or cancelled x 1 visits.

Comments: Patient discharged from physical therapy as patient has not returned for a follow up visit within 60 days of last appointment.

10/26/2009 - Allied Health/Nurse Visit in PHYSICAL THERAPY (continued)**Clinical Notes (continued)****Recommendation for follow-up: Return to physician if condition worsens or fails to improve.****Desiree Zavala PT, DPT**

Strain Shoulder, Trapezius Muscle [840.8 (ICD-9-CM)]

Patient Instructions

Ergonomic evaluation of work place.

Ice 15 mint 3-4 times per day, alternate with heat. May try icy hot patches.

Return in 1-2 weeks if persistent or earlier if inadequate pain control with medications or worsening.

Your Kaiser Permanente Care Instructions

Neck Strain: After Your Visit

Your Care Instructions

You have strained the muscles and ligaments in your neck. A sudden, awkward movement can strain the neck. This often occurs with falls or car accidents or during certain sports. Everyday activities like working on a computer or sleeping can also cause neck strain if they force you to hold your neck in an awkward position

11/04/2010 - Office Visit in URGENT CARE - WEST LA (continued)

Patient Instructions (continued)

for a long time.

It is common for neck pain to get worse for a day or two after an injury, but it should start to feel better after that. You may have more pain and stiffness for several days before it gets better. This is expected. It may take a few weeks or longer for it to heal completely. Good home treatment can help you get better faster and avoid future neck problems.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. Its also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

- If you were given a neck brace (cervical collar) to limit neck motion, wear it as instructed for as many days as your doctor tells you to. Do not wear it longer than you were told to. Wearing a brace for too long can make neck stiffness worse and weaken the neck muscles.
- Put ice or a cold pack on your neck for 10 to 20 minutes at a time. Try to do this every 1 to 2 hours for the next 3 days (when you are awake) or until the swelling goes down. Put a thin cloth between the ice and your skin.
- Take pain medicines exactly as directed.
 - If the doctor gave you a prescription medicine for pain, take it as prescribed.
 - If you are not taking a prescription pain medicine, ask your doctor if you can take an over-the-counter medicine.
 - Do not take two or more pain medicines at the same time unless the doctor told you to. Many pain medicines have acetaminophen, which is Tylenol. Too much acetaminophen (Tylenol) can be harmful.
- Gently rub the area to relieve pain and help with blood flow. Do not massage the area if it hurts to do so.
- If your neck is swollen, avoid things that might make swelling worse, such as hot showers, hot tubs, hot packs, and drinks that contain alcohol.
- After 2 or 3 days, if your swelling is gone, apply a heating pad set on low or a warm cloth to your neck. This helps keep your neck flexible. Some doctors suggest that you go back and forth between hot and cold. Put a thin cloth between the heating pad and your skin.
- Do not do anything that makes the pain worse. Take it easy for a couple of days. You can do your usual activities if they do not hurt your neck or put it at risk for more stress or injury.
- Try sleeping on a special neck pillow. Place it under your neck, not under your head. Placing a tightly rolled-up towel under your neck while you sleep will also work. If you use a neck pillow or rolled towel, do not use your regular pillow at the same time.
- To prevent future neck pain, do exercises to stretch and strengthen your neck and back. Learn how to use good posture, safe lifting techniques, and proper body mechanics.

When should you call for help?

Call 911 anytime you think you may need emergency care. For example, call if:

- You lose bladder or bowel control.
- You have weakness in your arms or legs.

Call your doctor now or seek immediate medical care if:

11/04/2010 - Office Visit in URGENT CARE - WEST LA (continued)**Patient Instructions (continued)**

- You have new pain, numbness, or tingling in your arms, hands, or legs.

Watch closely for changes in your health, and be sure to contact your doctor if:

- Your neck pain gets worse.
- Your neck pain is not better after 1 week. It may take longer for the pain to go away completely, but it should feel at least a little better.

Hello Dr. Stahl,

I hope all is well. I have an appointment with you on the 28th, however I had the day off but now I have to work in the morning. Is it possible for me to come anytime after 12pm. If not I will reschedule. Just let me know, I just discovered you have left messages here for me, so I will be sure to check back here for now on. Thanks so much and Happy New year!

Patient presents with:

FOLLOW UP ROUTINE - and chest pain , request blood test

Pepper Smith is a 39 year old female with cc of FOLLOW UP ROUTINE

Patient Active Problem List:

OBESITY (BMI 30-39.9) (278.00C)

No active medications on file as of 03/24/2011

Subjective

Pt here for physical exam

C/o chest pain

-shocks of pain in her mid chest - once bad and went to mid back -

Happening for past 3 weeks here and there - 2x per week

Just at rest they come on

Wt Readings from Last 3 Encounters:

03/24/2011 : 110.678 kg (244 lb)

11/12/2010 : 111.041 kg (244 lb 12.8 oz)

10/19/2009 : 106.142 kg (234 lb)

Estimated Body mass index is 43.22 kg/(m²) as calculated from the following:

Height as of this encounter: 5' 3"(1.6 m).

Weight as of this encounter: 244 lb(110.678 kg).

Has been walking - has thought about lindora or going back to weight watchers

Hasn't been doing any major exercise - walks at lunch and walks her dog

Also feeling pulsating HA when in bright light - used to deal with migraines - HA lasts only 15-20 minutes-
not so bad, nothing like used to have in the past

Would like to get breast reduction - can't find bras to fit her, having back pain from them

Past Surgical History:

LIGATION OF FALLOPIAN TUBE

Review of patient's family history indicates:

Glaucoma Father
COPD Father

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.8	0.6 - 1.1 mg/dL	—	956
GLOMERULAR FILTRATION RATE	80-NB	mL/min	—	956

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. * GFR Ranges * GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality). IDMS-calibrated. See LabNet for Details.

Hi Pepper,

Overall your labs look very good except for that your vitamin D level came back very low. In order to bring it up, I'd like you to take a prescription strength vitamin D (ordered in the pharmacy) once a week for 3 months, along with daily vitamin D of 1000 units which you can buy over the counter. You should repeat the level in 3 months.

Take care,
Jerusha Stahl, MD

Thank you so much. So you called the order into the pharmacy or do I just ask for it? Just to let you know I have been eating right since our appointment. I now walk at work and the dog after work. I've been baking and George foremaning everything and I have my appointment on the 11th for the program. So we shall see.

Thanks,
Pepper

Clinical Notes (continued)

Patient presents with:
ANKLE PAIN - left one

Pepper Smith is a 40 year old female with cc of ANKLE PAIN

Patient Active Problem List:
SEVERE OBESITY, BMI 40-44.9, ADULT (504038)
VITAMIN D DEFICIENCY (268.9A)

No active medications on file as of 06/02/2011

Subjective

Pt c/o left ankle pain- started last night when took a nap after work - felt pain on outer part of ankle
Walked fast yesterday in shoes with a small heel
Took some advil, and still with pain - can walk but is limping

Estimated Body mass index is 43.40 kg/(m²) as calculated from the following:

Height as of this encounter: 5' 3"(1.6 m).
Weight as of this encounter: 245 lb(111.131 kg).

BP 126/81 | Pulse 82 | Temp(Src) 97.4 °F (36.3 °C) (Tympanic) | Ht 1.6 m (5' 3") | Wt 111.131 kg (245 lb) |
LMP 05/15/2011

well appearing female in no acute distress
Left ankle with no swelling, tender to palpation over lateral edge behind lat malleolus
Mildly decreased flex and ext due to pain
No erythema

Assessment and Plan:

TENDONITIS OF ANKLE (primary encounter diagnosis)
Note: rest, ice, elevate, nsaid, TID for a week - air cast rx given
Follow up if not improving as expected

No orders of the defined types were placed in this encounter.

History Reviewed:

I have reviewed the Medical/Surgical and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

RE: My Ankle

From	To	Sent
Pepper Smith	Jerusha Emily (M.D.) Stahl, M.D.	6/17/2011 9:53 AM

Thank you! I will stay off it this weekend. I will go to the pharmacy this evening after work.

Thanks again,
Pepper Smith

----- Message -----

From: JERUSHA EMILY STAHL MD
Sent: 06/17/2011 8:00 AM
To: Pepper Smith
Subject: RE: My Ankle

The best thing really is to let it rest, and definitely use the soft cast. I will order something stronger for the evening, but remember, the only way for it to heal is to rest it!

Take care,
Jerusha Stahl, MD

06/14/2011 - Patient Message in INTERNAL MEDICINE GREEN1 (continued)**Messages (continued)****RE: My Ankle**

From Jerusha Emily (M.D.) Stahl, M.D. Last Read in kp.org 3/15/2014 5:18 PM by Pepper Smith	To Pepper Smith	Sent and Delivered 6/17/2011 8:00 AM
--	--------------------	---

The best thing really is to let it rest, and definitely use the soft cast. I will order something stronger for the evening, but remember, the only way for it to heal is to rest it!

Take care,
Jerusha Stahl, MD

My Ankle

From Pepper Smith	To Jerusha Emily (M.D.) Stahl, M.D.	Sent 6/14/2011 12:17 PM
----------------------	--	----------------------------

Hello Dr. Stahl:

I hope all is well. I'm hanging in there with my ankle. Some days are better than others, depending on how I spent my day. I wore my sneakers and the brace all last week and this weekend I wore sandals and now I'm paying for it. They told me in Orthopedics to come back for the soft cast, so I'm going to go there tomorrow at lunchtime. The Motrin is helping during the day but at night when I settle down it tends to hurt more, can I have something stronger to take for the evenings? I guess it's not healing like I would want because I haven't stopped walking but I'm scared if I do I won't get back in the groove.

Thanks
Anything you can do or recommend I will appreciate.
Pepper Smith

Subject: Regarding Breast Reduction Referral

Hello I hope all is well, I was trying to schedule an appointment with you to discuss my breast reduction options. I will be on Vacation starting 11/21/11 thru 12/02/11 however you had no appointments available during this time. If you can get me in I'd appreciate it. I have been very uncomfortable and my shoulder and back are bothering me more and more. I also have indentation marks on my shoulder from the bra's pulling down on them. I have lost over 10lbs. so I'm not sure if this is why it has increased. Let me know what you can do, I really appreciate it.

My new telephone # is (323)377-1787 in case I need to be contacted.

Thank you!

RE: Regarding Breast Reduction Referral

From Jerusha Emily (M.D.) Stahl, M.D. Last Read in kp.org 11/18/2011 8:01 PM by Pepper Smith	To Pepper Smith	Sent and Delivered 11/17/2011 5:32 PM
---	--------------------	--

Hi Pepper,
 i am going to put a referral in for you. I believe they will want you to lose more weight - they generally would like you to be as close as possible to your ideal body weight

Estimated Body mass index is 43.40 kg/(m²) as calculated from the following:
 Height as of 6/2/11: 5' 3"(1.6 m).
 Weight as of 6/2/11: 245 lb(111.131 kg).

I am sure they will want your BMI under 40, if not under 35. It improves wound healing, and surgical outcomes.
 But i will still have you see them, to evaluate you, and we can go from there.
 I am sorry - i am working in the hospital during the time you have off, that is why i have no appointments available. There should be same day appts with me available from 11/30-12/2 if

11/08/2011 - Patient Message in INTERNAL MEDICINE GREEN1 (continued)**Messages (continued)**

you can get one of them (call to schedule the day before)

Take care,
Jerusha Stahl, MD

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY,NATL OSTEOPOROSIS FDN, K_DOQI) THAT 25-OH
 VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD

01/18/2012 - Office Visit in INTERNAL MEDICINE GREEN1 (continued)**Labs (continued)**

(NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D,25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

What you need to know.

Many Vaccine Information Statements are available in Spanish and other languages. See <http://www.immunize.org/vis> Hojas de Información Sobre Vacunas están disponibles en Español y en muchos otros idiomas. Visite <http://www.immunize.org/vis>

1. Why get vaccinated?

Influenza (“flu”) is a contagious disease.

It is caused by the influenza virus, which can be spread by coughing, sneezing, or nasal secretions. Anyone can get influenza, but rates of infection are highest among children. For most people, symptoms last only a few days. They include:

- fever
- sore throat
- chills
- fatigue
- cough
- headache
- muscle aches

Other illnesses can have the same symptoms and are often mistaken for influenza.

Infants, the elderly, pregnant women, and people with certain health conditions – such as heart, lung or kidney disease or a weakened immune system – can get much sicker. Flu can cause high fever and pneumonia, and make existing medical conditions worse. It can cause diarrhea and seizures in children. Each year thousands of people die from seasonal influenza and even more require hospitalization.

By getting vaccinated you can protect yourself from influenza and may also avoid spreading influenza to others.

2. Inactivated influenza vaccine

There are two types of influenza vaccine:

Inactivated (killed) vaccine, or the “flu shot” is given by injection into the muscle.

Live, attenuated (weakened) influenza vaccine is sprayed into the nostrils. This vaccine is described in a separate Vaccine Information Statement.

01/18/2012 - Office Visit in INTERNAL MEDICINE GREEN1 (continued)

Patient Instructions (continued)

A "high-dose" inactivated influenza vaccine is available for people 65 years of age and older. Ask your healthcare provider for more information.

Influenza viruses are always changing, so annual vaccination is recommended. Each year scientists try to match the viruses in the vaccine to those most likely to cause flu that year.

The 2010-2011 vaccine provides protection against A/H1N1 (pandemic) influenza and two other influenza viruses – influenza A/H3N2 and influenza B. It will not prevent illness caused by other viruses.

It takes up to 2 weeks for protection to develop after the shot. Protection lasts about a year. Some inactivated influenza vaccine contains a preservative called thimerosal. Thimerosal-free influenza vaccine is available. Ask your healthcare provider for more information.

3. Who should get inactivated influenza vaccine?**WHO**

All people 6 months of age and older should get flu vaccine. Vaccination is especially important for people at higher risk of severe influenza and their close contacts, including healthcare personnel and close contacts of children younger than 6 months. People who got the 2009 H1N1 (pandemic) influenza vaccine, or had pandemic flu in 2009, should still get the 2010-2011 seasonal influenza vaccine.

WHEN

Getting the vaccine as soon as it is available will provide protection if the flu season comes early. You can get the vaccine as long as illness is occurring in your community. Influenza can occur at any time, but most influenza occurs from November through May. In recent seasons, most infections have occurred in January and February. Getting vaccinated in December, or even later, will still be beneficial in most years. Adults and older children need one dose of influenza vaccine each year. But some children younger than 9 years of age need two doses to be protected. Ask your healthcare provider. Influenza vaccine may be given at the same time as other vaccines, including pneumococcal vaccine.

4. Some people should not get inactivated influenza vaccine or should wait

- Tell your healthcare provider if you have any severe (life-threatening) allergies. Allergic reactions to influenza vaccine are rare.

-Influenza vaccine virus is grown in eggs. People with a severe egg allergy should not get influenza vaccine.

-A severe allergy to any vaccine component is also a reason not to get the vaccine.

-If you ever had a severe reaction after a dose of influenza vaccine, tell your healthcare provider.

-Tell your healthcare provider if you ever had Guillain-Barré Syndrome (a severe paralytic illness, also called GBS). Your provider will help you decide whether the vaccine is recommended for you.

-People who are moderately or severely ill should usually wait until they recover before getting flu vaccine. If you are ill, talk to your healthcare provider about whether to reschedule the vaccination. People with a mild illness can usually get the vaccine.

5. What are the risks from inactivated influenza vaccine?

A vaccine, like any medicine, could possibly cause serious problems, such as severe allergic reactions. The

01/18/2012 - Office Visit in INTERNAL MEDICINE GREEN1 (continued)

Patient Instructions (continued)

risk of a vaccine causing serious harm, or death, is extremely small. Serious problems from inactivated influenza vaccine are very rare. The viruses in inactivated influenza vaccine have been killed, so you cannot get influenza from the vaccine.

Mild problems:

- soreness, redness, or swelling where the shot was given
- hoarseness; sore, red or itchy eyes; cough
- fever
- aches

If these problems occur, they usually begin soon after the shot and last 1-2 days.

Severe problems:

- Life-threatening allergic reactions from vaccines are very rare. If they do occur, it is usually within a few minutes to a few hours after the shot.
- In 1976, a type of inactivated influenza (swine flu) vaccine was associated with Guillain-Barré Syndrome (GBS). Since then, flu vaccines have not been clearly linked to GBS. However, if there is a risk of GBS from current flu vaccines, it would be no more than 1 or 2 cases per million people vaccinated. This is much lower than the risk of severe influenza, which can be prevented by vaccination.

One brand of inactivated flu vaccine, called Afluria, should not be given to children 8 years of age or younger, except in special circumstances. A related vaccine was associated with fevers and fever-related seizures in young children in Australia. Ask your healthcare provider for more information.

The safety of vaccines is always being monitored. For more information, visit:

http://www.cdc.gov/vaccinesafety/Vaccine_Monitoring/Index.html

and

http://www.cdc.gov/vaccinesafety/Activities/Activities_Index.html

6. What if there is a severe reaction?**What should I look for?**

Any unusual condition, such as a high fever or behavior changes. Signs of a severe allergic reaction can include difficulty breathing, hoarseness or wheezing, hives, paleness, weakness, a fast heart beat or dizziness.

What should I do?

- Call a doctor, or get the person to a doctor right away.
- Tell the doctor what happened, the date and time it happened, and when the vaccination was given.
- Ask your healthcare provider to report the reaction by filing a Vaccine Adverse Event Reporting System (VAERS) form. Or you can file this report through the VAERS website at <http://www.vaers.hhs.gov>, or by calling 1-800-822-7967.

VAERS does not provide medical advice.

7. The National Vaccine Injury Compensation Program

The National Vaccine Injury Compensation Program (VICP) was created in 1986.

01/18/2012 - Office Visit in INTERNAL MEDICINE GREEN1 (continued)**Patient Instructions (continued)**

People who believe they may have been injured by a vaccine can learn about the program and about filing a claim by calling 1-800-338-2382, or visiting the VICP website at <http://www.hrsa.gov/vaccinecompensation>.

8. How can I learn more?

- Ask your provider. They can give you the vaccine package insert or suggest other sources of information.
- Call your local or state health department.
- Contact the Centers for Disease Control and Prevention (CDC):
-Call 1-800-232-4636 (1-800-CDC-INFO) or
-Visit CDC's website at www.cdc.gov/flu

Hi Pepper,

All your labs look good except for you low vitamin D level. Start taking daily 1000 units of vitamin D3, which you can buy over the counter. Recheck your level in 3 months.

Take care,
Jerusha Stahl, MD

Subject: Sinuitis cough and congestion

Hi Dr. Stahl,

I hope all went well with your move to Culver City.

I went to Urgent Care (Cadillac) on Monday because I had coughing, congestion, just at bedtime and real early morning it was bothering me since Thursday of last week. I was hoping it would just go away but I have been suffering so I went in. Dr. Scott diagnosed me with Sinuitis and prescribed me with Ampicillian. However this cough is bothering me, it's non stop, and I feel like I'm recycle (if that makes sense to you) my mucus from my mouth to my throat back and forth. Is there anything else I can take to calm this so I can get through the day and get some sleep at night. Anything you can do I would appreciate it. Today I'm at work but I may be leaving after 1pm so i can be reached at work (323)436-7900 or by cell (323)377-1787. If there is something you can prescribe you can call it into the Cadillac Pharmacy. Thank you!

Procedure Orders

1. XR MAMMOGRAPHY SCREENING BILATERAL, 2 VIEWS EACH BREAST [1554006325] ordered by Stahl, Jerusha Emily (M.D.) at 10/05/12 1114

BILATERAL SCREENING MAMMOGRAM: 5/3/2013

CLINICAL: Baseline mammogram, no family history of breast cancer.

No prior exams were available for comparison.

There are scattered fibroglandular elements in both breasts that could

obscure a lesion on mammography.

No significant masses, calcifications, or other findings are seen in either breast.

IMPRESSION: NEGATIVE

There is no mammographic evidence of malignancy. A routine screening mammogram is recommended within 2 years.

 Comment:
 NEGATIVE FOR INTRAEPITHELIAL LESION OR MALIGNANCY Educational Note: Cervical cytology is a screening test primarily for squamous cancers and precursors and has associated false-negative and false-positive results. Adherence to screening guidelines and follow-up of unexplained clinical signs and symptoms are recommended to minimize false negative results.
