vs.

Target \_\_\_\_\_

Employer/Insurance Carrier/Defendant.

Case No. SIF1965518

(IF APPLICATION HAS BEEN FILED, CASE NUMBER  
MUST BE INDICATED REGARDLESS OF DATE OF INJURY)

**SUBPOENA DUCES TECUM**

(When records are mailed, identify them by using above case number or attaching a copy of subpoena)

Where no application has been filed for injuries on or after January 1, 1990 and before January 1, 1994, subpoena will be valid without a case number, but subpoena must be served on claimant and employer and/or insurance carrier.

See instructions below.\*

*The People of the State of California Send Greetings to:* SCPMG/KFH

WE COMMAND YOU to appear before A Deposition Officer – Med-Legal, LLC

at 955 Overland Ct, Suite 200, San Dimas, CA 91773, Phone 800-244-3495

on the 01/04/22 day of \_\_\_\_\_, at 10:00 o'clock AM., to testify in the above-entitled matter and to bring with you and produce the following described documents, papers, books and records.

**See Attachment for a list of records to be produced subject to this subpoena, to make available for inspection and copying or transmit/transfer electronically.**

(Do not produce X-rays unless specifically mentioned above.)

For failure to attend as required, you may be deemed guilty of a contempt and liable to pay to the parties aggrieved all losses and damages sustained thereby and forfeit one hundred dollars in addition thereto.

This subpoena is issued at the request of the person making the declaration on the reverse hereof, or on the copy which is served herewith.

Date 12/15/21

WORKERS' COMPENSATION APPEALS BOARD  
OF THE STATE OF CALIFORNIA

Secretary, Assistant Secretary, Workers' Compensation Judge

**\*FOR INJURIES OCCURRING ON OR AFTER JANUARY 1, 1990,  
AND BEFORE JANUARY 1, 1994**

If no Application for Adjudication of Claim has been filed, a declaration under penalty of perjury that the Employee's Claim for Workers' Compensation Benefits (Form DWC-1) has been filed pursuant to Labor Code Section 5401 must be executed properly.

**SEE REVERSE SIDE  
[SUBPOENA INVALID WITHOUT DECLARATION]**

You may fully comply with this subpoena by mailing the records described (or authenticated copies, Evid. Code 1561) to the person and place stated above within ten (10) days of the date of service of this subpoena.

This subpoena does not apply to any member of the Highway Patrol, Sheriff's Office or city Police Department unless accompanied by notice from this Board that deposit of the witness fee has been made in accordance with Government Code 68097.2, et seq.

DECLARATION FOR SUBPOENA DUCES TECUM

Case No. SIF11965518

STATE OF CALIFORNIA, County of Los Angeles

The undersigned states: That Med-Legal, LLC has been authorized to obtain records by

Natalia Foley, Esq Workers Defenders Law Group

That he /she is (one of) the attorney(s) of record / representative(s) for the applicant/defendant in the action captioned on the reverse hereof. That SCPMG/KFH

has in his/her possession or under his/her control the documents described on the reverse hereof. That said documents are material to the issues involved in the case for the following reasons:

Based on the information and belief to resolve any dispute in the above referenced case.

Declaration for Injuries on or After January 1, 1990 and Before January 1, 1994

That an Employee's Claim for Workers' Compensation Benefits (DWC Form 1) has been filed in accordance with Labor Code Section 5401 by the alleged injured worker whose records are sought, or if the worker is deceased, by the dependent(s) of the decedent, and that a true copy of the form filed is attached hereto. (Check box if applicable and part of declaration below. See instructions on front of subpoena.)

I declare under penalty of perjury that the foregoing is true and correct

Executed on 12/15/21, at San Dimas, California.

Natalia Foley, Esq

Workers Defenders Law Group

5753 E Santa Ana Cyn Rd Ste G #616

Anaheim, CA 92807

**Records to produce:**

Deponent's file #:

Exclusions (if any):

**Date Range (if any):**

For each injury alleged by the Applicant named on the Subpoena, produce the following:

**A signed "Declaration of Custodian of Records" must accompany the records.**

### Record Copy Request – Medical File(s)

The **entire contents** of **all** files in your possession or under your control, for all dates of injuries or illness or for any purpose, whether industrial or non-industrial, including but not limited to all:

- All documents completed by the applicant to include intake sheets and pain diagrams
- Files
- Charts,
- Reports (which have not been previously served upon the requesting party)
- Notes, writings, and diagrams,
- Forms,
- Printouts,
- Test results,
- Lab results,
- All correspondence and telephone conversation notes (including printouts of all Email and computer notes) regarding this injured person to and from all sources, including but not limited to other medical facilities and doctors, and to and from any representative of any insurance company, employer, investigator and attorneys.
- All documents where "documents" is defined by Evidence Code Section 250 and includes any electronic recording.

**Notice: For Subpoenas of claim files, you are to send the claim file directly to Med-Legal only. Sending the claim file to other than Med-Legal will be considered to be in non-compliance of the subpoena.**

If any of the documents described above that are in your possession or control are not being produced then a detailed list of each withheld document must be included with the records production or listed on your declaration.

Where used, the terms "writing", "record", "document" and other words of similar meaning include (but are not limited to) electronically maintained image files, documents, notes, faxes, emails and other similar types of electronically held information. If the subpoenaed records exist in paper they are to be provided for inspection and copying. If the subpoenaed records exist electronically then they are to be provided either electronically through our Internet portal at [upload.getrecords.com](http://upload.getrecords.com) or on CD.

## DECLARATION OF CUSTODIAN OF MEDICAL RECORDS

Patient Name: CHOWDHUARY, SHERRY REF 22 32251 1  
Date of Birth: 11/29/1963 Kaiser Permanente Medical Record Number: 7877387  
Plaintiff: SHERRY CHOWDHURAY Defendant: TARGET  
Case or Reference Number: SIF11965518

**Says as follows (checked sections apply):**

The declarant is the duly authorized Custodian of Medical Records for **Kaiser Foundation Hospital-Southern California and Southern California Permanente Medical Group**, and has the authority to certify said records.

The copy or original of the medical records attached to this declaration is a true copy of the records described in the subpoena duces tecum, court order, or other request, that are permitted to be disclosed by law, and include the following record types:

Electronic:  Medical office  Hospital  Mental health  Addiction medicine  Pharmacy

Paper:  Medical office  Hospital  Mental health  Addiction medicine

These records are:

Limited to the dates, or date range of: ANY AND ALL

Limited to specific provider(s) or department type: \_\_\_\_\_

Paper records have been ordered to be retrieved from storage and are pending.

The following requested records that are permitted to be disclosed by law  do not exist;  have been destroyed;

could not be located after an exhaustive search:

Electronic Records:  Medical office  Hospital  Mental health  Addiction medicine  Pharmacy

Paper:  Medical office  Hospital  Mental health  Addiction medicine

Paper records may exist. The following paper records that were requested, and are permitted to be disclosed by law may exist but were not produced:

Paper:  Medical office  Hospital  Mental health  Addiction medicine

**A new request is not needed** to obtain these paper records. Just **send an email to address shown above within 30 days of the date of this declaration**, and provide the specific date range of the required paper records. If you wait more than 30 days after the date of this declaration to request any paper records, you must submit a new request with a \$15 payment.

The records were prepared by the personnel of the hospital, staff physicians, or persons acting under the control of either, in the ordinary course of business at or near the time of the act, condition, or event.

Pursuant to state and federal law, records which contain information pertaining to the treatment of inpatient psychiatric, chemical dependency, and HIV testing are subject to strict confidentiality and may not be disclosed in response to a routine subpoena. Such material may be obtained only upon a special court order or specific written authorization that meets federal or state guidelines.

I, Colleen Mckinney, declare under penalty of perjury that the foregoing is true and correct.

## Patient

## Kaiser Permanente Disclosure of Patient Medical Information

Kaiser Permanente documents patient medical record information in a Federally certified electronic medical record.

The output contained in this file is one or more of the following:

- A true and accurate copy of the requested patient medical record information for the timeframe requested as authorized by the patient or allowed by law or regulation
- If a medical certification form was requested, we may have substituted relevant medical records in lieu of form completion
- We may have also substituted a standardized electronic form, generated from our certified electronic medical record in lieu of form completion

State and federal law permit the use of electronic signatures (e-signatures) and electronic records in connection with transactions between parties.

- Medical certification forms and electronic records that are signed using electronic signatures can be audited and validated to prevent fraud
- The relevant laws provide that electronic signatures are as legally valid and as legally acceptable as wet signatures

This record output was generated on 1/4/22 and certified by Kaiser Permanente Release of Medical Information

## Current Medications

## NIFEdipine (PROCARDIA XL/NIFEDICAL XL) 60 mg Oral TR24 SR TAB

Instructions: Take 2 tablets by mouth daily  
Authorized by: Magana, Jose L (M.D.), M.D.      Ordered on: 12/23/2021  
Start date: 12/23/2021      Quantity: 200 tablet  
Refill: No refills remaining

## Atenolol (TENORMIN) 25 mg Oral Tab

Instructions: Take 2 tablets by mouth 2 times a day  
Authorized by: Magana, Jose L (M.D.), M.D.      Ordered on: 12/23/2021  
Start date: 12/23/2021      Quantity: 400 tablet  
Refill: No refills remaining

## Losartan (COZAAR) 50 mg Oral Tab

Instructions: Take 1 tablet by mouth daily for hypertension  
Authorized by: Magana, Jose L (M.D.), M.D.      Ordered on: 11/9/2021  
Start date: 11/9/2021      Quantity: 100 tablet  
Refill: No refills remaining

## lancets (ONETOUCH DELICA PLUS LANCET) 30 gauge Misc Misc

Instructions: Use as directed to test blood sugar. For use with Delica Lancing device  
Authorized by: Magana, Jose L (M.D.), M.D.      Ordered on: 8/17/2021  
Start date: 8/17/2021      End date: 8/17/2023  
Quantity: 200 Each      Refill: 3 refills remaining

## gliPiZIDE (GLUCOTROL XL) 2.5 mg Oral TR24 SR TAB

Instructions: Take 1 tablet orally thirty minutes before dinner. Take by mouth daily as directed. Do Not Miss or Delay Meals.  
Authorized by: Magana, Jose L (M.D.), M.D.      Ordered on: 2/1/2021  
Start date: 2/1/2021      Quantity: 100 tablet  
Refill: 3 refills remaining

## Patient (continued)

## Current Medications (continued)

**metFORMIN (GLUCOPHAGE XR) 500 mg Oral 24hr SR Tab**

Instructions: Take \*1 tablet with breakfast and dinner daily. Take by mouth as prescribed. Do Not Take On an Empty Stomach. Preferably take at the middle or end of the meal.

Authorized by: Magana, Jose L (M.D.), M.D.

Ordered on: 9/10/2020

Start date: 9/10/2020

Quantity: 200

Refill: 3

**Venlafaxine (EFFEXOR XR) 37.5 mg Oral 24hr SR Cap**

Instructions: 1 CAP PO DAILY WITH FOOD

Authorized by: Magana, Jose L (M.D.), M.D.

Ordered on: 7/7/2020

Start date: 7/7/2020

Quantity: 100

Refill: 2

**Methocarbamol (ROBAXIN) 500 mg Oral Tab**

Instructions: 1 TAB PO Q6-8H PRN MUSCLE SPASMS

Authorized by: Magana, Jose L (M.D.), M.D.

Ordered on: 4/14/2020

Start date: 4/14/2020

End date: 4/13/2024

Quantity: 30

Refill: 0

**blood sugar diagnostic (ONETOUCH VERIO TEST STRIPS) Misc Strips**

Instructions: Check your blood sugar 2 times a day (Every morning before breakfast and every evening before dinner)

Authorized by: Magana, Jose L (M.D.), M.D.

Ordered on: 10/30/2019

Start date: 10/30/2019

End date: 8/21/2023

Quantity: 200 Each

Refill: No refills remaining

**ASPIRIN 81 MG ORAL TBEC DR TAB**

Instructions: None Entered

Procedure Orders

1. SCRN MAMMO. [7544749] ordered by Interface, Scal\_Transcription at 01/24/05 0600

<PRE>BILATERAL FIRST EVER SCREENING MAMMOGRAM: 1/24/2005

-  
No prior exams were available for comparison.  
There are scattered fibroglandular elements in both breasts that could obscure a lesion on mammography.  
Benign appearing calcifications are present in the left breast.  
No significant masses, calcifications, or other findings are seen in either breast.

-  
IMPRESSION: BENIGN MAMMOGRAM  
There is no mammographic evidence of malignancy.  
A 1 year screening mammogram is recommended.

-  
Edmond Yang M.D.  
ey/penrad:3/1/2005 09:34:37

-  
Imaging Technologist: Kristin Olivo-Murray, Kaiser Permanente-Fontana

**Components**

Component	Value	Reference Range	Flag	Lab
HGBA1C%	12.1	4.2 - 6.7 %	H <sup>^</sup>	956

## Comment:

HBA1C CANNOT BE USED TO DIAGNOSE OR SCREEN FOR DIABETES OR OTHER DISORDERS OF GLUCOSE TOLERANCE. HBA1C IS BEST USED TO MONITOR BLOOD SUGAR CONTROL IN PATIENTS WITH DIABETES. IDEAL VALUES ARE BELOW 7.0 % AND VALUES >8.0 % SUGGEST THE NEED TO IMPROVE THE BLOOD SUGAR CONTROL TREATMENT PLAN.

## DISCHARGE SUMMARY

-  
DATE OF ADMISSION: 03/19/2006-  
DATE OF DISCHARGE: 03/21/2006-  
ADMITTING DIAGNOSIS:

1. ABDOMINAL PAIN, LIKELY DIABETIC GASTROPARESIS, WITH AN ACUTE GASTROENTERITIS.
2. DIABETES.
3. HYPERTENSION.
4. HYPERLIPIDEMIA.
5. FOLLICULITIS.

-  
DISCHARGE DIAGNOSIS:

1. ABDOMINAL PAIN, RESOLVED.
2. LIKELY DIABETIC GASTROPARESIS.
3. GASTROENTERITIS.
4. HYPERTENSION.
5. LIPIDEMIA.
6. DIABETES.
7. CHRONIC MICROCYTIC ANEMIA LIKELY IRON DEFICIENCY.

-  
CONSULTATIONS: DIABETIC EDUCATION.

-  
HOSPITAL COURSE: This is a 42-year-old female who states that she has had abdominal pain as well as a feeling of fullness with slow passage of food for over a month. For the last two days, she is beginning to have diarrhea as well as increased abdominal pain. She presented to an outside emergency room department where she had a workup for appendicitis. CT scan was negative but was unable to visualize the appendix. The patient was afebrile. She did have a slight white count of 12.2. They were uncomfortable sending her home so they transferred her to Kaiser Riverside for observation, rule out appendicitis. Once the patient presented to Kaiser Riverside, she did have some complaint of pain, periumbilical as well as right lower quadrant pain. No pain with eating. No bloody stools. No fevers or chills, nausea or vomiting.

-  
HOSPITAL COURSE: A CT scan was reviewed with Bo Gyi, M.D. which was negative but was unable to visualize the appendix. The patient remained afebrile throughout hospital course. The patient's white count dropped to 8.5. The patient's hemoglobin was stable at 9.9 for two days. MCV was 70.5. Serum iron was done which showed a low value at 16, total iron-binding capacity was 252. Percent saturation was 6%. Serum ferritin will also be ordered to be followed up as an outpatient. Because there was an initial drop in hemoglobin from the previous hospital, the patient's rectal examination was done which was negative. Guaiac was also negative. Occult stools were sent which were negative x 3. Stool wbc's were negative and other stool tests are pending. Clostridium difficile and cultures will be followed up by the primary doctor. However, this is likely just a viral gastroenteritis.

-  
The patient did well throughout hospital course. At the time of discharge, the patient's pain has completely resolved. She is able to eat without any problems. Regarding her abdominal pain, it has

**03/19/2006 - Clinical Documentation in PASADENA MORD (continued)****Discharge Summary Note (continued)**

now resolved. Regarding her diabetes, she is a poorly controlled diabetic with A1c greater than 12 on last check. Insulin education was obtained. The patient was started on Lantus 12 units q.h.s. as well as adding Actos. Glyburide was discontinued. The patient will continue these medications at home and check her sugars daily. An E referral will be sent for further diabetic education classes.

-  
Concerning hypertension, the patient was on atenolol as well as Maxzide. The Maxzide was discontinued and the patient was started on Prinzide so she would be getting her ACE inhibitor as well. The patient's blood pressure was very well controlled throughout her hospital stay. Electrolytes, BUN and creatinine will be obtained in two weeks.

-  
Regarding her hyperlipidemia, it is stable. Regarding anemia, hemoglobin is stable at 9.9 throughout hospital stay. Iron studies are suggestive of iron-deficiency anemia. Ferritin to be followed up by her primary doctor. We will start the patient on iron studies. The patient does have heavy menstrual cycles. We will send a consult to the OB Department to re-evaluate the patient.

-  
Regarding folliculitis, the patient was given Bactrim b.i.d. This can be followed by her primary care physician in two weeks.

-  
CONDITION ON DISCHARGE: Stable.

## INSTRUCTIONS:

FOLLOW-UP: The patient is to follow up with her primary doctor in two weeks.

DISCHARGE MEDICATIONS: The patient is to continue all medications that she was discharged with.

FOLLOW-UP LABORATORY STUDIES: The patient will have a CBC as well as electrolytes, BUN and creatinine in two weeks. The patient should have a repeat CBC as well as iron studies two months from now. This can be done by the primary doctor regarding the iron-deficiency anemia.

DIET: The patient is to continue a diabetic diet and follow up with diabetic education.

-  
ADDENDUM: On discussing the discharge instructions with the patient, she stated that she is not going to do insulin at this time. She does not want to inject herself. She feels like if she actually tried to follow a diabetic diet, and take her medications properly, she would be able to do better with her sugars. Previously, she was only taking her diabetic medications at half strength. Instead of taking it b.i.d., she was taking it once a day. Therefore, she will continue with the Actos as well as the Glucophage checking her blood sugars daily. If they remain high, greater than 140, then she will add the glyburide which she has at home back on, one pill per day, up to two pills a day if needed. The patient is to follow up with her primary doctor in two weeks regarding her diabetes as well as her laboratory studies which are not yet back. Ferritin was drawn prior to discharge.

## HISTORY AND PHYSICAL EXAMINATION

-  
CHIEF COMPLAINT: Abdominal pain.  
-

HISTORY OF PRESENT ILLNESS: The patient is a 42-year-old obese female, with poorly controlled diabetes, with complaint of abdominal pain, fullness, early satiety for the last month or so. However, she states for the last two days, she has had worsening abdominal pain as well as diarrhea. The patient states when she eats she feels like she gets fully quickly and has a feeling of fullness, discomfort as well as pain. She rates her pain as 10/10 today, periumbilical as well as right lower quadrant. She presented to St. Mary's emergency room. There, she had workup done to rule out appendicitis. The patient is afebrile. White count is slightly elevated at 12.2. CT of the abdomen was done which was negative. However, the appendix was not able to be visualized; therefore, it could not be ruled out for appendicitis. Otherwise, the CAT scan was completely normal. The emergency room doctor there felt the patient needed to be observed overnight. The patient was transferred to Kaiser Riverside. Once the patient was here, the CD that was sent of the abdominal CT was reviewed with Dr. Bo Gyi. Again, this was determined to be negative and no appendicitis noted; however, the appendix was not able to be visualized. There was no obstruction and no diverticulitis. The patient looks comfortable in the room on presentation. However, she still stated her pain was 10/10. When asked if she would be any more pain if someone cut off her arm, she changed her answer to about a 6/10. The patient denied any fevers, nausea and vomiting until the patient was given morphine, and then she had some nausea. There were no bloody stools. She has had diarrhea for two days. There was no dysuria, no shortness of breath or chest pain. She does state she has had some slight increase in vaginal discharge which is clear for the last couple of weeks and pain with intercourse for years.

-  
PAST MEDICAL HISTORY: Diabetes, hyperlipidemia, hypertension.  
-

## 03/19/2006 - Clinical Documentation in PASADENA MORD (continued)

## H&amp;P Notes (continued)

PAST SURGICAL HISTORY: Cesarean section times three.

-

SOCIAL HISTORY: No tobacco, no drugs, occasional alcohol. She has been married for 21 years, monogamous.

-

FAMILY HISTORY: The patient's father has hypertension.

-

ALLERGIES/SENSITIVITIES TO MEDICATIONS: No known drug allergies.

-

MEDICATIONS: Glucophage 850 b.i.d. However, the patient states she only takes it once a day because she wants to protect her kidneys. Glyburide 10 mg b.i.d. Atenolol 100 mg q.d. Lovastatin 40 mg q.h.s. Aspirin 81 mg per day. Maxzide, one tablet per day.

-

## PHYSICAL EXAMINATION

VITAL SIGNS: Temperature 36.9, respirations 16, pulse 81, blood pressure first one 167/105 and second one 144/94, 94% on room air.

GENERAL APPEARANCE: The patient is alert and oriented and in no acute distress.

HEENT: Pupils are equal, round, and reactive to light. Extraocular muscles are intact. Moist mucous membranes. Clear oropharynx.

LUNGS: Lungs are clear to auscultation bilaterally. No wheezes, rhonchi or crackles.

HEART: Regular rate and rhythm. No murmurs, rubs or gallops.

ABDOMEN: Obese, soft, active bowel sounds. There is tenderness to palpation periumbilical as well as right lower quadrant. No guarding, no rebound, no rigidity. The abdomen is soft.

EXTREMITIES: No clubbing, cyanosis, or edema.

RECTAL: No masses. Stool is brown and guaiac negative.

GENITAL/PELVIC: There is a small amount of discharge. No masses, no lesions. No cervical tenderness.

SKIN: There are small lesions suspicious for healing folliculitis on the patient's right buttock.

-

LABORATORY/DIAGNOSTIC STUDIES: Labs done on the outside: WBC 12.2, hemoglobin 11.1, hematocrit 34.0, platelets 384,000. Sodium 134, potassium 3.2, chloride 99, bicarbonate 28. BUN 13, creatinine 0.9, glucose 325. Alkaline phosphatase 112, amylase 25, lipase 22, total bilirubin 0.4, SGOT 12. Urinalysis was negative. Urine hCG was negative.

-

Old labs: Last A1c 12.1. LDL 93.

-

CT was negative.

-

## ASSESSMENT AND PLAN:

1. Abdominal pain. The patient has diabetic gastroparesis with acute gastroenteritis on top of that at this time. I doubt appendicitis.

I will just observe overnight. If the patient has no fever, no elevation of white count, and no additional pain, then she can be discharged in the morning. We will start with clear liquids right now and then advance to a diabetic diet as tolerated. We will also cover with Phenergan for any nausea. We will give Vicodin p.r.n. pain as the patient looks quite comfortable at this time and morphine has given her some nausea.

2. Diabetes. We will continue glyburide and Glucophage. If the patient tolerates a full diet, cover with insulin sliding scale.

3. Hypertension. Continue atenolol. I will hold the patient's Maxzide at this time and start Prinzide as the patient is diabetic and should be on an ACE (angiotensin-converting enzyme) inhibitor. I will start the 10/12.5. If the patient's blood pressure continues to be high, this can be increased to 20/25.

4. Hyperlipidemia. Continue lovastatin.

5. Skin lesions, likely folliculitis. We will order Bactroban

**03/19/2006 - Clinical Documentation in PASADENA MORD (continued)****H&P Notes (continued)**

ointment b.i.d. If the patient has another lesion formed, the nurse can call the medical doctor to look at it if it is suspicious for a herpetic-type lesion and then a culture can be sent. At this time, all of the lesions are old and dry.

-

The patient was discussed and assessment and plan formulated with Dr. Yeturu.

-

 Resulting lab: SHERMAN WAY REGIONAL LABORATORY

**Components**

Component	Value	Reference Range	Flag	Lab
HGBA1C%	6.4	4.2 - 6.7 %	—	956

Comment:  
 HBA1C CANNOT BE USED TO DIAGNOSE OR SCREEN FOR DIABETES OR OTHER DISORDERS OF GLUCOSE TOLERANCE. HBA1C IS BEST USED TO MONITOR BLOOD SUGAR CONTROL IN PATIENTS WITH DIABETES. IDEAL VALUES ARE BELOW 7.0 % AND VALUES >8.0 % SUGGEST THE NEED TO IMPROVE THE BLOOD SUGAR CONTROL TREATMENT PLAN.

Ordering provider: Pham, Thang Van (D.O.) 09/05/06 1014      Order status: Completed  
Filed on: 09/05/06 1129      Collected by: DEE 09/05/06 1025  
Resulting lab: HIGH DESERT LABORATORY

**Components**

Component	Value	Reference Range	Flag	Lab
CREATININE	0.8	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	>89-B	mL/min	—	157

**Comment:**

Result is normalized to 1.73 m2 body surface area. Race used is indicated by "B" for Black race and "NB" for Non-Black race. Multiply GFR by 1.21 if person is actually Black race, but Non-Black race was used in the calculation. \* GFR Ranges \*  
GFR >89 Normal      GFR 60-89 Mildly reduced      GFR 30-59 Moderately reduced      GFR 15-29 Severely reduced      GFR <15 Kidney failure  
This estimate of renal function assumes a steady-state and is not useful if the renal function is changing rapidly or if the patient is on dialysis. Many elderly patients have mildly and even moderately reduced GFR related to aging.

- 
- PREOP HISTORY AND PHYSICAL
- 
- DATE OF SERVICE:
- 
- DATE OF PROCEDURE: 01/31/07
- 
- IDENTIFICATION: This is a 43-year-old female.
-

**10/30/2006 - Clinical Documentation in PASADENA MORD (continued)****H&P Notes (continued)**

CHIEF COMPLAINT: Symptomatic macromastia.

HISTORY OF PRESENT ILLNESS: This is a 43-year-old female who complains of shoulder, neck, and back pain for so many years. She states that she perspires a lot and she has to wear powder underneath her breasts and they are very heavy. She was taking pain medication for shoulder and back pain. She is 46DD with a BMI of 35. She is 200 pounds with a height of 5 2 . She also states that sometimes she puts Vaseline in order to prevent a rash. She denies any family history of breast cancer. She had a screening mammogram done on June 5, 2005, which was negative. She also complains of shoulder grooving. She was evaluated by Dr. Kiran and after discussing the options, she decided to have the breast reduction done on January 31, 2007.

PAST MEDICAL HISTORY: Hypertension, diabetes type 2, hyperlipidemia, and back pain. She denies any heart disease, heart murmurs, thyroid problems, kidney disease, and any asthma or emphysema.

PAST SURGICAL HISTORY: C-section X 3. No other surgeries.

ALLERGIES AND SENSITIVITIES: She is not allergic to any medications, food, or tape.

CURRENT MEDICATIONS: Vicodin as needed for back pain, Actos 15 mg daily, lisinopril/hydrochlorothiazide 20/2.5 two pills daily, atenolol 25 mg two tablets twice a day, clonidine 0.1 mg p.o. twice a day, Nifedical XL 50 mg p.o. twice a day, lovastatin 40 mg daily, glyburide 5 mg two twice a day, and ibuprofen 800 on an as needed basis for back pain, she last took ibuprofen last two weeks. I instructed the patient not to take any ibuprofen or any other anti-inflammatories anymore. She takes potassium tablets 10 mEq once daily and aspirin 81 mg once daily. I instructed the patient not to take any aspirin, energy drinks, herbal medications, or vitamin E before the surgery.

OB/GYN HISTORY: Gravida 4, para 3, abortion 1, miscarriage 0. Her last menstrual period stated three days ago. Today is her last day. Her last Pap smear was last year, which was okay.

FAMILY HISTORY: Mother is living, is 62 years old, and has diabetes, she is a chain smoker, and has high blood pressure. Father is living, is 70 years old, and has high blood pressure. SOCIAL HISTORY: She is married and has three children. She is a CNA at Desert Valley Hospital. No smoking. She drinks occasionally. No illicit drug use.

REVIEW OF SYSTEMS: General: Denies any weakness or fatigue. Skin: Denies any rashes or jaundice. HEENT: Unremarkable for glasses. She has permanent teeth. No colds, flu, any fever, chills, sore throat, or problems swallowing in the past two weeks. No shortness of breath. She states that she has a cough sometimes secondary to second-hand smoke because when she visits her mom she is a chain smoker and she gets a cough from that. I instructed the patient not to go there secondary to the surgery and healing problems postop. No chest pain or difficulty on exertion. Denies any abdominal pain, history of hepatitis, or ulcers. Denies any problems with urination, seizure disorders, or bleeding disorders.

**PHYSICAL EXAMINATION**

VITAL SIGNS: Age 43. Height 5 2 . Weight 200 pounds. Blood

---

**10/30/2006 - Clinical Documentation in PASADENA MORD (continued)**

---

**H&P Notes (continued)**

---

pressure 136/84. Temperature 97.5. Pulse 91. Respirations 16.

GENERAL APPEARANCE: Well-developed, well-nourished, and pleasant in no acute distress.

SKIN: Warm, no cutaneous lesions found.

HEENT: Normocephalic and nontraumatic. PERRLA and EOMI. No conjunctival injection or lid lag noted. Tympanic membranes are intact. No external redness. Pinkish buccal mucosa. No exudates or abscess.

NECK: Supple without any lymphadenopathy.

LUNGS: Clear to auscultation bilaterally. No wheezing or rales appreciated.

HEART: Regular rate and rhythm. No murmurs or bruits appreciated.

ABDOMEN: Obese, soft, nontender, and nondistended. No organomegaly, masses, or bruits appreciated. Bowel sounds are present in 4 quadrants, normoactive. C-section scar seen. No hernias appreciated.

BACK: No CVA tenderness.

GENITALIA: Recently done, not indicated.

RECTAL: Not indicated.

PELVIC: Recently done, not indicated.

BREASTS: The patient was examined in a sitting and lying position, where she has large breasts, the left one is larger than the right. She has a grade 3 ptosis. She does have shoulder grooving. No inframammary rashes appreciated. She has moderate subaxillary folds. She has dense bilateral breasts. No dominant masses, no nipple discharge, inversion, skin changes, or dimpling. No supraclavicular, axillary, or infraclavicular lymphadenopathy appreciated bilaterally.

EXTREMITIES: Warm with good capillary refill. Strong pulses in upper and lower extremities without any clubbing, cyanosis, or edema.

NEUROLOGICAL: She is alert and oriented x 3. No focal deficits found.

-

DIAGNOSTIC DATA: She had a screening mammogram in 2005, which was negative. She did not have any recent blood work done.

IMPRESSION: Symptomatic macromastia. -

-

PLAN: (1) Surgery scheduled for bilateral breast reduction by Dr. Kiran on January 31, 2007 at Ontario-Vineyard Surgery Center. (2) Labs ordered.

-

Informed consent: All risks versus benefits of this procedure have been discussed with the patient by Dr. Kiran. These risks include but are not limited to bleeding, infection, anesthesia risks, injury to underlying structures, hematoma, seroma, scar formation, asymmetry, wound dehiscence, possible revision, possible fat necrosis, nipple areolar complex necrosis, and possible revision. The patient understands the risks versus benefits of this procedure and wishes to proceed as scheduled. All pertinent history and clinical findings were discussed with Dr. Kiran preoperatively.

Clinical Notes

Consults

Filed on 11/2/2006 0920

OUTPATIENT GENERAL PLASTICS CONSULTATION

-  
DATE OF SERVICE: 10/30/06  
-  
REFERRED BY:  
-  
REFERRED TO: Ravi V. Kiran, MD  
-  
REASON FOR CONSULTATION: Bilateral breast macromastia, shoulder pain, back pain.  
-  
History of Present Illness: This is a 42-year-old woman who presents today for evaluation for breast reduction. Her height is 5 feet 2. Her weight is 190 pounds. BMI is 35. Bras size is 46DD. Desired bras size is a C. She complains of back pain, shoulder pain, shoulder grooving from bra straps and the weight of the breasts affecting her posture.  
-  
Past Medical History: Relevant for diabetes Type 2 and hypertension.  
-  
Past Surgical History: None.  
-  
Medications: Include atenolol, clonidine, Glucophage, Actos, and glyburide.  
-  
Allergies: No known drug allergies.  
-  
Social History: She does not smoke. She is married and she has 3 children. She is a CNA at Desert Valley Hospital.  
-  
Family History: She denies a history of breast cancer.  
-  
Her previous mammogram was June of 2005 which was normal. She has had no previous breast surgeries.  
-

**10/30/2006 - Clinical Documentation in PASADENA MORD (continued)**

**Clinical Notes (continued)**

Physical Examination: She is alert, awake and breathing comfortably. Her skin tone is good. She has many striae over the breasts bilaterally. She has bilateral shoulder grooves from the bra straps and her shoulder posture is rounded. She does not have any active rash underneath the breasts and she has moderate subaxillary rolls. The nipple to the sternal notch is 43 cm bilaterally. The areolar diameter is 7 cm on the right side and 8.5 cm on the left side. The nipple to inframammary crease is 17.5 cm on the right side and 18.5 cm on the left side.

-  
Assessment: Bilateral breast macromastia with Grade 3 ptosis.

-  
Plan: We will schedule her for breast reduction. The indications, risks, benefits and alternatives to the breast reduction procedure was discussed in detail with the patient. The risks include but are not limited to bleeding, infection, hematoma, poor wound healing, unsatisfactory results, unsatisfactory scars, the need for further procedures, injury to adjacent structures, anesthesia or hypoesthesia of operative site, asymmetry of the breasts, asymmetry of the nipples, loss of nipples, decrease sensation to the nipples, decreased ability to lactate, bottoming out of breasts over the long term, risks of anesthesia. The patient is to obtain a repeat mammogram before surgery. She understands the risks and benefits and wishes to proceed with surgery.

Component	Value	Reference Range	Flag	Lab
CREATININE	0.8	0.6 - 1.1 mg/dl	—	151
GLOMERULAR FILTRATION RATE	>89-B	mL/min	—	151

## Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \* GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

-  
 -  
 OPERATIVE REPORT  
 -  
 DATE OF SERVICE: 01/31/07  
 -  
 SURGEON: Ravi Kiran, MD

**01/31/2007 - Clinical Documentation in PLASTIC SURGERY (continued)****Clinical Notes (continued)**

-  
PREOPERATIVE DIAGNOSIS: Bilateral breast macromastia, grade 3 ptosis.

-  
POSTOPERATIVE DIAGNOSIS: Bilateral breast macromastia, grade 3 ptosis.

-  
OPERATION: Bilateral breast reduction mammoplasties.

-  
ANESTHESIA: General.

-  
INDICATIONS: This is a 43-year-old woman who presented to the plastic surgery clinic with complaints of shoulder pain and back pain associated with bilateral enlarged breasts. The patient was felt to be a good candidate for bilateral breast reduction mammoplasty. The indications, risks, benefits, alternatives of the procedure were explained in the detail to the patient. A surgical consent was obtained. The risks include, but are not limited to bleeding, infection, hematoma, poor wound healing, unsatisfactory results or scars, need for further procedures, asymmetry of the breast, asymmetry of the nipples, loss of nipples, decreased sensation to the nipples, decreased or inability to lactate after surgery, bottoming out of breasts over the long term, boxy shape of the breasts initially, inadequate correction of axillary rolls, and risks of general anesthesia were explained to the patient. She understood these risks and wished to proceed with surgery.

-  
PROCEDURE: The patient was identified visually and by the armband. She was taken to the operating room. She was marked in the operating room while standing in an upright position. She has very large, ptotic breasts and minimal superior fullness. The midline was marked and the breast meridians were marked. The new position of the nipple was estimated at the level of the inframammary crease. This was 26 cm from the sternal notch. The Wise pattern markings were then completed. The patient was then laid supine on the operating table. Deep venous thrombosis prophylaxis was initiated. Preoperative antibiotics were administered. The patient then underwent general anesthesia. Bilateral breasts were then prepped and draped in the standard surgical fashion. The pedicle markings were then done with the width of the pedicle set at 11 cm at the base. The nipple areolas were marked with size 45 cookie-cutters. The right breast was then elevated. An Esmarch was placed at the base of the right breast to facilitate de-epithelialization of the right breast pedicle. The pedicle was deepithelialized using a size 10 blade. After completion of de-epithelialization, the Esmarch was removed. Residual de-epithelialization was done at the base. The local anesthetic, consisting of 0.5% lidocaine with epinephrine was infiltrated into all of the incision markings on both sides. The markings on the right breast were deepened with the size 10 blade. The electrocautery was used to extend the dissection through the dermis and the superior flap dissection was then done. The flap was left thick on the medial side, to allow for medial fullness. After completion of the superior pedicle dissection, hemostasis was ensured. We proceeded with the pedicle dissection. The lateral tissue was then excised and passed off the table as a specimen. Pedicle dissection was then done superiorly and proceeding medially. Breast tissue was left medially by just deepithelializing the skin, to allow for medial fullness. After completion of the pedicle dissection, we checked for any areas of tissue that could be removed. Caution was used to preserve the blood supply to the pedicle during the pedicle dissection. The wound was ensured of hemostasis. The wound was

**01/31/2007 - Clinical Documentation in PLASTIC SURGERY (continued)****Clinical Notes (continued)**

temporarily sutured with 3-0 silk suture, and staples were placed. The total amount of dermal gland resection on the right side was 1018 grams.

-

The left breast reduction was then done in a similar fashion, first by marking the pedicle width at 11 cm and the areola with the 45-mm cookie-cutter. Local anesthetic was infiltrated with 0.5% lidocaine with epinephrine. After deepithelializing the pedicle, the Esmarch was removed. Superior flap dissection was then done. The pedicle dissection was then done in a similar fashion as on the right side. Dermal gland resection was completed and passed off the table as a specimen. Tissue was left medially to allow for medial fullness. The total amount of dermal gland resection on the left side, to match the right side, measured 1124 grams of tissue. The wound was ensured of hemostasis. The 3-0 silk suture was placed at the base of the breast. The wounds temporarily stapled. The patient was then sat in a semi upright position to compare symmetry. There was excellent symmetry at this point. However, excess tissue was present laterally and markings were completed to correct the dog-ears laterally on both sides. The patient was then laid supine on the operating table again. The silk sutures were removed, as well as the staples. The breast wounds were both irrigated with sterile normal saline. Hemostasis was ensured with electrocautery. A size #10 flat Jackson-Pratt drain was then placed into each breast laterally and inferiorly, and secured to the skin with 3-0 nylon suture. The On-Q pump catheters were also introduced. The 3-0 Prolene suture was then placed on both sides to bring the 2 edges of the superior flap to the elevated notch on the inframammary crease. The wounds were then temporarily stapled. In order to keep the pedicle medially, pexying of the breast was done, from the superior flap to the lateral chest wall on both sides using 3-0 Vicryl suture. The skin closure was then done on the inframammary crease incisions using a few interrupted sutures of 3-0 Vicryl. The dermis was then run with 3-0 Biosyn suture. The skin was run with subcuticular suture of 3-0 Biosyn. The new position of the nipples was marked at 6.5 cm from the inframammary crease, along the vertical incision. The nipple position was then marked with a size 42 cookie-cutter. This was deepithelialized. The nipple was then brought out in its new position and secured at the 3 o'clock, 6 o'clock, 9 o'clock, and 12 o'clock positions with 3-0 Biosyn suture. Further 3-0 Biosyn sutures were placed between these sutures to secure the nipple. The inverted-T incision, as well around the nipple was sutured with 3-0 Biosyn for the dermis, and 4-0 Biosyn for the skin. The dog-ear correction had been done prior to closure of the inframammary crease incisions. After all of the wound closure was completed, the Jackson-Pratt drains were connected to bulb suction. The On-Q pump catheters were bolused and connected to On-Q pump bulb. Sterile dressings were placed on both breasts. The nipples appeared pink and viable at the end of the procedure. A postoperative surgical bra was then applied. The patient was then extubated and transferred to the recovery room in a stable condition.

-

I was present for the entire procedure.

-

Estimated blood loss: 150 mL.

Complications: None.

SPECIMEN:

- 
- Part A: RIGHT BREAST TISSUE
- Part B: LEFT BREAST TISSUE
- 

CLINICAL DIAGNOSIS:

- 
- A-B) Symptomatic macromastia
- 

GROSS DESCRIPTION:

- 
- A. Received in formalin is a 1040 gram, 19.0 x 18.0 x 8.5 cm aggregate of portions of fibrofatty breast tissue with attached and detached portions of unremarkable brown skin. The cut surfaces of the breast tissue consists of approximately 85% yellow lobulated adipose tissue and 15% pink-white fibrous tissue. No suspicious lesions are grossly identified or palpated. Representative sections are submitted. Two cassettes.
- 
- B. Received in formalin is a 1149 gram, 23.0 x 18.5 x 6.0 cm aggregate of portions of fibrofatty breast tissue with attached and detached portions of unremarkable brown skin. The cut surfaces of the breast tissue consists of approximately 85% yellow lobulated adipose tissue and 15% pink-white fibrous tissue. No suspicious lesions are grossly identified or palpated. Representative sections are submitted. Two cassettes.

## Salama, Medhat Sadiek (M.D.) at 3/16/2008 2157

Author: Salama, Medhat Sadiek (M.D.)  
Filed: 3/16/2008 9:57 PM  
Status: Signed

Service: —  
Encounter Date: 3/14/2008  
Editor: Salama, Medhat Sadiek (M.D.) (Physician)

Author Type: Physician  
Creation Time: 3/16/2008 9:57 PM

## History:

Sherry Chowdhuary is a 44 year old female with HTN, HLP and uncontrolled DM in the clinic today for a new provider consultation, and medications refill. She complains of chronic moderate LBP for yrs and using Vicodin ES from a previous provider.

## History Reviewed:

I have reviewed the Medical/Surgical and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

## Review of Systems

Constitutional: Negative for fever and chills.

HENT: Negative for headaches.

Cardiovascular: Negative for chest pain.

Musculoskeletal: Positive for neck pain and back pain. Negative for falls.

## PE Text: Not Used

## Physical Exam

Nursing note and vitals reviewed.

Constitutional: She is oriented and developed, nourished, and not distressed.

HENT:

Mouth/Throat: Oropharynx is clear and moist.

Cardiovascular: Normal rate and regular rhythm.

Pulmonary/Chest: Effort normal.

Abdominal: Soft.

Musculoskeletal: She exhibits tenderness.

Lumbar back: She exhibits pain and spasm. She exhibits normal range of motion.

Neurological: She is alert and oriented. No cranial nerve deficit.

Psychiatric: Mood normal.

## ASSESSMENT:

250.02B DIABETES MELLITUS TYPE 2, UNCONTROLLED (primary encounter diagnosis)

724.2M CHRONIC LOW BACK PAIN

## PLAN:

03/14/2008 - Office Visit in FAMILY MEDICINE (continued)

## Clinical Notes (continued)

I discussed in details the low fat, low carbohydrate diet and regular exercise. Advised to increase fibers in diet and encouraged to achieve and maintain ideal body weight. Continue to monitor BG as directed. I discussed the stretching exercises and heating pads alternating with icing. I counseled patient in details for benefits and risks of narcotic pain medications and acknowledged understanding. Patient's questions regarding proposed treatment and the differential diagnosis have been answered, including but not limited to other treatment options, benefits, risks, and possible adverse outcomes. All problems presented at this visit have been reviewed. Medication dosage, side effects and schedule reviewed and understood by patient. After visit discharge summary given to the patient.

Apple Valley, CA 92307-3938

Dear Sherry,

At Victorville Medical Office we believe in preventive medicine. Good diabetes control will help lower the chance of you suffering any of the complications of diabetes such as heart attack, stroke, kidney failure, blindness, and circulation problems that can lead to amputation.

You are due for lab test now. It is important to have the test done on a timely manner to help maximize the control of your diabetes. Please go to the Victorville Medical Office Laboratory Monday - Wednesday 7:30am - 6:30pm, Thursday - Saturday 7:30am - 4:30pm to have labs completed.

**For the tests, please do not eat or drink for 12 hours, and no alcohol for 72 hours, water is okay.**

**Note:** If you are taking diabetes medication, go to the laboratory as early as possible, then eat and take your usual morning diabetes pills and/or insulin as soon as possible. You may take your medications with water. The lab test orders will be waiting for you in the lab.

If you have not seen me, your **Primary Care Physician (PCP)** or had a **Diabetic Eye Photo** in the last 12 months, please call the toll free Call Center number 1 888 750 0036 Monday to Friday 7am to 7pm and Saturday 7am to 11:30am to schedule an appointment at your earliest convenience. Diabetic Eye Photo should be done once a year to detect any changes in vision.

Thank you for allowing us to participate in your diabetes care and prevention.

Sincerely,  
MEDHAT SADIEK SALAMA MD, MEDICAL DOCTOR and Your Victorville Medical Office Health Care Team!  
14011 Park Ave.

## Procedure Orders

1. XR MAMMOGRAPHY SCREENING BILATERAL, 2 VIEWS EACH BREAST [128876714] ordered by Salama, Medhat Sadiq (M.D.) at 12/08/08 1205

## BILATERAL SCREENING MAMMOGRAM: 12/15/2008

Comparison is made to exam dated: 1/24/2005 Kaiser Fontana Radiology.

There are scattered fibroglandular elements in both breasts that could

obscure a lesion on mammography.

There are benign calcifications in both breasts.

No significant masses or calcifications are seen in either breast.

## IMPRESSION: BENIGN

There is no mammographic evidence of malignancy. A 1 year screening mammogram is recommended.

## Clinical Notes (continued)

## Salama, Medhat Sadiq (M.D.) at 12/8/2008 1207

Author: Salama, Medhat Sadiq (M.D.)  
Filed: 12/8/2008 5:16 PM  
Status: SignedService: —  
Encounter Date: 12/8/2008  
Editor: Salama, Medhat Sadiq (M.D.) (Physician)Author Type: Physician  
Creation Time: 12/8/2008 12:07 PMHistory:

Sherry Chowdhuary is a 45 year old female with DM in the clinic today for routine physical exam.

G5P3A2

LMP: 12/1/08 regular.

She complains of brown smell vaginal discharge for few months.

History Reviewed:

I have reviewed the Medical/Surgical and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever and chills.

HENT: Negative for headaches.

Eyes: Negative for blurred vision.

Cardiovascular: Negative for chest pain and palpitations.

Respiratory: Negative for cough.

Gastrointestinal: Negative for vomiting and abdominal pain.

Genitourinary: Negative for dysuria and hematuria.

Musculoskeletal: Negative for joint pain.

Neurological: Negative for dizziness and focal weakness.

Psychiatric: Negative for depression. Is not nervous/anxious.

PE Text: Not Used

Physical Exam

Nursing note and vitals reviewed.

Constitutional: She is oriented. She appears not dehydrated. No distress.

HENT:

Head: Normocephalic.

Mouth/Throat: Oropharynx is clear and moist.

Eyes: Extraocular motions are normal. Pupils are equal, round, and reactive to light.

Neck: Normal range of motion. Neck supple.

Cardiovascular: Normal rate, regular rhythm, normal heart sounds and intact distal pulses.

Pulmonary/Chest: Effort normal and breath sounds normal. Right breast exhibits no inverted nipple, no mass, no nipple discharge, no skin change and no tenderness. Left breast exhibits no inverted nipple, no mass, no nipple discharge, no skin change and no tenderness. Breasts are symmetrical.

Abdominal: Bowel sounds are normal. She exhibits no mass. Soft. There is no organomegaly. No tenderness. She has no guarding.

Genitourinary: Thin fishy brown discharge found.

**Cervix: no lesions seen and no CMT.****Uterus: mobile, without tenderness.****Adnexa: no palpable masses or tenderness.**

Musculoskeletal: Normal range of motion.

Neurological: She is alert and oriented.

Skin: Skin is warm and dry. No rash noted.

Psychiatric: Mood normal.

## ASSESSMENT:

**12/08/2008 - Office Visit in FAMILY MEDICINE (continued)****Clinical Notes (continued)**

V70.0A PHYSICAL EXAMINATION, COMPLETE OR PARTIAL (primary encounter diagnosis)  
250.02B DIABETES MELLITUS TYPE 2, UNCONTROLLED  
724.2M CHRONIC LOW BACK PAIN  
401.9B ESSENTIAL HYPERTENSION  
V76.10A SCREENING FOR CA, BREAST  
616.10B BACTERIAL VAGINOSIS

**PLAN:**

I counseled patient for monthly self breast exam, self skin exam, STD prevention, regular physical activity and healthy diet.

Continue to monitor BG as directed. I discussed in details the low fat, low carbohydrate diet and regular exercise. Advised to increase fibers in diet and encouraged to achieve and maintain ideal body weight.

Orders as below and RTC/UC/ER if symptoms worsen or not improved or for any medical emergencies.

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.9	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	87-B	mL/min	—	157

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m<sup>2</sup> body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \*  
 GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29  
 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	8.7	4.8 - 5.9 %	H ^	956

Comment:

HBA1C CANNOT BE USED TO DIAGNOSE OR SCREEN FOR DIABETES OR OTHER DISORDERS OF GLUCOSE TOLERANCE. HBA1C IS BEST USED TO MONITOR BLOOD SUGAR CONTROL IN PATIENTS WITH DIABETES. IDEAL VALUES ARE BELOW 7.0 % AND VALUES >8.0 % SUGGEST THE NEED TO IMPROVE THE BLOOD SUGAR CONTROL TREATMENT PLAN.

BILATERAL SCREENING MAMMOGRAM: 12/15/2008

Comparison is made to exam dated: 1/24/2005 Kaiser Fontana Radiology.

There are scattered fibroglandular elements in both breasts that could

obscure a lesion on mammography.

There are benign calcifications in both breasts.

No significant masses or calcifications are seen in either breast.

**IMPRESSION: BENIGN**

There is no mammographic evidence of malignancy. A 1 year screening mammogram is recommended.

**Patient Instructions**

Well VisitAges 18 to 50: After Your Visit

Your Kaiser Permanente Care Instructions

Physical exams can help you stay healthy. Your doctor has checked your overall health and may have suggested ways to take good care of yourself. He or she also may have recommended tests. At home, you can help prevent illness with healthy eating, regular

**12/08/2008 - Office Visit in FAMILY MEDICINE (continued)****Patient Instructions (continued)**

exercise, and other steps.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. Its also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

- Reach and stay at a healthy weight. This will lower your risk for many problems, such as obesity, diabetes, heart disease, and high blood pressure.
- Get at least 30 minutes of physical activity on most days of the week. Walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports. Discuss any changes in your exercise program with your doctor.
- Do not smoke or allow others to smoke around you. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Talk to your doctor about whether you have any risk factors for sexually transmitted diseases (STDs). Having one sex partner (who does not have STDs and does not have sex with anyone else) is a good way to avoid these diseases.
- Use birth control if you do not want to have children at this time. Talk with your doctor about the choices available and what might be best for you.
- Always wear sunscreen on exposed skin. Make sure the sunscreen blocks ultraviolet rays (both UVA and UVB) and has a sun protection factor (SPF) of at least 15. Use it every day, even when it is cloudy. Some doctors may recommend a higher SPF, such as 30.
- See a dentist one or two times a year for checkups and to have your teeth cleaned.
- Wear a seat belt in the car.
- Drink alcohol in moderation, if at all. That means no more than 2 drinks a day for men and 1 drink a day for women.

Follow your doctor's advice about when to have certain tests. These tests can spot problems early.

For everyone

- Cholesterol. Have the fat (cholesterol) in your blood tested after age 20. Your doctor will tell you how often to have this done based on your age, family history, or other things that can increase your risk for heart disease.
- Blood pressure. Experts suggest that healthy adults with normal blood pressure (119/79 mm Hg or below) have their blood pressure checked at least every 1 to 2 years. This can be done during a routine doctor visit. If you have slightly higher or high blood pressure, your doctor will suggest more frequent tests.
- Vision. Have your eyes checked every year or two or as often as your doctor suggests. Some experts recommend that you have yearly exams for glaucoma and other age-related eye problems starting at age 50.
- Diabetes. Ask your doctor whether you should have tests for diabetes.
- Colon cancer. Have a test for colon cancer at age 50. You may have one of several tests. If you are younger than 50, ask your doctor whether you may have risk factors (such as your family history) that mean you should have tests before 50.

For women

- Breast exam and mammogram. If you are between 18 and 39, have a doctor check your breasts every 3 years. At age 40, have a doctor check your breasts every year. Ask when to have and how often to have a mammogram, which is an x-ray of your breasts. A mammogram can spot breast cancer before it can be felt and when it is easiest to treat. Have a yearly mammogram when you are age 50 or older.
- Pap test and pelvic exam. Begin Pap tests 3 years from the time you first have sexual intercourse, but no later than age 21. A Pap test is the best way to find cervical cancer. The test often is part of a pelvic exam. Ask how often to have this test.
- Tests for sexually transmitted diseases (STDs). Ask whether you should have tests for STDs. You may be at risk if you have sex with more than one person, especially if your partners do not wear condoms.

For men

- Tests for sexually transmitted diseases (STDs). Ask whether you should have tests for STDs. You may be at risk if you have sex with more than one person, especially if you do not wear a condom.
- Testicular cancer exam. Ask your doctor whether you should check your testicles regularly.
- Prostate exam. Talk to your doctor about whether you should have a blood test (called a PSA test) for prostate cancer. Experts differ on whether and when men should have this test. Some experts suggest it if you are older than 45 and are African-American or have a father or brother who got prostate cancer when he was younger than 65.

When should you call for help?

Watch closely for changes in your health, and be sure to contact your doctor if:

**12/08/2008 - Office Visit in FAMILY MEDICINE (continued)****Patient Instructions (continued)**

- You have any problems or symptoms that concern you.
- You want more information on taking care of yourself.

## Progress Notes

## Salama, Medhat Sadiq (M.D.) at 6/2/2009 2108

Author: Salama, Medhat Sadiq (M.D.)  
Filed: 6/2/2009 9:11 PM  
Status: SignedService: —  
Encounter Date: 6/1/2009  
Editor: Salama, Medhat Sadiq (M.D.) (Physician)Author Type: Physician  
Creation Time: 6/2/2009 9:08 PM

History:  
Sherry Chowdhuary is a 45 year old female with HTN, HLP and DM in the clinic today for follow up, and medications. She complains of productive sever cough for 3 weeks and failed on OTC medications.

History Reviewed:

I have reviewed the Medical/Surgical and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever.  
Cardiovascular: Negative for chest pain.  
Respiratory: Is experiencing shortness of breath.

PE Text: Not used

Physical Exam

Vitals reviewed.  
Constitutional: She is oriented and well-developed, well-nourished, and in no distress.  
HENT:  
Right Ear: Tympanic membrane and external ear normal.  
Left Ear: Tympanic membrane and external ear normal.  
Mouth/Throat: Posterior oropharyngeal erythema present. No oropharyngeal exudate.  
Neck: Neck supple.  
Cardiovascular: Normal rate and regular rhythm.  
Pulmonary/Chest: Breath sounds normal. No respiratory distress.  
Neurological: She is alert and oriented.  
Skin: Skin is warm and dry.  
**FEET: warm, good capillary refill and warm, normal DP and PT pulses, good capillary refill, Achilles reflexes, normal monofilament exam**

HGBA1C 8.1 06/01/2009

## ASSESSMENT:

V03.82E PROPHYLACTIC VACCINATION, PNEUMOVAX (primary encounter diagnosis)  
250.02B DIABETES MELLITUS TYPE 2, UNCONTROLLED  
401.9B ESSENTIAL HYPERTENSION  
466.0A ACUTE BRONCHITIS

## PLAN:

Orders as below and Continue to monitor BG as directed.  
I discussed in details the low fat, low carbohydrate diet and regular exercise. Advised to increase fibers in diet and encouraged to achieve and maintain ideal body weight.  
Increase hydration with water/Gatorade and hot fluids like soup and use OTC Tylenol q 4-6 hours as needed for fever

06/01/2009 - Office Visit in FAMILY MEDICINE (continued)

## Clinical Notes (group 2 of 2) (continued)

and/or pain.

Advised to monitor BP, follow up at HTN clinic/nurse visit and to take the medication as directed with low salt diet and weight management.

Resulted: 03/26/10 0409, Result status: Final result

Order status: Completed

Filed on: 03/26/10 0410

Collected by: LDR 03/25/10 1313

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	8.6	4.8 - 5.9 %	H ^	956

## Comment:

HBA1C CANNOT BE USED TO DIAGNOSE OR SCREEN FOR DIABETES OR OTHER DISORDERS OF GLUCOSE TOLERANCE. HBA1C IS BEST USED TO MONITOR BLOOD SUGAR CONTROL IN PATIENTS WITH DIABETES. IDEAL VALUES ARE BELOW 7.0 % AND VALUES >8.0 % SUGGEST THE NEED TO IMPROVE THE BLOOD SUGAR CONTROL TREATMENT PLAN.

## LDL DIRECT [149581036] (Abnormal)

Resulted: 06/02/09 1333, Result status: Final result

Order status: Completed

Filed on: 06/02/09 1333

Collected by: RMW 06/01/09 1549

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
LDL	147	<100 mg/dL	A †	956

## Comment:

DIRECT LDL: For patients having elevated triglyceride levels, i.e. >400 mg/dL, the direct LDL-C result may not represent the patient's LDL-C status upon restoration of triglycerides to lower levels. These patients should not be assumed to have representative LDL-C levels until triglyceride levels are reduced.

Your Kaiser Permanente Care Instructions

Body Mass Index: After Your Visit

Your Care Instructions

**06/01/2009 - Office Visit in FAMILY MEDICINE (continued)****Patient Instructions (continued)**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered normal. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. Its also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

If you have a BMI higher than 25

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

When should you call for help?

Watch closely for changes in your health, and be sure to contact your doctor if you have any problems.

Where can you learn more?

Go to <http://www.kp.org>

Enter S176 in the search box to learn more about "Body Mass Index: After Your Visit".

Editor: Carpio, Rebecca Ann (N.P.) (NURSE PRACTITIONER (N.P.))

Our Health Education Department has received an e-referral for the bariatric program regarding this member. This patient does meet the Bariatric criteria and will be appropriate for entrance into this program.

We will be mailing the patient a packet which the member is responsible for calling into the Health Education Department and scheduling themselves for the Bariatric Information class. Please note that the Bariatric Information Class and the Bariatric Educational classes are mandatory for either the gastric bypass surgery, the gastric sleeve or the lap band procedure.

The Bariatric Educational classes consists of 1 weekly meeting, for 1 1/2 hours, for a total of 20 weeks. This allows our multi-disciplinary team to prepare the member holistically for the Bariatric procedure. Once these classes have been completed, the member will need to be signed off medically by their PCP before an outside Bariatric Surgical consultation can be obtained. We will be sending you the sign-off paperwork for this member upon completion of the classes.

We look forward to working with you and the patient during this process.

If you have any questions, please call me at 909-609-3004 or e-mail.

Thank you for your participation.

## Williamson, Dianne S (Rph) at 8/1/2009 1520

Author: Williamson, Dianne S (Rph)  
Filed: 8/1/2009 3:20 PM  
Status: SignedService: —  
Encounter Date: 8/1/2009  
Editor: Williamson, Dianne S (Rph) (PHARMACIST)Author Type: PHARMACIST  
Creation Time: 8/1/2009 3:20 PM

## Subjective/ Objective:

Sherry Chowdhuary is a 45 year old female.

I spoke with her on the phone regarding Diabetes medication adherence.

Sherry Chowdhuary is identified by prescription profile as not adherent to 1 or more DM medications.

Potential non-adherence to following Diabetic Medication(s):

Metformin (Glucophage)

## Last A1C results

HGBA1C 8.1 06/01/2009

## Assessment/ Plan:

Discussed with her the purpose of medication, duration of therapy, and the benefits.

Identified medication adherence barriers and developed solutions with her:

Lack of Knowledge about Medication and its Use: Used Teach Back method (Patient repeat back)

## Further Recommendations:

HgbA1c: HGBA1C 8.1 06/01/2009

HgbA1c is above goal (HgbA1c goal is less than 7). Discussed the importance of medication adherence and reviewed life style modification.

## Self Monitoring Blood Glucose (SMBG):

08/01/2009 - Telephone in PHARMACY (continued)

## Clinical Notes (continued)

Discussed SMBG frequency: at least 1-2 times a day.

## Medication Adherence:

She is non-adherent to DM medications - Verified SIG and discussed DM medications.

## Outcomes:

She has agreed to repeat HgbA1c follow-up in 3 months upon restarting therapy.

Status: Signed	Editor: Salama, Medhat Sadiq (M.D.) (Physician)	

History:

Sherry Chowdhuary is a 45 year old female with HTN, HLP and DM in the clinic today for chronic care management, and medications refill.

## Patient presents with:

PALPITATIONS - since Sunday night  
DIZZY

She has Cardiolute stress test at Desert Valley hospital and normal per her <2 years ago.

History Reviewed:

I have reviewed the Medical/Surgical history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever.

Cardiovascular: Negative for chest pain.

Neurological: Positive for dizziness. Negative for speech change and focal weakness.

Physical Exam

Constitutional: She is oriented and well-developed, well-nourished, and in no distress.

HENT:

**10/14/2009 - Office Visit in FAMILY MEDICINE (continued)****Clinical Notes (continued)**

Mouth/Throat: Oropharynx is clear and moist.  
Eyes: Extraocular motions are normal. Pupils are equal, round, and reactive to light.  
Neck: Normal range of motion. Neck supple.  
Cardiovascular: Normal rate and regular rhythm.  
Pulmonary/Chest: Effort normal and breath sounds normal.  
Musculoskeletal: She exhibits no edema.  
Neurological: She is alert and oriented. She has normal reflexes. No cranial nerve deficit. GCS score is 15.  
Psychiatric: Mood normal.  
Nursing note and vitals reviewed.

LDL CALC 135 06/01/2009

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	6.8	4.8 - 5.9 %	H ^	956

Comment:

HBA1C CANNOT BE USED TO DIAGNOSE OR SCREEN FOR DIABETES OR OTHER DISORDERS OF GLUCOSE TOLERANCE. HBA1C IS BEST USED TO MONITOR BLOOD SUGAR CONTROL IN PATIENTS WITH DIABETES. IDEAL VALUES ARE BELOW 7.0 % AND VALUES >8.0 % SUGGEST THE NEED TO IMPROVE THE BLOOD SUGAR CONTROL TREATMENT PLAN.

## HEMOGLOBIN A1C [180284397] (Abnormal)

Resulted: 03/26/10 0409, Result status: Final result

Order status: Completed

Filed on: 03/26/10 0410

Collected by: LDR 03/25/10 1313

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	8.6	4.8 - 5.9 %	H <sup>^</sup>	956

Comment:

HBA1C CANNOT BE USED TO DIAGNOSE OR SCREEN FOR DIABETES OR OTHER DISORDERS OF GLUCOSE TOLERANCE. HBA1C IS BEST USED TO MONITOR BLOOD SUGAR CONTROL IN PATIENTS WITH DIABETES. IDEAL VALUES ARE BELOW 7.0 % AND VALUES &gt;8.0 % SUGGEST THE NEED TO IMPROVE THE BLOOD SUGAR CONTROL TREATMENT PLAN.

Dear Ms. Chowdhury,

Welcome to the Pre- Bariatric Options Educational program.

The highlighted items listed below are suggestions of class/classes to optimize your current health status while completing the bariatric program.

**Living Well with Diabetes:** These classes offer information in learning survival skills, self-blood-glucose monitoring, sick day rules, travel tips, and healthy meal planning.

Please call the Kaiser Preventive Medicine/Health Education Department at: 909-609-3000 to schedule your class time.

Also, available to each of our Kaiser member's is our self-referral classes. If you would like to participate in either of the classes listed below please call 909-609-3000 to schedule.

1. Depression overview
2. Stress: Reduction and relief. Stress Management

Thank you,

Rebecca A. Carpio-Darshay RN, MSN, Family Nurse Practitioner

Dear Member, upon review of your record we see that it's time to catch up on some things.

Visit our Treatment Nurse to make sure your blood pressure is within range.

Treatment Nurse's hours are: Mon-Fri, 8:30 a.m. - 11:30 a.m. or 1:30 to 4:30 p.m.; Saturday, 8:30 a.m. to 11:30 a.m.

Check in at reception to see the treatment nurse for Pneumonia Shot.

Drop off at our lab the enclosed colon cancer preventive screening test - we notice you haven't had one recently.

You are due for a follow up appointment for your diabetes. Keep a diary of your blood sugars and bring in all of your medications at time of visit.

Dr Salama has ordered labs in the computer for you to have done.

Please check in at the front reception desk.

Fasting: no. Fasting requires water and medications only

03/18/2010 - Telephone in FAMILY MEDICINE (continued)

## Letters (continued)

NOTHING TO EAT OR DRINK (EXCEPT WATER) 14 HRS PRIOR TO TEST AND NO ALCOHOL 72 HRS PRIOR TO TEST.

LAB HRS: MON, TUES, WED 7:30-12:30 & 1:30-7

LAB HRS: THURS, FRI, SAT 7:30-12:30 & 1:30-4:30

Your Doctor may contact you after these labs. If you want to know your results - you can register for member access to log into KP.ORG to lookup results. You could also call the KP (Lab Result line) at 1-888-457-8378 - follow the prompt to get your results.

Retinal Exam Due: Please call 1-888-750-0036 for an appointment in the High Desert Clinic. You do not need a driver.

Please schedule a routine appointment as soon as You can!

For Mammogram Please call (760)-843-2428 to schedule

If you need to schedule or reschedule an appointment, please call the appointment center at: 1-888-750-0036, Monday through Friday, 7 a.m. to 7 p.m., and Saturday 7 a.m. to 11:30 a.m.

Exercise, eating well, and taking care of the items checked above will help us all to THRIVE!

Sincerely,

Dr. Salama

## OPTIONS GROUP APPOINTMENT #1

Member Sherry Chowdhuary attended group appointment #1 of Options. Administrative form was presented and completed concerning patient responsibilities for group appointments and surgery. Topics for the class included an assessment of personal status in relation to vital changes in lifestyles before surgery and the development of an action plan to implement these changes. Instruction on completing My Daily Record (food and exercise record.) Written materials were provided on group appointment syllabus, health education classes and contact numbers. Appropriate forms were collected.

Dear Sherry Chowdhuary

Our records indicate that you have missed three (3) bariatric classes.

05/14/2010 - Message in HEALTH EDUCATION (continued)

## Letters (continued)

You must attend all class sessions, and make up any classes that you have missed. You are allowed to miss and make up three (3) class sessions. When you miss the fourth class session you may be automatically be dropped from the OPTIONS program.

Missing three (3) class sessions and making them up still counts as three (3) missed class sessions.

If you need to schedule make up classes, please call 909-609-3000.

Sincerely,

The Bariatric Surgery Preparation team

Dear Ms. Chowdhuary:

You were enrolled in our OPTIONS program at the Fontana Medical Center. Our records indicate, you have missed more than three classes. This exceeds the number of classes which we can make up for you. Program attendance is mandatory for this elective surgery. You have been dropped from your current class schedule, please call (909) 609-3000 if you wish to be put back on the program wait list in order to restart the program.

Missing a class and then making it up still counts as a missed class.

**You missed/canceled the following: 2,3,4,5**

Sincerely,

Bariatric Surgery Preparation Program Team

Dear Ms. Chowdhuary:

Our records show that you did not keep your appointment with the Diabetes Care Program. We are very concerned about your health and the control of your diabetes. The risks of uncontrolled diabetes include stroke, heart attack, kidney failure, loss of limb and blindness.

Please call us as soon as possible at (909) 609-3000 to reschedule your appointment at a time convenient for you. If you have already rescheduled your appointment, good for you! We look forward to seeing you here.

Sincerely,

The Diabetes Team of Health Education

---

Glyburide  
Actos  
Cozaar  
HCTZ  
Atenolol  
Nifedipine  
Zocor

Says she ran out of HCTZ and Cozaar a week ago and blood pressure has been running about 120's/70's at home

But started to get some leg swelling off HCTZ so got some OTC diuretic (main ingredient is caffeine)

Also ran out of Metformin and Actos

Says she was referred to Bariatric program in the past

Missed some classes and got dropped

**Review of Systems**

Cardiovascular: Positive for leg swelling.

**Physical Exam**

Constitutional: She is well-developed, well-nourished, and in no distress.

Cardiovascular: Normal rate, regular rhythm and normal heart sounds.

Pulmonary/Chest: Effort normal and breath sounds normal.

Musculoskeletal:

**Mild/trace edema**

**ASSESSMENT:****401.9B ESSENTIAL HYPERTENSION**

For the past week, she has been taking only Atenolol & Nifedipine and bp is good as it is today

Not been taking the HCTZ or Cozaar

However, has noted swelling off HCTZ and would like to go back on it

Also, explained to her that Cozaar can also help the kidneys in a diabetic so it is preferred

Therefore, we decided to go with Atenolol, Cozaar and HCTZ for now

Can hold the Nifedipine

Monitor blood pressure

Ideal blood pressure <130/80

**272.4C HYPERLIPIDEMIA**

Last LDL 69

Cont Zocor

**250.02B DIABETES MELLITUS TYPE 2, UNCONTROLLED**

Refilled Metformin and Actos

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.9	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	82-B	mL/min	—	157

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \* GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

Narrative:

Note: This is a result for your order which has been determined to be a duplicate order. Please understand that other providers have also received this result, thus coordination of care is necessary. Click on the Order Details hyperlink for indication of all providers who have received notification of this result.

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	9.6	4.8 - 5.9 %	H ^	956

Comment:

Hb A1c is best used to monitor blood sugar control in patients with diabetes. Ideal values are below 7.0% and values >8.0% suggest the need to improve the blood sugar control treatment plan.

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
LDL	60	<100 mg/dL	—	956

## Comment:

DIRECT LDL: For patients having elevated triglyceride levels, i.e. >400 mg/dL, the direct LDL-C result may not represent the patient's LDL-C status upon restoration of triglycerides to lower levels. These patients should not be assumed to have representative LDL-C levels until triglyceride levels are reduced.

Dear Ms. Chowdhuary,

Labs for this appointment 8/16/2010 have been ordered and should be completed approximately one week prior to your appointment. There are certain labs that have been ordered which require fasting.

In order to obtain accurate lab results you CANNOT have anything to eat or drink 12 to 14 hours prior to having your blood drawn, except for: water, medication that is not based on food consumption, such as diabetic medication; or medication that does not cause nausea or vomiting when taken on an empty stomach. Please do not chew gum or eat mints before you have you labs drawn.

You CANNOT have any alcoholic beverages 72 hours before you have your blood drawn. Lab results should be available for the doctor to discuss with you during your visit.

Lab Hours: 7:30 AM - 7:00 PM (Monday, Tuesday, Wednesday)  
7:30 AM - 5:00 PM (Thursday, Friday, Saturday)

PLEASE CHECK-IN AT THE RECEPTIONIST DESK.

If you have any questions, please call:  
HIGH DESERT MEDICAL OFFICES - FAMILY MEDICINE  
14011 Park Avenue

## Procedures

Filed on 8/16/2010 0000

## Procedure Orders

1. XR MAMMOGRAPHY SCREENING BILATERAL, 2 VIEWS EACH BREAST [203197060] ordered by Harris, Amanda Ann (N.P.) at 07/27/10 1331

## BILATERAL SCREENING MAMMOGRAM: 8/16/2010

Comparison is made to exams dated: 1/24/2005 Kaiser Fontana Radiology and 12/15/2008 Kaiser High Desert Radiology.

There are scattered fibroglandular elements in both breasts that could

obscure a lesion on mammography.

There are post surgical changes of bilateral breast reduction.

There are benign calcifications in the right breast.

No significant masses, calcifications, or other findings are seen in either breast.

There has been no significant interval change.

## IMPRESSION: BENIGN

There is no mammographic evidence of malignancy. A 2 year screening mammogram is recommended.

Eva Q. Luo M.D.

BILATERAL SCREENING MAMMOGRAM: 8/16/2010

Comparison is made to exams dated: 1/24/2005 Kaiser Fontana Radiology  
 and 12/15/2008 Kaiser High Desert Radiology.

There are scattered fibroglandular elements in both breasts that  
 could

obscure a lesion on mammography.

There are post surgical changes of bilateral breast reduction.

There are benign calcifications in the right breast.

No significant masses, calcifications, or other findings are seen in  
 either breast.

There has been no significant interval change.

## IMPRESSION: BENIGN

There is no mammographic evidence of malignancy. A 2 year screening  
 mammogram is recommended.

Eva Q. Luo M.D.

**Clinical Notes (continued)**

---

---

History:

Sherry Chowdhuary is a 46 year old female with HTN, HLP and DM in the clinic today for chronic care management, and medications refill. Last seen in 10/2009.

Patient presents for:

PHYSICAL EXAM, ANNUAL - physical with pap

Review of Systems

Constitutional: Negative for fever, chills, weight loss and malaise/fatigue.

Skin: Negative for rash.

HENT: Negative for headaches and congestion.

Eyes: Negative for blurred vision and eye pain.

Cardiovascular: Negative for chest pain and palpitations.

Respiratory: Negative for cough. Is not experiencing wheezing.

Gastrointestinal: Negative for vomiting, abdominal pain, blood in stool and melena.

Genitourinary: Negative for dysuria and hematuria.

Musculoskeletal: Positive for back pain. Negative for myalgias.

Endo/Heme/Allergies: Negative for polydipsia.

Neurological: Negative for dizziness, sensory change and focal weakness.

Psychiatric: Negative for depression and suicidal ideas. Is not nervous/anxious.

Physical Exam

Constitutional: She is oriented. She appears not dehydrated. No distress.

HENT:

Head: Normocephalic.

Mouth/Throat: Oropharynx is clear and moist.

Eyes: Extraocular motions are normal. Pupils are equal, round, and reactive to light.

Neck: Normal range of motion. Neck supple.

Cardiovascular: Normal rate, regular rhythm, normal heart sounds and intact distal pulses.

Pulmonary/Chest: Effort normal and breath sounds normal.

Abdominal: Bowel sounds are normal. She exhibits no mass. Soft. There is no organomegaly. No tenderness. She has no guarding.

Genitourinary:

**Chaperone is in the room, Sherry**

**Breast Exam: exposed, no palpable masses, erythema or nipple discharge.**

**Urethra: no lesion seen.**

**Perineum: no lesion seen.**

**Vagina and vulva: no discharge or lesions seen.**

**Cervix: no lesions seen and no CMT.**

**Uterus: mobile, without tenderness.**

**Adnexae: no palpable masses or tenderness.**

Musculoskeletal: Normal range of motion. She exhibits no edema.

Lumbar back: She exhibits pain and spasm.

Neurological: She is alert and oriented.

08/16/2010 - Office Visit in FAMILY MEDICINE (continued)

## Clinical Notes (continued)

Skin: Skin is warm and dry. No rash noted.

**FEET: warm, good capillary refill and warm, normal DP and PT pulses, good capillary refill, Achilles reflexes, normal monofilament exam**

Psychiatric: Mood normal.

Nursing note and vitals reviewed.

## ASSESSMENT:

V70.0A PHYSICAL EXAMINATION, COMPLETE OR PARTIAL (primary encounter diagnosis)

V72.85ZZP EXAM, FOOT, MONOFILAMENT

250.02B DIABETES MELLITUS TYPE 2, UNCONTROLLED

## PLAN:

I counseled patient for monthly self breast exam, self skin exam, STD prevention, regular physical activity and healthy diet.

I discussed in details the low fat, low carbohydrate diet and regular exercise. Advised to increase fibers in diet and encouraged to achieve and maintain ideal body weight.

I explained the multiple risks of uncontrolled DM, HTN or HLP including: MI, CVA, kidney failure and/or blindness . Also, I discussed the weight control through diet, walking exercise, and taking medications to prevent and/or delay these complications and patient acknowledged understanding.

Orders as below, questions regarding proposed treatment have been answered, including but not limited to benefits, risks, and possible adverse outcomes, agreed with the plans, AVS given and RTC as needed.

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.8	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	>89-B	mL/min	—	157

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \*  
 GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29  
 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

## Components

Component	Value	Reference Range	Flag	Lab
TSH	1.22	0.35 - 4.00 uIU/mL	—	956

Comment:

----- TO ALL PROVIDERS A REFLEX THYROID TESTING PROGRAM IS NOW IN PLACE. ALL SINGLE TSH SPECIMENS FOUND TO BE ABNORMAL WILL AUTOMATICALLY HAVE FT4 DETERMINED ON THE SAME SERUM SAMPLE. THIS WILL SIMPLIFY SCREENING FOR THYROID DYSFUNCTION BY ORDERING A SINGLE TSH MEASUREMENT. (APPROVED: REGIONAL ENDOCRINOLOGY SUBCOMMITTEE, 1995.)

Sherry Chowdhuary  
21547 Pine Ridge Ave  
Apple Valley, CA 92307-3938

Dear Ms. Chowdhuary:

The Health Education Department has received a referral from your physician, they have recommended that you enroll in the Living Well with Diabetes classes held in the Health Education Department. The information presented in the Living Well with Diabetes classes, will provide you with the information on:

- self-blood-glucose monitoring
- survival skills
- sick day rules
- travel tips
- healthy meal planning
- etc.

We invite you to call the Health Education Department today to schedule an appointment for the Living Well with Diabetes class. Please call (909)609-3000, between the hours of 8:30 am and 4:30 pm, Monday through Friday. For your convenience classes are offered in the morning, afternoon, evening and in English and Spanish.

Sincerely,

Health Education Department  
Palm Court 1  
17296 Slover Avenue  
Fontana, CA  
(909)609-3000

## OPTIONS GROUP APPOINTMENT #1

Member Sherry Chowdhuary attended group appointment #1 of Options. Administrative form was presented and completed concerning patient responsibilities for group appointments and surgery. Topics for the class included an assessment of personal status in relation to vital changes in lifestyles before surgery and the development of an action plan to implement these changes. Instruction on completing My Daily Record (food and exercise record.) Written materials were provided on group appointment syllabus, health education classes and contact numbers. Appropriate forms were collected.

## Wt Readings from Last 1 Encounters:

09/13/2010 : 240 lb (108.863 kg)

Estimated Body mass index is 45.35 kg/(m<sup>2</sup>) as calculated from the following:

Height as of this encounter: 5' 1"(1.549 m).

Weight as of this encounter: 240 lb(108.863 kg).

Fontana Medical Center  
17296 Slover Ave  
Palm Court I  
Fontana, CA  
(909) -609-3000

9/24/2010

To Whom It May Concern:

This letter is to verify that Sherry Chowdhuary is enrolled in a 12 Week medical program (as referred by his/her physician). This program is scheduled to begin on 9/10/10 from 10AM to 1130AM, meeting once a week on FRIDAYS, for the next 3 months. This program will conclude on 12/3/10.

If you need any further verification, you may reach me at (909) 609-3000.

Sincerely,

Dave C. Roadruck DrPH

Order status: Completed

Filed on: 11/12/10 1426

Collected by: LDR 11/09/10 1058

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
25-HYDROXYVITAMIN D	8	30 - 100 ng/mL	L v	956
VITAMIN D, 25-HYDROXY, D3	8	NOT ESTABLISHED ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	NOT ESTABLISHED ng/mL	—	956

## Comment:

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY,NATL OSTEOPOROSIS FDN, K\_DOQI) THAT 25-OH VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD (NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D,25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## Components

Component	Value	Reference Range	Flag	Lab
THIAMINE, WHOLE BLOOD	109	70 - 180 nMol/L	—	956

## Comment:

Thiamine testing has no role in the acute management of suspected thiamine deficiency! Treatment should be prophylactic and empiric, particularly before glucose infusion. Thiamine diphosphate (TPD) is the primary active form of Vitamin B1 in whole blood, and is thought to reflect tissue stores. However, there is abundant evidence that thiamine assays alone, by concentration or activity, are neither sufficiently sensitive nor specific for predicting the development of Wernicke syndrome or beriberi. A quarter of bariatric surgery patients with clinically proven Wernicke syndrome have normal thiamine levels Singh S, Kumar A. Neurology 2007; 68:807-11. Aasheim ER. Ann Surg 2008; 248:714-20. and personal communication.

Preoperatively 15-30% of bariatric surgery patients have abnormally low thiamine levels, yet never develop symptoms of

## 10/08/2010 - Telephone in HEALTH EDUCATION (continued)

## Labs (continued)

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.9	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	82-B	mL/min	—	157

## Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \* GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

## Components

Component	Value	Reference Range	Flag	Lab
REPORT	H. pylori Antigen: NOT DETECTED	NOT DETECTED	—	950

## Comment:

This test is intended to aid in the diagnosis of H.pylori infection and to aid in monitoring the efficacy of antimicrobial therapy. Antimicrobials, proton pump inhibitors, and bismuth preparations inhibit H.pylori and ingestion prior to testing may cause false negative results. If a negative result is obtained for a patient ingesting these compounds within two weeks prior to performing this test, it may be a false negative result and the test should be repeated on a new specimen obtained two weeks after discontinuing treatment. This Test Performed At: Quest Diagnostics Nichols Institute 33608 Ortega Highway San Juan Capistrano CA 92690-6130 J M Nakamoto MD, PhD

## Components

## 11/05/2010 - Released Future/Standing Orders in FAMILY MEDICINE (continued)

## Labs (continued)

Component	Value	Reference Range	Flag	Lab
HGBA1C%	7.7	4.8 - 5.9 %	H <sup>^</sup>	956

## Comment:

Hb A1c is best used to monitor blood sugar control in patients with diabetes. Ideal values are below 7.0% and values >8.0% suggest the need to improve the blood sugar control treatment plan.

Patient has not completed an EKG, was notified by phone that her packet will not moved until the EKG is completed. Patient continues to state that she completed an EKG when in reality patient completed an echocardiogram. Patient spoke with RN Case Manager Clare Faivre to inform the patient the differences between an EKG and an Echocardiogram.

No EKG on file. Advised patient that a rhythm strip may have been run during her Echocardiogram but it differs from an EKG. Advised to make an appointment for an EKG to be done at her "home" MOB. Also reviewed labs, patient has several abnormal labs from her Pre-op Bariatric surgery testing. Advised that she move forward on following up with her PCP as additional testing may be necessary for medical optimization for surgery.

Dear Ms. Chowdhuary,

Our records show that your physician has ordered lab tests that are due now. Please go to a Kaiser lab for a blood test at your convenience. You do not need to fast. The lab test orders will be waiting for you in the lab.

If you have already done the test(s) recently, please disregard this notice.

Sincerely,

CYNTHIA OLUFSON on behalf of MEDHAT SADIEK SALAMA MD, MEDICAL DOCTOR

Physical Exam

Constitutional: She is well-developed, well-nourished, and in no distress.  
Cardiovascular: Normal rate and regular rhythm.  
Pulmonary/Chest: Effort normal.  
Skin: Skin is warm and dry. No erythema.  
**~2 cm soft lump at the R thigh**  
Nursing note and vitals reviewed.

## ASSESSMENT:

782.2A SKIN SWELLING, LOCALIZED SUPERFICIAL (primary encounter diagnosis)  
724.2M CHRONIC LOW BACK PAIN  
250.02B DIABETES MELLITUS TYPE 2, UNCONTROLLED  
504038 SEVERE OBESITY, BMI 40-44.9, ADULT

## PLAN:

Likely lipoma but cancer can't totally ruled out. I explained the B&R of watchful observation.  
Advised for rest, stretching exercises and heating pads without sleeping on it alternating with icing.  
I discussed in details the low fat, low carbohydrate diet and regular exercise. Advised to increase fibers in diet and encouraged to achieve and maintain ideal body weight.  
Orders as below, questions regarding proposed treatment have been answered, including but not limited to benefits, risks, and possible adverse outcomes, agreed with the plans, AVS given and RTC as needed.

Encounter Date: 5/4/2011  
Editor: Sugimoto, Gary Dwayne (M.D.) (Physician)

Author Type: Physician  
Creation Time: 5/4/2011 4:55 PM

History:

47 yo female  
Had a few episodes of dizziness (3) over the past 2 days  
One time was after getting up from toilet  
Second time was lying back in bed  
Third time was when at work and walking to a room  
All episodes brief (seconds)  
Not dizzy currently  
Checked blood pressure at those times and not high or low  
Check sugar at those times and not high or low  
No meds changes, all old  
No URI or other illness concurrently with this  
No increased stress  
No head trauma  
Awaiting Bariatric surgery, already evaluated at Pacific Bariatric

Review of Systems

Neurological: Positive for dizziness.

Physical Exam

Constitutional: She is well-developed, well-nourished, and in no distress.

HENT:

Right Ear: External ear normal.

Left Ear: External ear normal.

Mouth/Throat: Oropharynx is clear and moist.

Cardiovascular: Normal rate, regular rhythm and normal heart sounds.

Pulmonary/Chest: Effort normal and breath sounds normal.

Lymphadenopathy:

She has no cervical adenopathy.

**Patient Instructions**

Your Kaiser Permanente Care Instructions

**Body Mass Index: After Your Visit****Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

If you have a BMI higher than 25

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the

05/04/2011 - Office Visit in FAMILY MEDICINE (continued)

## Patient Instructions (continued)

risk of weight-related health problems.

- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

Dear Ms. Chowdhuary,

Our records show that your physician has ordered lab tests that you have not yet done. Please go to a Kaiser lab for a blood test at your convenience. You do not need to fast. The lab test orders will be waiting for you in the lab.

If you have already done the test(s) recently, please disregard this notice.

Sincerely,

MEDHAT SADIEK SALAMA MD, MEDICAL DOCTOR

## Components

Component	Value	Reference Range	Flag	Lab
-----------	-------	-----------------	------	-----

## 05/10/2011 - Message in FAMILY MEDICINE (continued)

## Labs (continued)

LDL	86	<100 mg/dL	—	956
-----	----	------------	---	-----

## Comment:

DIRECT LDL: For patients having elevated triglyceride levels, i.e. >400 mg/dL, the direct LDL-C result may not represent the patient's LDL-C status upon restoration of triglycerides to lower levels. These patients should not be assumed to have representative LDL-C levels until triglyceride levels are reduced.

Dear patient

At the Kaiser Permanente High Desert Medical Office we believe in preventive medicine. Good diabetes

05/10/2011 - Message in FAMILY MEDICINE (continued)

## Letters (continued)

control will help lower the chance of you suffering any of the complications of diabetes such as heart attack, stroke, kidney failure, blindness, and circulation problems that can lead to amputation. Diabetic labs should be done at least once a year.

Sherry, it has come to our attention you are due to have your diabetic labs repeated. You can come to the High Desert Medical Office Laboratory Monday through Friday 7:30 am to 8:30 pm, and Saturday 7:30 am to 4:30 pm.

## Instructions:

For the tests, please do not eat or drink for 12 hours, and no alcohol for 72 hours, water is okay.

Note: If you are taking diabetes medication, go to the laboratory as early as possible, then eat and take your usual morning diabetes pills and/or insulin as soon as possible. You may take your medications with water. The lab test orders will be waiting for you in the lab.

Sincerely,

Dr. MEDHAT SADIEK SALAMA MD, MEDICAL DOCTOR and Your High Desert Medical Office Health Care Team!

Dear patient

We have noticed that you have not had your Diabetic Retinal Screening Exam done yet. It is very important that you have this exam once a year.

You need to call the Fontana Appointment Center's toll free number 1 888-750-0036 to schedule an appointment at the High Desert Medical Office as soon as possible. You do not need a driver.

06/13/2011 - Letter (Out) in FAMILY MEDICINE (continued)

Pre-op Bariatric surgery lab orders for Pacific Bariatric reprocessed as initial labs have expired. Secondary pre-op labs are an abbreviated listing per protocol. Surgery scheduled 9/13/2011.

Patient advised that testing has been ordered with directive for the following:

Tests are fasting, nothing to eat or drink after midnight.

May drink H2O

No ETOH consumption within 72 hours of test.

Tests will be faxed to Pacific Bariatric once resulted.

Faxed current labs to PBSMG

Electronically signed by Hooper, Myrtle D (R.N.) at 8/19/2011 10:31 AM

## Labs

## CBC W DIFFERENTIAL, AUTO [267647662] (Final result)

Electronically signed by: Hooper, Myrtle D (R.N.) on 08/17/11 1437

Status: Completed

This order may be acted on in another encounter.

Ordering user: Hooper, Myrtle D (R.N.) 08/17/11 1437

Authorized by: Salama, Medhat Sadiek (M.D.)

Ordering mode: Standard

Cosigning events

Electronically cosigned by Salama, Medhat Sadiek (M.D.) 08/23/11 17:15 for Ordering

Frequency: Routine 08/17/11 -

Class: Normal

Quantity: 1

Lab status: Final result

Diagnoses

CASE / CARE MGMT, PREOP BARIATRIC PROGRAM [V65.49 (ICD-9-CM)]

## Provider Details

CREATININE	0.9	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	81-B	mL/min	—	157

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \* GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	7.6	4.8 - 5.9 %	H ^	956

Comment:

Hb A1c is best used to monitor blood sugar control in patients with diabetes. Ideal values are below 7.0% and values >8.0% suggest the need to improve the blood sugar control treatment plan.

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	1.1	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	65-B	mL/min	—	157

## Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \*  
 GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29  
 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

## Components

Component	Value	Reference Range	Flag	Lab
LDL	114	<100 mg/dL	—	956

Comment:

DIRECT LDL: For patients having elevated triglyceride levels, i.e. >400 mg/dL, the direct LDL-C result may not represent the patient's LDL-C status upon restoration of triglycerides to lower levels. These patients should not be assumed to have representative LDL-C levels until triglyceride levels are reduced.

Sherry Chowdhuary is a 47 year old female Roux-en-Y Gastric Bypass, at Scripts Memorial Hospital by Pacific Bariatrics surgeon, Dr Zorn.

This Telephone encounter was to conduct the first of five post op contacts

Pre op wt 243.5 #

Pt responded to the following questions:

Are you currently experiencing any of the following?

- Fever no
- Abdominal pain no

09/21/2011 - Telephone in HEALTH EDUCATION (continued)
--

---

---

**Clinical Notes (continued)**

---

---

3. Chest pain no
4. New shortness of breathe no
5. Vomiting no
6. Nausea no
7. Syncope/Dizziness/Fainting no
8. Blood in stool no
9. Wound site redness/ purulent (pus) discharge no
10. S/S UTI: dysuria, urinary frequency , hematuria no
11. Suicidal ideations no

**Diet, hydration & supplement adherence questions:**

1. Are you taking at least 64 oz of water/fluid daily? 42 oz No

2. Are you adhering to diet restrictions as instructed at time of hospital discharge and as discussed on Options class:

- yes .. Clear, sugar free liquids 1st & 2nd day post Op  
.. Protein supplements : Premiere 60 gm daily.

3. Are you taking your vitamins and supplements? yes

4. Are you urinating? yes

5. Are you having bowel movements? yes

6. Are you using Birth Control? Tubal

**ASSESSMENT:**

V65.49BADE CASE / CARE MGMT, BARIATRIC PROGRAM, POSTOP (primary encounter diagnosis)  
Comment : no s/s of post op complications

**PLAN:**

Reinforced daily exercise  
Continue 64 oz of fluid daily

09/21/2011 - Telephone in HEALTH EDUCATION (continued)

## Clinical Notes (continued)

Diet progression as instructed by Surgeon  
 Keep follow-up appt with Surgeon as scheduled  
 Report all suspected post op complications to Bariatric surgeon and PCP.  
 Advised not to get pregnant within 18 months of surgery, and if RYGB needs to use other than OCP for protection  
 daily requirements  
 Labs @ one month post op  
 Follow up Telephone call Post op  
 Follow-up joint appt. with Post Bariatric NP & RD @ Heath Education/ Bariatric Surgery Department @ Fontana/ Palm Court 1 @ 3 months post Op  
 Chart cc to scheduling LVN to book follow-up appt.  
 Post Op Program folder mailed to patient .

**VITAMIN D, 25-HYDROXY [285552163]**

Resulted: 12/06/11 1702, Result status: Final result

Order status: Completed  
 Collected by: LRL 12/02/11 0821  
 Filed on: 12/06/11 1702  
 Resulting lab: SHERMAN WAY REGIONAL LABORATORY

**Components**

Component	Value	Reference Range	Flag	Lab
25-HYDROXYVITAMIN D	35	30 - 100 ng/mL	—	956
VITAMIN D, 25-HYDROXY, D3	35	NOT ESTABLISHED ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	NOT ESTABLISHED ng/mL	—	956

**Comment:**

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY,NATL OSTEOPOROSIS FDN, K\_DOQI) THAT 25-OH VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD (NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D,25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

**Components**

Component	Value	Reference Range	Flag	Lab
THIAMINE, WHOLE BLOOD	134	70 - 180 nMol/L	—	956

**Comment:**

Thiamine testing has no role in the acute management of suspected thiamine deficiency! Treatment should be prophylactic and empiric, particularly before glucose infusion. Thiamine diphosphate (TPD) is the primary active form of Vitamin B1 in whole blood, and is thought to reflect tissue stores. However, there is abundant evidence that thiamine assays alone, by concentration or activity, are neither sufficiently sensitive nor specific for predicting the development of Wernicke syndrome or beri beri. A quarter of bariatric surgery patients with clinically proven Wernicke syndrome have normal thiamine levels Singh S, Kumar A. Neurology 2007; 68:807-11. Aasheim ER. Ann Surg 2008; 248:714-20. and personal communication. Preoperatively 15-30% of bariatric surgery patients have abnormally low thiamine levels, yet never develop symptoms of thiamine deficiency Flandbaum L, et al. J Gastrointest Surg 2006; 10: 1033-7. Carrodeguas L, et al. Surgery for Obesity and Related Diseases 2005; 1:517-22. . This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	1.2	0.6 - 1.1 MG/DL	H <sup>▲</sup>	157
GLOMERULAR FILTRATION RATE	58-B	mL/min	—	157

## Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \*  
 GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29  
 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

CARE MGMT, BARIATRIC PROGRAM- POST-OP by Duncan, Sheila Gail (N.P.) on 9/26/2011

Status: Sent  
Letter body:

Comments: Welcome to the Post Bariatric Surgery Clinic.

9/26/2011

MR# 000007877387

Sherry Chowdhuary  
21547 Pine Ridge Ave  
Apple Valley CA 92307-3938

Dear Ms. Chowdhuary,

Welcome to the Post Bariatric Surgery Clinic.

Now that you have completed your 12 weeks Bariatric Education Program and undergone weight loss surgery, the last chapter of the Bariatric Program Benefit Package is your one year post surgical follow-up. I want to take a few minutes to explain what is included in your post surgical program:

## First Contact

You will be seeing your Bariatric surgeon during the first month after surgery. We, here at Health Education, want to assure that your transition into post-op life is smooth. Therefore, the Post Bariatric Nurse Practitioner will call you within the first 6-8 weeks after surgery and ask you a series of question to assess for any signs or symptoms of complications and to assure that you are adjusting to your post surgical eating plan.

## Future Contact

Evaluating your weight loss, assessing your nutritional status, monitoring for any vitamin/ mineral deficiencies and assessing for any post weight loss surgery complications are the focus of subsequent contacts. Therefore, we will be scheduling you for appointments, in the Health Education Department, with the Post Bariatric Nurse Practitioner. During these visits your vital signs, surgical site, weight and BMI will

---

**09/26/2011 - Letter (Out) in HEALTH EDUCATION (continued)**

---

**Letters (continued)**

---

---

be evaluated. Your diet will be reviewed. Your Vitamin levels and other labs will be evaluated and ongoing counseling will occur.

Please Note that the above Five contacts will require NO CO- PAY

If you, however, require additional visits, beyond the five scheduled contacts, your standard office visit co-pay will be required. Example: If you need additional visits with a Registered Dietitian, Mental Health counselor or the Nurse Practitioner to follow-up a complication, a co-pay is required.

**WHAT TO BRING AT EVERY VISIT:**

All Vitamins and supplements being taken

Food Diary: keep a diary of your daily intake and bring the preceding 3-7 days to review.

Write down any questions or concerns you may have regarding the outcome of your surgery. If you need to cancel or change appointment, contact Patricia Contreras, LVN (909 609 3734)

Respectfully,

Sheila Duncan, NP-C

Nurse Practitioner

Health Education/Post Bariatric Surgery Clinic

(909) 609-3000

## Mason, Janice at 11/28/2011 1436

Author: Mason, Janice  
Filed: 11/28/2011 2:36 PM  
Status: Signed

Service: —  
Encounter Date: 11/28/2011  
Editor: Mason, Janice

Author Type: —  
Creation Time: 11/28/2011 2:36 PM

## Diagnostic Request

Reason for request: Patient had her bariatric surgery and needs lab work done. Please call to advise

Type of request: Laboratory

Patient's age: 47 Yrs.

Caller's relationship to patient? self

Caller's first and last name (if not patient):

Best time available for callback: anytime

Callback number:

Home Phone 760-810-0188

Do you authorize a Kaiser employee to leave a message? yes.

If active on KP.ORG, do you authorize a response to this message via secured email? n/a

Message sent to office of: MEDHAT SADIEK SALAMA MD

Electronically signed by Mason, Janice at 11/28/2011 2:36 PM

Labs (continued)

ESTABLISHED  
ng/mL

## Comment:

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY,NATL OSTEOPOROSIS FDN, K\_DOQI) THAT 25-OH VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD (NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D,25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## Components

Component	Value	Reference Range	Flag	Lab
THIAMINE, WHOLE BLOOD	134	70 - 180 nMol/L	—	956

Comment:

Thiamine testing has no role in the acute management of suspected thiamine deficiency! Treatment should be prophylactic and empiric, particularly before glucose infusion. Thiamine diphosphate (TPD) is the primary active form of Vitamin B1 in

**11/30/2011 - Released Future/Standing Orders in HEALTH EDUCATION (continued)**

**Labs (continued)**

whole blood, and is thought to reflect tissue stores. However, there is abundant evidence that thiamine assays alone, by concentration or activity, are neither sufficiently sensitive nor specific for predicting the development of Wernicke syndrome or beri beri. A quarter of bariatric surgery patients with clinically proven Wernicke syndrome have normal thiamine levels Singh S, Kumar A. Neurology 2007; 68:807-11. Aasheim ER. Ann Surg 2008; 248:714-20. and personal communication. Preoperatively 15-30% of bariatric surgery patients have abnormally low thiamine levels, yet never develop symptoms of thiamine deficiency Flancbaum L, et al. J Gastrointest Surg 2006; 10: 1033-7. Carrodeguas L, et al. Surgery for Obesity and Related Diseases 2005; 1:517-22. . This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	1.2	0.6 - 1.1 MG/DL	H <sup>▲</sup>	157
GLOMERULAR FILTRATION RATE	58-B	mL/min	—	157

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \* GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

Re: Sherry Chowdhuary  
21547 Pine Ridge Ave  
Apple Valley CA 92307-3938

Dear patient

A very important requirement for high blood pressure medication refills is the documentation that your blood pressure is under control. Under California and Federal guidelines, if your last blood pressure measurement was > 12 months ago, you are uncontrolled and at higher risk for stroke.

Sherry, we need to have a documented blood pressure in our electronic medical records that is under 140/90 in order for us to safely continue refilling your blood pressure medication. PLEASE KEEP IN MIND THAT UNCONTROLLED (HIGH) BLOOD PRESSURE INCREASES YOUR RISK OF HEART ATTACK AND STROKE BY 4 - 8 FOLD.

WE HAVE MADE THE RECHECK PART EASY. On any Saturday, you can walk in for a BLOOD PRESSURE CHECK at NO CHARGE for most health plans. If your blood pressure is under control, you should return for a recheck every 12 months. If your blood pressure is not under control, a physician will adjust your medications during your visit. AGAIN, THERE IS NO CHARGE for most health plans. You can also walk in for a BLOOD PRESSURE CHECK Monday through Friday; however, during the week we may not be able to adjust your medications during your visit.

HEALTHY BLOOD PRESSURE RANGE IS NORMALLY 100-120s (SYSTOLIC) / 50-70s (DIASTOLIC)

Walk in hours for blood pressure checks are as follows:

12/01/2011 - Letter (Out) in FAMILY MEDICINE (continued)

## Letters (continued)

Monday through Saturday  
8:30am - 11:30am & 1:30pm - 4:00pm (Closed for Lunch)

Sincerely,  
Joseph De La Torre, MA on behalf of  
Suk Park, MD, MSPH, FAAFP  
Chief of CSG Primary Care Management  
Assistant Physician in Charge of Kaiser Victorville  
Call Center 1 888-750-0036

Resulted: 01/10/12 1618, Result status: Final result

Order status: Completed

Filed on: 01/10/12 1619

Collected by: MTD 01/06/12 0950

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
THIAMINE, WHOLE BLOOD	146	70 - 180 nMol/L	—	956

## Comment:

Thiamine testing has no role in the acute management of suspected thiamine deficiency! Treatment should be prophylactic and empiric, particularly before glucose infusion. Thiamine diphosphate (TPD) is the primary active form of Vitamin B1 in whole blood, and is thought to reflect tissue stores. However, there is abundant evidence that thiamine assays alone, by concentration or activity, are neither sufficiently sensitive nor specific for predicting the development of Wernicke syndrome or beriberi. A quarter of bariatric surgery patients with clinically proven Wernicke syndrome have normal thiamine levels Singh S, Kumar A. Neurology 2007; 68:807-11. Aasheim ER. Ann Surg 2008; 248:714-20. and personal communication.

Preoperatively 15-30% of bariatric surgery patients have abnormally low thiamine levels, yet never develop symptoms of thiamine deficiency Flancbaum L, et al. J Gastrointest Surg 2006; 10: 1033-7. Carrodeguas L, et al. Surgery for Obesity and Related Diseases 2005; 1:517-22. . This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

486826518	—	BLOOD	MTD 01/06/12 0950

VITAMIN D, 25-HYDROXY [287417243]

Resulted: 01/11/12 1709, Result status: Final result

Order status: Completed

Filed on: 01/11/12 1710

Collected by: MTD 01/06/12 0950

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
25-HYDROXYVITAMIN D	31	30 - 100 ng/mL	—	956
VITAMIN D, 25-HYDROXY, D3	31	NOT ESTABLISHED ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	NOT ESTABLISHED ng/mL	—	956

## Comment:

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY, NATL OSTEOPOROSIS FDN, K\_DOQI) THAT 25-OH VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD (NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D, 25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

Dear Patient,

I have tried to reach you by phone without success. You are due for a 3 month post-op follow up appointment with the Bariatric medicine department. Please contact me at your earliest convenience to schedule that appointment. You can reach me at 909-609-3000.

It is very important that you keep all scheduled appointment with your surgeon as well as follow up with our department. We are here for your success and want to make sure that all is going as it should.

Thank you for your time regarding this matter.

Sincerely,

UHURA N GOODEN LVN  
Bariatric Medicine Department/Health Education

**Letters (continued)**

---

---

Dear Ms. Chowdhuary,

Your recent potassium level is low

Normal potassium level is 3.5- 5.5

Your level is :3.2

**I have reordered potassium supplements for you . You can pick it up at the High Desert Pharmacy if you don't have any of the previously ordered potassium on hand. Recheck your potassium level in 2 weeks.**

**I suggest that you include potassium rich food in your meal plan.**

The main reasons that we require potassium in our bodies is to ensure a safe balance of the PH levels in our bodily fluids and potassium is also involved in regulating other bodily functions and aspects of our composition which include:

- Potassium helps in the regulation of blood pressure
- Potassium helps in the regulation of the nervous system
- Potassium aids the heart and kidneys
- Potassium assists how our muscles work
- Potassium helps our adrenal functions
  
- Raisins (seedless) - 1 cup of seedless raisins weighing approx 5.8 oz - 1,235.9 milligrams of potassium  
This also has 493 calories.
- Raisins (seedless) - 1 small box of seedless raisins weighing approx 0.5 oz - 104.9 milligrams of potassium  
This also has 42 calories.

Dear Ms. Chowdhuary,

Your recent potassium level is low

Normal potassium level is 3.5- 5.5

Your level is :

3.4

**I have ordered potassium supplements for you . You can pick it up at the Kaiser Pharmacy./Recheck your potassium level in 2 weeks.**

**I suggest that you include potassium rich food in your meal plan.**

The main reasons that we require potassium in our bodies is to ensure a safe balance of the PH levels in our bodily fluids and potassium is also involved in regulating other bodily functions and aspects of our composition which include:

- Potassium helps in the regulation of blood pressure
- Potassium helps in the regulation of the nervous system
- Potassium aids the heart and kidneys
- Potassium assists how our muscles work
- Potassium helps our adrenal functions
  
- Raisins (seedless) - 1 cup of seedless raisins weighing approx 5.8 oz - 1,235.9 milligrams of potassium  
This also has 493 calories.
- Raisins (seedless) - 1 small box of seedless raisins weighing approx 0.5 oz - 104.9 milligrams of potassium

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	6.7	4.8 - 5.9 %	H ^	956

## Comment:

Hb A1c is best used to monitor blood sugar control in patients with diabetes. Ideal values are below 7.0% and values >8.0% suggest the need to improve the blood sugar control treatment plan.

## Components

Component	Value	Reference Range	Flag	Lab
LDL	105	<100 mg/dL	—	956

## Comment:

DIRECT LDL: For patients having elevated triglyceride levels, i.e. >400 mg/dL, the direct LDL-C result may not represent the patient's LDL-C status upon restoration of triglycerides to lower levels. These patients should not be assumed to have representative LDL-C levels until triglyceride levels are reduced.

Cardiovascular: Negative for chest pain.  
Musculoskeletal: Positive for back pain.

## Physical Exam

Constitutional: She is well-developed, well-nourished, and in no distress.

**Obese female but lost ~60 lbs**

Cardiovascular: Normal rate and regular rhythm.  
Pulmonary/Chest: Effort normal and breath sounds normal.  
Abdominal:

**She refused since wearing a slim brace**

Musculoskeletal: She exhibits no edema.  
Neurological: She is alert.  
Nursing note and vitals reviewed.

Outpatient Prescriptions Marked as Taking for the 5/8/12 encounter (Office Visit) with Salama, Medhat Sadiq (M.D.):

Hydrochlorothiazide (ESIDRIX/HYDRODIURIL) 25 mg Oral Tab	TAKE 1 TABLET ORALLY EVERY MORNING FOR BLOOD PRESSURE	Disp: 100	Rfl: 3
HYDROcodone-Acetaminophen (NORCO) 10-325 mg Oral Tab	TAKE 1 TABLET ORALLY 3 TO 4 TIMES DAILY AS NEEDED FOR SEVERE PAIN	Disp: 120	Rfl: 2
Potassium Chloride (K-TAB) 10 mEq Oral SR Tab	1 TAB PO DAILY	Disp: 100	Rfl: 3
Losartan (COZAAR) 50 mg Oral Tab	TAKE 1 TABLET ORALLY DAILY FOR HYPERTENSION	Disp: 90	Rfl: 3
Atenolol (TENORMIN) 25 mg Oral	TAKE 2 TABLETS ORALLY	Disp: 400	Rfl: 3

05/08/2012 - Office Visit in FAMILY MEDICINE (continued)

## Clinical Notes (continued)

Tab	2 TIMES DAILY		
NIFEdipine (NIFEDICAL XL) 60 mg Oral TR24 SR TAB	2 TABS PO DAILY	Disp: 200	Rfi: 3
Simvastatin (ZOCOR) 40 mg Oral Tab	TAKE 1 TABLET ORALLY DAILY AT BEDTIME FOR TREATING HIGH CHOLESTEROL	Disp: 90	Rfi: 3

HGBA1C 6.7 01/06/2012  
 CHOL 191 11/09/2010  
 TRIG 163 11/09/2010  
 HDL 37 11/09/2010  
 LDL CALC 121 11/09/2010  
 LDL 105 01/06/2012  
 CHOL/HDL 5.2 11/09/2010

## ASSESSMENT:

724.2 CHRONIC LOW BACK PAIN  
 V45.79 HX OF CHOLECYSTECTOMY  
 790.29 PREDIABETES  
 V45.86 HX OF BARIATRIC SURGERY  
 504402 OBESITY, BMI 34-34.9, ADULT  
 401.9 ESSENTIAL HYPERTENSION

## PLAN:

I counseled patient in details for benefits and risks of narcotic pain medications and acknowledged understanding.

I discussed in details the low fat, low carbohydrate diet and regular exercise. Advised to increase fibers in diet and encouraged to achieve and maintain ideal body weight.

Resume HCTZ, Advised to monitor BP by the nurse weekly and to take the medication as directed with low salt diet and weight management.

The benefits, and risks are discussed. The questions have been answered, and affirms understanding.

Agreed with the plans, AVS given and RTC as needed.

## Orders Placed This Encounter

- CBC NO DIFF
- HEMOGLOBIN A1C
- VITAMIN B12
- IRON AND TIBC
- LIPID PANEL
- CREATININE, SERUM
- ALT, SERUM
- TSH
- ELECTROLYTE PANEL (NA, K, CL, CO2)
- Hydrochlorothiazide (ESIDRIX/HYDRODIURIL) 25 mg Oral Tab
- HYDROcodone-Acetaminophen (NORCO) 10-325 mg Oral Tab

05/08/2012 - Office Visit in FAMILY MEDICINE (continued)

## HEMOGLOBIN A1C [316429988] (Abnormal)

Resulted: 05/09/12 2148, Result status: Final result

Order status: Completed

Filed on: 05/09/12 2148

Collected by: TRK 05/08/12 1130

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	6.3	4.8 - 5.9 %	H ^	956

Comment:

Hb A1c is best used to monitor blood sugar control in patients with diabetes. Ideal values are below 7.0% and values >8.0% suggest the need to improve the blood sugar control treatment plan.

## CREATININE, SERUM [316429993]

Resulted: 05/08/12 1238, Result status: Final result

Order status: Completed

Filed on: 05/08/12 1238

Collected by: TRK 05/08/12 1130

Resulting lab: HIGH DESERT LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.9	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	81-B	mL/min	—	157

Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \*  
 GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29  
 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2  
 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

TSH	0.77	0.35 - 4.00 uIU/mL	—	956

Comment:

----- TO ALL PROVIDERS A REFLEX THYROID TESTING PROGRAM IS NOW IN PLACE. ALL SINGLE TSH SPECIMENS FOUND TO BE ABNORMAL WILL AUTOMATICALLY HAVE FT4 DETERMINED ON THE SAME SERUM SAMPLE. THIS WILL SIMPLIFY SCREENING FOR THYROID DYSFUNCTION BY ORDERING A SINGLE TSH MEASUREMENT. (APPROVED: REGIONAL ENDOCRINOLOGY SUBCOMMITTEE, 1995.)

## Progress Notes

Holt, Laverne C (L.V.N.) at 8/4/2012 1226

Author: Holt, Laverne C (L.V.N.)

Service: —

Author Type: LICENSED VOCATIONAL  
NURSE

Filed: 8/4/2012 12:30 PM

Encounter Date: 8/4/2012

Creation Time: 8/4/2012 12:26 PM

Status: Signed

Editor: Holt, Laverne C (L.V.N.) (LICENSED VOCATIONAL NURSE)

Sherry Chowdhuary is a 48 year old female

Patient presents with:

BLOOD PRESSURE CHECK

WEIGHT CHECK

BP 137/72 | Pulse 57 | Wt 178 lb (80.74 kg) | LMP 08/01/2012

Previous BP readings:

BP Readings from Last 3 Encounters:

08/04/12 : 137/72

05/08/12 : 147/88

04/02/12 : 130/78

Medication(s):

Outpatient Prescriptions Marked as Taking for the 8/4/12 encounter (Allied Health/Nurse Visit) with Temple, Janet L (R.N.):

Losartan (COZAAR) 50 mg Oral Tab	TAKE 1 TABLET ORALLY DAILY FOR HYPERTENSION	Disp: 90	Rfi: 3

**Patient Instructions****TO ACCESS YOUR TEST RESULTS WITHOUT A COMPUTER:**

Call 1-888-4KP-TEST (1-888-457-8378) and enter your medical record number.

However, you can now use your computer or smartphone to view your test results, e-mail your physician's office, make appointments, and refill prescriptions. By registering on KP.ORG you get better access to your own personal health information so you can actively participate in your own care, anytime, anywhere!

**KP.ORG registration is easy:****Step 1** Open your internet browser, type 'kp.org' in the address, and click on Register Now**Step 2 Verify Membership**

First &amp; Last Name, Date of Birth, Area (California – Southern), and Medical Record Number

**Step 3 Accept Terms****Step 4 Choose User ID**

Username, Password, and your e-mail address

08/04/2012 - Allied Health/Nurse Visit in FAMILY MEDICINE (continued)

Patient Instructions (continued)

**Step 5 Activate Registration**

Last 4 digits of your Social Security Number

If you have any trouble or need technical support, call 1-888-556-7677.

**CALL FOR CARE****When You Need to See a Doctor**

Next time you need to see a doctor right away, give us a call before you come in!

We know your time is important. Calling ahead can lessen your wait time and we now offer more same day appointments for your convenience.

Day or night, our care teams can assist you with advice and treatment suggestions. We may even be able to save you an appointment!

So let us know when you need care. At Kaiser Permanente, we want you to thrive!

Call for Care at (888) 750-0036.

Resulting lab: HIGH DESERT LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.9	0.6 - 1.1 MG/DL	—	157
GLOMERULAR FILTRATION RATE	81-B	mL/min	—	157

## Comment:

Comments: Estimated GFR is derived and reported per 1.73 m2 body surface area. Race used from Foundations System: "NB" non-black, "B" black. GFR estimate has been multiplied by 1.21 if "B" is indicated in the system. \* GFR Ranges \*  
GFR >89 Normal (or CKD1\*) 60-89 Mildly reduced (CKD2\*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29  
Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) \* GFR >60 is not diagnostic of CKD 1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on two occasions, or renal biopsy or imaging abnormality).

**Components**

Component	Value	Reference Range	Flag	Lab
HGBA1C%	6.0	4.8 - 5.9 %	H <sup>^</sup>	956

Comment:

Hb A1c is best used to monitor blood sugar control in patients with diabetes. Ideal values are below 7.0% and values >8.0% suggest the need to improve the blood sugar control treatment plan.

## Components

Component	Value	Reference Range	Flag	Lab
THIAMINE, WHOLE BLOOD	121	70 - 180 nMol/L	—	956

## Comment:

Thiamine testing has no role in the acute management of suspected thiamine deficiency! Treatment should be prophylactic and empiric, particularly before glucose infusion. Thiamine diphosphate (TPD) is the primary active form of Vitamin B1 in whole blood, and is thought to reflect tissue stores. However, there is abundant evidence that thiamine assays alone, by concentration or activity, are neither sufficiently sensitive nor specific for predicting the development of Wernicke syndrome or beriberi. A quarter of bariatric surgery patients with clinically proven Wernicke syndrome have normal thiamine levels Singh S, Kumar A. Neurology 2007; 68:807-11. Aasheim ER. Ann Surg 2008; 248:714-20. and personal communication. Preoperatively 15-30% of bariatric surgery patients have abnormally low thiamine levels, yet never develop symptoms of thiamine deficiency Flancbaum L, et al. J Gastrointest Surg 2006; 10: 1033-7. Carrodegua L, et al. Surgery for Obesity and Related Diseases 2005; 1:517-22. . This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## VITAMIN D, 25-HYDROXY [332988673]

Resulted: 08/28/12 1603, Result status: Final result

Order status: Completed

Filed on: 08/28/12 1604

Collected by: KMA 08/23/12 1046

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
25-HYDROXYVITAMIN D	34	30 - 100 ng/mL	—	956
VITAMIN D, 25-HYDROXY, D3	34	NOT ESTABLISHED ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	NOT ESTABLISHED ng/mL	—	956

## Comment:

THERE IS GENERAL CONSENSUS (ENDOCRINE SOCIETY, NATL OSTEOPOROSIS FDN, K\_DOQI) THAT 25-OH VITAMIN D LEVELS >30 ng/mL ARE DESIRABLE. HOWEVER, MOST AMERICANS ARE DEFICIENT BY THIS STANDARD (NHANES III). LEVELS <10 ng/mL ARE CONSISTENT WITH A DIAGNOSIS OF RICKETS/OSTEOMALACIA. INFANTS NORMALLY PRODUCE VITAMIN D METABOLITES THAT MAY FALSELY ELEVATE 25-OH VITAMIN D MEASUREMENTS. PLEASE ORDER VITAMIN D, 25-HYDROXY, NEONATAL 82306D FOR THESE PATIENTS. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## Components

Component	Value	Reference Range	Flag	Lab
PARATHYROID HORMONE INTACT	100	15 - 65 pg/mL	H ^	956

Comment:

INTERPRETATION OF INTACT PTH RESULTS SHOULD TAKE INTO ACCOUNT THE SERUM CALCIUM CONCENTRATIONS AND THE PHYSIOLOGICAL INTERPLAY BETWEEN THESE TWO ELEMENTS IN THE VARIOUS PTH/CALCIUM DISORDERS. THE FOLLOWING LEVELS OF INTACT PTH WERE DETERMINED BY NICHOLS DIAGNOSTICS, USING A DIFFERENT ASSAY. NORMAL RANGE (n=253): PTH OF 10-65 pg/mL WITH CALCIUM VALUES RANGING FROM 8.5-10.5 mg/dL PTH DEPENDENT HYPERCALCEMIA (n=88): PTH 53 TO 1180 pg/mL WITH CALCIUM VALUES RANGING FROM 10.5-16.3 mg/dL NON-PTH DEPENDENT HYPERCALCEMIA (n=63): PTH FROM UNDETECTABLE TO 22 pg/mL WITH CALCIUM VALUES RANGING FROM 10.5-17.6 mg/dL HYPOPARATHYROIDISM (n=8): PTH FROM UNDETECTABLE TO 21 pg/mL WITH CALCIUM VALUES RANGING FROM 6.3-8.5 mg/dL CONSISTENT WITH GOOD CLINICAL PRACTICE, IT IS RECOMMENDED THAT INTACT PTH RESULTS, EVEN WHEN USED IN CONJUNCTION WITH CALCIUM VALUES, SHOULD BE INTERPRETED WITH CAUTION AND WITH CONSIDERATION OF THE OVERALL CLINICAL MANIFESTATIONS.

Sherry Chowdhuary  
 21547 Pine Ridge Ave  
 Apple Valley CA 92307-3938

Re: Post Bariatric Surgery Clinic Appointment

Dear Sherry Chowdhuary,

You are scheduled for your **one year** Post Bariatric Surgery follow up appointment, in our Health Education/  
 Bariatric Surgery Clinic at Kaiser Permanente in Fontana, with the Post Bariatric Surgery Nurse Practitioner on:

**Date: 9/6/12****Time : 11:00 am****Location: 17296 Slover Ave, Palm Court 1, Fontana, Ca 92337**

Please Bring:

1. **A list of all medications and supplements currently taking.**
2. **Three day Food Diary (every thing you eat the preceding 3 days)**

08/08/2012 - Telephone in HEALTH EDUCATION (continued)

Letters (continued)

3. Write down any questions regarding your diet and weight loss.

**Follow Up Labs have been ordered and are in the computer. Please make sure that you have been fasting at least 8 hrs. These are to be completed 2 wk's prior to your scheduled appointment.**

Please check in 10 minutes before your scheduled appointment. There is no co-pay for this visit.

If you need to cancel or reschedule the appointment, please call **Mary Boothe-Greene LVN @ (909) 609-2996.**

Sincerely,

Sheila Duncan,  
Nurse Practitioner  
Health Education/Bariatric Surgery Department

Musculoskeletal: Negative.

Endo/Heme/Allergies: Negative.

Neurological: Negative.

Psychiatric/Behavioral: Negative for depression (**happy had surgery** ).Physical Exam

Constitutional: She is well-developed, well-nourished, and in no distress.

Abdominal: Soft. Bowel sounds are normal.

Skin: Skin is warm.

Psychiatric: Affect normal.

Vitals reviewed.

## Assessment:

V65.49 CASE / CARE MGMT, BARIATRIC PROGRAM, POSTOP (primary encounter diagnosis)

Comments: no s/s of post op complications

- 1) weight status: Weight loss is adequate 55.9% of excess body weight
- 2) Comorbid conditions , DIABETES and HYPERTENSION has changed since wt loss
- 3) Protein Intake Not Adequate
- 4) Caloric intake excessive
- 5) life style is not consistent with successful long term weight loss .

**PLAN:**

09/06/2012 - Office Visit in HEALTH EDUCATION (continued)

## Clinical Notes (continued)

Increase activity

Mindful eating

Attend support group

Attend eating well after Bariatric Surgery

Take supplements as discussed

Recheck Calcium in 1 month

Follow-up Diabetes &amp; HYPERTENSION with PCP

See RD Note

1. Report all suspected complications to Bariatric Surgeon and PCP.

2. Keep all scheduled Appointments with Bariatric Surgeon .

3. Exercise at least one hour daily .

4. Maintenance Supplements: Refer to supplement handout Take vitamin supplement daily as instructed

5. Take other Medications as instructed by your surgeon or PCP.

6. For weight loss plateau: cross train, increase duration and intensity of current exercise routine, resistance training (light weight training or resistance bands)

7. Labs:in 1 yr

8. Reviewed and reinforced Protein requirement ( 60 - 80 GMS protein Daily ) : Eat Protein first, Fruit and veggies second, Carbs last ( whole grain ). Meal time 30 minutes.

9. Reviewed and reinforced daily fluid intake of 64 oz

10 Reviewed and Reinforced appropriate meal size and daily caloric intake of 1000-1200

11. Reinforced NO NSAID, ASA, ALCOHOL, Caffeine

12. Follow up to be arranged per protocol.

Visit time 60 minutes with over 50% counseling face to face on topics

Discussed estimated requirements and reviewed basic nutrition principles and diet guidelines after Bariatric surgery, vitamin and mineral supplementation requirements. Stressed importance of: lifetime vitamin and mineral supplementation, eating balanced meals, adequate intakes of protein, nutrients, and water. Provided written materials.

Filed: 9/6/2012 1:17 PM  
Status: Signed

Service: —  
Encounter Date: 9/6/2012  
Editor: Shumaker, Angela (C.H.E.) (HEALTH EDUCATOR)

Author Type: HEALTH EDUCATOR  
Creation Time: 9/6/2012 11:15 AM

**ASSESSMENT**

Sherry Chowdhuary is a 48 year old female status post bariatric surgery.

Diet Phase: Regular

Diet tolerance: yes

Eating complaints/issues: Experiencing hunger

Adequate hydration: Yes

Estimated requirements (1 year Post-Op)

1000-1200 kcal/day

80-100 gm pro/day

24 - Hour Diet Recall

Breakfast: Premier Protein Shake

Snack: None.

Lunch: 4 Chicken Nuggets, 1 Tea

Snack: 1 cup Cherrios

---

**09/06/2012 - Office Visit in HEALTH EDUCATION (continued)**

---

**Clinical Notes (continued)**

---

Dinner: 3oz Beef Sausage Link, 1 cup Mashed Potato  
Snack: 1 cup Cherrios

Total kcal intake: 1100kcal.

Total protein intake: 70g

Meeting est needs: No. Discussed protein and calorie guidelines. Emphasized importance of protein after bariatric surgery.

Nurse Practitioner/Physician's Assistant will discuss exercise, labs, and vitamin supplements with patient.

**NUTRITION DIAGNOSIS**

Inadequate Protein Intake (NI-5.7.1) related to bariatric surgery and poor dietary choices as evidenced by diet recall and discussion

**INTERVENTION****Dietary Changes:**

- Drink 2 protein shake per day.
- Eat protein at each meal and snack. Good protein sources: fish, shrimp, meat, chicken, turkey, eggs, tofu, edamame, low-fat cheeses, yogurt (Greek best), and cottage cheese.
- [www.nectar.com](http://www.nectar.com); 1-866-333-7403
- Aim for 60-80gm protein per day and 600-800 calories per day.
- Always eat protein first, then fruits and vegetables, and then whole grains (starches).
- Don't skip meal. Aim for 3 meals and 2 planned snacks per day. Avoid grazing.
- Meal sizes should be 1/2-3/4 cup per meal.
- Avoid high sugar foods. Aim for no more than 6 grams of sugars per serving of food at one sitting.
- Avoid high fat foods. Choose foods with 3 grams or less of total fat per ounce, per serving or per 100 calories. Select cheeses with 5 grams or less of total fat per ounce.
- Try to add fruits and vegetables to diet as tolerated.
- Try at least one new food per week. Many foods that aren't tolerated at one stage may be tolerated in a few weeks or months.
- Make sure to chew food thoroughly and take at least 30min to complete meal.
- Aim for 64 ounces (8 cups) of fluids per day. Avoid caffeine and alcohol.
- Keep food diary.

**Exercise Changes:**

- Strive for 45-60 minutes of exercise most days of the week. Include a combination of aerobic exercise and resistance training. Exercise should be a life-long habit and is known to improve over-all health, mood and sense of well-being as well as maximize weight loss.

**Support Systems:**

## 09/06/2012 - Office Visit in HEALTH EDUCATION (continued)

## Clinical Notes (continued)

- Kaiser Fontana offers a bariatric support group on the 1st Tuesday, 2nd Wednesday, and last Thursday of every month. Bariatric Nutrition Support Group is on the 3rd Tuesday of every month. Call 909-609-3000 to schedule.

- Member can contact dietitian via KP.org or at 909-609-3000 with further questions.

Discussed estimated requirements and reviewed basic nutrition principles and diet guidelines after bariatric surgery. Stressed importance of lifetime vitamin and mineral supplementation, eating balanced meals, adequate intakes of protein, nutrients, and water. Provided written materials.

Patient verbalized understanding by appropriate statements, therefore, expect compliance.

Discussed patient nutrition diagnosis and intervention with Post-Op Bariatric Clinic Nurse Practitioner/Physician's Assistant.

## Patient Instructions

**Recheck calcium in 1 month**  
**Take supplements as discussed**

**Dietary Changes:**

- Drink 2 protein shake per day.
- Eat protein at each meal and snack. Good protein sources: fish, shrimp, meat, chicken, turkey, eggs, tofu, edamame, low-fat cheeses, yogurt (Greek best), and cottage cheese.
- [www.nectar.com](http://www.nectar.com); 1-866-333-7403
- Aim for 60-80gm protein per day and 600-800 calories per day.
- Always eat protein first, then fruits and vegetables, and then whole grains (starches).
- Don't skip meal. Aim for 3 meals and 2 planned snacks per day. Avoid grazing.
- Meal sizes should be 1/2-3/4 cup per meal.
- Avoid high sugar foods. Aim for no more than 6 grams of sugars per serving of food at one sitting.
- Avoid high fat foods. Choose foods with 3 grams or less of total fat per ounce, per serving or per 100 calories. Select cheeses with 5 grams or less of total fat per ounce.
- Try to add fruits and vegetables to diet as tolerated.
- Try at least one new food per week. Many foods that aren't tolerated at one stage may be tolerated in a few weeks or months.
- Make sure to chew food thoroughly and take at least 30min to complete meal.
- Aim for 64 ounces (8 cups) of fluids per day. Avoid caffeine and alcohol.
- Keep food diary.

**Exercise Changes:**

- Strive for 45-60 minutes of exercise most days of the week. Include a combination of aerobic exercise and resistance training. Exercise should be a life-long habit and is known to improve over-all health, mood and sense of well-being as well as maximize weight loss.

---

**09/06/2012 - Office Visit in HEALTH EDUCATION (continued)**

---

**Patient Instructions (continued)**

---

---

**Support Systems:**

- Kaiser Fontana offers a bariatric support group on the 1st Tuesday, 2nd Wednesday, and last Thursday of every month. Bariatric Nutrition Support Group is on the 3rd Tuesday of every month. Call 909-609-3000 to schedule.
- Member can contact dietitian via KP.org or at 909-609-3000 with further questions

Angela Shumaker MPH, RD  
Health Educator II  
Bariatrics/ Weight Management

**Constipation:**

- Make sure you get plenty of water daily; carry it with you. Drink enough so that your urine is mostly clear.
- Calcium citrate recommended instead of calcium carbonate
- Iron: Ferrous sulfate is constipating, ask for alternative if on it
- Increase dietary fiber; pears, apples, pineapple, prunes, fruits, vegetables, beans, and whole grains.
- Take a fiber supplement, such as Citrucel, Liquifiber or **Metamucil clear and natural**; every day. Start with a small dose and very slowly increase the dose over a month or more.
- Exercise helps, especially sit ups,
- Sometimes probiotics help
- Schedule time each day for a bowel movement, usually in the morning. A daily routine may help. Take your time having your bowel movement.
- Support your feet with a small step stool when you sit on the toilet. This helps flex your hips and places your pelvis in a squatting position.

Recipe to promote bowel regularity:

Fruit 'N Bran

3 parts bran (wheat bran or 100% bran)

2 parts applesauce

1 part prune juice

Mix together. Eat 3 times per day as needed to help promote bowel movements. Good on toast or crackers

**Stool Softener**

Docusate: Colace® Diocto® Docusoft-S™ Dulcolax® Stool Softener Enemeez® Fleet® Sof-Lax® Genasoft® Phillips'® Stool Softener Laxative Silace Surfak®

Take this medicine at bedtime.

Take this medicine with or without food. Take with food if it causes an upset stomach.

Drink plenty of noncaffeine-containing liquid unless told to drink less liquid by healthcare provider.

A liquid (syrup) is available if you cannot swallow pills.

09/06/2012 - Office Visit in HEALTH EDUCATION (continued)

**Patient Instructions (continued)**

Many times this medicine is taken on an as needed basis.

1) Find and attend a **Support Group : Kaiser Fontana 909 609 - 3000 1st Tuesday ( evening ) , 3rd Tuesday starting June 19,2012( Nutritional Support Group ) 2nd Wednesday ( daytime) last Thursday ( evening ) of the month ; www. Obesityhelp.com ; OA.org ( over eaters anonymous);**

**Eating well after Bariatric Surgery (one time class) 909 609 - 3000**

**Need Healthy Living Coach :**

Try Healthy Living Helpline : 1 866-402-4320:

Monday- Friday 8 am - 4:30 pm

Lifestyle coaching : Healthy eating, Get active/Fit

**Exercise coach who is specialist with Bariatric Patients :**

[http://www.fitandflourishing.com/Bariatric\\_Champion\\_Program.html](http://www.fitandflourishing.com/Bariatric_Champion_Program.html)

2) Exercise at least one hour daily, add resistance training when ok with surgeon; cross train and increase exercise intensity when reach weight loss plateau.

3) Keep all appointments with Bariatric surgeon

4) Report all suspected complications to Bariatric surgeon and Primary Care Provider.

5) Remember when planning meals: protein first, fruit / veggie second and carbs ( whole grain last) . meal time 30 minutes .

6) Protein supplements essential ( you require 80 gms of protein daily

7) Use Whey Protein

8) Plan your meals : Use to help you calculate the protein and calorie content of your meals:

<http://www.nal.usda.gov/fnic/foodcomp/search/>.

or

<http://nutritiondata.self.com>:

What is the best protein?

There is really no one best protein – most dietary experts would tell you that variety is beneficial, and that it is best to get multiple sources. In terms of protein quality, animal proteins always rate higher than vegetable (soy, pea, rice). Egg, whey and casein tend to be the top rated proteins for amino acid content, bioavailability and quality. However, all animal proteins - fish, chicken, lamb, beef, etc - rate very high. How much protein do I need after surgery?

The most common recommendation for protein intake after bariatric surgery is 60 to 80 grams per day, taken in divided doses throughout the day. In general, it is best to take no more than 20 to 30 grams of protein at one sitting.

Nectar Protein : 13 samples for \$ 13

the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Positive for fever and chills. Negative for weight loss, malaise/fatigue and diaphoresis.

HENT: Positive for congestion and sore throat. Negative for hearing loss, ear pain, nosebleeds, tinnitus and ear discharge.

Cardiovascular: Negative for chest pain, palpitations, orthopnea, claudication, leg swelling and PND.

Respiratory: Positive for cough. Negative for hemoptysis, sputum production, shortness of breath, wheezing and stridor.

Gastrointestinal: Negative for nausea and vomiting.

Endo/Heme/Allergies: Does not bruise/bleed easily.

Neurological: Positive for headaches. Negative for weakness.

Physical Exam

Constitutional: She is well-developed, well-nourished, and in no distress.

HENT:

Head: Normocephalic and atraumatic.

Right Ear: External ear normal.

Left Ear: External ear normal.

Nose: Nose normal.

Mouth/Throat: Uvula is midline and mucous membranes are normal. Oropharyngeal exudate, posterior oropharyngeal edema and posterior oropharyngeal erythema present.

Cardiovascular: Normal rate, regular rhythm, normal heart sounds and intact distal pulses. Exam reveals no gallop and no friction rub.

No murmur heard.

Pulmonary/Chest: Effort normal and breath sounds normal. No respiratory distress. She has no wheezes.

She has no rales. She exhibits no tenderness.

Nursing note and vitals reviewed.

**ASSESSMENT:**

460 NASOPHARYNGITIS (primary encounter diagnosis)

786.2 COUGH

**PLAN:**

Gargle with warm salt water once an hour to help reduce swelling and relieve discomfort. Use 1 teaspoon of salt mixed in 1 cup of warm water.

Take an over-the-counter pain medicine, such as acetaminophen (Tylenol), ibuprofen (Advil, Motrin), or naproxen (Aleve). Read and follow all instructions on the label.

Be careful when taking over-the-counter cold or flu medicines and Tylenol at the same time. Many of these medicines have acetaminophen, which is Tylenol. Read the labels to make sure that you are not taking more than the recommended dose. Too much acetaminophen (Tylenol) can be harmful.

Drink plenty of fluids. Fluids may help soothe an irritated throat. Hot fluids, such as tea or soup, may help decrease throat pain

**Orders Placed This Encounter**

- Amoxicillin 500 mg Oral Cap

02/26/2013 - Office Visit in FAMILY MEDICINE (continued)

## Clinical Notes (continued)

- Codeine-guaiFENesin (GUAIFENESIN AC) 10-100 mg/5 mL Oral Liqd

The patient's questions and concerns were answered and patient affirms understanding and agreement with the plan

Call or return to clinic prn if these symptoms worsen or fail to improve as anticipated.

## History:

Family Medicine

Office visit: Ricardo Araujo, MD

Date: 9/27/2013

Sherry Chowdhuary is a 49 year old female

Smoking Status: Never Smoker

Smokeless Status: Never Used

Patient presents with:

PHYSICAL EXAM, ANNUAL - check up

09/27/2013 - Office Visit in FAMILY MEDICINE (continued)

Clinical Notes (continued)

BP 132/75 | Pulse 71 | Temp(Src) 97 °F (36.1 °C) (Temporal) | Resp 12 | Ht 5' 1" (1.549 m) | Wt 186 lb 8 oz (84.596 kg) | BMI 35.26 kg/m<sup>2</sup> | SpO2 97% | LMP 09/20/2013

SUBJECTIVE:

Sherry Chowdhuary is a 49 year old female with history of hypertension, obesity s/p bariatric surgery. She is here for labs and health maintenance.

Patient is stated to have gained weight lately. No other complaints.

Her blood pressure is controlled with current regimen, denies shortness of breath, no chest pain.

She is not depressed and not taking any medication.

Wt Readings from Last 3 Encounters:

09/27/13 : 186 lb 8 oz (84.596 kg)

02/26/13 : 175 lb (79.379 kg)

09/06/12 : 181 lb 6.4 oz (82.283 kg)

Chronic Diseases:ESSENTIAL HYPERTENSION

Status: Stable/Unchanged Control: Well Controlled

Rx Side-Effects: None

DEPRESSION, MAJOR, SINGLE EPISODE, MODERATE

Status: Inactive/In Remission Control: Well Controlled

Rx Side-Effects: None

History Reviewed:

I have reviewed the Medical/Surgical, Family and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever, chills, weight loss, malaise/fatigue and diaphoresis.

Cardiovascular: Negative for chest pain, palpitations, orthopnea, claudication, leg swelling and PND.

Gastrointestinal: Negative for nausea and vomiting.

Musculoskeletal: Negative for myalgias.

Endo/Heme/Allergies: Does not bruise/bleed easily.

Neurological: Negative for dizziness, sensory change, focal weakness and weakness.

Psychiatric/Behavioral: Negative for depression.

Physical Exam

Constitutional: She is oriented to person, place, and time and well-developed, well-nourished, and in no distress.

HENT:

Head: Normocephalic and atraumatic.

Right Ear: External ear normal.

Left Ear: External ear normal.

Nose: Nose normal.

**09/27/2013 - Office Visit in FAMILY MEDICINE (continued)****Clinical Notes (continued)**

Mouth/Throat: Oropharynx is clear and moist.

Cardiovascular: Normal rate, regular rhythm, normal heart sounds and intact distal pulses.

Pulmonary/Chest: Effort normal.

Abdominal: Soft. Bowel sounds are normal.

Neurological: She is alert and oriented to person, place, and time. She has normal reflexes. Gait normal. GCS score is 15.

Psychiatric: Mood, memory, affect and judgment normal.

Nursing note and vitals reviewed.

**ASSESSMENT:**

V45.86 HX OF BARIATRIC SURGERY (primary encounter diagnosis)

401.9 ESSENTIAL HYPERTENSION

V82.9 SCREENING

278.00 OBESITY

296.22 DEPRESSION, MAJOR, SINGLE EPISODE, MODERATE

**PLAN:**

Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.

- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.

- Do not smoke.d.

- Limit alcohol to 1 drink a day for women. Too much alcohol can cause health problems.

**Orders Placed This Encounter**

- LIPID PANEL
- GLUCOSE, FASTING
- VITAMIN B12
- VITAMIN D, 25-HYDROXY
- VITAMIN A
- ELECTROLYTE PANEL (NA, K, CL, CO2)
- IRON AND TIBC
- CREATININE, SERUM
- REFERRAL HEALTH EDUCATION
- NIFEdipine (PROCARDIA XL/NIFEDICAL XL) 60 mg Oral TR24 SR TAB

The patient's questions and concerns were answered and patient affirms understanding and agreement with the plan

Call or return to clinic prn if these symptoms worsen or fail to improve as anticipated.

Resulted: 04/02/14 1239, Result status: Final result

Order status: Completed

Filed on: 04/02/14 1257

Collected by: Wolfenbarger,Rosemary 03/31/14 0808

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 536162391

## Components

Component	Value	Reference Range	Flag	Lab
PARATHYROID HORMONE INTACT	129	15 - 65 pg/mL	H ^	956

## Comment:

Pe Interpretation of Intact PTH results should take into account the serum calcium concentrations and the physiological interplay between these two elements in the various PTH/Calcium disorders. The following levels of Intact PTH were determined by Nichols Diagnostics, using a different assay. NORMAL RANGE (n=253): PTH of 15-65 pg/mL with Calcium values ranging from 8.5-10.5 mg/dL PTH DEPENDENT HYPERCALCEMIA (n=88): PTH 53-1180 pg/mL with Calcium values ranging from 10.5-16.3 mg/dL NON-PTH DEPENDENT HYPERCALCEMIA (n=63): PTH from undetectable to 22 pg/mL with Calcium values ranging from 10.5-17.6 mg/dL HYPOPARATHYROIDISM (n=8): PTH from undetectable to 21 pg/mL with Calcium values ranging from 6.3-8.5 mg/dL Consistent with good clinical practice, it is recommended that Intact PTH results, even when used in conjunction with Calcium values, should be interpreted with caution and with consideration of the overall clinical manifestations.

## Components

Component	Value	Reference Range	Flag	Lab
VITAMIN D, 25-HYDROXY, D3	38	ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	ng/mL	—	956
25-HYDROXYVITAMIN D	38	30 - 100 ng/mL	—	956

Comment:

There is general consensus (Endocrine Society, Natl Osteoporosis FDN, K\_DOQI) that 25-OH Vitamin D measurements > 30 ng/mL are desirable. However, most Americans are deficient by this standard (NHanes III). Levels <10 ng/mL are consistent with a diagnosis of Rickets/Osteomalacia. Infants normally produce Vitamin D metabolites that falsely elevate 25-OH Vitamin D measurements. Please order D,25-Hydroxy, Neonatal [82306D] for these patients. This test was developed

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 536162392

## Components

Component	Value	Reference Range	Flag	Lab
THIAMINE, WHOLE BLOOD	201	70 - 180 nmol/L	H <sup>^</sup>	956

## Comment:

Thiamine testing has no role in the acute management of suspected thiamine deficiency! Treatment should be prophylactic and empiric, particularly before glucose infusion. Thiamine diphosphate (TPD) is the primary active form of Vitamin B1 in whole blood, and is thought to reflect tissue stores. However, there is abundant evidence that thiamine assays alone, by concentration or activity, are neither sufficiently sensitive nor specific for predicting the development of Wernicke syndrome or beri beri. A quarter of bariatric surgery patients with clinically proven Wernicke syndrome have normal thiamine levels [Singh S, Kumar A. Neurology 2007; 68:807-11. Aasheim ER. Ann Surg 2008; 248:714-20. and personal communication.] Preoperatively 15-30% of bariatric surgery patients have abnormally low thiamine levels, yet never develop symptoms of thiamine deficiency [Flancbaum L, et al. J Gastrointest Surg 2006; 10:1033-7. Carrodeguas L, et al. Surgery for Obesity and Related Diseases 2005;1:517-22.]. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

## Components

Component	Value	Reference Range	Flag	Lab
GLUCOSE, FASTING	111	70 - 99 mg/dL	H <sup>^</sup>	157

Comment:

A repeatable fasting blood glucose result > 125 mg/dL is diagnostic of diabetes. A single such result can also be confirmed by, a 2 hr OGTT or random plasma glucose > or = 200 mg/dL, or a Hb A1c >6.4%. Patients with fasting blood sugar results between 100 and 125 mg/dL are at increased risk for future diabetes.

Resulted: 04/01/14 0510, Result status: Final result

Order status: Completed

Filed on: 04/01/14 0511

Collected by: Wolfenbarger,Rosemary 03/31/14 0808

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 536162391

## Components

Component	Value	Reference Range	Flag	Lab
HGBA1C%	6.6	<=6.9 %	—	956
ESTIMATED AVERAGE GLUCOSE	143	mg/dL	—	956

Comment:

Actual blood glucose measurements may differ from the estimated average glucose due to differences in test timing, stability of glycemic control, and RBC lifespan.

CARE MGMT, BARIATRIC PROGRAM- POST-OP by Goodman, Sharon Darlene (L.V.N.) on 1/30/2014

Status: Sent  
 Letter body:

Post Bariatric Program  
 MRN# 000007877387  
 1/30/2014

Sherry Chowdhuary  
 15428 Morada Rd  
 Victorville CA 92394-1937

Re: Post Bariatric Surgery Clinic Appointment

Dear Sherry Chowdhuary

You are scheduled for your 2 year Post Bariatric Surgery follow up appointment in our Health Education/ Bariatric Surgery Clinic at Kaiser Permanente in Fontana, with the Post Bariatric Provider and may or may not see Post Bariatric Registered Dietician on :

## Future Appointments

Date	Time	Provider	Department	Center
3/7/2014	3:10 PM	Turner, Sarah Elizabeth (M.D.)	PMMTB	PCCU

Location: 17296 Slover Ave, Palm Court 1. Fontana, Ca 92337

## Please Bring:

1. All medications and supplements currently taking.
2. Three day Food Diary (every thing you eat for preceding 3 days)
3. Write down any questions regarding your diet and weight loss.

**Follow Up Labs have been ordered and are in the computer. Please make sure that you have been fasting at least 8 hrs. These are to be completed 1-2 weeks prior to your scheduled appointment.**

Please check in 15 minutes before your scheduled appointment. If you need to cancel or reschedule the appointment, please call Sharon Goodman @ 909-609-3000.

01/30/2014 - Telephone in HEALTH EDUCATION (continued)

Letters (continued)

Sincerely,

Sharon Goodman , LVN  
On behalf of Health Ed/Bariatric Department  
17296 Slover Ave, Palm Court 1  
Fontana, CA. 92337

\*This appointment is not to replace any appointment with your Bariatric Surgeon or your Primary Doctor.  
Please keep ALL scheduled appointments with your Bariatric Surgeon.

**Components**

Component	Value	Reference Range	Flag	Lab
CREATININE	1.01	<=1.10 mg/dL	—	157
GLOMERULAR FILTRATION RATE	70	mL/min	—	157
Comment: Estimated GFR (eGFR) is normalized to a standard body surface area (1.73m <sup>2</sup> ), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System. -GFR Ranges- GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).				
RACE	Black	—	—	157

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	1.01	<=1.10 mg/dL	—	157
GLOMERULAR FILTRATION RATE	70	mL/min	—	157
Comment:				
Estimated GFR (eGFR) is normalized to a standard body surface area (1.73m <sup>2</sup> ), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System. -GFR Ranges- GFR >89 Normal (or CKD1*) 60-89 Mildly reduced (CKD2*) 30-59 Moderately reduced (CKD3 if >3mos) 15-29 Severely reduced (CKD4 if >3mos) GFR <15 Kidney failure (CKD5 if >3mos) * GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).				
RACE	Black	—	—	157

 FASTING? YES

## Components

Component	Value	Reference Range	Flag	Lab
CHOLESTEROL	148	<=199 mg/dL	—	956
TRIGLYCERIDE	102	<=149 mg/dL	—	956
Comment: Note that if triglycerides (TG) are sufficiently high, then direct LDL (if TG>1300 mg/dL) or HDL (if TG>2000 mg/dL) measurements may not be valid.				
HDL	45	>=40 mg/dL	—	956
LDL CALCULATED	83	<=99 mg/dL	—	956
CHOLESTEROL/HIGH DENSITY LIPOPROTEIN	3.3	<=4.2	—	956
Comment: See LabNet for more information.				
CHOLESTEROL, NON-HDL	103	—	—	956
Comment: NonHDL targets are 30 mg/dL higher than LDL targets.

## Proactive Care Actions

Proactive Office Encounter Actions: ---BREAST CANCER SCREENING---

Mammogram appointment scheduled for patient

---CERVICAL CANCER SCREENING---

Patient requests Pap Test today, set up for Pap and staged order

---COLORECTAL CANCER SCREENING---

Colorectal screening due, member states received kit in mail, reminded to complete screening and Patient Instructions for AVS staged - patient wants to do it at home

---LABS, IMMUNIZATIONS, PROCEDURES, MEDICATIONS, OTHER---

Lipid Panel order staged

Sherry Chowdhuary exercises 0 minutes 0 days per week at a moderate or strenuous level.

## Health Maintenance procedures due:

Flu\_Influenza 18 Yr+ (Seasonal) due on 8/1/2013

Mammogram Screening due on 11/29/2013

Medication changes: no

04/02/2014 - Office Visit in OBG / GYN (continued)

Clinical Notes (continued)

Allergies: reviewed, no changes

MARINA ISABEL MENDOZA  
4/2/2014 3:12 PM

2 questions ask about domestic violence

1. Are you safe at home? yes

2. Have you been hit, kicked slapped or hurt in the past year? no

Patient refuses to answer any questions no

GYN VISIT

Sherry Chowdhuary is a 50 year old female

Presents for:  
had a chief complaint of VAGINAL BLEEDING.

C/o: 2mos of irregular menses( missed menses last month), then this cycle started on 3/17 and has not stopped ( 2 weeks). Has had heavy menses for a year. Pt went St Marys this AM bc was at work and had a bleeding accident. She was evaluated and was told that sonogram was consistent with " increased tissue", but patient did not bring results. She has not taken any meds to reduce menstrual flow. Had weight loss surgery (roux en Y) and has had some fluctuations in weight . Had surg 2 years ago

**Review of Systems**

Gastrointestinal: Positive for abdominal pain (**cramps**).  
Genitourinary: Negative. Negative for dysuria, urgency and frequency.

**Physical Exam**

Abdominal: Soft. She exhibits no distension. There is no tenderness.  
Genitourinary: Cervix normal, right adnexa normal and left adnexa normal. No vaginal discharge found.  
**VE: no vulvar or vaginal lesions, no abnormal discharge or bleeding. Bimanual exam reveals difficult due to her habitus**  
**No adnexal mass or tenderness appreciated.**

**EMB done:**

**Betadine applied to external os**  
**Tenaculum used on anterior lip of cervix**  
**Sounded to 7 cm, with 3mm pipelle**

Psychiatric: Affect normal.  
Vitals reviewed.

Patient needs to send me her sono records.  
Start prog to reduce bleeding, but if not working will need D&C. I gave her bleeding precautions. Also anemia precautions.  
Start liquid Fe( hx roux en Y)  
Will contact with biopsy results and review sonogram to make appropriate recommendations  
F/u 4 weeks

**ASSESSMENT:**

**626.8 DYSFUNCTIONAL UTERINE BLEEDING (primary encounter diagnosis)**

04/02/2014 - Office Visit in OBG / GYN (continued)

Result: Facility: Fontana Medical Center Provider: CASSANDRA BLOT SIMMONS M.D. Case #: FONG14-4876  
FINAL CYTOLOGIC

INTERPRETATION: CERVIX, LIQUID BASED PAP TEST: - NEGATIVE FOR SQUAMOUS INTRAEPITHELIAL LESION-  
ENDOMETRIAL CELLS PRESENT IN A WOMAN GREATER THAN OR EQUAL TO 40 YEARS OF AGE (See comment).  
ADEQUACY: Satisfactory for evaluation. Endocervical/transformation zone component present. Case signed out by:  
VONNY W TUNRU-DINH M.D. Cathy Kirkwood Date of diagnosis: 04/09/14 COMMENT: Follow-up of ENDOMETRIAL  
CELLS 40+ per ACOG 2010 Guidelines for Management of Abnormal Cervical Cytology and Histology: This is a negative pap  
smear with the presence of benign endometrial cells, endometrial stromal cells or histiocytes in a woman age 40 or older. For  
asymptomatic premenopausal women, no further evaluation is recommended. For symptomatic premenopausal women with  
clinical indications, ie irregular bleeding, endometrial assessment is indicated. For postmenopausal women, endometrial  
assessment is recommended regardless of symptoms. Follow up is determined based upon further evaluation by ordering  
provider. Please consider whether patient is still menstruating and what her risk factors are for endometrial hyperplasia/cancer  
and other pathologies. If indicated, endometrial assessment includes: Colposcopy, Endocervical Curettage, Endometrial  
Biopsy. (Transvaginal Ultrasound may be considered.) COLLECTED: 4/2/2014 RECEIVED: 4/3/2014 FEE CODE(S): A.  
88175 PAP, LBP GS and Rescreen-88175 x 1A. 88141 PAP, MD Review-88141 x 1 EDUCATIONAL NOTE: Cervical  
cytology is a screening test primarily for squamous cancers and precursors and has associated false-negative and false-  
positive results. Adherence to screening guidelines and follow-up of unexplained clinical signs and symptoms are  
recommended to minimize false negative results. GYN METHODOLOGY: GYN review used the SurePath Guided Screening  
process plus cytotechnologist review.

Description: CONSENT Scan Date: 4/10/2014 Index Date: 4/10/2014

Kaiser Foundation Hospital  
Southern California Permanente Medical Group

Chowdhuary, Sherry  
# 7877387  
DOB 11/29/63  
IMPRINT KAISER PERMANENTE ID CARD HERE

CONSENT TO OPERATION, ADMINISTRATION OF ANESTHETICS,  
AND THE RENDERING OF OTHER MEDICAL SERVICES

1. I authorize Cassandra Simmons, MD and/or his/her associates, assistants of his/her choice, and personnel assigned by the hospital or medical group to perform the following operation or procedure (medical and common names): ENDOMETRIAL BIOPSY

FOR THE PURPOSE OF (explanation in simple terms): TISSUE SAMPLE OF THE UTERINE LINING FOR DIAGNOSTIC PURPOSES

upon (name of patient): Chowdhuary Sherry  
and/or to do any other procedures that in his/her/their judgment may be advisable for the patient's well-being including such procedures as are considered medically advisable to remedy conditions discovered during the procedure or operation. I am satisfied with my understanding of the nature of the operation or procedure, the more common risks associated with it, including the potential for serious harm, including wound infection, anesthesia risks and death, and alternative methods of treatment which have been explained to me. No warranty or guarantee has been made as to the result or cure.

2. Under the Federal Safe Medical Devices Act, Kaiser Permanente must provide manufacturers of certain medical devices with personal information to enable manufacturers to locate patients when a device is removed from the market or when information about significant device problems has to be sent out. If the above procedure involves the implantation of a medical device requiring tracking by the manufacturer and/or the Food and Drug Administration (FDA), my name, birth date, address, phone number and social security number may be forwarded for this purpose. Kaiser Permanente will treat the collected information with the same degree of confidentiality provided to all other medical information. The manufacturers and the FDA are required to treat this information in the same manner. I may refuse to permit the release of this required information (complete form NS-5789, Consent for Safe Medical Device Act, Notice Regarding Medical Device Tracking).

3. I hereby authorize and direct the above-named hospital, medical group, surgeon and/or his/her associates and assistants, to provide such additional services for me as he/she or they may deem medically advisable, including, but not limited to, the selection and administration of anesthesia and the performance of pathology and radiology services.

4. I hereby authorize the hospital and medical group to dispose of any severed tissue or member in accordance with accustomed hospital practice.

**Filed on 4/30/2014 0654**

Procedure Orders

1. XR MAMMOGRAPHY SCREENING BILATERAL, 2 VIEWS EACH BREAST [461016714] ordered by Interface, Scal\_Radiology at 04/25/14 1300

BILATERAL DIGITAL SCREENING MAMMOGRAM: 4/25/2014

Comparison is made to exams dated: 8/16/2010 and 12/15/2008 Kaiser High

Desert Radiology.

There are scattered fibroglandular elements in both breasts that could

obscure a lesion on mammography.

There are benign calcifications in both breasts.

No significant masses, calcifications, or other findings are seen in either breast.

There has been no significant interval change.

**IMPRESSION: BENIGN**

There is no mammographic evidence of malignancy. Return to annual mammogram screening schedule is recommended.

Dear Sherry,

05/19/2014 - Letter (Out) in POPULATION CARE MANAGEMENT PRV (continued)

Letters (continued)

At Kaiser Permanente, our primary goal is to help you enjoy a healthy lifestyle and prevent illness. Working together with your health care provider is the best way for you to maintain optimum health and reduce the risk of complications from chronic disease. **Our health care records indicate that you are due for the following screening:**

- Colorectal Cancer Screening**

**Colorectal Screening:** Colon cancer screening is the best method for early detection of colon cancer. Colon cancer is preventable and can be cured if found early. Most colon cancers come from colon polyps (growths in the colon, or large intestine). The risk of colon cancer can be reduced by having regular screenings.

**If you do not already have a home FIT kit or would like to be referred for a Colonoscopy, which is the Gold Standard for testing, please call (888) 750-0036 and a message will be sent to your provider, please indicate you either want a home FIT kit to be mailed or a colonoscopy referral.**

Our mission is to help you THRIVE and preventative screening is a key component to good health.

Sincerely,

Your Complete Care Team  
On behalf of Araujo, Ricardo Moura de (M.D.)  
17284 Slover Ave., Suite #203

History:

Family Medicine

Office visit: Ricardo Araujo, MD

Date: 7/14/2014

Sherry Chowdhuary is a 50 year old female

Smoking Status: Never Smoker

Smokeless Status: Never Used

Patient presents with:

**PERSONAL PROBLEMS**BP 136/68 | Pulse 62 | Temp(Src) 97.7 °F (36.5 °C) (Temporal) | Resp 18 | Ht 5' 1" (1.549 m) | Wt 189 lb 8 oz (85.957 kg) | BMI 35.82 kg/m<sup>2</sup> | SpO<sub>2</sub> 96%SUBJECTIVE:

Sherry Chowdhuary is a 50 year old female with chief complaining of depression symptoms and sadness due to dysmorphic abdomen.

Patient underwent to a bariatric surgery 3 years ago, she lost weight and now is presenting with excess of skin on her lower abdominal area.

Patient states this is causing marital problems, she is not able to have sexual relation with her husband, it is very uncomfortable, she is requesting plastic surgery referral.

History Reviewed:

I have reviewed the Medical/Surgical and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever, chills, weight loss, malaise/fatigue and diaphoresis.

Cardiovascular: Negative for chest pain, palpitations and orthopnea.

Gastrointestinal: Negative for nausea and vomiting.

Genitourinary: Negative for dysuria, urgency and frequency.

Neurological: Negative for weakness.

Psychiatric/Behavioral: Positive for depression. Negative for suicidal ideas, hallucinations, memory loss and substance abuse. The patient is nervous/anxious and has insomnia.

Physical Exam

Constitutional: She is well-developed, well-nourished, and in no distress.

Cardiovascular: Normal rate, regular rhythm, normal heart sounds and intact distal pulses.

Pulmonary/Chest: Effort normal and breath sounds normal. No respiratory distress. She has no wheezes. She has no rales.

Abdominal:

**declined**

Nursing note and vitals reviewed.

07/14/2014 - Office Visit in FAMILY MEDICINE (continued)

## Clinical Notes (continued)

## ASSESSMENT:

309.9 ADJUSTMENT DISORDER  
 278.1 PANNICULUS OF ABDOMEN  
 285.9 ANEMIA  
 401.9 ESSENTIAL HYPERTENSION

## PLAN:

Be physically active. Getting 15 to 30 minutes of exercise each day is good for your body and your mind. Go at your own pace. If you already exercise, keep it up.

- Plan something pleasant for yourself every day. Include activities you have enjoyed in the past.
- Get enough sleep.
- Eat a balanced diet. If your appetite is poor, eat small snacks rather than large meals.
- Do not drink alcohol or use illegal drugs. They may interfere with your treatment.
- Spend time with family and friends. Speak openly with people you trust about your depression.

## Orders Placed This Encounter

- REFERRAL PLASTIC SURGERY
- Ferrous Sulfate 220 mg (44 mg iron)/5 mL Oral Soln
- NIFedipine (PROCARDIA XL/NIFEDICAL XL) 60 mg Oral TR24 SR TAB

The patient's questions and concerns were answered and patient affirms understanding and agreement with the plan

Call or return to clinic prn if these symptoms worsen or fail to improve as anticipated.

## IMPORTANCE OF WEIGHT STABILITY FOR BODY CONTOURING PROCEDURES

Weight stability is very important for many body contouring procedures, including breast reduction, breast reconstruction, panniculectomy (removal of skin below the belly button) and abdominoplasty (tummy tuck/ tummy contouring).

Weight gain or loss after these procedures can adversely affect the results and repeat surgery is not covered by your Health Plan.

Kaiser offers several Weight Loss Classes/ Programs available to you. Please call 866-402-4320 for more information.

When you have reached a weight you feel you can maintain long term, call and make an appointment with a Plastic Surgeon.

Thank you for your visit today.

I hope our contact was courteous and respectful.

I hope I was able to address your concerns, explain what I was doing during the visit

I hope our service has been a 10/10. If I can be of any further assistance please let me know.

For appointments in the Surgical Services Departments please call  
1- (866) 454- 3485.

For appointments in other departments, please call 1- (888) 750- 0036.

On holidays and after working hours, please call:

1- (888)- KP -ON- CALL (1-888-576-6225).

*You may receive a brief survey from Kaiser Permanente asking you to evaluate today's clinic experience. Please complete the survey and return at your earliest convenience. This will help us improve our services to you. We thank you in advance.*

**Your Kaiser Permanente Care Instructions****Body Mass Index: After Your Visit****Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

07/24/2014 - Office Visit in PLASTIC SURGERY (continued)

## Patient Instructions (continued)

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

**If you have a BMI higher than 25**

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

**Where can you learn more?**Go to <http://www.kp.org>Enter **S176** in the search box to learn more about "**Body Mass Index: After Your Visit**".

Order status: Completed

Filed on: 01/09/15 1418

Collected by: Reece, Darlene L 01/07/15 1150

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 552986307

## Components

Component	Value	Reference Range	Flag	Lab
VITAMIN D, 25-HYDROXY, D3	33	ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	ng/mL	—	956
25-HYDROXYVITAMIN D	33	30 - 100 ng/mL	—	956

## Comment:

There is general consensus (Endocrine Society, Natl Osteoporosis FDN, K\_DOQI) that 25-OH Vitamin D measurements > 30 ng/mL are desirable. However, most Americans are deficient by this standard (NHanes III). Levels <10 ng/mL are consistent with a diagnosis of Rickets/Osteomalacia. Infants normally produce Vitamin D metabolites that falsely elevate 25-OH Vitamin D measurements. Please order D,25-Hydroxy, Neonatal [82306D] for these patients. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

Sarah Elizabeth (M.D.) Turner, M.D. Last Read in kp.org Not Read	Sherry Chowdhuary	10/7/2014 4:26 AM

Ms. Chowdhuary,

Please call 909-609-3000 to schedule an appointment for routine bariatric follow up.  
 Please also go to the lab and have lab work done to reassess your iron levels.  
 Lab work has been ordered and no fasting is required.

In addition to the supplemental iron prescribed by your doctor, you should be taking the following vitamins:

- a multivitamin with minerals and 18mg iron
- B12 1000mcg 3x/week
- B1 50mg 3x/week
- 500 mg calcium citrate 3x/day
- 2000IU vitamin D per day
- beta carotene 25,000IU 2x/week

10/07/2014 - Patient Message in METABOLIC CENTER (continued)

## VITAMIN D, 25-HYDROXY [506890817]

Resulted: 01/09/15 1418, Result status: Final result

Order status: Completed

Filed on: 01/09/15 1418

Collected by: Reece,Darlene L 01/07/15 1150

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 552986307

11/07/2014 - Released Future/Standing Orders in METABOLIC CENTER (continued)

## Labs (continued)

## Components

Component	Value	Reference Range	Flag	Lab
VITAMIN D, 25-HYDROXY, D3	33	ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	ng/mL	—	956
25-HYDROXYVITAMIN D	33	30 - 100 ng/mL	—	956

## Comment:

There is general consensus (Endocrine Society, Natl Osteoporosis FDN, K\_DOQI) that 25-OH Vitamin D measurements > 30 ng/mL are desirable. However, most Americans are deficient by this standard (NHanes III). Levels <10 ng/mL are consistent with a diagnosis of Rickets/Osteomalacia. Infants normally produce Vitamin D metabolites that falsely elevate 25-OH Vitamin D measurements. Please order D,25-Hydroxy, Neonatal [82306D] for these patients. This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

Author Type: PHYSICIAN ASSISTANT  
(P.A.)

Filed: 12/11/2014 3:00 PM

Encounter Date: 12/11/2014

Creation Time: 12/11/2014 2:37 PM

Status: Signed

Editor: Raponi, Nyla J (P.A.) (PHYSICIAN ASSISTANT (P.A.))

History:

Patient presents with:

VAGINAL DISCHARGE - x1 week, after menstrual cycle

BP 126/74 | Pulse 73 | Temp(Src) 98 °F (36.7 °C) (Temporal) | Resp 16 | Ht 1.562 m (5' 1.5") | Wt 82.271 kg  
(181 lb 6 oz) | BMI 33.72 kg/m<sup>2</sup> | LMP 12/04/2014

No vaginal itching. Odor. Fishy. Funky.

One week after menses.

Married. Monogamous. Last sexual activity 2 months ago.

No history of STD.

No pelvic pain, fever or chills.

No nausea or vomiting.

Review of Systems

Constitutional: Negative for fever and chills.

Gastrointestinal: Negative for nausea, vomiting and abdominal pain.

Genitourinary: Negative for dysuria, urgency and frequency.

Physical Exam

Constitutional: No distress.

HENT:

From	To	Sent and Delivered
Sarah Elizabeth (M.D.) Turner, M.D. Last Read in kp.org Not Read	Sherry Chowdhuary	1/8/2015 3:14 PM

Ms. Chowdhuary,

You have iron deficiency anemia.

This can cause weakness, fatigue, leg cramping, easy muscle fatigability, decreased exercise tolerance, cold intolerance, dizziness, irritability and hair loss.

You should be taking at least 18 mg of iron daily in your multiple vitamin.

Please start taking ferrous gluconate 325mg 3x/day with vitamin C to boost absorption. I have written a prescription for you and it can be picked up at any Kaiser Pharmacy. Have your blood work done now and have it repeated 4-6 weeks after the start of ferrous gluconate.

Please call or email me if you are experiencing heavy periods, black or tarry stools, or have noticed any blood in your stool or urine, or any other forms of blood loss.

Please call me if you have been consistent with your iron intake or if you are already taking supplemental iron 3x/day.

---

**01/08/2015 - Patient Message in METABOLIC CENTER (continued)**

---

**Messages (continued)**

---

Please schedule a follow up appt by calling 909-609-3000 so that we can review your current health situation and follow up on your nutritional status and post-operative bariatric health. Please bring all of your supplement bottles, a food log, and your protein supplement label to your appointment.

Take iron 2 hours apart from tea, meals, multivitamin, and calcium as these decrease absorption.

Breakfast: Multivitamin with food  
                  Thiamine & B-12 3 x week  
                  Calcium with Vitamin D  
                  beta carotene 2 x wk  
Between meal: Iron  
Lunch           Calcium with Vitamin D  
Between meal: Iron  
P.M. Meal    Calcium with Vitamin D  
Bedtime           Iron

Iron levels change throughout the day so it is best to do your lab work in the morning, when iron levels are highest.

Iron pills may cause stomach problems, such as heartburn, nausea, diarrhea, constipation, and cramps. Be sure to drink plenty of fluids and include fruits, vegetables, and fiber in your diet each day. Iron pills can change the color of your stool to a greenish or grayish black. This is normal, but because internal bleeding can also cause dark stool, be sure to mention any color changes to your doctor.

- Call your doctor if you think you are having a problem with your iron pills. Even after you start feeling better, it will take several months for your body to build up its supply of iron.
- If you miss taking a pill on time, do not take a double dose of iron.
- Keep iron pills out of the reach of small children. An overdose of iron can be very dangerous.
- Eat foods rich in iron, such as red meat, shellfish, poultry, eggs, beans, raisins, whole-grain bread, and leafy green vegetables.
- Steam vegetables to help them keep their iron content.
- Use iron pots for cooking.
- Do not take nonsteroidal anti-inflammatory pain relievers, such as naproxen (Aleve), or ibuprofen (Advil, Motrin)
- Avoid all alcohol

Thanks,  
Sarah Turner, MD, MPH  
Department of Bariatrics

 Araujo, Ricardo Moura de (M.D.) on 06/01/15 1455  
 Magana, Jose L (M.D.) on 06/02/15 0957

**Components**

Component	Value	Reference Range	Flag	Lab
CREATININE	1.01	<=1.10 mg/dL	—	157
GLOMERULAR FILTRATION RATE	70	mL/min/BSA	—	157

Comment:  
 Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System.

-GFR Ranges-  
 GFR >89 Normal (or CKD1\*)  
 60-89 Mildly reduced (CKD2\*)  
 30-59 Moderately reduced (CKD3 if >3mos)  
 15-29 Severely reduced (CKD4 if >3mos)  
 GFR <15 Kidney failure (CKD5 if >3mos)  
 \* GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).

PCP:Magana, Jose L (M.D.)

Sherry Chowdhuary is a 51 year old female

Chief Complaint:

Patient presents with:

JAW PAIN: started 6 days ago after eating at buffalo wild wings, had sores in mouth, and when she chews or tried to eat it feels like it's crackling, no pain just discomfort

ROS:

**ASSESSMENT/PLAN:**

524.60 LEFT TMJ DISORDER

524.60 RIGHT TMJ DISORDER

**Nurse/LVN/MA-**

AVOID NSAIDS: (MOTRIN, ADVIL, IBUPROFEN, NAPROSYN, NAPROXEN, ALEVE, MELOXICAM, MOBIC)

Tylenol is ok (acetaminophen)

Narcotics ok as well after bariatric surgery.

TMJ

Easy stretching.

No icepacks

Heat only.

Tylenol as needed

No gum chewing, ice chewing, hard food, or grinding of teeth.

Slow iron does not cause the constipation.

**Orders Placed This Encounter**

- Mouthwash:diphenhydrAMINE-Hydrocortisone-Lidocaine Visc-Mylanta-Nystatin Oral Susp

**Return to clinic as needed or if your symptoms worsen or fail to improve. (end of Patient Instructions)**

08/25/2015 - Office Visit in FAMILY MEDICINE (continued)

## **Your Kaiser Permanente Care Instructions**

### **Body Mass Index: After Your Visit**

#### **Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

#### **How can you care for yourself at home?**

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

#### **If you have a BMI higher than 25**

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

#### **Where can you learn more?**

Comments: FIT KIT SENT

Fontana / Ontario Outreach

Program Letter #2

November 2015

Dear Member,

**We show you are due or coming due for colorectal cancer screening with the Fecal Immunochemical Test (FIT).** Colon cancer is the third most commonly diagnosed cancer in the United States. At Kaiser Permanente, we strongly recommend regular colorectal cancer screening with the FIT kit once a year for everyone 50 and older. Men and women with certain risk factors may need more frequent screening.

The enclosed FIT kit is simple, painless and is designed to catch a potential problem while it's easy to treat. Follow the instructions with the kit and mail back your sample in the enclosed pre-paid business envelope.

You can call 1-888-457-8378 for your results two weeks after you mail back your sample. If further follow up is necessary, you will be contacted about next steps.

For more information, assistance with instructions, or answers to questions regarding the FIT kit, please contact the Complete Care Department at (909) 609-3900.

Did you know you can manage your health online? If you're registered on kp.org there are many useful resources including your new customized **Personal Action Plan** - a new, online tool that provides recommendations to help you take control of your health. Please visit [kp.org/actionplan](http://kp.org/actionplan) to see what you can take control of today!

Remember to live well, be well and THRIVE!

Sincerely,

---

Program Letter #2

Noviembre 2015

Estimado/a Miembro,

**Nuestros datos indican que le corresponde hacerse la prueba inmunoquímica fecal (FIT) ahora o próximamente.** El cáncer de colon es el tercer tipo de cáncer que se diagnostica más comúnmente en los Estados Unidos. En Kaiser Permanente, recomendamos mucho que las personas mayores de 50 años se hagan un examen regular de detección de cáncer colorectal, con el kit FIT, una vez al año. Los hombres y las mujeres con ciertos factores de riesgo pueden necesitar exámenes más frecuentes.

El kit FIT adjunto es sencillo, no duele y está diseñado para detectar un problema potencial cuando es fácil de tratar. Siga las instrucciones del kit y envíe por correo la muestra en el sobre con porte pagado adjunto.

Puede llamar al 1- 888-457-8378 después de que hayan pasado dos semanas de que envió la prueba para obtener los resultados. En caso de que sea necesario dar más seguimiento, nos comunicaremos con usted para hablar sobre los siguientes pasos.

Si desea más información, ayuda con las instrucciones o respuestas a sus preguntas sobre el kit FIT, por favor comuníquese con el Departamento de Cuidado Integral al (909) 609-3900.

¿Usted sabía que puede manejar su salud por el internet? Si usted está registrado en kp.org hay muchos recursos útiles como el nuevo **Plan de Acción Personal** – una nueva herramienta que ofrece recomendaciones para ayudar a controlar su salud. Por favor visite [kp.org/actionplan](http://kp.org/actionplan) o escanee el código para poder ver que puede controlar hoy!

Recuerde, ¡viva bien!

Atentamente,

Kaiser Permanente, Servicio al Área de Fontana / Ontario

Review of Systems

Constitutional: Negative for fever and diaphoresis.  
HENT: Positive for congestion and sore throat. Negative for ear pain.  
Respiratory: Positive for cough and sputum production.  
Neurological: Positive for headaches.

Physical Exam

Constitutional: She is oriented to person, place, and time and well-developed, well-nourished, and in no distress. No distress.

HENT:

Right Ear: External ear normal.

Left Ear: External ear normal.

Nose: Nose normal.

Mouth/Throat: Oropharynx is clear and moist. No oropharyngeal exudate.

**B maxillary, frontal sinus tenderness**

Pulmonary/Chest: Effort normal and breath sounds normal. No respiratory distress.

Lymphadenopathy:

She has no cervical adenopathy.

Neurological: She is alert and oriented to person, place, and time.

Skin: Skin is warm and dry.

## Indications

ACUTE URI [J06.9 (ICD-10-CM)]

## Patient Instructions

## Your Kaiser Permanente Care Instructions

## Body Mass Index: Care Instructions

## Your Care Instructions

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

## How can you care for yourself at home?

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

## If you have a BMI higher than 25

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35

12/08/2015 - Office Visit in FAMILY MEDICINE (continued)

## Patient Instructions (continued)

inches in women can increase the risk of weight-related health problems.

- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

**03/24/2016 - Ancillary Orders in FAMILY MEDICINE (continued)****Clinical Notes (continued)**

Desert Radiology.

There are scattered fibroglandular elements in both breasts that could

obscure a lesion on mammography.

There are benign calcifications in both breasts.

No significant masses, calcifications, or other findings are seen in either breast.

There has been no significant interval change.

**IMPRESSION: BENIGN**

There is no mammographic evidence of malignancy. A routine screening mammogram is recommended within 2 years.

Kaiser Permanente regional guidelines recommend annual screening mammography for high risk patients and screening mammography within 2 years for normal low risk patients. Determination of risk assessment by

radiology is limited and ultimately should be determined by the patient's primary care provider in collaboration with the patient.

Mammograms do not detect all breast cancer. Up to 15 percent of breast

cancer can't be detected by mammography. Patients with palpable abnormalities may require further investigation.

**Disposition and Responsibility**

A letter with these results will be sent to the patient by the Mammography Department.

Author: Magana, Jose L (M.D.), M.D.  
Filed: 3/25/2016 11:43 AM  
Status: SignedService: —  
Encounter Date: 3/24/2016  
Editor: Magana, Jose L (M.D.), M.D. (Physician)Author Type: Physician  
Creation Time: 3/25/2016 11:39 AM

## History:

Patient presents with:

PHYSICAL EXAM, ANNUAL: New member routine

Patient is a 52 year old female who presents today for above

## Physical

Patient had bariatric surgery, was referred to panniculus of abdomen, states has not heard from referral department, requests new referral

Left dorsal foot pain, no falls, no redness and no fevers, gait normal

Hx of htn, elevated, recheck 2 weeks

Depression, n si or hi, stable, declines medicine now, states may feel better after panniculus dealt with

No additional issues brought up.

## Nursing Notes:

Roman, Michelle 3/24/2016 1:27 PM Signed Sherry Chowdhury is a 52 year old female

Patient presents with:

PHYSICAL EXAM, ANNUAL: New member routine

Estimated body mass index is 35.43 kg/(m<sup>2</sup>) as calculated from the following:

Height as of this encounter: 5' 1" (1.549 m).

Weight as of this encounter: 187 lb 6.3 oz (85 kg).

Member given Patient Instructions on BMI/Weight

## Filed Vitals:

03/24/16 1321 03/24/16 1326

BP: 141/69 146/90

Pulse: 63

Temp: 97.2 °F (36.2 °C)

TempSrc: Temporal

Resp: 16  
Height: 5' 1" (1.549 m)  
Weight: 187 lb 6.3 oz (85 kg)  
SpO2: 97%

**PROACTIVE CARE ACTIONS**

Proactive Office Encounter Actions: Mammogram ordered today (staged)  
---HYPERTENSION---  
Blood Pressure above goal, repeat blood pressure taken and documented  
Flu immunization declined  
The patient exercises 0 minutes per week at a moderate to strenuous level.  
Management  
Electronically signed by:  
MICHELLE ROMAN  
3/24/2016  
1:26 PM

**Patient Active Problem List:**

HYPERLIPIDEMIA  
ESSENTIAL HYPERTENSION  
ABNL PAP SMEAR, POSITIVE DNA TEST FOR HPV IN LOW RISK PATIENT  
ANEMIA, IRON DEFICIENCY  
CHRONIC LOW BACK PAIN  
DEPRESSION, MAJOR, SINGLE EPISODE, MODERATE  
OCCUPATIONAL PROBLEM.  
VACCINE REFUSED BY PATIENT  
SKIN SWELLING, LOCALIZED SUPERFICIAL  
HX OF BARIATRIC SURGERY  
HX OF CHOLECYSTECTOMY  
CASE / CARE MGMT, BARIATRIC PROGRAM, POSTOP  
OBESITY, BMI 34-34.9, ADULT  
DIABETES RESOLVED POST BARIATRIC SURGERY

Outpatient Prescriptions Marked as Taking for the 3/24/16 encounter (Office Visit) with Magana, Jose L (M.D.), M.D.:

Atenolol (TENORMIN) 25 mg Oral Tab, Take 2 tablets by mouth 2 times a day  
Losartan (COZAAR) 50 mg Oral Tab, Take 1 tablet by mouth daily for hypertension  
Acetaminophen (TYLENOL) 500 mg Oral Tab, 2 TABS PO Q6H PRN PAIN OR FEVER. DO NOT EXCEED 6 TABLETS IN 24 HOURS  
NIFedipine (PROCARDIA XL/NIFEDICAL XL) 60 mg Oral TR24 SR TAB, Take 2 tablets by mouth daily

Smoking Status: Never Smoker

---

**03/24/2016 - Office Visit in FAMILY MEDICINE (continued)**

---

**Clinical Notes (continued)**

---

---

Smokeless Status: Never Used

BP 146/90 mmHg | Pulse 63 | Temp(Src) 97.2 °F (36.2 °C) (Temporal) | Resp 16 | Ht 5' 1" (1.549 m) | Wt 187 lb 6.3 oz (85 kg) | BMI 35.43 kg/m2 | SpO2 97%

**Physical Exam**

Constitutional: She is oriented to person, place, and time and well-developed, well-nourished, and in no distress.

**HENT:**

Head: Normocephalic and atraumatic.

Eyes: EOM are normal. Pupils are equal, round, and reactive to light.

Neck: Normal range of motion. Neck supple. No thyromegaly present.

Cardiovascular: Normal rate, regular rhythm and normal heart sounds.

Pulmonary/Chest: Effort normal and breath sounds normal. No respiratory distress.

Abdominal: Soft. Bowel sounds are normal. She exhibits no distension. There is no tenderness. There is no rebound and no guarding.

Musculoskeletal: Normal range of motion.

**Diffuse dorsal left foot ttp, no redness and no swelling, normal distal pulses**

Neurological: She is alert and oriented to person, place, and time. Gait normal.

Skin: Skin is warm and dry.

Psychiatric: Affect normal. Her mood appears not anxious. She exhibits a depressed mood. She expresses no homicidal and no suicidal ideation. She expresses no suicidal plans and no homicidal plans.

Vitals reviewed.

**Assessment and Plan:**

ROUTINE ADULT HEALTH CHECK UP EXAM (primary encounter diagnosis)

Plan: CBC NO DIFFERENTIAL

ELECTROLYTE PANEL (NA, K, CL, CO2)

CREATININE

ALT

TSH

HEMOGLOBIN A1C, SCREENING OR PREDIABETIC MONITORING

LIPID PANEL

MICROALBUMIN, URINE

DECLINES INFLUENZA VACCINATION

ESSENTIAL HYPERTENSION

Note: recheck 2 weeks

Plan: ATENOLOL 25 MG ORAL TAB

**03/24/2016 - Office Visit in FAMILY MEDICINE (continued)**

**Clinical Notes (continued)**

LOSARTAN 50 MG ORAL TAB

**MEDICATION REFILL**

Plan: LOSARTAN 50 MG ORAL TAB

**LEFT FOOT PAIN**

Note: supportive care

Plan: ACETAMINOPHEN 500 MG ORAL TAB

**PANNICULUS OF ABDOMEN**

Plan: REFERRAL PLASTIC SURGERY

**DEPRESSION, MAJOR, SINGLE EPISODE, MODERATE**

Note: stable

Pt advised to return if worse or not doing better. Pt was warned to go the emergency department for any severe or unexpected symptoms as well as any drastic changes in condition. After visit summary was given to the patient and all orders were again explained at checkout. All patient questions were answered and patient verbalized an understanding of the plan.

**CALL FOR CARE**

When You Need to See a Doctor

Next time you need to see a doctor right away, give us a call before you come in!

We know your time is important. Calling ahead can lessen your wait time and we now offer more same day

**03/24/2016 - Office Visit in FAMILY MEDICINE (continued)****Patient Instructions (continued)**

appointments for your convenience.

Day or night, our care teams can assist you with advice and treatment suggestions. We may even be able to save you an appointment!

So let us know when you need care. At Kaiser Permanente, we want you to thrive!

Call for Care at (888) 750-0036.

**TO ACCESS YOUR TEST RESULTS WITHOUT A COMPUTER:**

Call 1 (888) 4KP-TEST (1-888-457-8378) and enter your medical record number.

However, you can now use your computer or smartphone to view your test results, e-mail your physician's office, make appointments, and refill prescriptions. By registering on KP.ORG you get better access to your own personal health information so you can actively participate in your own care, anytime, anywhere!

**KP.ORG** registration is easy:

Step 1 Open your internet browser, type 'kp.org' in the address, and click on Register Now

Step 2 Verify Membership

First & Last Name, Date of Birth, Area (California – Southern), and Medical Record Number

Step 3 Accept Terms

Step 4 Choose User ID

Username, Password, and your e-mail address

Step 5 Activate Registration

Last 4 digits of your Social Security Number

If you have any trouble or need technical support, call 1(888) 556-7677.

**LAB HRS: MONDAY THROUGH FRIDAY 7:30am to 9:00 pm**

Saturday and Sunday 9 am - 9 pm

**-Pharmacy Hours (Kaiser Victorville):**

Monday- Friday 8:30am - 9:00pm and Saturday and Sunday 8:30 - 9 pm

**-Treatment Nurse's hours are:**

Mon-Friday, 8:30 a.m. – 4:30 Saturday 8:30- 11:30

Pain Management 1-866-454-3485

**Wellness Coaching by Phone** continues providing free, personalized service to assist members in reaching their lifestyle and wellness goals and to improve their health.

Coaching focuses on five lifestyle behaviors that impact risk for and management of chronic conditions, and supports members who want to:

- Quit tobacco
- Get active
- Eat healthy
- Manage weight
- Reduce stress

Trained to help members who are thinking about or are already motivated and ready to make a behavior change, wellness coaches partner with a member to focus on healthy habits, create a customized plan, and schedule convenient telephone sessions.

No referral is needed to access wellness coaching. Members can call the new phone number, (866) 862-4295, for an appointment. Wellness Coaching by Phone is available Monday through Friday, 6 a.m. to 7 p.m. (Pacific Standard Time).

## Your Kaiser Permanente Care Instructions

### Body Mass Index: After Your Visit

#### Your Care Instructions

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese. If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes. BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

" Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.

" Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.

" Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.

03/24/2016 - Office Visit in FAMILY MEDICINE (continued)

## Patient Instructions (continued)

" Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

If you have a BMI higher than 25

" Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.

" Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

**04/06/2016 - Office Visit in FAMILY MEDICINE (continued)**

---

**Clinical Notes (continued)**

---

---

Left foot pain after dropping table leg since 6/19/15  
Happened while she was at work and has been seeing employee health  
Patient is a CNA  
Taking Tylenol with minimal relief  
Was released from employee health due to negative radiograph and didn't want injections  
No recent surgery or immobilization  
No oral contraceptive pill use  
No leg swelling  
No hemoptysis  
No previous history of DVT/PE

**History Reviewed:**

I have reviewed the Medical/Surgical and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

**Review of Systems**

Constitutional: Negative for fever, chills, weight loss and malaise/fatigue.  
Cardiovascular: Negative for chest pain.  
Respiratory: Negative for shortness of breath.  
Gastrointestinal: Negative for nausea, vomiting and abdominal pain.  
Musculoskeletal: Positive for myalgias.  
Neurological: Negative for dizziness and headaches.

**Physical Exam**

Constitutional: She is oriented to person, place, and time and well-developed, well-nourished, and in no distress. Vital signs are normal. She appears not dehydrated. She appears healthy. Non-toxic appearance. She does not have a sickly appearance. No distress.

**Patient happy, active, sitting upright**

Cardiovascular: Normal rate.

Pulmonary/Chest: Effort normal.

**Good air movement. No respiratory distress**

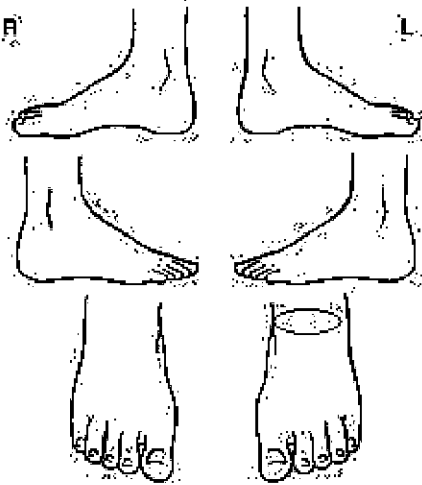

Musculoskeletal: Normal range of motion.

Left foot: There is tenderness. There is normal range of motion.

Feet:

04/06/2016 - Office Visit in FAMILY MEDICINE (continued)

## Clinical Notes (continued)

**Left foot poorly localized soft tissue tenderness. Full ankle range of motion without limitation. No bony tenderness to palpation. Pedal strength 5/5. Dorsalis pedis 2+. Toe sensation intact. Capillary refill immediate. Patient ambulates well. No tenderness to palpation at proximal tibia/fibula. Negative Homan's sign**

**Neurological:** She is alert and oriented to person, place, and time. Gait normal. GCS score is 15.

**Skin:** Skin is warm and dry.

**Psychiatric:** Affect normal.

Vitals reviewed.

## Assessment:

M79.672 LEFT FOOT PAIN (primary encounter diagnosis)  
I10 ESSENTIAL HYPERTENSION  
E66.9, Z68.35 OBESITY, BMI 35-35.9, ADULT

## Plan:

## Orders Placed This Encounter

- XR LEFT FOOT 3 OR MORE VIEWS
- REFERRAL PODIATRY
- Acetaminophen (TYLENOL) 500 mg Oral Tab

The results of X-rays given today are preliminary readings. If the final results from Radiologist should be read Differently, you will be notified.

Apply a compressive ACE bandage. Rest and elevate the affected painful area. Apply cold compresses intermittently as needed. As pain recedes, begin normal activities slowly as tolerated. Call if symptoms persist.

Further workup and treatment should be done if symptoms persist, worsen or new related symptoms occur. Patient aware of need to go to urgent care or ER if symptoms worsen or persist within 8-12 hours.

Off work note provided for 1 week

The questions and concerns of patient were answered and patient affirms understanding and agreement with the plan.

**Patient Instructions**

Your appointment has been scheduled for the Department of Podiatry/Podiatrist: 818-375-1690 with DR. CLAUSSEN on 4/8/16 at 10:00 AM at KAISER FONTANA BUILDING 3 ONT THE 1ST FLOOR. Please call the specialty department directly for any cancellation or reschedule needs.

**Your Kaiser Permanente Care Instructions**

**Body Mass Index: Care Instructions**

**Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a

---

**04/06/2016 - Office Visit in FAMILY MEDICINE (continued)**

---

**Patient Instructions (continued)**

---

formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

### **How can you care for yourself at home?**

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

### **If you have a BMI higher than 25**

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

04/06/2016 - Office Visit in FAMILY MEDICINE (continued)

Patient Instructions (continued)

## Your Kaiser Permanente Care Instructions

### Foot Pain: Care Instructions

#### Your Care Instructions

Foot injuries that cause pain and swelling are fairly common. Almost all sports or home repair projects can cause a misstep that ends up as foot pain. Normal wear and tear, especially as you get older, also can cause foot pain.

Most minor foot injuries will heal on their own, and home treatment is usually all you need to do. If you have a severe injury, you may need tests and treatment.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

#### How can you care for yourself at home?

- Take pain medicines exactly as directed.
  - ◆ If the doctor gave you a prescription medicine for pain, take it as prescribed.
  - ◆ If you are not taking a prescription pain medicine, ask your doctor if you can take an over-the-counter medicine.
- Rest and protect your foot. Take a break from any activity that may cause pain.
- Put ice or a cold pack on your foot for 10 to 20 minutes at a time. Put a thin cloth between the ice and your skin.
- Prop up the sore foot on a pillow when you ice it or anytime you sit or lie down during the next 3 days. Try to keep it above the level of your heart. This will help reduce swelling.
- Your doctor may recommend that you wrap your foot with an elastic bandage. Keep your foot wrapped for as long as your doctor advises.
- If your doctor recommends crutches, use them as directed.
- Wear roomy footwear.
- As soon as pain and swelling end, begin gentle exercises of your foot. Your doctor can tell you which exercises will help.

#### When should you call for help?

Call **911** anytime you think you may need emergency care. For example, call if:

- Your foot turns pale, white, blue, or cold.

Call **your doctor now** or seek immediate medical care if:

- You cannot move or stand on your foot.
- Your foot looks twisted or out of its normal position.
- Your foot is not stable when you step down.
- You have signs of infection, such as:
  - ◆ Increased pain, swelling, warmth, or redness.
  - ◆ Red streaks leading from the sore area.

04/06/2016 - Office Visit in FAMILY MEDICINE (continued)

## Patient Instructions (continued)

- ◆ Pus draining from a place on your foot.
- ◆ A fever.
- Your foot is numb or tingly.

Watch closely for changes in your health, and be sure to contact your doctor if:

- You do not get better as expected.
- You have bruises from an injury that last longer than 2 weeks.

Sherry Chowdhuary is a 52 year old woman

04/22/2016 - Office Visit in PLASTIC SURGERY (continued)

## Clinical Notes (continued)

Well known to me from previous  
Bilateral breast reduction mammoplasties. 1/31/2007

Now here for evaluation of excess lower abdominal skin/pannus.

Current complaints are rashes under skin folds - treatable with topical meds, cosmetic concerns and back discomfort.

Maximal weight: 250 lbs

S/P weight loss 61 Lbs.

She went down to 172 lbs and gained it back.

PE:

BP 121/76 mmHg | Pulse 73 | Ht 1.588 m (5' 2.5") | Wt 85.73 kg (189 lb) | BMI 34.00 kg/m2

Constitutional: . No acute distress.

Well developed, well nourished

HEENT:

Head: Normocephalic and atraumatic.

Ears: external ears normal in appearance

Nose: Nose normal.

Mouth/Throat: Oropharynx is clear and moist.

Eyes: sclera anicteric Conjunctivae and extraocular motions are normal. Pupils are equal, round,

Neck: Normal range of motion. Neck supple.

Cardiovascular: Normal rate

Pulmonary/Chest: breathing comfortably, No respiratory distress.

Musculoskeletal: Normal range of motion.

Neurological: alert and oriented., Gait normal.

Skin: Skin is warm and dry.

Psychiatric: Mood, affect and judgment normal.

Abdomen:

+ pannus in lower abdomen.

**04/22/2016 - Office Visit in PLASTIC SURGERY (continued)**

---

**Clinical Notes (continued)**

---

---

**ASSESSMENT:**

E65 PANNICULUS OF ABDOMEN (primary encounter diagnosis)

**PLAN:****Recommend further weight loss prior to surgery.-Goal BMI 30  
Patient has a symptomatic lower abdominal pannus.**

The procedure fully discussed - differences between a cosmetic abdominoplasty and a reconstructive abdominal lipectomy or panniculectomy were fully explained. An abdominoplasty is cosmetic and not a covered procedure whereas a panniculectomy can be performed if specific medical criteria are met. A panniculectomy may not provide significant cosmetic improvement but may improve the conditions contributing to development of rashes although there is no assurance of such. Other risks were reviewed such as bleeding, infection, hypertrophic/poor scarring, dehiscence and delayed wound healing, persistent seroma, loss of umbilicus, unexpected hernia in need of repair, DVT, PE, continued symptoms, asymmetry of contour and/or poor cosmetic outcome, pain that may be permanent, suture reactions, and need for further surgery were also explained. Patient understands weight must be stable for several months prior to surgery.

Panniculectomy with umbilical repositioning discussed. This is a cosmetic fee And needs to be paid up front.

I also discussed with her that if the patient wishes to have an abdominoplasty, it can be offered for a discounted fee as part of the cosmetic Program since patient is already a candidate for a panniculectomy. This is a reduced fee compared to the normal stand alone fee for an abdominoplasty. The fee needs to be paid upfront.

She is leaning towards abdominoplasty.

**Patient Instructions**

---

---

Thank you for your visit today.

I hope our contact was courteous and respectful, and my nurses have shown care and concern during your visit.

I hope I was able to address your concerns, explain what I was doing during the visit

I hope I was able to explain the problems using words that were easy for you to understand

**04/22/2016 - Office Visit in PLASTIC SURGERY (continued)**

**Patient Instructions (continued)**

My goal is to address all your concerns and spend enough time answering your questions my sincere effort is to provide quality of service to my patients

I hope our service has been a 10/10. If I can be of any further assistance please let me know.

To e-mail dr. kiran : Sign up at [www.kp.org](http://www.kp.org)

*You may receive a brief survey from Kaiser Permanente asking you to evaluate todays clinic experience. Please complete the survey and return at your earliest convenience. This will help us improve our services to you. We thank you in advance.*

If you have any questions or concerns, please call the Kaiser Advice Registered Nurse at (909) 427-3909, Monday - Friday 8:30 am - 4:30 pm. If the nurse is unavailable to answer your call, please leave a message and your call will be returned.

On holidays and after working hours, please contact:  
1-888-KP-ON-CALL (1-888-576-6225).

=====

HEALTHY LIVING HELPLINE: (866) 402-4320 Mon-Fri 8:00a-4:30p

It's easy! Just one free phone call for lifestyle coaching on to quit smoking, weight loss, getting active/fit and/or eating healthy.

Take your total health assessment online ([kp.org/healthylifestyles](http://kp.org/healthylifestyles)).

=====

MY HEALTH MANAGER: Register online at [KP.org](http://KP.org) for email access to your health care team, your medical record (test results, immunization record), to refill prescriptions, view upcoming or to schedule appointments, and more!

=====

Please bring an UPDATED MEDICATION LIST with you to all appointments. This is important as pharmacy records only indicate what medications you have been prescribed and when, but may not necessarily reflect the way you currently take your medications. Be sure to include vitamins and over the counter (OTC) or herbal medications on your list as it is important for your physicians to be aware that you may be taking these as well.

Trivex(impact resistant) or High Index lenses are recommended for thinner, lighter lenses.

Anti-reflective(AR) coating is excellent for reducing glare from lights at night and computer screens. It also allows other people to see your eyes through your glasses rather than their own reflection.

UV light from the sun can cause damage to your eyes and has been shown to contribute to numerous eye conditions. UV protection should be worn at all times when in the sun. Photochromic lenses allow your regular glasses to darken in the sun or you can purchase a separate pair of tinted sunglasses.

Edited by: Felce, Roonggan Klaisri (O.D.), O.D.

**07/23/2016 - Office Visit in OPTOMETRY (continued)**

**Clinical Notes (continued)**

**Assessment:**

- (H52.203) BILAT ASTIGMATISM
- (H52.11) RIGHT MYOPIA
- (H52.02) LEFT HYPEROPIA
- (H52.4) PRESBYOPIA

Ocular Health is within normal limits OU. Binocular vision WNL.

**Plan:**

Prescription as per refraction. Discussed any changes and adaptation.  
 Release Eyeglass Rx for 2 years or sooner PRN

Results discussed with patient-see patient instructions-After Visit Summary Dispensed to Patient.

Next Exam: 1 year or sooner PRN.

Learn more about our products and services at: [www.kp2020.org](http://www.kp2020.org)

Vision Essentials offers a variety of lens materials and technologies.

**DSL or Direct Surface Progressive Lenses**- A special process that produces the widest, most balanced vision for multi-focal wearers. The process uses a mathematical calculation of a variety of factors to optimize your prescription.

**High Index Lenses** - The thinnest, lightest and most comfortable lenses which are best utilized to reduce the weight of stronger corrections and to provide the most cosmetically appealing appearance.

**Polycarbonate Lenses** -The most impact resistant lenses available.

**Active Tint** - A product that enables lenses that are clear indoors to automatically darken to a moderate shade of grey outdoors.

**illumacoat ULTRA** – Vision Essentials' in-house anti-reflective coating that eliminates unwanted reflections, night glare and allows your eyes to look more natural. This premium product repels water, grease and oils for effortless cleaning and is incredibly scratch resistant so your lenses last longer.

---

**Refractive errors:** Refractive errors include myopia, hyperopia, presbyopia, and astigmatism, eye conditions that are very common. Most people have one or more of them. Refractive errors can usually be corrected with eyeglasses or contact lens.

**Myopia (nearsightedness):** If you have myopia you can clearly see close objects, but distant objects are blurry. Myopia is caused by the eyeball being too long. Myopia occurs in different degrees from minimal to extreme. The more myopic you are the blurrier your vision is at a distance and objects will have to be closer to you so you can see them clearly.

**Hyperopia (farsightedness):** If you have hyperopia, you can see distant objects clearly, but close ones are blurry. Hyperopia occurs when the eyeball is too short for the light rays to focus clearly on the retina.

**Astigmatism:** If you have an astigmatism, the surface of the eye (cornea) is not perfectly round, rather it is more oval and doesn't allow the eye to focus clearly. The cornea is very important in helping the eye focus light rays on the retina. Astigmatism rarely occurs alone. It is usually accompanies myopia or hyperopia.

**Presbyopia:** If you have presbyopia, you have the loss of the ability to focus up close that occurs as you age. Most people are between 40 and 50 years when they realize for the first time that they can't read objects close to them. The letters of the phone book are 'too small' or you have to hold the newspaper farther away from your eye to see it clearly. At the same time your ability to focus on objects that are far way remains normal.

## Labs (continued)

## VITAMIN D, 25-HYDROXY [669898080] (Abnormal)

Resulted: 09/09/16 2119, Result status: Final result

Order status: Completed

Filed by: Interface, Scal\_Lab\_Cerner 09/09/16 2120

Collected by: Phou,Salyna 09/07/16 1144

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 592098046

Acknowledged by: Carpio, Rebecca Ann (N.P.), N.P. on 09/12/16 1129

## Components

Component	Value	Reference Range	Flag	Lab
VITAMIN D, 25-HYDROXY, D3	26	ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	ng/mL	—	956
25-HYDROXYVITAMIN D	26	30 - 100 ng/mL	L v	956

Comment:

There is general consensus (Endocrine Society, Natl Osteoporosis FDN, K\_DOQI) that 25-OH Vitamin D measurements > 30 ng/mL are desirable. However, most Americans are deficient by this standard (NHanes III).

Levels <10 ng/mL are consistent with a diagnosis of Rickets/Osteomalacia.

Infants normally produce Vitamin D metabolites that falsely elevate 25-OH Vitamin D measurements. Please order D,25-Hydroxy, Neonatal [82306D] for these patients.

This test was developed and its performance characteristics determined by the SCPMG Regional Reference Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research. The SCPMG Regional Reference Laboratories are certified under CLIA '88 as qualified to perform high complexity clinical laboratory testing.

Victorville CA 92394-1937

Re: Post Bariatric Surgery Clinic Appointment

Dear Sherry Chowdhuary

We have been unable to contact you by telephone. You are/were due for a 5 YEAR postop follow-up appointment in SEPT.2016.

Follow up after Bariatric Surgery is critical to continued and successful weight loss. *Studies show that patients who keep their follow-up appointments and attend support groups lose more weight and keep it off longer.*

Please call our office @ 909-609-3000 at your convenience, to schedule your appointment with us.

**If you have already scheduled this appointment, please disregard letter.**

Thank you and we look forward to hearing from you soon.

Health Education/Bariatric Department  
17296 Slover Avenue  
Palm Court 1  
Fontana, CA 92337

Re: Post Bariatric Surgery Clinic Appointment

Dear Sherry Chowdhuary

You are scheduled for your 5 YEAR post bariatric surgery follow up appointment in our Health Education/Bariatric Surgery Clinic at Kaiser Permanente in Fontana, with the Post Bariatric Provider, and may or may not see the Post Bariatric Registered Dietitian on:

**Future Appointments**

Date	Time	Provider	Department	Center
10/5/2016	2:00 PM	Carpio, Rebecca Ann (N.P.), N.P.	PMHED	PCCU

Location: 17296 Slover Ave, Palm Court 1. Fontana, CA 92337

**Please Bring:**

1. All medications and supplements currently taking.
2. Three day food diary (everything you eat for the preceding 3 days)
3. Write down any questions regarding your diet and weight loss.

**Follow up labs have been ordered and are in the computer. No fasting required. These are to be completed 1-2 weeks prior to your scheduled appointment.**

Please check in 15 minutes before your scheduled appointment. If you need to cancel or reschedule the appointment, please call 909-609-3000.

Sincerely,

The Health Education/Bariatric Department  
17296 Slover Ave, Palm Court 1  
Fontana, CA. 92337

**Components**

Component	Value	Reference Range	Flag	Lab
CREATININE	0.81	<=1.10 mg/dL	—	157
GLOMERULAR FILTRATION RATE	>89	mL/min/BSA	—	157

**08/04/2016 - Orders Only in POPULATION CARE MANAGEMENT PRV (continued)**

**Labs (continued)**

Comment:  
Estimated GFR (eGFR) is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>), by sex, age, and race. The eGFR has been multiplied by 1.21 if "Black" race is reported in Foundations System.

-GFR Ranges-  
GFR >89 Normal (or CKD1\*)  
60-89 Mildly reduced (CKD2\*)  
30-59 Moderately reduced (CKD3 if >3mos)  
15-29 Severely reduced (CKD4 if >3mos)  
GFR <15 Kidney failure (CKD5 if >3mos)  
\* GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. microalbumin or urine protein >300 mg/day on 2 occasions, or renal biopsy or imaging abnormality).

RACE	Black	—	—	157
------	-------	---	---	-----

1.)

Right foot pain from injury 1 year ago

Table leg fell on foot at work, CNA

Is seeing worker's comp but feels like they aren't helping

Had MRI but doesn't have the results

Never went to see podiatry after initial visit

History Reviewed:

I have reviewed the Medical/Surgical and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

Review of Systems

Constitutional: Negative for fever, chills, weight loss and malaise/fatigue.

Cardiovascular: Negative for chest pain.

Respiratory: Negative for shortness of breath.

Gastrointestinal: Negative for nausea, vomiting and abdominal pain.

Musculoskeletal: Positive for myalgias.

Neurological: Negative for dizziness and headaches.

Physical Exam

Constitutional: She is oriented to person, place, and time and well-developed, well-nourished, and in no distress. Vital signs are normal. She appears not dehydrated. She appears healthy. Non-toxic appearance. She does not have a sickly appearance. No distress.

09/07/2016 - Office Visit in FAMILY MEDICINE (continued)

## Clinical Notes (continued)

**Patient happy, active, sitting upright**

Cardiovascular: Normal rate.

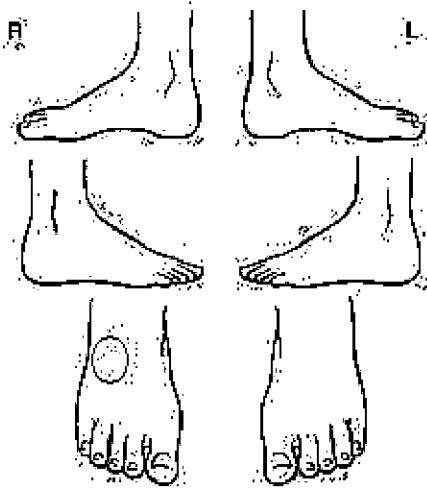

Pulmonary/Chest: Effort normal.

**Good air movement. No respiratory distress**

Musculoskeletal: Normal range of motion.

Right foot: There is tenderness. There is normal range of motion.

Feet:

**Full ankle range of motion without limitation. No bony tenderness to palpation. Pedal strength 5/5. Dorsalis pedis 2+. Toe sensation intact. Capillary refill immediate. Positive tenderness to palpation at dorsal midfoot area noted. Patient ambulates well. No tenderness to palpation at proximal tibia/fibula.**

Neurological: She is alert and oriented to person, place, and time. Gait normal. GCS score is 15.

Skin: Skin is warm and dry.

Psychiatric: Affect normal.

Vitals reviewed.

## Assessment:

M79.671 RIGHT FOOT PAIN (primary encounter diagnosis)

I10 ESSENTIAL HYPERTENSION

Z28.20 DECLINES INFLUENZA VACCINATION

## Plan:

## Orders Placed This Encounter

- REFERRAL PODIATRY

Apply a compressive ACE bandage. Rest and elevate the affected painful area. Apply cold compresses intermittently as needed. As pain recedes, begin normal activities slowly as tolerated. Call if symptoms persist.

Off work note provided for 1 week

Further workup and treatment should be done if symptoms persist, worsen or new related symptoms occur. Patient aware of need to go to urgent care or ER if symptoms worsen or persist within 8-12 hours.

The questions and concerns of patient were answered and patient affirms understanding and agreement with the plan.

**Patient Instructions**

Your Kaiser Permanente Care Instructions:

---

**09/07/2016 - Office Visit in FAMILY MEDICINE (continued)**

---

**Patient Instructions (continued)**

---

---

You are being given this care instruction on alcohol because your response to the alcohol screening question indicates that you may need further follow-up.

We know that there are limits to what is considered safe alcohol consumption. The amount that is acceptable for you is based on a variety of factors, including your health status, medications, your gender, and your age.

Do not drink and drive, and do not drink and operate heavy machinery. Even one alcoholic beverage can impair your thinking, your driving, and your ability to respond.

Pregnant women and people under 21 should not drink any alcohol.

The following are potentially harmful amounts of alcohol:

**MALE:**

Weekly use: More than 14 standard drinks\* per week or 4 drinks per day

Any episode: 5 or more drinks in a day

**FEMALE:**

Weekly use: More than 7 standard drinks\* per week or 3 drinks per day

Any episode: 4 or more drinks in a day

\* A standard drink is a 12-ounce glass of beer, a 5-ounce glass of wine, or a shot of liquor.

If you are having problems related to drinking or are drinking more than the amounts above, we recommend that you reduce your level of drinking or stop altogether.

If you are unable to reduce your alcohol use, please call your local Kaiser Permanente Chemical Dependency Recovery Program.

If stress is causing you to drink, please call Wellness Coaching by Phone at 1-866-862-4295 to speak with a lifestyle coach.

## **Your Kaiser Permanente Care Instructions**

### **Body Mass Index: Care Instructions**

#### **Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

---

**09/07/2016 - Office Visit in FAMILY MEDICINE (continued)**

---

**Patient Instructions (continued)**

---

---

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

### **How can you care for yourself at home?**

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- Get at least 30 minutes of exercise 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

### **If you have a BMI higher than 25**

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

## **Your Kaiser Permanente Care Instructions**

### **Foot Pain: Care Instructions**

#### **Your Care Instructions**

Foot injuries that cause pain and swelling are fairly common. Almost all sports or home repair projects can

---

**09/07/2016 - Office Visit in FAMILY MEDICINE (continued)**

---

**Patient Instructions (continued)**

---

cause a misstep that ends up as foot pain. Normal wear and tear, especially as you get older, also can cause foot pain.

Most minor foot injuries will heal on their own, and home treatment is usually all you need to do. If you have a severe injury, you may need tests and treatment.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

- Take pain medicines exactly as directed.
  - ◆ If the doctor gave you a prescription medicine for pain, take it as prescribed.
  - ◆ If you are not taking a prescription pain medicine, ask your doctor if you can take an over-the-counter medicine.
- Rest and protect your foot. Take a break from any activity that may cause pain.
- Put ice or a cold pack on your foot for 10 to 20 minutes at a time. Put a thin cloth between the ice and your skin.
- Prop up the sore foot on a pillow when you ice it or anytime you sit or lie down during the next 3 days. Try to keep it above the level of your heart. This will help reduce swelling.
- Your doctor may recommend that you wrap your foot with an elastic bandage. Keep your foot wrapped for as long as your doctor advises.
- If your doctor recommends crutches, use them as directed.
- Wear roomy footwear.
- As soon as pain and swelling end, begin gentle exercises of your foot. Your doctor can tell you which exercises will help.

**When should you call for help?**

Call **911** anytime you think you may need emergency care. For example, call if:

- Your foot turns pale, white, blue, or cold.

Call **your doctor now** or seek immediate medical care if:

- You cannot move or stand on your foot.
- Your foot looks twisted or out of its normal position.
- Your foot is not stable when you step down.
- You have signs of infection, such as:
  - ◆ Increased pain, swelling, warmth, or redness.
  - ◆ Red streaks leading from the sore area.
  - ◆ Pus draining from a place on your foot.
  - ◆ A fever.
- Your foot is numb or tingly.

Watch closely for changes in your health, and be sure to contact your doctor if:

- You do not get better as expected.
- You have bruises from an injury that last longer than 2 weeks.

09/14/2016  
04:26 PM**KP ReConnect - NON-KFH Initial Post Discharge Call****Situation**

CHOWDHUARY SHERRY is a 52 year old female who has an NonKFH\_ED at [VICTOR VALLEY GLOBAL MEDICAL] admitted on [9/12/2016] and Discharged on [9/13/2016] with a diagnosis of [Right Foot Pain].

**Background**

Where were you when symptoms occurred: [Home]

What Symptoms lead to the NON KFH Event: [Patient stated her left foot is still in pain due to a table falling on it. She went to the nearest ED because she thought her Podiatry appt was this Friday 9/16 and she couldn't wait that long.]

Treatment and discharge instructions, while at the NON KFH Facility: [Observe/Assess;Other:She was only given 500 mg Tylenol. No other tests were performed]

Patient reached at listed phone number: home/mobile

Per OTRS, presented at this location via [WALK-IN]actual [WALK-IN]

Reason for presentation at Non-KP facility: [Walk in]

Reason for 911 call: [Did not call 911]

Reason for Walk-in: [Member NonCompliance]

New Member: [No]

Last contact with KP: [0-3 Month]

Patient attempted to make a Same Day appt with KP?: [NO]

Patient attempted to call/email KP MD?: [NO]

Patient attempted to call NON-Plan phone number on KP Card?: [NO]

**Medical History** (from problem list, PROB):

Patient Active Problem List:

HYPERLIPIDEMIA

ESSENTIAL HYPERTENSION

ABNL PAP SMEAR, POSITIVE DNA TEST FOR HPV IN LOW RISK PATIENT

ANEMIA, IRON DEFICIENCY

CHRONIC LOW BACK PAIN

Dear Sherry,

My name is Jessica, RN, I spoke with you today regarding the KP ReConnect program.

Thank you for taking the time to speak with me today. A discharge from the Emergency Department can sometimes be difficult. Since you were recently discharged from VICTOR VALLEY GLOBAL MEDICAL, I want to make sure you are doing well for the next thirty days. I can help you make follow up appointments with your Primary Care Physician and connect you with any other resources that you may need. If you need any more information or have any questions you can also call me directly at **323-857-2395**.

I have enclosed additional information for future use

Dear Ms. Chowdhuary,

Thank you for completing your bariatric lab work.

**Your vitamin D level is below normal at 26, normal range is 30-100**

A prescription has been ordered for Vitamin D. Please pick-up your vitamin D prescription from your local

09/15/2016 - Letter (Out) in PREVENTIVE MEDICINE (continued)

## Letters (continued)

Kaiser Pharmacy and take as directed.

Also, begin taking an additional over the counter vitamin D3 2000 International Unit daily

**Your calcium level is below normal**

Please begin taking calcium citrate 500-600 mg by mouth three times a day with meals.

**Your iron level is below normal**

Please purchase an over-the-counter Ferrous Gluconate 325 mg tablets and begin taking 2 times a day with a vitamin C 500 mg chewable tablet, may take with food, avoid taking with calcium supplement. If constipation should occur, begin taking over the counter colace 100 mg one to two times a day as needed. Also increase your water and fiber intake.

If you are unable to tolerate the iron supplement, please let me know.

**I have ordered repeat lab work to be completed in 3 months, non-fasting.**

Please let me know if you have any further questions or concerns.

Rebecca A. Carpio-Darshay FNP-C, MSN

Dear Ms. Chowdhuary,

Your carotene level is also below normal

Carotene, which is a precursor to Vitamin A enhances the health of your skin, body tissue and is needed by the white blood cells to develop a strong immune system

Good food sources for carotene would include green leafy vegetables, carrots, sweet potatoes, winter squash, spinach, and apricots.

Please purchase an over the counter beta carotene 25,000 International Unit and begin taking once a day, with or without food for the next 2 months then decrease to 2 times a week.

09/21/2016 - Letter (Out) in PREVENTIVE MEDICINE (continued)

## Letters (continued)

I have also ordered a follow up carotene level in 3 months.

Please let me know if you have any further questions or concerns.

Take care,

Rebecca A. Carpio-Darshay FNP-C, MSN

Component	Value	Reference Range	Flag	Lab
REPORT	Vitamin D, 25-OH, Total: 33	30 - 100 ng/mL	—	950

Comment:  
25-OHD3 indicates both endogenous production and supplementation. 25-OHD2 is an indicator of exogenous sources, such as diet or supplementation. Therapy is based on measurement of Total 25-OHD, with levels <20 ng/mL indicative of Vitamin D deficiency, while levels between 20 ng/mL and 30 ng/mL suggest insufficiency. Optimal levels are > or = 30 ng/mL.

TELEPHONE APPOINTMENT VISIT (TAV) -- 8:06 AM

Sherry Chowdhuary is a 53 year old female

**04/10/2017 - Telephone Appointment Visit in FAMILY MEDICINE (continued)**

**Clinical Notes (continued)**

Reason for TAV: TEST RESULTS

DIABETIC FOOT EXAM due on 11/29/1981

**PHONE VISIT DOCUMENTATION:**

Recheck in June, mild anemia

**ASSESSMENT:**

E11.9 DM 2 (primary encounter diagnosis)  
D64.9 ANEMIA

**PLAN:**

**Orders Placed This Encounter**

- HEMOGLOBIN A1C, DIABETIC MONITORING
- CBC NO DIFF
- Ferrous Sulfate 325 mg (65 mg iron) Oral Tab

Time spent with patient or guardian over the phone was 5 minutes.

DM 2 [E11.9 (ICD-10-CM)]

## CREATININE [765162459] (Abnormal)

Resulted: 09/18/17 1002, Result status: Final result

Order status: Completed  
Collected by: Bernstrom,Michelle N 09/17/17 1912Filed by: Interface, Scal\_Lab\_Cerner 09/18/17 1002  
Resulting lab: SCPMG REGIONAL REFERENCE  
LABORATORIES, CLINICAL PATHOLOGY - CHINO HILLS

## Narrative:

RMS ACCN: 617303166

Acknowledged by

Hicks, Rachel Catherine (M.D.), M.D. on 09/18/17 1015

Magana, Jose L (M.D.), M.D. on 09/19/17 1142

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	1.52	<=1.10 mg/dL	H ^	SCPMG
GLOMERULAR FILTRATION RATE	45	mL/min/BSA	—	SCPMG

## Comment:

Estimated GFR (eGFR) is calculated by the CKD-Epi formula using serum creatinine, sex, age and race. Result is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>). This result is invalid if serum creatinine is not in steady state, if patient is receiving dialysis, or if muscle mass is significantly above or below population norm for age and gender.

## -GFR Ranges-

GFR &gt;89 Normal (or CKD1\*)

60-89 Mildly reduced (CKD2\*)

30-59 Moderately reduced (CKD3 if &gt;3mos)

15-29 Severely reduced (CKD4 if &gt;3mos)

GFR &lt;15 Kidney failure (CKD5 if &gt;3mos)

\* GFR &gt;60 is not diagnostic of CKD1 or 2

unless another marker of kidney damage is present

(e.g. excessive urine albumin or urine protein

on 2 occasions, or renal biopsy or imaging abnormality).

RACE	Black	—	—	SCPMG
------	-------	---	---	-------

09/11/2017 - Allied Health/Nurse Visit in FAMILY MEDICINE 1 (continued)

## Other Orders (continued)

## Indications

SCREENING FOR DIABETIC RETINOPATHY [Z13.5 (ICD-10-CM)]

## Patient Instructions

**Instructions:** Your eyes have been dilated today, you may drive as soon as you can see distance clearly. You may have light sensitivity and blurred vision with dilation and should wear dark glasses. Light sensitivity is common for the first 4 to 6 hours until dilation wears off.

**Adverse reactions:** Watch for adverse reaction such as pain, redness, tearing, itching, nausea and vomiting. Contact the Ophthalmology Advice Registered Nurse at 1-888-750-0036 and ask to be transferred to extension 73922, Monday thru Friday from 8:30 AM - 5:00 PM. After business hours, please call KP On Call Advice Nurse (KPOC) at 1-888-576-6225 or go to Urgent Care or Emergency Room.

You will receive by mail, a letter regarding your Diabetic Retinal Screening results in about 10-14 days. Thank you for choosing Kaiser Permanente as your health care provider.

**General Information**

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Editor: Tostado, Laura E (R.N.), R.N. (REGISTERED NURSE)Author Type: REGISTERED NURSE  
Creation Time: 1/11/2018 11:48 AM

ASCVD-Risk (A-Risk): 10.4%

**Medication/MRAR List**

Medication	MRAR	DSR
Atenolol (TENORMIN) 25 mg Oral Tab	55	-79
Losartan (COZAAR) 50 mg Oral Tab	74	-24
NIFEdipine (PROCARDIA XL/NIFEDICAL XL) 60 mg Oral TR24 SR TAB	88	42
Acetaminophen (TYLENOL) 500 mg Oral Tab		
Ascorbic Acid (VITAMIN C) 250 mg Oral Tab		
ASPIRIN 81 MG ORAL TBEC DR TAB (ECOTRIN LOW STRENGTH)		
Baclofen (LIORESAL) 10 mg Oral Tab		
traMADol (ULTRAM) 50 mg Oral Tab		
VITAMIN D2 50,000 unit Oral Cap		

*MRAR may not represent the member's true adherence if additional medication is received from outside KP pharmacies, if the amount taken is different than the Sig, or if the patient has stopped the medication, but it was not discontinued from the KPHC meds list.*

Instructed patient on the following lifestyle modifications which are a critical component of ASCVD risk reduction.

- Avoiding all nicotine or getting help quitting
- Maintaining healthy weight by following a heart healthy diet (low cholesterol, low fat)
- Importance of regular daily exercise at least 30 minutes every day
- Diabetic: maintaining HGBA1c under 7.0 and regular follow up with Diabetic Case Manager

**Wellness Coaching by Phone** continues providing free, personalized service to assist members in reaching their lifestyle and wellness goals and to improve their health.

Coaching focuses on five lifestyle behaviors that impact risk for and management of chronic conditions, and supports members who want to:

- Quit tobacco
- Get active

---

**06/04/2018 - Office Visit in FAMILY MEDICINE (continued)**

---

**Patient Instructions (continued)**

---

---

- Eat healthy
- Manage weight
- Reduce stress

Trained to help members who are thinking about or are already motivated and ready to make a behavior change, wellness coaches partner with a member to focus on healthy habits, create a customized plan, and schedule convenient telephone sessions.

No referral is needed to access wellness coaching. Members can call the new phone number, (866) 862-4295, for an appointment. Wellness Coaching by Phone is available Monday through Friday, 6 a.m. to 7 p.m. (Pacific Standard Time).

**Your Kaiser Permanente Care Instructions****Body Mass Index: After Your Visit****Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese. If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes. BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

" Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.

" Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.

" Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.

" Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

If you have a BMI higher than 25

" Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.

" Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

Where can you learn more?

## General Information

Protect yourself from the flu. Get vaccinated.

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call

**Wellness Coaching by Phone** continues providing free, personalized service to assist members in reaching their lifestyle and wellness goals and to improve their health.

Coaching focuses on five lifestyle behaviors that impact risk for and management of chronic conditions, and supports members who want to:

- Quit tobacco
- Get active
- Eat healthy
- Manage weight
- Reduce stress

Trained to help members who are thinking about or are already motivated and ready to make a behavior change, wellness coaches partner with a member to focus on healthy habits, create a customized plan, and schedule convenient telephone sessions.

No referral is needed to access wellness coaching. Members can call the new phone number, (866) 862-4295, for an appointment. Wellness Coaching by Phone is available Monday through Friday, 6 a.m. to 7 p.m. (Pacific Standard Time).

**Patient Instructions (continued)****Body Mass Index: After Your Visit****Your Care Instructions**

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

" Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.

" Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.

" Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.

" Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

If you have a BMI higher than 25

" Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.

" Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

Dear Ms. Chowdhuary:

The Health Education Department has received a referral from your physician recommending that you enroll in the Living Well with Diabetes classes. This is a four class series, each class is two hours in length. The information presented in the Living Well with Diabetes classes, will provide you with information on:

- Self-blood-glucose monitoring**
- Survival skills**
- Sick day rules**
- Travel tips**
- Healthy meal planning**

We invite you to call the Health Education Department today to schedule an appointment for the Living Well with Diabetes classes. For your convenience English or Spanish classes are available morning, afternoon, and evening.

Please call (909) 609-3000, between the hours of 8:30am and 4:30pm, Monday through Friday.

Sincerely,

Health Education Department  
Kaiser Permanente

---

We have been unable to reach you to schedule an appointment for the Mammogram exam that your Doctor ordered for you.

Please call us at (909) 427-3914 during the business hours of 7:00 am to 7:00 pm, everyday, to schedule this appointment. If we do not hear from you within 30 days, your exam may expire. If, after that time, you wish to have this exam you will need to contact your Doctor to have a new order written.

If your appointment has already taken place or is scheduled for the near future please disregard this notice.

Thank you.

Sincerely,

Radiology Department  
Fontana/Ontario Medical Centers

## General Information

## SKIP THE TRIP. Have our pharmacy come to you!

New and refill prescriptions mailed to your home.

## When using the mail order option for obtaining prescriptions:

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

## 4 ways to receive prescriptions by mail:

Sherry Chowdhuary (MRN: 000007877387) • Printed at 8/13/19 2:56 PM

This is confidential information. Do not throw away in a Kaiser Permanente trash can.

**06/22/2018 - Telephone in HOV RADIOLOGY (continued)**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.

## SUBJECTIVE:

Sherry Chowdhuary is a 54 year old female

## Chief Complaint

Patient presents with

- DIZZY

*X 5 days, per patient only when she drives, per patient needs to use glasses but does not have any*

## Allergies

Allergen

- Lisinopril  
Cough

Reactions

Other

Last Admit Date: 01/24/2007

## History:

Patient c/o dizziness while driving last week

Not associated with any room spinning, n/v

Only when she drives 'on the freeway'

No pain associated, no weakness, shortness of breath, chest pain, palpitations, vision changes

Currently not symptomatic.

Outpatient Prescriptions Marked as Taking for the 9/7/18 encounter (Office Visit) with Charoen, Charinda (P.A.), P.A.

Medication

Sig

- metroNIDAZOLE (FLAGYL) 500 mg Oral Tab Take 1 tablet by mouth 2 times a day for 7 days

- Atenolol (TENORMIN) 25 mg Oral Tab Take 2 tablets by mouth 2 times a day

09/07/2018 - Office Visit in URGENT CARE (continued)

## Clinical Notes (continued)

• Atorvastatin (LIPITOR) 40 mg Oral Tab	Take 1 tablet orally daily at bedtime to help lower cholestrol and help keep arteries open
• Acetaminophen (TYLENOL) 500 mg Oral Tab	2 TABS orally every 6 Hours for PAIN OR FEVER. DO NOT EXCEED 6 TABLETS IN 24 HOURS
• Losartan (COZAAR) 50 mg Oral Tab	Take 1 tablet by mouth daily for hypertension
• NIFEdipine (PROCARDIA XL/NIFEDICAL XL) 60 mg Oral TR24 SR TAB	Take 2 tablets by mouth daily
• ASPIRIN 81 MG ORAL TBEC DR TAB	None Entered

## History

## Smoking Status

- Never Smoker

## Smokeless Tobacco

- Never Used

## Review of Systems

Constitutional: Negative for chills and fever.

Eyes: Negative for blurred vision, double vision and discharge.

Cardiovascular: Negative for chest pain and palpitations.

Respiratory: Negative for shortness of breath.

Gastrointestinal: Negative for nausea and vomiting.

Neurological: Positive for dizziness. Negative for tingling, tremors, sensory change, speech change, focal weakness, seizures, loss of consciousness and headaches.

## OBJECTIVE:

BP 114/69 (BP Location: LA-LEFT ARM, BP Patient Position: STANDING, Cuff Size: Large Adult) | Pulse 58 | Temp 97.2 °F (36.2 °C) (Temporal) | Resp 16 | Ht 5' 1" (1.549 m) | Wt 195 lb 1.7 oz (88.5 kg) | SpO2 94% | BMI 36.87 kg/m<sup>2</sup>

Estimated body mass index is 36.87 kg/m<sup>2</sup> as calculated from the following:

Height as of this encounter: 5' 1" (1.549 m).

Weight as of this encounter: 195 lb 1.7 oz (88.5 kg).

## Physical Exam

Constitutional: She is oriented to person, place, and time and well-developed, well-nourished, and in no distress.

## HENT:

Head: Normocephalic and atraumatic.

Right Ear: External ear normal.

Left Ear: External ear normal.

Mouth/Throat: Oropharynx is clear and moist.

Cardiovascular: Normal rate.

Pulmonary/Chest: Effort normal and breath sounds normal.

Musculoskeletal: Normal range of motion.

Neurological: She is alert and oriented to person, place, and time.

## Clinical Notes (continued)

Unsure what causes her dizziness only while driving at this time. Advised to f/u with PCP for further evaluation

Urine showed trichomonas so she was treated

Drink plenty of fluid. No alcohol x 7 days

To ED if worse

I have addressed all questions and concerns with the patient, spouse, parent. An UC visit does not replace visits to your doctor. Exams and tests are preliminary studies and do not replace ongoing care. See your doctor as indicated above, return sooner to the UC or see your doctor if worse. All required follow up regarding today's visit has been discussed and reviewed. The patient verbalizes and consents to the follow up care and plan of care offered.

## 09/07/2018 - Office Visit in URGENT CARE (continued)

## Labs (continued)

Charoen, Charinda (P.A.), P.A. on 09/07/18 2019  
Magana, Jose L (M.D.), M.D. on 09/10/18 0812

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.83	<=1.10 mg/dL	—	157
GLOMERULAR FILTRATION RATE	93	mL/min/BSA	—	157

## Comment:

Estimated GFR (eGFR) is calculated by the CKD-Epi formula using serum creatinine, sex, age and race. Result is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>). This result is invalid if serum creatinine is not in steady state, if patient is receiving dialysis, or if muscle mass is significantly above or below population norm for age and gender.

## -GFR Ranges-

GFR >89 Normal (or CKD1\*)  
60-89 Mildly reduced (CKD2\*)  
30-59 Moderately reduced (CKD3 if >3mos)  
15-29 Severely reduced (CKD4 if >3mos)  
GFR <15 Kidney failure (CKD5 if >3mos)  
\* GFR >60 is not diagnostic of CKD1 or 2 unless another marker of kidney damage is present (e.g. excessive urine albumin or urine protein on 2 occasions, or renal biopsy or imaging abnormality).

RACE	Black	—	—	157

## Questionnaire

Question	Answer
Is this medication for a workers' compensation condition?	No

Admin instructions: Best with food. No alcohol and alcohol-containing medication.

## Indications

TRICHOMONAS INFECTION [A59.9 (ICD-10-CM)]

## Patient Instructions

## Your Kaiser Permanente Care Instructions

## Body Mass Index: Care Instructions

## Your Care Instructions

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are.

- A BMI lower than 18.5 is considered underweight.
- A BMI between 18.5 and 24.9 is considered healthy.
- A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes. If your BMI is in the underweight range, you may be at increased risk for health problems such as fatigue, lower protection (immunity) against illness, muscle loss, bone loss, hair loss, and hormone problems.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health

problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- If your doctor recommends it, get more exercise. Walking is a good choice. Bit by bit, increase the amount you walk every day. Try for at least 30 minutes on most days of the week.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

**If you have a BMI higher than 25**

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

**If you have a BMI lower than 18.5**

- Your doctor may do other tests to check your risk for health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to gain or maintain weight and stay healthy, such as getting more healthy foods in your diet and doing exercises to build muscle.

**General Information**

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

**09/09/2018 - Telephone in FAMILY MEDICINE (continued)**

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

**General Information****Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

## Procedure Orders

1. MAMMO BILAT SCREENING SEQUENTIAL W OR WO COMPUTER AIDED DETECTION ANALYSIS [910601672]  
ordered by Interface, Scal\_Radiology at 10/02/18 1310

- MAMMO SCREENING BILAT SEQUENTIAL W OR WO COMPUTER AIDED DETECTION ANALYSIS  
BILATERAL DIGITAL SCREENING MAMMOGRAM SEQUENTIAL: 10/2/2018  
CLINICAL: Self Referral.

Comparison is made to exams dated: 3/24/2016 and 4/25/2014 Kaiser High Desert Radiology.

There are scattered fibroglandular elements in both breasts that could obscure a lesion on mammography.

Scattered calcifications are present in the right breast. There is an asymmetry in the right breast middle depth lateral region seen on the craniocaudal view only.

No other significant masses, calcifications, or other findings are seen in either breast.

**IMPRESSION: INCOMPLETE: NEEDS ADDITIONAL IMAGING EVALUATION**

The asymmetry in the right breast appears indeterminate. Exaggerated CC and spot compression views as well as a possible ultrasound are recommended.

**Disposition and Responsibility**

A letter with these results will be sent to the patient by the Mammography Department.

**SUMMARY:**

A diagnostic right mammogram is ordered. Perform right breast

10/02/2018 - Office Visit in FAMILY MEDICINE (continued)

## Labs (continued)

Order comments: For age &lt;21, routine screening is not recommended.

## Specimen Information

ID	Type	Source	Collected By
FONG18020640	—	—	10/02/18 1011

## GYN CYTOLOGY (PAP) [910982300] (Abnormal)

Resulted: 10/04/18 1438, Result status: Final result

Order status: Completed

Filed by: Interface, Scal\_Results\_B 10/04/18 1439

Collected by: 10/02/18 1011

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Lab Technician: 4312526-JANE ELLAINE TONGSON-IGNACIO

Acknowledged by: Raponi, Nyla J (P.A.), P.A. on 10/04/18 1443

## Components

Component	Value	Reference Range	Flag	Lab
REPORT	—	—	A †	956

Result:

Facility: HIGH DESERT MEDICAL OFFICES

Provider: NYLA J RAPONI P.A.

Case #: FONG18-20640

## FINAL CYTOLOGIC INTERPRETATION

CERVIX, LIQUID BASED PAP TEST:

- ATYPICAL SQUAMOUS CELLS OF UNDETERMINED SIGNIFICANCE
- ENDOMETRIAL CELLS PRESENT IN A WOMAN GREATER THAN OR EQUAL TO 40 YEARS OF AGE (See Comment)

## ADEQUACY:

Satisfactory for evaluation.

Endocervical/transformation zone component absent.

Case signed out by: JANE ELLAINE F TONGSON-IGNACIO M.D.

Lorraine Bartlett, CT (ASCP)

Date of diagnosis: 10/04/18

Interpretation Performed at:

SCPMG Regional Reference Laboratories, Anatomic Pathology - Sherman Way

COMMENT: Follow-up of ENDOMETRIAL CELLS 40+ per ACOG 2010 Guidelines for Management of Abnormal Cervical Cytology and Histology:

This is a negative pap smear with the presence of benign endometrial cells, endometrial stromal cells or histiocytes in a woman age 40 or older.

For asymptomatic premenopausal women, no further evaluation is recommended.

For symptomatic premenopausal women with clinical indications, ie irregular bleeding, endometrial assessment is indicated.

For postmenopausal women, endometrial assessment is recommended regardless of symptoms.

Follow up is determined based upon further evaluation by ordering provider. Please consider whether patient is still menstruating and what her risk factors are for endometrial hyperplasia/cancer and other pathologies.

If indicated, endometrial assessment includes: Colposcopy, Endocervical Curettage, Endometrial Biopsy. (Transvaginal Ultrasound may be considered.)

COLLECTED: 10/2/2018

RECEIVED: 10/2/2018

## FEE CODE(S):

A. 88175 PAP, LBP GS and Rescreen-88175 x 1

A. 88141 PAP, MD Review-88141 x 1

## EDUCATIONAL NOTE:

Cervical cytology is a screening test primarily for squamous cancers and precursors and has associated false-negative and false-positive results. Adherence to screening guidelines and follow-up of unexplained clinical signs and symptoms are recommended to minimize false negative results.

## GYN METHODOLOGY:

**10/02/2018 - Office Visit in FAMILY MEDICINE (continued)****Labs (continued)**

GYN review used the SurePath Guided Screening process plus cytotechnologist review.

SCPMG Regional Reference Laboratories, Anatomic Pathology - Sherman Way, 11668 Sherman Way, North Hollywood, CA 91605

**Patient Instructions****Thank you for your visit today!**

You may receive a brief survey from Kaiser Permanente asking you to evaluate today's clinic experience.

We hope our contact was courteous and respectful.

We hope we were able to address your concerns, and explain what we were doing during the visit.

We hope we were able to explain the problems using words that were easy for you to understand.

Our goal is to address all your concerns and spend enough time answering your questions.

Our sincere effort is to provide quality of service to all of our patients.

We hope our service has been a 10/10. If we can be of any further assistance please let us know.

A. Davis LVN

10/02/2018 - Office Visit in FAMILY MEDICINE (continued)

Patient Instructions (continued)

Please log onto [www.kp.org](http://www.kp.org) to register on our website. You will be able to view results, make appointments, e-mail your physician, and request a prescription refill.

If I have placed orders for medication(s) for you, here is some useful information. Prescriptions can be filled at any Fontana Kaiser pharmacy. You MUST check in with the pharmacist for your order to start to be filled. They WILL NOT fill your prescription unless you do so.

I hope that I have addressed all your questions and concerns. If not, or you have additional questions or require further explanation, then please contact me. I can be contacted via e-mail through the website 'www.kp.org', or I can also be contacted by calling 1-888-750-0036. Please leave a message and I or my nurse will call you back. If you have not already signed up for our website, I strongly encourage you to do so.

**Nurse Treatment Hours**  
**Monday Thru Friday**  
**8:30 am to 12 pm Or 1:30 pm to 4:30 pm**  
**No appointment necessary.**

#### Kaiser Permanente Notification System (KPNS) Test Results

Certain test results are available to you automatically via KPNS; those laboratory tests are listed below. Many messages are available in both English and Spanish.

You may call KPNS toll free 24 hours a day at **1-888-4KP-TEST (1-888-457-8378)** and follow the voice prompts which instruct you to enter your medical record number and your six digit date of birth followed by the # key (for example June, 08, 1957 would be entered as 060857#).

**Once Posted Your Test Results and Messages will be Available on KPNS for 21 Days.** Test results are confidential. Only someone who knows your Medical Record number and birth date can access your results. To ensure privacy and security, always keep your Medical Record number private.

## General Information

### Protect yourself from the flu. Get vaccinated.

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

**10/02/2018 - Office Visit in FAMILY MEDICINE (continued)**

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

Sherry Chowdhuary  
15428 Morada Rd  
Victorville CA 92394-1937

Dear Ms. Sherry Chowdhuary,

Your most recent Pap Smear showed some minor changes called ASCUS (Atypical Squamous Cells of Undetermined Significance). Your HPV (human papilloma virus) test result is negative. Your next pap and HPV test is due in three years.

This means that the minor changes on your pap smear are unlikely to be of any significance to you. These findings are usually caused by some inflammation or other minor changes in the cervix. There is no treatment at this time. If you have any questions regarding your test results, please contact the call center at 1-888-750-0036 and leave a message for your provider

To schedule your appointment, please call the Pap Registry Office at 909-427-4382 or 909-427-4358 four (4) weeks prior to the month in which you are due.

Thank you for allowing us to assist in maintaining your good health and well being.

Sincerely,

Pap Registry Office  
OB/GYN Department  
Kaiser Permanente Fontana

## Reason for Visit

## Visit Diagnosis

- ABNL MAMMOGRAPHY [R92.8]

## Clinical Notes

## Procedures

Filed on 10/18/2018 0738

## Procedure Orders

1. US RIGHT BREAST COMPLETE DX, SEQUENTIAL [912318510] ordered by Magana, Jose L (M.D.), M.D. at 10/05/18 1541

- MAMMO DX RIGHT SEQUENTIAL W OR WO COMPUTER AIDED DETECTION  
UNILATERAL RIGHT DIGITAL DIAGNOSTIC MAMMOGRAM SEQUENTIAL: 10/17/2018  
CLINICAL: Reason: Incomplete: Needs Additional Imaging Evaluation The  
Asymmetry In The Right Breast Appears Indeterminate. Exaggerated Cc  
And  
Spot Compre...See Ris For More Info.

Comparison is made to exams dated: 12/15/2008, 8/16/2010, 4/25/2014,  
3/24/2016 and 10/2/2018 Kaiser High Desert Radiology.  
There are scattered fibroglandular elements in the right breast that  
could obscure a lesion on mammography.  
Scattered calcifications are present in the right breast. There is an  
asymmetry in the right breast middle depth lateral region seen on the  
craniocaudal view only. This is not significantly changed when  
comapred  
to mammogram 4/25/2014. There is no correlative finding under  
ultrasound.  
No other significant masses or calcifications are seen in the breast.

## BENIGN

The asymmetry in the right breast is consistent with fibroglandular  
tissue and appears benign.  
There is no mammographic evidence of malignancy.

There are scattered fibroglandular elements in the right breast that  
could obscure a lesion on mammography.

Scattered calcifications are present in the right breast. There is an  
asymmetry in the right breast middle depth lateral region seen on the  
craniocaudal view only. This is not significantly changed when  
compared  
to mammogram 4/25/2014. There is no correlative finding under  
ultrasound.

No other significant masses or calcifications are seen in the breast.

**BENIGN**

The asymmetry in the right breast is consistent with fibroglandular  
tissue and appears benign.

There is no mammographic evidence of malignancy.

## General Information

## Protect yourself from the flu. Get vaccinated.

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Victorville CA 92394-1937

Dear Sherry,

At Kaiser Permanente, your health and well-being is our first priority. Your primary care doctor recommends that you complete the following health screening:

**Colorectal Screening** - Colon cancer is the third most commonly diagnosed cancer in the United States. We strongly recommend a FIT kit for everyone 50 and older every year.

- If you already have a kit at home please complete it and mail it back as directed or drop it off at the nearest Kaiser Lab.
- If you do not have a kit at home please call **909-609-3900**, and leave your name and medical record number and one will be mailed to you.

If you have any questions regarding this letter you can reach us directly at **909-609-3900**. Your health is important to us ... Please don't delay.

Sincerely,  
Your Complete Care Team  
On behalf of Magana, Jose L (M.D.)

## General Information

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

**10/29/2018 - Telephone in FAMILY MEDICINE 1 (continued)**

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

Estimated body mass index is 36.95 kg/m<sup>2</sup> as calculated from the following:

Height as of 10/2/18: 5' 1" (1.549 m).

Weight as of 10/2/18: 195 lb 8.8 oz (88.7 kg).

The goals of diabetes therapy that have shown to reduce small and large blood vessel complications:

- Pre-meal blood glucose levels of 80 - 120, 2 hr after meals under 160
- HgbA1c less than 7 %
- Blood pressure levels less than 140/90
- Statin daily to protect from and prevent heart attack and stroke.

Yearly retinal examinations are required.

Examine own feet daily. Report problems such as callus or wounds immediately.

Increase physical activity such as brisk walking or any aerobic exercise with a goal of walking 10,000 steps a day or 30 minutes 5 days per week.

Wear a medic alert bracelet or necklace

Take an aspirin daily

Treat hypoglycemia symptoms with 15 grams of carbohydrates such as 3 - 4 glucose tablets, 1/2 cup of juice or hard candy (jolly ranchers, life savers, peppermints). Then recheck your blood sugar 15 minutes later.

Recommend dental visits every 6 months to avoid periodontal disease.

Victorville CA 92394-1937

Dear Ms. Chowdhuary,

Our records show that your physician has ordered lab tests that you have not yet done. Please go to a Kaiser lab for a fasting blood test at your convenience. Do not eat or drink for 12 hours prior to the lab tests. (If you are taking diabetes medication, go to the laboratory as early as possible, then eat and take your usual morning diabetes pills and/or insulin as soon as possible). You may take your medications with water. The lab test orders will be waiting for you in the lab.

Sherry Chowdhuary  
15428 Morada Rd  
Victorville CA 92394-1937

Dear Sherry,

At Kaiser Permanente, your health and well-being is our first priority. Your primary care doctor recommends that you complete the following health screening:

**Colorectal Screening** - Colon cancer is the third most commonly diagnosed cancer in the United States. We strongly recommend a FIT kit for everyone 50 and older every year.

- If you already have a kit at home please complete it and mail it back as directed or drop it off at the nearest Kaiser Lab.
- If you do not have a kit at home please call **909-609-3900**, and leave your name and medical record number and one will be mailed to you.

If you have any questions regarding this letter you can reach us directly at **909-609-3900**. Your health is important to us ... Please don't delay.

Sincerely,  
Your Complete Care Team  
On behalf of Magana, Jose L (M.D.)

[www.kp.org](http://www.kp.org)**General Information****Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

## General Information

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

**Wellness Coaching by Phone** continues providing free, personalized service to assist members in reaching their lifestyle and wellness goals and to improve their health. Coaching focuses on five lifestyle behaviors that impact risk for and management of chronic conditions, and supports members who want to:

- Quit tobacco
- Get active
- Eat healthy
- Manage weight
- Reduce stress

Trained to help members who are thinking about or are already motivated and ready to make a behavior change. Wellness coaches partner with a member to focus on healthy habits, create a customized plan, and schedule convenient telephone sessions.

No referral is needed to access wellness coaching. Members can call the new phone number, (866) 862-4295, for an appointment. Wellness Coaching by Phone is available Monday through Friday, 6:00 AM - 7:00 PM (Pacific Standard Time).

## Your Kaiser Permanente Care Instructions

### Body Mass Index: After Your Visit

#### Your Care Instructions

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese. If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes. BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

How can you care for yourself at home?

Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.

---

**03/27/2019 - Office Visit in FAMILY MEDICINE (continued)**

---

**Patient Instructions (continued)**

---

Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.

Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.

Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

If you have a BMI higher than 25

Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.

Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

**Your Kaiser Permanente Care Instructions****Bacterial Vaginosis: Care Instructions****Your Care Instructions**

Bacterial vaginosis is a type of vaginal infection. It is caused by excess growth of certain bacteria that are normally found in the vagina. Symptoms can include itching, swelling, pain when you urinate or have sex, and a gray or yellow discharge with a "fishy" odor. It is not considered an infection that is spread through sexual contact.

Although symptoms can be annoying and uncomfortable, bacterial vaginosis does not usually cause other health problems. However, if you have it while you are pregnant, it can cause complications.

While the infection may go away on its own, most doctors use antibiotics to treat it. You may have been prescribed pills or vaginal cream. With treatment, bacterial vaginosis usually clears up in 5 to 7 days.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

- Take your antibiotics as directed. Do not stop taking them just because you feel better. You need to take the full course of antibiotics.
- Do not eat or drink anything that contains alcohol if you are taking metronidazole (Flagyl).
- Keep using your medicine if you start your period. Use pads instead of tampons while using a vaginal cream or suppository. Tampons can absorb the medicine.
- Wear loose cotton clothing. Do not wear nylon and other materials that hold body heat and moisture close to the skin.
- Do not scratch. Relieve itching with a cold pack or a cool bath.
- Do not wash your vaginal area more than once a day. Use plain water or a mild, unscented soap. Do not douche.

**When should you call for help?**

Watch closely for changes in your health, and be sure to contact your doctor if:

- You have unexpected vaginal bleeding.
- You have a fever.
- You have new or increased pain in your vagina or pelvis.
- You are not getting better after 1 week.

**03/27/2019 - Office Visit in FAMILY MEDICINE (continued)**

**Patient Instructions (continued)**

- Your symptoms return after you finish the course of your medicine.

### Your Kaiser Permanente Care Instructions

#### Body Mass Index: After Your Visit

##### Your Care Instructions

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are. A BMI between 18.5 and 24.9 is considered healthy. A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

#### How can you care for yourself at home?

Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.

Get at least 30 minutes of exercise 4 to 5 days a week or more. Brisk walking is a good choice. You also may want to do other activities, such as running, swimming, cycling, or playing tennis or team sports.

Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.

Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

#### If you have a BMI higher than 25

Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.

**03/27/2019 - Office Visit in FAMILY MEDICINE (continued)**

Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

## General Information

### Protect yourself from the flu. Get vaccinated.

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

## General Information

## Protect yourself from the flu. Get vaccinated.

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

**03/27/2019 - Telephone in FAMILY MEDICINE (continued)**

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Dear Sherry,

Our records indicate that you are due for a **non-fasting lab test**. Please stop by your nearest Kaiser Permanente Laboratory as soon as possible. The following lab test has been ordered:

Test Name	About the test	How often
<b>A1C</b>	This test is done to check how well your diabetes has been controlled over the past 2 to 3 months. Your doctor can use this information to adjust your medicine and diabetes treatment, if needed.	2 times a year or as needed

For any questions, please call us directly at 909-609-3900.

Sincerely,

Your Complete Care Team

Sherry Chowdhuary  
15428 Morada Rd  
Victorville CA 92394-1937

Dear Sherry,

We are sending you this Letter to inform you that you are due for a diabetic photo and you have been scheduled. Your eyes will be dilated. You will **NOT** need to bring a driver.

**Future Appointments**

Date	Time	Provider	Department	Center
8/1/2019	10:30 AM	Evans, Diane C	HDFAM1	HDU

Your appointment is located at the **Kaiser High Desert Medical Office**.

**CHECK IN ON THE FIRST FLOOR, MEDICAL OFFICES 1**

If this appointment time doesn't work for you, please call **(888) 750-0036** to reschedule.

Thank you for making this part of your diabetic care an important priority. Early treatment of any irregularities noted in the recommended screening tests can prevent or reduce many diabetes related complications. In fact, early detection and treatment are the key to the successful management of this disease.

**PLEASE REMEMBER THAT:**

- Yearly retinal eye exams for diabetics are strongly advised to detect early eye disease.
- Good blood sugar control helps to prevent eye problems related to diabetes.
- Annual flu shots are recommended for all diabetics.
- Check your feet daily to prevent infections.

There is **NO** co-payment for your **DIABETIC PHOTO** with Evans, Diane.

Your Complete Care Team  
On behalf of Magana, Jose L (M.D.)  
14011 Park Avenue

## CREATININE [1029571607]

Resulted: 09/28/19 0541, Result status: Final result

Order status: Completed

Filed by: Interface, Scal\_Lab\_Cerner 09/28/19 0541

Collected by: X607418 09/27/19 1204

Resulting lab: SCPMG REGIONAL REFERENCE  
LABORATORIES, CLINICAL PATHOLOGY - CHINO HILLS

Narrative:

RMS ACCN: 668659118

Acknowledged by: Magana, Jose L (M.D.), M.D. on 09/28/19 1455

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.89	<=1.10 mg/dL	—	SCPMG
GLOMERULAR FILTRATION RATE	85	mL/min/BSA	—	SCPMG

Comment:

Estimated GFR (eGFR) is calculated by the CKD-Epi formula using serum creatinine, sex, age and race. Result is normalized to a standard body surface area (BSA, 1.73m<sup>2</sup>). This result is invalid if serum creatinine is not in steady state, if patient is receiving dialysis, or if muscle mass is significantly above or below population norm for age and gender.

-GFR Ranges-

GFR &gt;89 Normal (or CKD1\*)

60-89 Mildly reduced (CKD2\*)

30-59 Moderately reduced (CKD3 if &gt;3mos)

15-29 Severely reduced (CKD4 if &gt;3mos)

GFR &lt;15 Kidney failure (CKD5 if &gt;3mos)

\* GFR &gt;60 is not diagnostic of CKD1 or 2

08/14/2019 - Orders Only in COMPLETE CARE (continued)

## Labs (continued)

unless another marker of kidney damage is present  
(e.g. excessive urine albumin or urine protein  
on 2 occasions, or renal biopsy or imaging abnormality).

**General Information**

**SKIP THE TRIP. Have our pharmacy come to you!**  
 New and refill prescriptions mailed to your home.

09/27/2019 - Call Center Telephone Encounter in FAMILY MEDICINE (continued)

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to kp.org/Rxrefill**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to KP.ORG/REGISTERNOW to get started.**

**Protect yourself from the flu. Get vaccinated.**

**09/27/2019 - Call Center Telephone Encounter in FAMILY MEDICINE (continued)**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

Letter body:

9/30/2019

Sherry Chowdhuary  
15428 Morada Rd  
Victorville CA 92394-1937

Dear Sherry Chowdhuary,

At Kaiser Permanente, we value the health of our members and we strive to better your well-being. We are outreaching to you regarding your last Hemoglobin A1C HGBA1C 12.7 09/27/2019.

Dr. Magana, Jose L (M.D.) has referred you to work with a Diabetes Case Manager. We understand that living with a chronic illness can be difficult at times and our team is here to help you with your treatment plan.

Please call at **909-609-3140** so we can schedule a follow up Telephone Appointment with your Diabetes Case Manager.

If you have a blood sugar meter (Verio Flex), please upload results to your electronic device for review.

In addition, here are some quick tips on how to manage your blood sugars.

1. Take your medications as prescribed
2. Check your blood sugar readings every day.
3. Food portion control and avoiding sweets are very important.
4. Stay active. Try to do at least 30 minutes of exercise, 5 days a week.

We look forward to speaking with you soon. Be well and THRIVE!

Sharon E Smith, LVN/PMSC on behalf of Magana, Jose L (M.D.)

**General Information**

**SKIP THE TRIP. Have our pharmacy come to you!**  
 New and refill prescriptions mailed to your home.

10/28/2019 - Telephone in EPRP DMC KPHC DEFAULT (continued)

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**Hours**  
 Open 7 days a week  
 from 8 a.m. to 8 p.m.

**Protect yourself from the flu. Get vaccinated.**

**10/28/2019 - Telephone in EPRP DMC KPHC DEFAULT (continued)**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

10/31/2019 12:35 PM Sherry Chowdhuary is a 55 year old female who attended the Living Well with Diabetes workshop Achieving Your Target Blood Sugar.

The objectives of the group were to discuss the importance of regularly checking blood sugar, recognize when to check blood sugar, understand what affects blood sugar, explain how to treat low and high blood sugar, and describe how to check blood sugar. Participants created action plans for the upcoming week. An active break in this session provided an opportunity for members to be physically active, encouraging blood sugar control.

**General Information****SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to kp.org/Rxrefill**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Order comments: This order indicates that this patient has been referred to the Diabetes Care/Case Management Program at the Fontana/Ontario Medical Centers. This authorizes the approved Registered Nurses(RN) in this program to provide the following interventions: 1. Provide assessment of member's self care skills, and provide education on lifestyle modification for diabetes mellitus. 2. Utilize the Medical Center's approved standardized RN protocols for diabetes mellitus oral medications, insulin and lipid-lowering medications as appropriate to initiate, titrate, or discontinue medication therapy. 3. Advise the member on adverse effects and assess for medication adherence, to include recommending or re-ordering medications when indicated by member non-adherence.

**General Information**

11/01/2019 - Telephone in POPULATION CARE MANAGEMENT PRV (continued)

**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering online.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**Hours**

Open 7 days a week  
 from 8 a.m. to 8 p.m.

**11/01/2019 - Telephone in POPULATION CARE MANAGEMENT PRV (continued)**

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

AFTER VISIT SUMMARY

Sherry Chowdhuary MRN: 000007877387

2/7/2020 FAMILY MEDICINE

Today's Visit

You saw KAREN E TODD RN, R.N. on Friday February 7, 2020. The following issues were addressed:

- DIABETES TYPE 2

What's Next

Office Visit with JOSE L MAGANA MD, M.D.  
Tuesday February 25 2:10 PM

FAMILY MEDICINE  
14011 PARK AVE  
VICTORVILLE CA 92392-2413  
833-574-2273

Medications

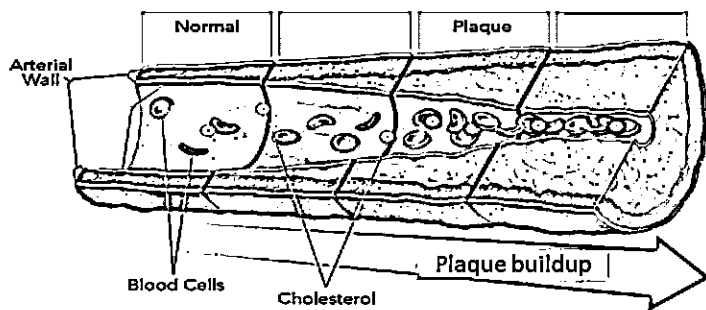

Visit Medication List

Patient reported, restarted, and new medications relevant to this visit. This may not reflect all medications the patient is taking.

	Dosage
metFORMIN (GLUCOPHAGE XR) 500 mg Oral 24hr SR Tab (Taking)	Take 2 tablets by mouth daily with evening meal

Additional Information

Statins reduce heart attacks and strokes by reducing plaque and cholesterol

## 02/07/2020 - Telephone in FAMILY MEDICINE (continued)

**Additional Information (continued)**

Atherosclerosis is the buildup of cholesterol and other fats in the lining of the arteries. This buildup is called plaque. Plaque increases as we age. It increases more if you have high cholesterol or high blood pressure. Over time, plaques can break apart and cause heart attacks and strokes. Healthy food choices and regular physical activity help reduce plaque. Statins reduce plaque and cholesterol, and reduce heart attacks and strokes. Following your statin prescription correctly will help you live a longer, healthier life.

**New Orders**

Normal Orders This Visit

HEMOGLOBIN A1C, DIABETIC MONITORING [B3036 CPT(R)]

## Common Medication Direction Abbreviations

PO = Orally, QD = Once/day, BID = Twice/day, TID = 3x/day, QID = 4x/day, PRN = as needed  
QHS = Every night at bedtime, AC = Before meals, PC = After meals, c = With, s = Without

**General Information****SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.

## 02/07/2020 - Telephone in FAMILY MEDICINE (continued)

- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill).** After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**For questions, call member services at**

[800-464-4000](tel:8004644000) or TTY 711  
[800-788-0616](tel:8007880616) (Spanish)  
[800-757-7585](tel:8007577585) (Chinese dialects)

**Hours**

Open 7 days a week  
 24 hours a day  
 Closed holidays

**Medicare members**

[800-443-0815](tel:8004430815) or TTY 711

**Hours**

Open 7 days a week  
 from 8 a.m. to 8 p.m.

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

**02/25/2020 - Office Visit in FAMILY MEDICINE (continued)**

Visit Medication List Patient reported,  
restarted, and new medications relevant to this visit. This may not reflect all medications  
the patient is taking. (continued)

	Dosage
Losartan (COZAAR) 50 mg Oral Tab (Taking)	Take 1 tablet by mouth daily for hypertension
Atorvastatin (LIPITOR) 40 mg Oral Tab (Taking)	Take 1 tablet orally daily at bedtime to help lower cholesterol and help keep arteries open
ASPIRIN 81 MG ORAL TBEC DR TAB (Taking)	None Entered

**Additional Information**

Statins reduce heart attacks and strokes by reducing plaque and cholesterol

Atherosclerosis is the buildup of cholesterol and other fats in the lining of the arteries. This buildup is called plaque. Plaque increases as we age. It increases more if you have high cholesterol or high blood pressure. Over time, plaques can break apart and cause heart attacks and strokes. Healthy food choices and regular physical activity help reduce plaque. Statins reduce plaque and cholesterol, and reduce heart attacks and strokes. Following your statin prescription correctly will help you live a longer, healthier life.

**New Orders**

- Normal Orders This Visit

## General Information

**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to kp.org/Rxrefill**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
 Not registered yet? Go to KP.ORG/REGISTERNOW to get started.**

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Victorville CA 92394-1937

Dear Sherry Chowdhuary,

You were recently referred to the Department of Physical Medicine.

At your earliest convenience, please contact the Physical Medicine Call Center between the hours of 7:00 AM to 7:00 PM, Monday through Friday at 1-866-454-3485 to schedule your appointment. Your referral will be held for 14 days, after which it will be returned to the referring provider.

If you have already scheduled your appointment, please disregard this letter.

Thank you,

Kaiser Permanente – Southern California Permanente Medical Group  
Fontana Medical Center  
Department of Physical Medicine

\*NO PHYSICAL EXAM WAS DONE AS THIS IS A TELEPHONE VISIT.

## Diagnosis:

1. RIGHT CARPAL TUNNEL SYNDROME
2. LEFT CARPAL TUNNEL SYNDROME

## IMPRESSION:

56 year old female with a history of a couple of years of bilateral hand numbness/pain/swelling. Possible CTS, but likely other issues (arthritis, tendonitis). Referred for NCS/EMG. Has not had braces or home exercise program in the past.

03/23/2020 - Telephone Appointment Visit in PHYSICAL MEDICINE (continued)

Clinical Notes (group 2 of 2) (continued)

Treatment is complicated by chronicity of symptoms.

## PLAN:

- will send home exercise program for CTS in the mail
  - braces ordered for bilateral wrists to wear at night
  - Followup in 8 weeks for NCS/EMG
- The plan was discussed with the patient and she reports full understanding.

Time spent with patient or guardian over the phone was 13 minutes.

**Additional Information**

Statins reduce heart attacks and strokes by reducing plaque and cholesterol

Atherosclerosis is the buildup of cholesterol and other fats in the lining of the arteries. This buildup is called plaque. Plaque increases as we age. It increases more if you have high cholesterol or high blood pressure. Over time, plaques can break apart and cause heart attacks and strokes. Healthy food choices and regular physical activity help reduce plaque. Statins reduce plaque and cholesterol, and reduce heart attacks and strokes. Following your statin prescription correctly will help you live a longer, healthier life.

## General Information

**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

## When using the mail order option for obtaining prescriptions:

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

## 4 ways to receive prescriptions by mail:

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to kp.org/Rxrefill**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**03/23/2020 - Telephone Appointment Visit in PHYSICAL MEDICINE (continued)**

**Hours**

Open 7 days a week  
from 8 a.m. to 8 p.m.

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

Additional Information

Statins reduce heart attacks and strokes by reducing plaque and cholesterol

Atherosclerosis is the buildup of cholesterol and other fats in the lining of the arteries. This buildup is called plaque. Plaque increases as we age. It increases more if you have high cholesterol or high blood pressure. Over time, plaques can break apart and cause heart attacks and strokes. Healthy food choices and regular physical activity help reduce plaque. Statins reduce plaque and cholesterol, and reduce heart attacks and strokes. Following your statin prescription correctly will help you live a longer, healthier life.

## General Information

**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to kp.org/Rxrefill**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
 Not registered yet? Go to KP.ORG/REGISTERNOW to get started.**

Patient reported, restarted, and new medications relevant to this visit.  
This may not reflect all medications the patient is taking.

	Dosage
Methocarbamol (ROBAXIN) 500 mg Oral Tab (Taking)	1 TAB PO Q6-8H PRN MUSCLE SPASMS
DULoxetine (CYMBALTA) 20 mg Oral CPDR SR Cap (Taking)	1 CAP PO DAILY

## Additional Information

Statins reduce heart attacks and strokes by reducing plaque and cholesterol

Additional Information (continued)

Atherosclerosis is the buildup of cholesterol and other fats in the lining of the arteries. This buildup is called plaque. Plaque increases as we age. It increases more if you have high cholesterol or high blood pressure. Over time, plaques can break apart and cause heart attacks and strokes. Healthy food choices and regular physical activity help reduce plaque. Statins reduce plaque and cholesterol, and reduce heart attacks and strokes. Following your statin prescription correctly will help you live a longer, healthier life.

Common Medication Direction Abbreviations

PO = Orally, QD = Once/day, BID = Twice/day, TID = 3x/day, QID = 4x/day, PRN = as needed  
 QHS = Every night at bedtime, AC = Before meals, PC = After meals, c = With, s = Without

General Information

**SKIP THE TRIP. Have our pharmacy come to you!**  
 New and refill prescriptions mailed to your home.

When using the mail order option for obtaining prescriptions:

- You must be able to wait 7 days before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a credit card on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.

## 04/14/2020 - Telephone Appointment Visit in FAMILY MEDICINE (continued)

- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**For questions, call member services at**

[800-464-4000](tel:8004644000) or TTY [711](tel:711)  
[800-788-0616](tel:8007880616) (Spanish)  
[800-757-7585](tel:8007577585) (Chinese dialects)

**Hours**

Open 7 days a week  
 24 hours a day  
 Closed holidays

**Medicare members**

[800-443-0815](tel:8004430815) or TTY [711](tel:711)

**Hours**

Open 7 days a week  
 from 8 a.m. to 8 p.m.

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

**04/14/2020 - Telephone Appointment Visit in FAMILY MEDICINE (continued)**

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

Continue medications as prescribed

Encouraged life style modification

I have discussed the risks, benefits, alternative to treatments that will be rendered. The patient is competent and understands and agrees to comply with treatment plans. The patient also understands the risks of noncompliance and the consequences that may occur. The patient agrees to inform and communicate with Magana, Jose L (M.D.) any problems with the treatment plan that may occur so we can adjust the plan as needed.

The goals of diabetes therapy that have shown to reduce small and large blood vessel complications:

- a)Pre-meal blood glucose levels of 80 - 120, 2 hr after meals under 160
- b)HgbA1c less than 7 %
- c)Blood pressure levels less than 140/90
- D)Statin daily to protect from and prevent heart attack and stroke.

Yearly retinal examinations are required.

Examine own feet daily. Report problems such as callus or wounds immediately.

**04/29/2020 - Telephone Appointment Visit in POPULATION CARE MANAGEMENT PRV (continued)****Clinical Notes (continued)**

Increase physical activity such as brisk walking or any aerobic exercise with a goal of walking 10,000 steps a day or 30 minutes 5 days per week.

Wear a medic alert bracelet or necklace

Take an aspirin daily

Treat hypoglycemia symptoms with 15 grams of carbohydrates such as 3 - 4 glucose tablets, 1/2 cup of juice or hard candy (jolly ranchers, life savers, peppermints). Then recheck your blood sugar 15 minutes later.

Recommend dental visits every 6 months to avoid periodontal disease.

## LIPID PANEL [1117297081] (Abnormal)

Resulted: 05/09/20 0510, Result status: Final result

Order status: Completed  
Collected by: G047078 05/08/20 1152Filed by: Interface, Scal\_Lab\_Cerner 05/09/20 0510  
Resulting lab: SCPMG REGIONAL REFERENCE  
LABORATORIES, CLINICAL PATHOLOGY - CHINO HILLSNarrative:  
RMS ACCN: 679396391  
FASTING? NO  
Acknowledged by: Magana, Jose L (M.D.), M.D. on 05/10/20 0807

## Components

Component	Value	Reference Range	Flag	Lab
CHOLESTEROL	167	<=199 mg/dL	—	SCPMG
HDL	41	>=40 mg/dL	—	SCPMG
LDL	110	<=99 mg/dL	H <sup>^</sup>	SCPMG

Comment: See LabNet for more information.

TRIGLYCERIDE, NONFASTING 160 <=149 mg/dL H<sup>^</sup> SCPMG

Comment:

Nonfasting triglycerides (TG) are affected by both recent meals and patient metabolism. No reference range is established. However, nonfasting triglycerides &gt;170 mg/dL are significantly elevated, and measurement of fasting triglycerides may be warranted.

Note that if nonfasting TG are sufficiently high, then direct LDL (if TG&gt;1300 mg/dL) or HDL (if TG&gt;2000 mg/dL) measurements may not be valid.

CHOLESTEROL, NON-HDL 126 mg/dL — SCPMG

Comment: NonHDL targets are 30 mg/dL higher than LDL targets.

Resulted: 05/12/20 0841, Result status: Final result

Order status: Completed

Filed by: Interface, Scal\_Lab\_Cerner 05/12/20 0841

Collected by: G047078 05/08/20 1152

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 679396388

Acknowledged by: Magana, Jose L (M.D.), M.D. on 05/12/20 0847

**Components**

Component	Value	Reference Range	Flag	Lab
VITAMIN D, 25-HYDROXY, D3	17	ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	ng/mL	—	956
25-HYDROXYVITAMIN D	17	30 - 100 ng/mL	L▼	956

Comment:

There is general consensus (Endocrine Society, Natl Osteoporosis FDN, K\_DOQI) that 25-OH Vitamin D measurements > 30 ng/mL are desirable. However, most Americans are deficient by this standard (NHanes III).

Levels <10 ng/mL are consistent with a diagnosis of Rickets/Osteomalacia.

Infants normally produce Vitamin D metabolites that falsely elevate 25-OH Vitamin D measurements. Please order D,25-Hydroxy, Neonatal [82306D] for these patients.

This test was developed and its performance characteristics determined by each applicable laboratory in the Southern California Permanente Medical Group Laboratory System where the test is performed. It has not been cleared or approved by the FDA. Each applicable laboratory is regulated under CLIA as qualified to perform high-complexity testing. This test is used for clinical purposes. It should not be regarded as investigational or for research.

## General Information

### SKIP THE TRIP. Have our pharmacy come to you!

New and refill prescriptions mailed to your home.

#### When using the mail order option for obtaining prescriptions:

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

#### 4 ways to receive prescriptions by mail:

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

#### Hours

Open 7 days a week  
from 8 a.m. to 8 p.m.

**05/05/2020 - Telephone Appointment Visit - Allied Health/Nurse Visit in POPULATION CARE MANAGEMENT  
(continued)**

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

Dear Ms. Chowdhuary,

Please make a telephone appointment to discuss your test results. There are some abnormalities we need to talk about, nothing urgent. Please keep in mind telephone appointments are brief visits. If you have further concerns, please book an office visit.

Sincerely,

JOSE L MAGANA MD

06/10/2020 - Telephone Appointment Visit - Allied Health/Nurse Visit in POPULATION CARE MANAGEMENT  
(continued)**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

## 07/07/2020 - Telephone Appointment Visit in FAMILY MEDICINE (continued)

New and refill prescriptions mailed to your home.

### When using the mail order option for obtaining prescriptions:

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

### 4 ways to receive prescriptions by mail:

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**08/18/2020 - Telephone Appointment Visit - Allied Health/Nurse Visit in POPULATION CARE MANAGEMENT  
PRV (continued)**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.

## Clinical Notes (continued)

**CHIEF COMPLAINT:** No blood sugar numbers to report by Sherry Chowdhuary.

Per patient, "I tested three days ago and it was 180."

PATIENT INFORMED OF HER CURRENT A1C AND THAT IT HAS INCREASED.

PATIENT ENCOURAGED TO START CONSISTENTLY TESTING HER BLOOD.

**Medications Review:**

PATIENT STATES **SHE STOPPED TAKING GLIPIZIDE 2.5 MG SR** BECAUSE, "The Glipizide pill caused me to have dizziness and a headache on the right side of my head. I never had that happen before. Every since I stopped the Glipizide the symptoms went away. I went back to taking Metformin 500 mg XR yesterday. I am taking one pill with breakfast and dinner. So far no diarrhea. The diarrhea that I was having wasn't like liquid, it was more soft."

**PATIENT WAS ASKED ABOUT STARTING INSULIN**, "No way. I am not going to take insulin, I would rather die first."

**Adherence to statin therapy verified: NO STATIN**

LDL CALC 94 09/07/2016  
LDL 110 (H) 05/08/2020

**KPARE (ARisk): 6.2%**

**BP Review**

>140/90 for <60 years of age, DM, CKD  
>150/90 if >60 years of age with no DM or no CKD

**BP Readings from Last 3 Encounters:**

02/25/20 118/68

**General Information****SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

**10/01/2020 - Telephone Appointment Visit - Allied Health/Nurse Visit in POPULATION CARE MANAGEMENT  
PRV (continued)**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**For questions, call member services at**

[800-464-4000](tel:8004644000) or TTY [711](tel:711)  
[800-788-0616](tel:8007880616) (Spanish)  
[800-757-7585](tel:8007577585) (Chinese dialects)

**Hours**

Open 7 days a week  
 24 hours a day  
 Closed holidays

**Medicare members**

[800-443-0815](tel:8004430815) or TTY [711](tel:711)

**Hours**

Open 7 days a week  
 from 8 a.m. to 8 p.m.

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

**10/01/2020 - Telephone Appointment Visit - Allied Health/Nurse Visit in POPULATION CARE MANAGEMENT  
PRV (continued)**

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

**01/07/2021 - Ancillary Orders in FAMILY MEDICINE (continued)**

---

**Clinical Notes (continued)**

---

---

Comparison is made to exams dated: 10/17/2018 Kaiser Fontana Radiology, 10/2/2018, and 3/24/2016 Kaiser High Desert Radiology. There are scattered fibroglandular areas of density in both breasts which could obscure a lesion on mammography.

There are benign calcifications in both breasts. There also are benign post operative findings in both breasts. No significant masses, calcifications, or other findings are seen in either breast. There has been no significant interval change.

**IMPRESSION: BENIGN**

There is no mammographic evidence of malignancy. A routine screening mammogram is recommended within 2 years.

Kaiser Permanente regional guidelines recommend annual screening mammography for high risk patients and screening mammography within 2 years for normal low risk patients. Determination of risk assessment by radiology is limited and ultimately should be determined by the patient's primary care provider in collaboration with the patient.

Mammograms do not detect all breast cancer. Up to 15 percent of breast cancer can't be detected by mammography. Patients with palpable abnormalities may require further investigation.  
(01/08/2023)

**Disposition and Responsibility**

A letter with these results will be sent to the patient by the Mammography Department.

## 02/01/2021 - Telephone in PHARMACY CALL CENTER IPK (continued)

New and refill prescriptions mailed to your home.

### When using the mail order option for obtaining prescriptions:

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

### 4 ways to receive prescriptions by mail:

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**Protect yourself from the flu. Get vaccinated.**

**02/01/2021 - Telephone in PHARMACY CALL CENTER IPK (continued)**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

## Patient Instructions

## Recommendations for Healthy Eyes:

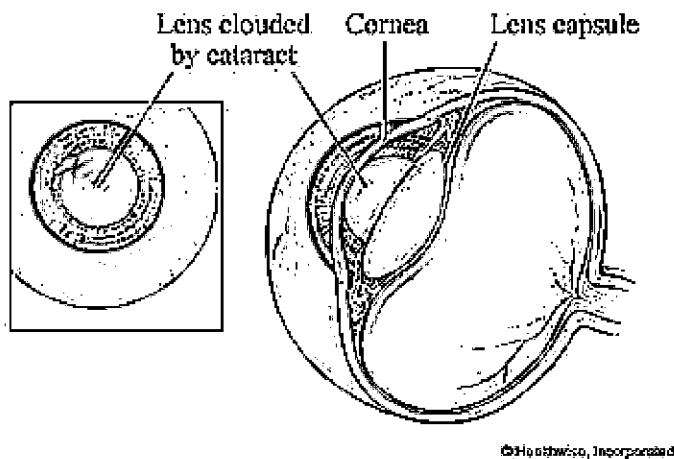

For healthy eyes it is recommend to eat a diet rich in the pigment lutein which is found in dark leafy green vegetables such as kale, spinach, and collard greens. Zeaxanthin is also helpful for eye health and found in foods such as red and orange bell peppers. Omega 3 fatty acids may help with ocular vascular health. Examples of foods high in omega 3 include certain fish like salmon, olive oil and canola oil, walnuts, and flax seeds. Wearing ocular UV sun protection in the form of sunglasses and hats is also recommended when outdoors. In addition, exercising regularly can help lower your risk of certain eye diseases. If you have high blood pressure, high cholesterol, or diabetes it is very importance to work with your doctors to control these conditions to keep your eyes healthy.

## Patient Education

## Your Kaiser Permanente Care Instructions

## Cataracts: Care Instructions

## Your Care Instructions

©Houthwaite, Incorporated

A cataract is a clouding of the lens of the eye. The lens focuses light on the retina at the back of the eye. Cataracts block some of the light and make it harder for you to see clearly. Cataracts often develop when you get older.

Most cataracts grow slowly. At first, you may just need stronger glasses to help you see better. Later, if the cataracts grow and begin to seriously impair your vision, you can have surgery to remove them.

**Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments,**

02/18/2021 - Office Visit in OPTOMETRY (continued)

## Patient Instructions (continued)

and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

- Move room lights and use window shades to avoid glare.
- Use more lighting or higher-watt bulbs.
- Use a magnifying glass for reading. Look for large-print books and other reading material to make reading more enjoyable.
- Have your eyes checked regularly, and update your glasses when needed.
- Wear sunglasses to block out harmful sunlight. Buy sunglasses that screen out ultraviolet A and B (UVA and UVB) rays.
- Do not smoke. Smoking can make cataracts worse. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.

**When should you call for help?**

Watch closely for changes in your health, and be sure to contact your doctor if:

- Your vision is getting worse.
- You have increasing trouble doing everyday tasks, like driving or reading the newspaper, because of your eyesight.

**Where can you learn more?**

If you have questions about a medical condition or this instruction, always ask your healthcare professional. Healthwise, Incorporated disclaims any warranty or liability for your use of this information.

Today your eyes were dilated with medicated eye drops in order to better examine the inside health of your eyes. It may take on average 5-6 hours for the dilated pupils (black part of central eye) to go back to normal size. During this time you might see more halos and glare, be more light sensitive, and have some mildly blurred vision in the distance. If you are not nearsighted, you may also have more trouble seeing things up close for the first few hours (If you are under the age of 60 this will be much more noticeable). You should not experience any significant pain other than light sensitivity. If you experience cloudy vision or eye pain symptoms in either eye or any nausea or severe headache, please call to return right away. It is OK to drive but you should be very cautious, careful, and practice defensive driving. Please have someone else drive you if you feel uncomfortable driving with your current vision.

## AFTER VISIT SUMMARY

## General Information

**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.**

**Hours**Open 7 days a week  
from 8 a.m. to 8 p.m.**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

CREATININE	0.84	<=1.10 mg/dL	—	SCPMG

**03/02/2021 - Office Visit in FAMILY MEDICINE (continued)**

**Labs (continued)**

GLOMERULAR FILTRATION RATE 89 >=60 mL/min/BSA — SCPMG

Comment:  
GFR estimate is invalid if on dialysis or if acute kidney injury. For newly identified GFR decline, evaluate for reversible causes and order Kidney Profile (includes GFR and ACR). Go to Aura 5-year Renal Failure for CKD risk assessment and guidance.

CKD Categorization by GFR & ACR (urine Albumin/Creatinine Ratio = microalbumin/creatinine)

GFR >3 months	ACR <30(A1)	ACR 30-<300(A2)	ACR 300+(A3)
>=90		CKD1 A2 or *	CKD1 A3
60-<90		CKD2 A2 or *	CKD2 A3
30-<59	CKD3 A1 or *	CKD3 A2	CKD3 A3
15-<30	CKD4 A1	CKD4 A2	CKD4 A3
<15	CKD5 A1	CKD5 A2	CKD5 A3

\*may label 'abnormal kidney function' or 'proteinuria' as appropriate

RACE Black — — SCPMG

## VITAMIN D, 25-HYDROXY [1243095445] (Abnormal)

Resulted: 03/28/21 1627, Result status: Final result

Order status: Completed

Filed by: Interface, Scal\_Lab\_Cerner 03/28/21 1627

Collected by: P315031 03/24/21 1326

Resulting lab: SHERMAN WAY REGIONAL LABORATORY

Narrative:

RMS ACCN: 696043017

Acknowledged by: Magana, Jose L (M.D.), M.D. on 03/29/21 1243

## Components

Component	Value	Reference Range	Flag	Lab
VITAMIN D, 25-HYDROXY, D3	16	ng/mL	—	956
VITAMIN D, 25-HYDROXY, D2	<4	ng/mL	—	956
25-HYDROXYVITAMIN D	16	30 - 100 ng/mL	L v	956

Comment:

There is general consensus (Endocrine Society, Natl Osteoporosis FDN, K\_DOQI) that 25-OH Vitamin D measurements > 30 ng/mL are desirable. However, most Americans are deficient by this standard (NHanes III).

Levels <10 ng/mL are consistent with a diagnosis of Rickets/Osteomalacia.

Infants normally produce Vitamin D metabolites that falsely elevate 25-OH Vitamin D measurements. Please order D,25-Hydroxy, Neonatal [82306D] for these patients.

This test was developed and its performance characteristics determined by each applicable laboratory in the Southern California Permanente Medical Group Laboratory System where the test is performed. It has not been cleared or approved by the FDA. Each applicable laboratory is regulated under CLIA as qualified to perform high-complexity testing. This test is used for clinical purposes. It should not be regarded as investigational or for research.

SPECIMEN VALIDITY, URINE	Normal	Normal	—	SCPMG

## Comment:

Cut-off for positive results by enzyme immunoassay (ng/mL):

Buprenorphine Screen -	5
Fentanyl Screen -	2
Heroin (6-MAM) Screen -	20
Hydrocodone/Hydromorphone Screen -	300
Methadone Screen -	150
Opiates Screen* -	300
Oxycodone Screen** -	100
Tramadol Screen -	200

Opiates Screen\* - positive from Codeine, Morphine, Hydrocodone, Hydromorphone.

Oxycodone Screen\*\* - positive from Oxycodone, Oxymorphone.

Rarely, high concentrations of drugs in either opiate or oxycodone screens cross-react to cause a false-positive result in the other category (oxycodone or opiate).

Morphine taken in high concentration can be metabolized to Hydromorphone as a minor metabolite, which can be detected by the Hydrocodone/Hydromorphone class screen.

In most

**03/02/2021 - Office Visit in FAMILY MEDICINE (continued)****Labs (continued)**

cases, heroin users will have positive results on both the 6-MAM and opiates screens.

In the case of unexpected screening results, confirmatory testing can be ordered.

Urine drug screen results are for medical purposes. Chain of custody is not monitored.

## Comment:

Cut-off for positive results by various enzyme immunoassay (ng/mL):

Amphetamine Screen -	1000
Barbiturate Screen -	200
Benzodiazepine Screen -	200
Cocaine Screen -	300
MDMA Screen -	500
Opiates Screen -	300
Oxycodone Screen -	100
PCP Screen -	25
THC Screen -	50

All positive urine toxicology screening results from Labor and Delivery patients and children under 14 years old will be confirmed by an alternative method. For other patients, only Amphetamine, MDMA (Ecstasy), and PCP results will be automatically confirmed. Confirmation may be ordered for positive barbiturates, benzodiazepines, cocaine, marijuana, and opiate results within 10 days of specimen collection.

Urine drug screen results are for medical purposes. Chain of custody is not monitored.

## General Information

**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**When using the mail order option for obtaining prescriptions:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 ways to receive prescriptions by mail:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.**  
**Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

Dear Sherry Chowdhuary,

At Kaiser Permanente, we value the health of our members and we strive to better your well-being. We are outreaching to you regarding your missed Telephone Appointment with your Diabetes Case Manager/ Nurse Practitioner.

If you have a blood sugar meter (Verio Flex), please upload results to your electronic device for review.

Dr. Magana, Jose L (M.D.) has referred you to work with a Diabetes Case Manager/ Nurse Practitioner. We understand that living with a chronic illness can be difficult at times and our team is here to help you with your treatment plan.

Please call at **909-609-3156** reschedule your Telephone Appointment with your Diabetes Case Manager/ Nurse Practitioner.

In addition, here are some quick tips on how to manage your blood sugars.

1. Take your medications as prescribed
2. Check your blood sugar readings every day.
3. Food portion control and avoiding sweets are very important.
4. Stay active. Try to do at least 30 minutes of exercise, 5 days a week.

We look forward to speaking with you soon. Be well and THRIVE!

**Complete Care Diabetes Team** (909) 609-3156

Encounter Date: 6/7/2021  
Editor: Gaines, Linda D (R.N.), R.N. (REGISTERED NURSE)

Author Type: REGISTERED NURSE  
Creation Time: 6/7/2021 3:17 PM

Utilizing two patient identifiers.

Spoke with patient regarding this issue.

Patient reports throat feels like "something stuck in it." denies difficulty breathing, no red flags. Requesting f2f with any provider. Appointment offered, accepted, scheduled and instructions given with return verbal understanding.

Expressed gratitude for assistance.

## General Information

**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**WHEN USING THE MAIL ORDER OPTION FOR OBTAINING PRESCRIPTIONS:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 WAYS TO RECEIVE PRESCRIPTIONS BY MAIL:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to kp.org/Rxrefill**. After signing into kp.org, you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.

### Protect yourself from the flu. Get vaccinated.

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

**General Information****SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**WHEN USING THE MAIL ORDER OPTION FOR OBTAINING PRESCRIPTIONS:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 WAYS TO RECEIVE PRESCRIPTIONS BY MAIL:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.

## 09/28/2021 - Office Visit in FAMILY MEDICINE (continued)

- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill).** After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

**09/28/2021 - Office Visit in FAMILY MEDICINE (continued)**

## Thrive Local

### Find help in your community

We're here to support you however we can. If you need help with essentials like housing, childcare, or food, Thrive Local Connections can help connect you to resources in your community. Call 1-800-443-6328 (TTY 711), Monday through Friday between 8 a.m. and 5 p.m.

Register at [www.kp.org](http://www.kp.org) to email your physician, renew prescriptions, request appointments, learn more about your personal health, or obtain tips for healthy living!

Save money and time! Get your refills for home delivery at [www.kp.org/refill](http://www.kp.org/refill)

## Nursing Notes:

Rodriguez, Rubicelia (L.V.N.), L.V.N. 12/1/2021 3:01 PM Addendum  
PROACTIVE CARE ACTIONS

Proactive Office Encounter Actions: Patient reports Pap Test already scheduled  
 Patient declines Pap Test today  
 Diabetic Member: Member prepared for annual monofilament exam and order staged  
 Member instructed to go to lab to have pre-ordered labs drawn  
 Flu immunization declined  
 Member given Patient Instructions on BMI/Weight Management  
 Member exercises 0 minutes a week.  
 Member instructed on KP.ORG registration process

BP 119/83 | Pulse 70 | Temp 97.7 °F (36.5 °C) (Temporal) | Resp 14 | Ht 5' 1" (1.549 m) | Wt 194 lb 14.4 oz (88.4 kg) | SpO2 97% | Breastfeeding No | BMI 36.83 kg/m<sup>2</sup>

## SUBJECTIVE:

Sherry Chowdhuary is a 58 year old female

## Chief Complaint

Patient presents with

- PAIN  
*left arm, middle of back x1 wk & around left breast x year with dizzy spells x1 month*
- DIABETIC FOOT EXAM

Left breast pain for 1 month, on and off.

## HISTORY REVIEWED:

I have reviewed the Medical/Surgical, Family and Social history as displayed in HealthConnect on the date of the encounter or the portion(s) as noted in the progress note.

## Review of Systems

Physical Exam

Vitals reviewed. Exam conducted with a chaperone present.

Cardiovascular:

Rate and Rhythm: Normal rate and regular rhythm.  
 Heart sounds: No murmur heard.

Chest:

**12/01/2021 - Office Visit in FAMILY MEDICINE (continued)****Clinical Notes (continued)****Breasts:**

Left: Normal.

**Lymphadenopathy:**

Cervical: No cervical adenopathy.

Left cervical: No superficial cervical adenopathy.

**Upper Body:**

Left upper body: No supraclavicular adenopathy.

**Neurological:**

Mental Status: She is alert and oriented to person, place, and time.

BP 119/83 | Pulse 70 | Temp 97.7 °F (36.5 °C) (Temporal) | Resp 14 | Ht 5' 1" (1.549 m) | Wt 194 lb 14.4 oz (88.4 kg) | SpO2 97% | Breastfeeding No | BMI 36.83 kg/m<sup>2</sup>

DIABETIC FOOT EXAM: "sensate to 10 gms, skin intact, pulses present"

A chaperone was present during the examination: Rubi, LVN

**ASSESSMENT:**

N64.4 LEFT MASTODYNIA

Z53.20 DECLINES CERVICAL CANCER SCREENING (PAP SMEAR)

Z28.20 DECLINES INFLUENZA VACCINATION

Z13.89 SCREENING FOR DIABETIC FOOT DISEASE, CATEGORY 0 - NORMAL DIABETIC FOOT

**Patient Education**

**Your Kaiser Permanente Care Instructions**

**Body Mass Index: Care Instructions**

**Your Care Instructions**

Underweight  Normal weight  Overweight  Obese  Extremely obese

Body mass index (BMI) can help you see if your weight is raising your risk for health problems. It uses a formula to compare how much you weigh with how tall you are.

12/01/2021 - Office Visit in FAMILY MEDICINE (continued)

**Patient Instructions (continued)**

- A BMI lower than 18.5 is considered underweight.
- A BMI between 18.5 and 24.9 is considered healthy.
- A BMI between 25 and 29.9 is considered overweight. A BMI of 30 or higher is considered obese.

If your BMI is in the normal range, it means that you have a lower risk for weight-related health problems. If your BMI is in the overweight or obese range, you may be at increased risk for weight-related health problems, such as high blood pressure, heart disease, stroke, arthritis or joint pain, and diabetes. If your BMI is in the underweight range, you may be at increased risk for health problems such as fatigue, lower protection (immunity) against illness, muscle loss, bone loss, hair loss, and hormone problems.

BMI is just one measure of your risk for weight-related health problems. You may be at higher risk for health problems if you are not active, you eat an unhealthy diet, or you drink too much alcohol or use tobacco products.

**Follow-up care is a key part of your treatment and safety.** Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.

**How can you care for yourself at home?**

- Practice healthy eating habits. This includes eating plenty of fruits, vegetables, whole grains, lean protein, and low-fat dairy.
- If your doctor recommends it, get more exercise. Walking is a good choice. Bit by bit, increase the amount you walk every day. Try for at least 30 minutes on most days of the week.
- Do not smoke. Smoking can increase your risk for health problems. If you need help quitting, talk to your doctor about stop-smoking programs and medicines. These can increase your chances of quitting for good.
- Limit alcohol to 2 drinks a day for men and 1 drink a day for women. Too much alcohol can cause health problems.

**If you have a BMI higher than 25**

- Your doctor may do other tests to check your risk for weight-related health problems. This may include measuring the distance around your waist. A waist measurement of more than 40 inches in men or 35 inches in women can increase the risk of weight-related health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to lose weight and stay healthy, such as changing your diet and getting regular exercise.

**If you have a BMI lower than 18.5**

- Your doctor may do other tests to check your risk for health problems.
- Talk with your doctor about steps you can take to stay healthy or improve your health. You may need to make lifestyle changes to gain or maintain weight and stay healthy, such as getting more healthy foods in your diet and doing exercises to build muscle.

## General Information

**SKIP THE TRIP. Have our pharmacy come to you!**

New and refill prescriptions mailed to your home.

**WHEN USING THE MAIL ORDER OPTION FOR OBTAINING PRESCRIPTIONS:**

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering on line.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

**4 WAYS TO RECEIVE PRESCRIPTIONS BY MAIL:**

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](https://kp.org/Rxrefill)**. After signing into [kp.org](https://kp.org), you will be brought to the Pharmacy Center.

## 12/01/2021 - Office Visit in FAMILY MEDICINE (continued)

- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to KP.ORG/REGISTERNOW to get started.**

**For questions, call member services at**

800-464-4000 or TTY 711  
800-788-0616 (Spanish)  
800-757-7585 (Chinese dialects)

**Hours**

Open 7 days a week  
24 hours a day  
Closed holidays

**Medicare members**

800-443-0815 or TTY 711

**Hours**

Open 7 days a week  
from 8 a.m. to 8 p.m.

**Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

**12/01/2021 - Office Visit in FAMILY MEDICINE (continued)**

Dr. Khurana,

You have placed an order for a **DIAGNOSTIC TOMOSYNTHESIS MAMMOGRAM**.

These exams are specialized and are not performed within our facility. We wanted to verify with you that the patient in fact does need a **TOMOSYNTHESIS** mammogram.

If you ordered this exam in error, please cancel this order and place the correct order.

If the order is correct, please respond to this message and we will begin the process to send the exam out to be performed.

Thank you kindly,  
Diagnostic Imaging Department  
*Cindy Gutierrez*

## General Information

### SKIP THE TRIP. Have our pharmacy come to you!

New and refill prescriptions mailed to your home.

#### WHEN USING THE MAIL ORDER OPTION FOR OBTAINING PRESCRIPTIONS:

- **You must be able to wait 7 days** before starting a new, mail-order prescription. Medications needed before 7 days should be filled at the pharmacy. Ask the pharmacist if you have questions.
- You will need to have a **credit card** on file to use the mail-order option, unless you have dual medical coverage or have MediCal health benefits. You may bring a credit card to the pharmacy to be placed on file or enter while ordering online.
- For most medications that are meant to be refilled every 30 days, filling the prescription by mail **you can obtain a 3-month supply** for just 2 months of copay!

#### 4 WAYS TO RECEIVE PRESCRIPTIONS BY MAIL:

- If **checking-in at the Pharmacy**, ask for the mail order option to avoid waiting for the prescriptions to be filled. This is available only for medications not needed within the next 7 days.
- **Go to [kp.org/Rxrefill](http://kp.org/Rxrefill)**. After signing into [kp.org](http://kp.org), you will be brought to the Pharmacy Center.
- Use the **Kaiser Permanente app** for your mobile device. Find and download the app by searching for Kaiser Permanente on the Apple Store or the Google App Store.
- **Call (866) 206-2983** and be sure to have your medical record number and the prescription number located on the medication label ready when you call.

**You must be registered on KP.ORG to order prescriptions online or through the KP app.  
Not registered yet? Go to [KP.ORG/REGISTERNOW](http://KP.ORG/REGISTERNOW) to get started.**

#### For questions, call member services at

[800-464-4000](tel:8004644000) or TTY [711](tel:711)

[800-757-7585](tel:8007577585) (Chinese dialects)

#### Hours

Open 7 days a week  
24 hours a day  
Closed holidays

#### Medicare members

[800-443-0815](tel:8004430815) or TTY [711](tel:711)

#### Hours

Open 7 days a week  
from 8 a.m. to 8 p.m.

**12/06/2021 - Telephone Appointment Visit - Allied Health/Nurse Visit in POPULATION CARE MANAGEMENT  
PRV (continued)****Protect yourself from the flu. Get vaccinated.**

The flu is a serious, contagious illness caused by influenza viruses. Anyone can get the flu. It can cause mild to severe illness. The best way to prevent the flu is by getting a flu shot each year. The CDC and Kaiser Permanente recommend everyone 6 months and older get a flu shot every year.

Flu shot clinics open in September. No appointment is necessary.

Flu shots are available at no charge to members at Kaiser Permanente medical facilities.

For information about hours, times, and locations, please visit [kp.org/flu](http://kp.org/flu) or call 1-866-70-NOFLU (1-866-706-6358).

Adults should participate in at least 30 minutes, and children at least 60 minutes, of moderate exercise (such as brisk walking) for five or more days each week, unless instructed otherwise by your provider. For more information on the health benefits of walking please refer to <http://www.everybodywalk.org>. THRIVE!

## CREATININE, SERUM [32897352]

Resulted: 03/20/06 0634, Result status: Final result

Ordering provider: Johansen, Mark Carl (D.O.) 03/19/06 2113

Order status: Completed

Filed on: 03/20/06 0634

Collected by: AXH 03/20/06 0555

Resulting lab: RIVERSIDE LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.8	0.6 - 1.1 mg/dl	—	501
GLOMERULAR FILTRATION RATE	>89-B	mL/min	—	501

## Comment:

Result is normalized to 1.73 m2 body surface area. Race used is indicated by "B" for Black race and "NB" for Non-Black race. Multiply GFR by 1.21 if person is actually Black race, but Non-Black race was used in the calculation. \* GFR Ranges \*

GFR >89 Normal GFR 60-89 Mildly reduced GFR 30-59 Moderately reduced GFR 15-29 Severely reduced GFR <15 Kidney failure This estimate of renal function assumes a steady-state and is not useful if the renal function is changing rapidly or if the patient is on dialysis. Many elderly patients have mildly and even moderately reduced GFR related to aging.

## CREATININE, SERUM [32970404]

Resulted: 03/21/06 0710, Result status: Final result

Ordering provider: Johansen, Mark Carl (D.O.) 03/20/06 2115 Order status: Completed  
 Filed on: 03/21/06 0710 Collected by: RXB 03/21/06 0610  
 Resulting lab: RIVERSIDE LABORATORY

## Components

Component	Value	Reference Range	Flag	Lab
CREATININE	0.7	0.6 - 1.1 mg/dl	—	501
GLOMERULAR FILTRATION RATE	>89-B	mL/min	—	501

## Comment:

Result is normalized to 1.73 m2 body surface area. Race used is indicated by "B" for Black race and "NB" for Non-Black race. Multiply GFR by 1.21 if person is actually Black race, but Non-Black race was used in the calculation. \* GFR Ranges \*  
 GFR >89 Normal GFR 60-89 Mildly reduced GFR 30-59 Moderately reduced GFR 15-29 Severely reduced GFR <15 Kidney failure This estimate of renal function assumes a steady-state and is not useful if the renal function is changing rapidly or if the patient is on dialysis. Many elderly patients have mildly and even moderately reduced GFR related to aging.
